LCF7

**Seventh International Conference on
Low Cycle Fatigue**

September 9 – 11, 2013
Aachen, Germany

Table of content	Page
Plenary lectures	
Nonproportional Low Cycle Fatigue for Mod.9Cr-1Mo Steel	3
M. Sakane, T. Katagi	
Practical applications of the fatigue behaviour of steels in the low cycle regime	9
H.P. Lieurade	
Introduction of the new nickel-base alloy ATI 718Plus® for critical parts	17
M. Springmann, W. Rothkegel, D. Huenert, H. Schlums	
Plastic Strain Localization and Fatigue Micro-Crack Formation	25
W. Abuzaid, H. Sehitoglu, J. Lambros, H. J. Maier	
1. Isothermal LCF	
Influence of loading conditions on the cyclic deformation behavior and phase transformation of the austenitic stainless steel AISI 347 at ambient temperature and 300 °C	33
A. Sorich, M. Smaga, D. Eifler	
Low cycle fatigue behavior of AISI 347 with varied surface morphology	39
R. Skorupski, M. Smaga, D. Eifler, P. Mayer, J. C. Aurich	
Fatigue and strength of a new grey iron alloy for brake discs	45
P. Skoglund, T. Sjögren, J. Moverare	
Fatigue of Duplex Stainless Steels in the Temperature Range of the 475°C Embrittlement	51
K. Wackermann, S. Pazhamannil, U. Krupp, H.-J. Christ	
The influence of temperature on the course of fatigue damage cumulation of P91 steel	57
S. Mroziński, R. Skocki	

Influence of strain hold time on high-temperature low cycle fatigue life of heat resistant materials.	63
T. Ogata	
Material laws of an AISi cast alloy under high temperature loading as a function of material condition	69
S. Michelfeit, A. Scholz, M. Oechsner	
Fatigue behaviour of calcium-containing AZ91 magnesium alloys	75
D. Amberger, T. Blickle, H. W. Höppel, M. Göken	
LCF loop shape in near pearlitic steels – influence of temperature	81
J. Ahlström	
Experimental Study on Uniaxial Cyclic Deformation of Rolled 5083Al Alloy Plate	87
F. Lu, G. Kang, Y. Liu, K. Shi	
Isothermal and thermo-mechanical fatigue of a CoNiCrAlY coated third generation γ-TiAl based alloy	95
M. Hoffmann, H. Biermann	
Cyclic deformation mechanisms in a TiNi shape memory alloy	101
A.L. Gloanec, M. Gerland	
Cyclic plastic response of nickel-based superalloys at room and at elevated temperatures	107
J. Polák, M. Petrenec, A. Chlupová, J. Tobiáš, R. Petráš	
Dwell effect on low cycle fatigue behaviour of cast superalloy Inconel 792-5A at 800°C	113
M. Šmíd, K. Obrtlík, J. Polák	
Effect of the surface topography generated by finish machining on the isothermal fatigue life behaviour of Inconel 718 (only Abstract)	119
A. Madariaga, J.A. Esnaola, P.J. Arrazola, E. Fernandez, I. Torca	

Influence of specimen size and grain orientation on the LCF crack initiation life of a conventionally cast Ni superalloy 121

T. Seibel, T. Beck

Low Cycle Fatigue Behaviour of the Gamma titanium aluminide alloy TNB-V2 127

A. El-Chaikh, F. Appel, H.-J. Christ

The Morlet Wavelet-based Features Extraction for Compressing Automotive Fatigue Strain Data 133

T.E. Putra, S. Abdullah, D. Schramm, M.Z. Nuawi, T. Bruckmann

2. Thermomechanical Fatigue

Creep-fatigue Damage Assessment of Casting materials in high temperature Applications 141

F. Laengler, T. Mao, A. Scholz

Isothermal and Nonisothermal Fatigue Crack Growth of MAR-M247 CC (HIP) 147

C. Schweizer, M. Schlesinger

Evaluation of time dependent thermomechanical fatigue crack growth in a nickel alloy for power plant applications 153

M. Schlesinger, C. Schweizer, Y. Brontfeyn

Thermo-Mechanical Fatigue Crack Propagation Behavior of Ni-based Single Crystal Superalloy CMSX-4 159

Y. Mukai, H. Kagawa, M. Sakaguchi, M. Okazaki

Thermo-Mechanical Fatigue Life of Solder Alloys 165

N. Hiyoshi, T. Itoh, M. Sakane

Lifetime, cyclic deformation and damage behaviour of NiCr22Co12Mo9 under TMF-loadings with various phasing of strain and temperature 171

S. Guth, A. Korinth, K.-H. Lang

Ratchetting Behaviour of Bearing Support Structures during Windmilling in Aero Engines	177
N. Govindarajan, R. Khosrow	
LCF life prediction of electron beam welded notched Parts of nickel-based superalloy	185
J. Fang, H. Yuan	
Considerations on the Predictability of Thermomechanical Fatigue Life	191
H.-J. Christ	
Thermo mechanical fatigue behaviour of a duplex stainless steel in the temperature range of 350°C to 600°C	197
R. Kolmorgen, S. Henkel, H. Biermann	
Small Fatigue Crack Propagation Behavior from Cooling Holes with Temperature Gradient in Ni-Base Superalloy Specimen	203
M. Okazaki, Y. Sakamoto, S. Rajivgandhi, M. Sekihara	
3. Superimposed LCF/HCF and TMF/HCF Loadings	
Damage Development in Cast Iron and Steel Specimens under TMF and TMF+HCF Loading	211
L. Heritier, K.-H. Lang	
Analysis of transient micromechanical deformation and thermo-mechanical fatigue damage in AISi based piston alloys under superimposed high cycle mechanical and low cycle thermal loading.	217
S. Kenningley, R. Morgenstern	
Damage and Lifetime of Novel Low and High Pressure Die Cast Aluminum Piston Alloys under Superimposed TMF / HCF Loadings (only Abstract)	223
A. Humbertjean, T. Beck	
HCF/LCF interaction in a 3D XFEM crack propagation problem (only Abstract)	225
M. Forbes , E. Wyart	

Effect of Pre-inelastic Multiaxial Loading on High Cycle Fatigue Strength	227
T. Itoh, K. Ohsuga	

4. Multiaxial Loadings

Determination of fatigue life of the aluminium alloy under complex loading and low-cycle fatigue	235
---	------------

K. Walat, T. Łagoda

Lifetime prediction of full-scale welded crane runway girders	241
--	------------

P. Rettenmeier, E. Roos

Low Cycle Fatigue Lives under Multiaxial Non-proportional Loading	247
--	------------

T. Itoh, Z. Bao

Multi-surface incremental plasticity formulation with non-linear kinematic models for non-proportional variable amplitude histories	253
--	------------

M.A. Meggiolaro, J.T.P. Castro

An integral method to predict non-proportionality factors and equivalent ranges in multiaxial histories	259
--	------------

M.A. Meggiolaro, J.T.P. Castro

5. Microstructural Aspects

Fatigue life, cyclic deformation behaviour and damage mechanisms of ultrafine-grained aluminium alloys produced by Accumulative Roll Bonding	267
---	------------

H. W. Höppel, T. Hausöl, M. Göken

Martensitic transformation and crack formation in the austenitic stainless steel X6CrNiNb18-10 under cyclic loading	273
--	------------

E. Soppa, C. Kohler, E. Roos, X. Schuler

Estimation of local cyclic plasticity based on a coupled EBSD / TEM analysis	279
---	------------

J. Bouquerel, F. Léaux, J-B. Vogt, F. Palleschi

Influence of Cr and Ni on the high-temperature low-cycle fatigue life of a ferritic ductile cast iron 285
M. Ekström, S. Jonsson

Influence of Precipitates and Texture on the Fatigue Behaviour of Mg-Alloys in Air and in Corrosive Environment (only Abstract) 291
H. Hornberger, S. Kamrani, D. Letzig, C. Fleck

6. Influence of surface, environment and protective coatings

Influence of laser cutting on the fatigue limit of two high strength steels 295
A. Mateo, G. Fargas, J. Calvo, J.J. Roa

About the Wear-Performance of Differently Structured a-C:H:W-Coatings: What is better, Gradient or Homogenous Coating? 301
A. Gies, N. Schwarzer, T. Chudoba, J. Becker

Degradation process and lifetime of Alloy 247 DS coated with MCrAlY protective coating under TMF loading 307
O. Trunova, T. Beck, L. Singheiser

Damage and behavior and life prediction of thermal barrier coatings for gas turbine components under thermal fatigue and TMF loadings 313
T.Beck, O.Trunova, R.Herzog, L.Singheiser

Influence of corrosion on fatigue properties of new creep-resistant magnesium alloy DieMag422 319
M. Klein, P. Wittke, H. Dieringa, F. Walther

7. Advanced materials and case studies

Effect of Al₂O₃ dispersed nanoparticles on the fatigue behaviour of copper 327
J.-B. Vogt, E. Charkaluk, A. Daoud, L. Zhang, J.-C. Biasci

Low-cycle fatigue behavior of a TWIP steel: Effect of mean stress and microstructure	333
C.J. Rüsing, T. Niendorf, A. Frehn, H. J. Maier	
Fatigue assessment of a work hardened planet carrier	339
A. Tomasella, V. Landersheim, R. Waterkotte, H. Kaufmann, H. Hanselka	
Influence of Mg-PSZ particle size on the low cycle fatigue behaviour of steel matrix composites	345
A. Glage, M. Maurer, C. Weigelt, J. Räthel, H. Biermann	
8. Experimental aspects and standardization	
Thermo-mechanical fatigue resistance characterization and materials ranking from heat flux controlled tests.	353
F. Szmytka, P. Michaud, L. Rémy, A. Köster	
Early detection of fatigue at elevated temperature in austenitic steel using electromagnetic ultrasound transducers	359
G. Seiler, K. Szielasko, R. Tschuncky, I. Altpeter, I. Mironenko, C. Boller, A. Sorich, M. Smaga, D. Eifler	
Low cycle fatigue behaviour of automotive parts	365
S. Bergamo, D. Hamel	
Influence of elevated temperatures on high cycle fatigue behaviour of thin sheet metals	371
B. Strohhäussl, G. Winter	
Low-cycle material properties testing with the use of microspecimens	377
D. Boronski	
Actual developments of international fatigue standardization	383
H. Klingelhöffer	

9. Fatigue damage, crack initiation and –growth	
Experimental study on the origin of crack initiation in fatigued metals	391
J. Man, M. Valtr, I. Kuběna, M. Petrevec, K. Obtrlík, J. Polák	
Early stages of LCF damage in a 316L austenitic stainless steel in relation with grains microstructure: experiments and numerical simulations	397
L. Signor, P. Villechaise, E. Lacoste, T. Ghidossi, M. Gueguen, S. Courtin	
Toward a better understanding of strain incompatibilities at grain boundaries in the analysis of fatigue crack initiation at low temperature in the Udimet 720Li superalloy (only Abstract)	403
B. Larrouy, P. Villechaise, J. Cormier, O. Berteaux	
Quantifying slip irreversibility and its effects on fatigue crack growth	405
G. J. Pataky, H. Sehitoglu, H. J. Maier	
Macroscopic and local modelling of fatigue crack growth in generalised plasticity (only Abstract)	411
V. Maurel , H. Wang , A. Koster , F. S. Gonçalves , L. Rémy	
On the tolerance to short fatigue cracks	413
J.T.P. Castro, M.A. Meggiolaro	
A model for fatigue crack growth with a variable stress. Description in terms of crack mechanics	419
V. M. Kornev	
Fatigue propagation of long cracks in metastable austenitic stainless steels	425
D.F. Martelo, A. Mateo, G. Fargas, M.D. Chapetti	
Effects of Al₂O₃ particle reinforcement and equal-channel angular pressing on fatigue crack growth of AA2017	431
L. Köhler, K. Hockauf, T. Halle, T. Lampke	

Paradigm Shift from Creep towards Fatigue Degradation Due to Flexible Thermal Loads (only Abstract)	437
P. Mutschler, D. Rieck, M. Sandér, A. Schulz, R. Wernicke	
Understanding of low cycle fatigue behaviour of ODS steels	439
I. Kubena, T. Kruml	
Microstructural strain heterogeneities during low cycle fatigue	445
A. El Bartali, N. Limodin, L. Wang, E. Charkaluk	
Effects of homogenization heat treatment on short crack nucleation during cycling in lean duplex stainless steels (only Abstract)	451
R. Strubbia, S. Hereñú, I. Alvarez-Armas	
Cyclic deformation behaviour and damage mechanisms in CuAgZr alloys (only Abstract)	457
M. Kommer, S. Schwub, J. Freudenberger, H. W. Höppel, M. Göken	
Influence of Punched Hole on Fatigue Properties of TiC-Precipitation-Strengthened Steels	459
T. Ito, T. Matsueda, N. Koga, S. Yamamoto, Y. Mine, K. Takashima, T. Tsuchiyama, T. Yokoi, H. Noguchi	
Low-cycle fatigue damage mechanism of micro size Sn-Ag-Cu solder joint (only Abstract)	465
Y. Kariya, H. Kontani	
 10. Deformation Modelling and Life Assessment	
Constitutive Modelling of cast Al alloys under high temperature fatigue (only Abstract)	473
P. Osmond, L. Rémy, L. Nazé	
Unified description of cyclic viscoplasticity of Alloy 617B in different material conditions comprising microstructural changes (only Abstract)	475
G. Maier, H. Riedel, C. Somsen	

Experimental and Numerical Analysis of the Low Cycle Fatigue Behaviour of a Web Frame Corner in Ships	477
V. Crupi, W. Fricke, N. Friedrich, E. Guglielmino, L. Musumeci, H. Paetzold	
Probabilistic analysis of LCF Crack Initiation Life of a Turbine Blade under thermomechanical loading	483
S. Schmitz, G. Rollmann, H. Gottschalk, R. Krause	
Low cycle fatigue of thermoplastic laser welds	489
D. Spancken, J. Decker, A. Büter	
Microstructural changes in a superferritic stainless steel during low cycle fatigue	495
S. Hereñú, M. G. Moscato, I. Alvarez-Armas, A. F. Armas	
Ultra Low Cycle Fatigue Evaluation in Notched Geometries	501
S. Cravero, D. Demarco, F. Klein, H. Ernst	
Fatigue life approach method for welded high-strength fine-grained steels in the LCF regime	507
B. Möller, R. Wagener, H. Kaufmann, H. Hanselka, J. Hrabowski, S. Herion, T. Ummenhofer	
Local transient boundary conditions in models of power plant components under mechanical and thermal loading	513
J. Okrajni , M. Twardawa	
Comparison of solder joint fatigue predictions based on the Darveaux's model and the cohesive zone method (only Abstract)	519
L. Benabou, Z. Sun, P.R. Dahoo	
Material modeling as the basis for life time prediction of industrial components exposed to thermo-mechanical fatigue	525
P. Raninger, W. Ecker, G. Winter, T. Antretter	
Thermo-mechanical analysis of a copper mould for continuous casting of steel	527
M. Ansoldi, G. Bazzaro, D. Benasciutti, F. De Bona, G. Luvarà, L. Moro, M. Gh. Munteanu, F. Vecchiet	

Unequivocal relationship of thermal Plastic strain on thermal fatigue lifetime at DSA temperature range for Spheroidal ductil cast iron	533
M. Hayashi, H. Mouri	
An experimental and numerical fatigue assessment of ultrafine-grained microstructures produced by severe plastic deformation under constant and variable amplitude loading.	539
A. Tomasella, O. Bauer, V. Landersheim, J. Eufinger, H. Kaufmann, H. Hanselka	
Application of continuum damage mechanics for modeling of damage evolution in sintered metals (only Abstract)	545
S. Ma, H. Yuan	
Thermomechanical fatigue design of a welded structure: application to exhaust manifold	551
A. Benoit, L. Rémy , H. Maitournam , F. Oger	
Probabilistic Thermomechanical Fatigue Criteria for Lost Foam Casting Aluminium Alloys	553
E. Charkaluk, A. Constantinescu, F. Szymyka, S. Tabibian	
Modelling of the stress-strain behaviour during thermo-mechanical fatigue processes	559
J. Okrajni, G. Junak	
Comparison and Evaluation of Damage Indicated Thermo-Mechanical Fatigue Life Prediction for Cylinder Head Application	565
P. Huter, G. Winter	
Autorenindex	573
