Preface.....	xxi
Author.....	xxv
List of Symbols	xxvii
1. Introduction to Electric Motors	1
1.1 History of Electric Motors.....	1
1.2 Motor Design Characteristics.....	2
1.2.1 Motor Torque	2
1.2.1.1 Static and Dynamic Torque.....	2
1.2.1.2 Motor Torque in Motor-Load System	4
1.2.1.3 Continuous Torque.....	6
1.2.1.4 Peak Torque	6
1.2.1.5 Stall Torque.....	7
1.2.1.6 Cogging Torque and Reduction Methods	8
1.2.1.7 Torque Ripple.....	13
1.2.2 Motor Speed.....	14
1.2.2.1 Continuous Speed	15
1.2.2.2 Peak Speed	15
1.2.2.3 Speed Ripple	15
1.2.3 Torque Density	15
1.2.4 Motor Power and Power Factor.....	16
1.2.5 Torque–Speed Characteristics.....	17
1.2.6 Mechanical Resonance and Resonant Frequency	20
1.2.7 Load-to-Motor Inertia Ratio	25
1.2.8 Duty Cycle	26
1.2.9 Motor Efficiency	29
1.2.9.1 Definition of Motor Efficiency	29
1.2.9.2 IEC Standards on Efficiency Classes of AC Electric Motors.....	30
1.2.10 Motor Insulation	31
1.2.11 Motor Operation Reliability	36
1.3 Classifications of Electric Motors.....	36
1.3.1 DC and AC Motors	38
1.3.2 Single-Phase and Three-Phase Motors	39
1.3.3 Induction and Permanent Magnet Motors.....	40
1.3.4 Synchronous and Asynchronous Motors.....	44
1.3.5 Servo and Stepper Motors	45
1.3.6 Gear Drive and Direct Drive Motors	49
1.3.7 Brush and Brushless Motors	53
1.3.8 Reluctance Motors	54
1.3.9 Radial-Flux and Axial-Flux Motors	55
1.3.10 Rotary and Linear Motors	56
1.3.11 Open and Enclosed Motors.....	57
1.3.12 Motor Classification according to Power Rating.....	57

1.4	Motor Design and Operation Parameters	58
1.4.1	Back EMF Constant, K_v	58
1.4.2	Torque Constant, K_t	59
1.4.3	Velocity Constant, K_v	60
1.4.4	Motor Constant, K_m	60
1.4.5	Mechanical Time Constant, τ_m	61
1.4.6	Electrical Time Constant, τ_e	63
1.4.7	Thermal Time Constant, τ_{th}	64
1.4.8	Viscous Damping, K_{vd}	65
1.5	Sizing Equations.....	66
1.6	Motor Design Process and Considerations	67
1.6.1	Design Process	68
1.6.2	Design Integration	73
1.6.3	Mechatronics	74
1.7	Motor Failure Modes	74
1.8	IP Code	76
	References	78
2.	Rotor Design.....	83
2.1	Rotor in Induction Motor	83
2.1.1	Wound Rotor	83
2.1.2	Squirrel Cage Rotor	85
2.1.2.1	Factors Impacting Resistance of Squirrel Cage Rotor.....	86
2.1.2.2	Double-Cage Rotor.....	87
2.1.2.3	Casting Squirrel Cage Rotor.....	88
2.1.2.4	Skin Effect.....	91
2.1.3	Induction Motor Design Types and Their Performing Characteristics	91
2.2	Permanent Magnet Rotor.....	92
2.2.1	Discovery of Phenomenon of Magnetism	92
2.2.2	Permanent Magnet Characteristics	93
2.2.3	Permanent Magnet Materials.....	95
2.2.3.1	Ferrite Permanent Magnets	96
2.2.3.2	Rare-Earth Permanent Magnets.....	96
2.2.3.3	New Developments of Permanent Magnets.....	97
2.2.4	Magnetization	98
2.2.5	Factors Causing Demagnetization	99
2.2.6	Maximum Operation Temperature	102
2.2.7	Permanent Magnet Mounting and Retention Methods	102
2.2.8	Corrosion Protection of Permanent Magnets	107
2.3	Rotor Manufacturing Process	109
2.3.1	Lamination Materials.....	109
2.3.2	Lamination Cutting	111
2.3.3	Lamination Surface Insulation	112
2.3.4	Lamination Annealing.....	113
2.3.5	Lamination Stacking	113
2.3.6	Rotor Casting for Squirrel Cage Motor.....	113
2.3.7	Heat Treatment of Casted Rotor	114
2.3.8	Rotor Assembly	115

2.3.9	Rotor Machining and Runout Measurement.....	115
2.3.10	Rotor Balancing.....	115
2.3.10.1	Types of Unbalance.....	118
2.3.10.2	Rotor Balancing Machine.....	120
2.3.10.3	Balancing Operation.....	121
2.4	Interference Fit.....	122
2.4.1	Press Fit.....	124
2.4.2	Shrink Fit.....	128
2.4.3	Serration Fit.....	131
2.4.4	Fitting with Adjustable Ringfeder® Locking Devices.....	132
2.4.5	Fitting with Tolerance Rings.....	132
2.5	Stress Analysis of Rotor.....	135
2.6	Rotordynamic Analysis.....	137
2.6.1	Rotor Inertia.....	137
2.6.2	Motor Critical Speed and Resonance.....	139
2.7	Rotor Burst Containment Analysis.....	143
2.7.1	Rotor Burst Speed.....	143
2.7.2	Energy in Rotating Rotor.....	145
2.7.2.1	Kinetic Energy in Rotor.....	145
2.7.2.2	Elastic Potential Energy in Rotor.....	146
2.7.2.3	Ratio of Potential Energy to Kinetic Energy of Rotor.....	147
2.7.3	Rotor Burst Containment Design.....	147
	References.....	150
3.	Shaft Design.....	155
3.1	Shaft Materials.....	155
3.2	Shaft Loads.....	159
3.3	Shaft Design Methods.....	160
3.3.1	Macaulay’s Method.....	160
3.3.2	Area–Moment Method.....	161
3.3.3	Castigliano’s Method.....	162
3.3.4	Graphical Method.....	163
3.4	Engineering Calculations.....	163
3.4.1	Normal Stress for Shaft Subjected to Axial Force.....	164
3.4.2	Bending Stress for Shaft Subjected to Bending Moment.....	165
3.4.3	Torsional Shear Stress and Torsional Deflection.....	168
3.4.4	Lateral Deflection of Shaft.....	172
3.4.4.1	Lateral Deflection due to Bending Moment.....	173
3.4.4.2	Lateral Deflection due to Transverse Force.....	174
3.4.4.3	Lateral Deflection due to Shear Force.....	176
3.5	Shaft Design Issues.....	176
3.5.1	Shaft Design Considerations.....	176
3.5.2	Shaft Rigidity.....	178
3.5.3	Critical Shaft Speed.....	178
3.5.3.1	Shaft with Uniform Diameter.....	179
3.5.3.2	Stepped Shaft.....	179
3.5.4	Dimensional Tolerance.....	179
3.5.5	Dynamic Shaft Runout.....	180
3.5.6	Shaft Eccentricity.....	180

3.5.7	Heat Treatment and Shaft Hardness.....	180
3.5.8	Shaft Surface Finishing.....	182
3.5.9	Shaft Lead.....	184
3.5.10	Shaft Seal.....	186
3.5.10.1	O-Ring Seal.....	186
3.5.10.2	Universal Lip Seal.....	188
3.5.10.3	V-Shaped Spring Seal.....	189
3.5.10.4	Brush Seal.....	189
3.5.10.5	PTFE Seal.....	191
3.5.10.6	Noncontact Seal.....	191
3.5.11	Diametrical Fit Types.....	193
3.6	Stress Concentration.....	193
3.7	Torque Transmission through Mechanical Joints.....	194
3.7.1	Keyed Shafts.....	194
3.7.1.1	Selection of Key Material.....	194
3.7.1.2	Stress Analysis of Key and Keyseat.....	195
3.7.1.3	Key Fitting.....	198
3.7.1.4	Stress Concentration Factors of Keyed Shafts.....	199
3.7.2	Spline Shafts.....	200
3.7.2.1	Advantages of Spline Shafts.....	201
3.7.2.2	Spline Types.....	202
3.7.2.3	Stress Concentration Factors of Spline Shafts.....	203
3.7.3	Tapered Shafts.....	203
3.8	Fatigue Failure under Alternative Loading.....	205
3.9	Shaft Manufacturing Methods.....	206
3.9.1	Machined Shaft.....	206
3.9.2	Forged Shaft.....	207
3.9.3	Welded Hollow Shaft.....	207
3.9.4	Shaft Measurement.....	210
3.10	Shaft Misalignment between Motor and Driven Machine.....	210
3.10.1	Types of Misalignment.....	211
3.10.2	Correction of Shaft Misalignment.....	212
3.11	Shaft Coupling.....	213
3.11.1	Rigid and Semirigid Couplings.....	213
3.11.2	Flexible Couplings.....	216
	References.....	216
4.	Stator Design.....	219
4.1	Stator Lamination.....	219
4.1.1	State Lamination Material.....	219
4.1.2	Stator Lamination Patterns.....	219
4.1.2.1	One-Piece Lamination.....	219
4.1.2.2	T-Shaped Segmented Lamination.....	220
4.1.2.3	Connected Segmented Lamination.....	224
4.1.2.4	Two-Section Stator Lamination.....	224
4.1.2.5	Stator Lamination Integrated by Individual Teeth and a Yoke Section.....	225
4.1.2.6	Slotless Stator Core.....	226
4.1.2.7	Slinky Lamination Stator Core.....	227

4.2	Magnet Wire	230
4.2.1	Regular Magnet Wire.....	230
4.2.2	Self-Adhesive Magnet Wire.....	230
4.2.3	Litz Wire.....	231
4.3	Stator Insulation.....	232
4.3.1	Injection Molded Plastic Insulation.....	233
4.3.2	Slot Liner	233
4.3.3	Glass Fiber-Reinforced Mica Tape.....	234
4.3.4	Powder Coating on Stator Core.....	235
4.4	Manufacturing Process of a Stator Core.....	236
4.4.1	Stator Lamination Cutting.....	237
4.4.2	Lamination Fabrication Process.....	238
4.4.3	Lamination Annealing.....	239
4.4.4	Lamination Stacking	240
4.4.5	Stator Winding	242
4.4.5.1	Random Winding by Hand	243
4.4.5.2	Coil Formation: Distributed Winding.....	243
4.4.5.3	Coil Formation: Concentrated Winding	243
4.4.5.4	Coil Formation: Conductor Bar	243
4.5	Stator Encapsulation and Impregnation.....	245
4.5.1	Encapsulation	245
4.5.1.1	Encapsulation Materials.....	245
4.5.1.2	Encapsulation Process	248
4.5.2	Varnish Dipping.....	249
4.5.3	Trickle Impregnation.....	250
4.5.4	Vacuum Pressure Impregnation.....	250
4.6	Stator Design Considerations.....	253
4.6.1	Cogging Torque.....	253
4.6.2	Air Gap.....	253
4.6.3	Stator Cooling.....	254
4.6.4	Robust Design of Stator.....	254
4.7	Mechanical Stress of Stator.....	254
	References	256
5.	Motor Frame Design	259
5.1	Types of Motor Housing	259
5.1.1	Wrapped Housing.....	259
5.1.2	Casted Housing.....	260
5.1.2.1	Casting Materials	261
5.1.2.2	Casting Process.....	264
5.1.2.3	Pressure Casting.....	268
5.1.2.4	Heat Treatment	268
5.1.3	Machined Housing.....	269
5.1.4	Stamped Housing	269
5.1.5	Extruded Aluminum Motor Housing.....	269
5.1.6	Motor Housing with Composite Materials	270
5.1.7	Motor Housing Fabricated by 3D Printing Technology.....	270
5.1.8	Frameless Motor.....	271
5.2	Testing Methods of Casted Motor Housing.....	273

5.3	Endbell Manufacturing.....	276
5.3.1	Casted Endbell.....	277
5.3.2	Stamped Endbell.....	277
5.3.3	Iron Casting versus Aluminum Casting.....	278
5.3.4	Machined Endbell.....	279
5.3.5	Forged Endbell.....	279
5.4	Motor Assembly Methods.....	279
5.4.1	Tie Bar.....	279
5.4.2	Tapping at Housing End Surface.....	279
5.4.3	Forged Z-Shaped Fastener.....	280
5.4.4	Rotary Fasteners.....	282
5.4.4.1	Triangle-Base Rotating Fastener.....	283
5.4.4.2	Square-Base Rotating Fastener.....	285
5.4.4.3	Butterfly-Base Rotating Fastener.....	286
5.4.5	Other Types of Fasteners.....	286
5.4.5.1	Cylinder-Base Fastener Locked with Retaining Ring.....	287
5.4.5.2	Cylinder-Base Fastener with Self-Locking Aperture.....	287
5.4.5.3	Fastener Engaged with Housing from Housing Interior.....	289
5.5	Fastening System Design.....	290
5.5.1	Types of Thread Fasteners.....	290
5.5.2	Thread Formation.....	290
5.5.3	Fastener Preload.....	290
5.5.4	Fastener-Tightening Process.....	291
5.5.5	Tightening Torque.....	294
5.5.6	Thread Engagement and Load Distribution.....	297
5.6	Anticorrosion of Electric Motor and Components.....	298
5.6.1	Surface Treatment Methods.....	298
5.6.1.1	Electroplating.....	299
5.6.1.2	Electroless Plating.....	299
5.6.1.3	Physical Vapor Deposition.....	299
5.6.1.4	Inorganic Coating.....	300
5.6.1.5	Phosphate Coating.....	300
5.6.1.6	Electropolishing.....	300
5.6.2	Anticorrosion Treatment of Electric Motor.....	301
5.6.3	Hydrogen Embrittlement Issues.....	302
	References.....	305
6.	Motor Bearing.....	309
6.1	Bearing Classification.....	309
6.1.1	Journal Bearing.....	309
6.1.2	Rolling Bearing.....	313
6.1.2.1	Ball Bearing.....	313
6.1.2.2	Roller Bearing.....	319
6.1.3	Noncontact Bearing.....	320
6.1.4	Sensor Bearing.....	322
6.2	Bearing Design.....	323
6.2.1	Bearing Materials.....	323

6.2.2	Bearing Internal Clearances	324
6.2.3	Allowable Bearing Speed.....	328
6.2.4	Bearing Fitness	328
6.2.5	Prevention of Bearing Axial Movement	329
6.2.6	Bearing Load	331
6.2.6.1	Bearing Preload Arrangement	331
6.2.6.2	Radial and Axial Bearing Load.....	332
6.2.6.3	Load Distribution.....	332
6.3	Bearing Fatigue Life.....	335
6.3.1	Calculation of Bearing Fatigue Life	335
6.3.2	Bearing Failure Probability Distribution	336
6.3.3	Influence of Unbalance on Bearing Fatigue Life	338
6.3.4	Influence of Wear on Bearing Fatigue Life.....	341
6.3.5	Influence of Internal Radial Clearance on Bearing Fatigue Life.....	341
6.4	Bearing Failure Mode.....	343
6.4.1	Major Causes of Premature Bearing Failure.....	344
6.4.2	Lubricant Selection	344
6.4.3	Improper Bearing Lubrication	347
6.4.4	Lubricant Contamination	347
6.4.5	Grease Leakage	348
6.4.6	Bearing Sealing	349
6.4.7	Excessive Load.....	350
6.4.8	Internal Radial Interference Condition.....	351
6.4.9	Bearing Current.....	354
6.4.10	Impact of High Temperature on Bearing Failure.....	355
6.4.11	Bearing Failure Associated with Motor Vibration and Overloading	356
6.4.12	Improper Bearing Installation and Bearing Misalignment.....	357
6.4.13	Vertically Mounted Motor	358
6.5	Bearing Noise	359
6.6	Bearing Selection.....	360
6.6.1	Bearing Type Selection Based on Load.....	362
6.6.2	Bearing Type Selection Based on Speed	363
6.6.3	Selection of Bearing Size.....	363
6.7	Bearing Performance Improvement	364
