<i>Preface to the Eighth Edition</i>	xvii
<i>Acknowledgments</i>	xix
<i>The Order of Presentation of the Formulas</i>	xxv
<i>Use of the Tables</i>	xxix
<i>Index of Special Functions</i>	xxxvii
<i>Notation</i>	xli
<i>Note on the Bibliographic References</i>	xlvi
0 Introduction	1
0.1 Finite sums	1
0.11 Progressions	1
0.12 Sums of powers of natural numbers	1
0.13 Sums of reciprocals of natural numbers	3
0.14 Sums of products of reciprocals of natural numbers	3
0.15 Sums of the binomial coefficients	4
0.2 Numerical series and infinite products	7
0.21 The convergence of numerical series	7
0.22 Convergence tests	7
0.23–0.24 Examples of numerical series	9
0.25 Infinite products	15
0.26 Examples of infinite products	15
0.3 Functional series	16
0.30 Definitions and theorems	16
0.31 Power series	17
0.32 Fourier series	20
0.33 Asymptotic series	21
0.4 Certain formulas from differential calculus	22
0.41 Differentiation of a definite integral with respect to a parameter	22
0.42 The n^{th} derivative of a product (Leibniz's rule)	22
0.43 The n^{th} derivative of a composite function	23
0.44 Integration by substitution	24
1 Elementary Functions	25
1.1 Power of Binomials	25
1.11 Power series	25
1.12 Series of rational fractions	26
1.2 The Exponential Function	26

1.21	Series representation	26
1.22	Functional relations	27
1.23	Series of exponentials	27
1.3–1.4	Trigonometric and Hyperbolic Functions	28
1.30	Introduction	28
1.31	The basic functional relations	28
1.32	The representation of powers of trigonometric and hyperbolic functions in terms of functions of multiples of the argument (angle)	31
1.33	The representation of trigonometric and hyperbolic functions of multiples of the argument (angle) in terms of powers of these functions	33
1.34	Certain sums of trigonometric and hyperbolic functions	36
1.35	Sums of powers of trigonometric functions of multiple angles	37
1.36	Sums of products of trigonometric functions of multiple angles	38
1.37	Sums of tangents of multiple angles	39
1.38	Sums leading to hyperbolic tangents and cotangents	39
1.39	The representation of cosines and sines of multiples of the angle as finite products	40
1.41	The expansion of trigonometric and hyperbolic functions in power series	42
1.42	Expansion in series of simple fractions	43
1.43	Representation in the form of an infinite product	44
1.44–1.45	Trigonometric (Fourier) series	45
1.46	Series of products of exponential and trigonometric functions	50
1.47	Series of hyperbolic functions	51
1.48	Lobachevskiy's "Angle of parallelism" $\Pi(x)$	51
1.49	The hyperbolic amplitude (the Gudermannian) $\operatorname{gd} x$	52
1.5	The Logarithm	52
1.51	Series representation	52
1.52	Series of logarithms (cf. 1.431)	55
1.6	The Inverse Trigonometric and Hyperbolic Functions	55
1.61	The domain of definition	55
1.62–1.63	Functional relations	56
1.64	Series representations	60
2	Indefinite Integrals of Elementary Functions	63
2.0	Introduction	63
2.00	General remarks	63
2.01	The basic integrals	64
2.02	General formulas	65
2.1	Rational Functions	66
2.10	General integration rules	66
2.11–2.13	Forms containing the binomial $a + bx^k$	68
2.14	Forms containing the binomial $1 \pm x^n$	74
2.15	Forms containing pairs of binomials: $a + bx$ and $\alpha + \beta x$	78
2.16	Forms containing the trinomial $a + bx^k + cx^{2k}$	78
2.17	Forms containing the quadratic trinomial $a + bx + cx^2$ and powers of x	79
2.18	Forms containing the quadratic trinomial $a + bx + cx^2$ and the binomial $\alpha + \beta x$	81
2.2	Algebraic functions	82
2.20	Introduction	82
2.21	Forms containing the binomial $a + bx^k$ and \sqrt{x}	83

2.22–2.23	Forms containing $\sqrt[k]{(a+bx)^k}$	84
2.24	Forms containing $\sqrt{a+bx}$ and the binomial $\alpha + \beta x$	88
2.25	Forms containing $\sqrt{a+bx+cx^2}$	92
2.26	Forms containing $\sqrt{a+bx+cx^2}$ and integral powers of x	94
2.27	Forms containing $\sqrt{a+cx^2}$ and integral powers of x	99
2.28	Forms containing $\sqrt{a+bx+cx^2}$ and first- and second-degree polynomials	103
2.29	Integrals that can be reduced to elliptic or pseudo-elliptic integrals	104
2.3	The Exponential Function	106
2.31	Forms containing e^{ax}	106
2.32	The exponential combined with rational functions of x	106
2.4	Hyperbolic Functions	110
2.41–2.43	Powers of $\sinh x$, $\cosh x$, $\tanh x$, and $\coth x$	110
2.44–2.45	Rational functions of hyperbolic functions	125
2.46	Algebraic functions of hyperbolic functions	132
2.47	Combinations of hyperbolic functions and powers	140
2.48	Combinations of hyperbolic functions, exponentials, and powers	149
2.5–2.6	Trigonometric Functions	151
2.50	Introduction	151
2.51–2.52	Powers of trigonometric functions	152
2.53–2.54	Sines and cosines of multiple angles and of linear and more complicated functions of the argument	161
2.55–2.56	Rational functions of the sine and cosine	171
2.57	Integrals containing $\sqrt{a \pm b \sin x}$ or $\sqrt{a \pm b \cos x}$	179
2.58–2.62	Integrals reducible to elliptic and pseudo-elliptic integrals	184
2.63–2.65	Products of trigonometric functions and powers	214
2.66	Combinations of trigonometric functions and exponentials	227
2.67	Combinations of trigonometric and hyperbolic functions	231
2.7	Logarithms and Inverse-Hyperbolic Functions	237
2.71	The logarithm	237
2.72–2.73	Combinations of logarithms and algebraic functions	238
2.74	Inverse hyperbolic functions	242
2.75	Logarithms and exponential functions	242
2.8	Inverse Trigonometric Functions	242
2.81	Arcsines and arccosines	242
2.82	The arcsecant, the arccosecant, the arctangent and the arccotangent	243
2.83	Combinations of arcsine or arccosine and algebraic functions	244
2.84	Combinations of the arcsecant and arccosecant with powers of x	245
2.85	Combinations of the arctangent and arccotangent with algebraic functions	246
3–4	Definite Integrals of Elementary Functions	249
3.0	Introduction	249
3.01	Theorems of a general nature	249
3.02	Change of variable in a definite integral	250
3.03	General formulas	251
3.04	Improper integrals	253
3.05	The principal values of improper integrals	254
3.1–3.2	Power and Algebraic Functions	255
3.11	Rational functions	255

3.12	Products of rational functions and expressions that can be reduced to square roots of first- and second-degree polynomials	256
3.13–3.17	Expressions that can be reduced to square roots of third- and fourth-degree polynomials and their products with rational functions	256
3.18	Expressions that can be reduced to fourth roots of second-degree polynomials and their products with rational functions	315
3.19–3.23	Combinations of powers of x and powers of binomials of the form $(\alpha + \beta x)$. .	318
3.24–3.27	Powers of x , of binomials of the form $\alpha + \beta x^p$ and of polynomials in x	324
3.3–3.4	Exponential Functions	336
3.31	Exponential functions	336
3.32–3.34	Exponentials of more complicated arguments	338
3.35	Combinations of exponentials and rational functions	342
3.36–3.37	Combinations of exponentials and algebraic functions	346
3.38–3.39	Combinations of exponentials and arbitrary powers	348
3.41–3.44	Combinations of rational functions of powers and exponentials	355
3.45	Combinations of powers and algebraic functions of exponentials	365
3.46–3.48	Combinations of exponentials of more complicated arguments and powers . . .	366
3.5	Hyperbolic Functions	374
3.51	Hyperbolic functions	374
3.52–3.53	Combinations of hyperbolic functions and algebraic functions	377
3.54	Combinations of hyperbolic functions and exponentials	384
3.55–3.56	Combinations of hyperbolic functions, exponentials, and powers	388
3.6–4.1	Trigonometric Functions	392
3.61	Rational functions of sines and cosines and trigonometric functions of multiple angles	392
3.62	Powers of trigonometric functions	397
3.63	Powers of trigonometric functions and trigonometric functions of linear functions	399
3.64–3.65	Powers and rational functions of trigonometric functions	403
3.66	Forms containing powers of linear functions of trigonometric functions	407
3.67	Square roots of expressions containing trigonometric functions	410
3.68	Various forms of powers of trigonometric functions	415
3.69–3.71	Trigonometric functions of more complicated arguments	419
3.72–3.74	Combinations of trigonometric and rational functions	427
3.75	Combinations of trigonometric and algebraic functions	438
3.76–3.77	Combinations of trigonometric functions and powers	440
3.78–3.81	Rational functions of x and of trigonometric functions	451
3.82–3.83	Powers of trigonometric functions combined with other powers	463
3.84	Integrals containing $\sqrt{1 - k^2 \sin^2 x}$, $\sqrt{1 - k^2 \cos^2 x}$, and similar expressions . .	476
3.85–3.88	Trigonometric functions of more complicated arguments combined with powers	479
3.89–3.91	Trigonometric functions and exponentials	489
3.92	Trigonometric functions of more complicated arguments combined with exponentials	497
3.93	Trigonometric and exponential functions of trigonometric functions	499
3.94–3.97	Combinations involving trigonometric functions, exponentials, and powers . . .	501
3.98–3.99	Combinations of trigonometric and hyperbolic functions	513

4.11–4.12	Combinations involving trigonometric and hyperbolic functions and powers . . .	520
4.13	Combinations of trigonometric and hyperbolic functions and exponentials . . .	526
4.14	Combinations of trigonometric and hyperbolic functions, exponentials, and powers	529
4.2–4.4	Logarithmic Functions	530
4.21	Logarithmic functions	530
4.22	Logarithms of more complicated arguments	533
4.23	Combinations of logarithms and rational functions	538
4.24	Combinations of logarithms and algebraic functions	541
4.25	Combinations of logarithms and powers	543
4.26–4.27	Combinations involving powers of the logarithm and other powers	546
4.28	Combinations of rational functions of $\ln x$ and powers	556
4.29–4.32	Combinations of logarithmic functions of more complicated arguments and powers	559
4.33–4.34	Combinations of logarithms and exponentials	575
4.35–4.36	Combinations of logarithms, exponentials, and powers	577
4.37	Combinations of logarithms and hyperbolic functions	582
4.38–4.41	Logarithms and trigonometric functions	584
4.42–4.43	Combinations of logarithms, trigonometric functions, and powers	597
4.44	Combinations of logarithms, trigonometric functions, and exponentials	603
4.5	Inverse Trigonometric Functions	603
4.51	Inverse trigonometric functions	603
4.52	Combinations of arcsines, arccosines, and powers	603
4.53–4.54	Combinations of arctangents, arccotangents, and powers	605
4.55	Combinations of inverse trigonometric functions and exponentials	608
4.56	A combination of the arctangent and a hyperbolic function	609
4.57	Combinations of inverse and direct trigonometric functions	609
4.58	A combination involving an inverse and a direct trigonometric function and a power	610
4.59	Combinations of inverse trigonometric functions and logarithms	610
4.6	Multiple Integrals	611
4.60	Change of variables in multiple integrals	611
4.61	Change of the order of integration and change of variables	612
4.62	Double and triple integrals with constant limits	614
4.63–4.64	Multiple integrals	617
5	Indefinite Integrals of Special Functions	623
5.1	Elliptic Integrals and Functions	623
5.11	Complete elliptic integrals	623
5.12	Elliptic integrals	625
5.13	Jacobian elliptic functions	627
5.14	Weierstrass elliptic functions	630
5.2	The Exponential Integral Function	631
5.21	The exponential integral function	631
5.22	Combinations of the exponential integral function and powers	631
5.23	Combinations of the exponential integral and the exponential	632
5.3	The Sine Integral and the Cosine Integral	632
5.4	The Probability Integral and Fresnel Integrals	633
5.5	Bessel Functions	633

5.6	Orthogonal Polynomials	634
5.7	Hypergeometric Functions	634
6-7	Definite Integrals of Special Functions	637
6.1	Elliptic Integrals and Functions	637
6.11	Forms containing $F(x, k)$	637
6.12	Forms containing $E(x, k)$	638
6.13	Integration of elliptic integrals with respect to the modulus	639
6.14-6.15	Complete elliptic integrals	639
6.16	The theta function	642
6.17	Generalized elliptic integrals	643
6.2-6.3	The Exponential Integral Function and Functions Generated by It	644
6.21	The logarithm integral	644
6.22-6.23	The exponential integral function	646
6.24-6.26	The sine integral and cosine integral functions	648
6.27	The hyperbolic sine integral and hyperbolic cosine integral functions	653
6.28-6.31	The probability integral	653
6.32	Fresnel integrals	657
6.4	The Gamma Function and Functions Generated by It	659
6.41	The gamma function	659
6.42	Combinations of the gamma function, the exponential, and powers	660
6.43	Combinations of the gamma function and trigonometric functions	663
6.44	The logarithm of the gamma function*	664
6.45	The incomplete gamma function	665
6.46-6.47	The function $\psi(x)$	666
6.5-6.7	Bessel Functions	667
6.51	Bessel functions	667
6.52	Bessel functions combined with x and x^2	672
6.53-6.54	Combinations of Bessel functions and rational functions	678
6.55	Combinations of Bessel functions and algebraic functions	682
6.56-6.58	Combinations of Bessel functions and powers	683
6.59	Combinations of powers and Bessel functions of more complicated arguments	697
6.61	Combinations of Bessel functions and exponentials	702
6.62-6.63	Combinations of Bessel functions, exponentials, and powers	706
6.64	Combinations of Bessel functions of more complicated arguments, exponentials, and powers	716
6.65	Combinations of Bessel and exponential functions of more complicated arguments and powers	718
6.66	Combinations of Bessel, hyperbolic, and exponential functions	720
6.67-6.68	Combinations of Bessel and trigonometric functions	724
6.69-6.74	Combinations of Bessel and trigonometric functions and powers	734
6.75	Combinations of Bessel, trigonometric, and exponential functions and powers	750
6.76	Combinations of Bessel, trigonometric, and hyperbolic functions	753
6.77	Combinations of Bessel functions and the logarithm, or arctangent	754
6.78	Combinations of Bessel and other special functions	755
6.79	Integration of Bessel functions with respect to the order	756
6.8	Functions Generated by Bessel Functions	760
6.81	Struve functions	760

6.82	Combinations of Struve functions, exponentials, and powers	761
6.83	Combinations of Struve and trigonometric functions	762
6.84–6.85	Combinations of Struve and Bessel functions	763
6.86	Lommel functions	767
6.87	Thomson functions	768
6.9	Mathieu Functions	770
6.91	Mathieu functions	770
6.92	Combinations of Mathieu, hyperbolic, and trigonometric functions	770
6.93	Combinations of Mathieu and Bessel functions	774
6.94	Relationships between eigenfunctions of the Helmholtz equation in different coordinate systems	774
7.1–7.2	Associated Legendre Functions	776
7.11	Associated Legendre functions	776
7.12–7.13	Combinations of associated Legendre functions and powers	777
7.14	Combinations of associated Legendre functions, exponentials, and powers	783
7.15	Combinations of associated Legendre and hyperbolic functions	785
7.16	Combinations of associated Legendre functions, powers, and trigonometric functions	786
7.17	A combination of an associated Legendre function and the probability integral	788
7.18	Combinations of associated Legendre and Bessel functions	789
7.19	Combinations of associated Legendre functions and functions generated by Bessel functions	794
7.21	Integration of associated Legendre functions with respect to the order	795
7.22	Combinations of Legendre polynomials, rational functions, and algebraic functions	796
7.23	Combinations of Legendre polynomials and powers	798
7.24	Combinations of Legendre polynomials and other elementary functions	799
7.25	Combinations of Legendre polynomials and Bessel functions	801
7.3–7.4	Orthogonal Polynomials	802
7.31	Combinations of Gegenbauer polynomials $C_n^\nu(x)$ and powers	802
7.32	Combinations of Gegenbauer polynomials $C_n^\nu(x)$ and elementary functions	805
7.325*	Complete System of Orthogonal Step Functions	805
7.33	Combinations of the polynomials $C_n^\nu(x)$ and Bessel functions. Integration of Gegenbauer functions with respect to the index.	806
7.34	Combinations of Chebyshev polynomials and powers	807
7.35	Combinations of Chebyshev polynomials and elementary functions	809
7.36	Combinations of Chebyshev polynomials and Bessel functions	810
7.37–7.38	Hermite polynomials	810
7.39	Jacobi polynomials	814
7.41–7.42	Laguerre polynomials	816
7.5	Hypergeometric Functions	820
7.51	Combinations of hypergeometric functions and powers	820
7.52	Combinations of hypergeometric functions and exponentials	822
7.53	Hypergeometric and trigonometric functions	825
7.54	Combinations of hypergeometric and Bessel functions	825
7.6	Confluent Hypergeometric Functions	828
7.61	Combinations of confluent hypergeometric functions and powers	828

7.62–7.63	Combinations of confluent hypergeometric functions and exponentials	830
7.64	Combinations of confluent hypergeometric and trigonometric functions	837
7.65	Combinations of confluent hypergeometric functions and Bessel functions	838
7.66	Combinations of confluent hypergeometric functions, Bessel functions, and powers	839
7.67	Combinations of confluent hypergeometric functions, Bessel functions, exponentials, and powers	842
7.68	Combinations of confluent hypergeometric functions and other special functions	847
7.69	Integration of confluent hypergeometric functions with respect to the index	849
7.7	Parabolic Cylinder Functions	849
7.71	Parabolic cylinder functions	849
7.72	Combinations of parabolic cylinder functions, powers, and exponentials	850
7.73	Combinations of parabolic cylinder and hyperbolic functions	851
7.74	Combinations of parabolic cylinder and trigonometric functions	852
7.75	Combinations of parabolic cylinder and Bessel functions	853
7.76	Combinations of parabolic cylinder functions and confluent hypergeometric functions	857
7.77	Integration of a parabolic cylinder function with respect to the index	857
7.8	Meijer's and MacRobert's Functions (G and E)	858
7.81	Combinations of the functions G and E and the elementary functions	858
7.82	Combinations of the functions G and E and Bessel functions	862
7.83	Combinations of the functions G and E and other special functions	864
8–9	Special Functions	867
8.1	Elliptic Integrals and Functions	867
8.11	Elliptic integrals	867
8.12	Functional relations between elliptic integrals	872
8.13	Elliptic functions	874
8.14	Jacobian elliptic functions	875
8.15	Properties of Jacobian elliptic functions and functional relationships between them	879
8.16	The Weierstrass function $\wp(u)$	882
8.17	The functions $\zeta(u)$ and $\sigma(u)$	885
8.18–8.19	Theta functions	886
8.2	The Exponential Integral Function and Functions Generated by It	892
8.21	The exponential integral function $Ei(x)$	892
8.22	The hyperbolic sine integral $\operatorname{shi} x$ and the hyperbolic cosine integral $\operatorname{chi} x$	895
8.23	The sine integral and the cosine integral: $\operatorname{si} x$ and $\operatorname{ci} x$	895
8.24	The logarithm integral $\operatorname{li}(x)$	896
8.25	The probability integral $\Phi(x)$, the Fresnel integrals $S(x)$, $C(x)$, the error function $\operatorname{erf}(x)$, and the complementary error function $\operatorname{erfc}(x)$	896
8.26	Lobachevskiy's function $L(x)$	900
8.3	Euler's Integrals of the First and Second Kinds and Functions Generated by Them	901
8.31	The gamma function (Euler's integral of the second kind): $\Gamma(z)$	901
8.32	Representation of the gamma function as series and products	903
8.33	Functional relations involving the gamma function	904
8.34	The logarithm of the gamma function	907
8.35	The incomplete gamma function	908
8.36	The psi function $\psi(x)$	911

8.37	The function $\beta(x)$	915
8.38	The beta function (Euler's integral of the first kind): $B(x, y)$	917
8.39	The incomplete beta function $B_x(p, q)$	919
8.4–8.5	Bessel Functions and Functions Associated with Them	919
8.40	Definitions	919
8.41	Integral representations of the functions $J_\nu(z)$ and $N_\nu(z)$	921
8.42	Integral representations of the functions $H_\nu^{(1)}(z)$ and $H_\nu^{(2)}(z)$	923
8.43	Integral representations of the functions $I_\nu(z)$ and $K_\nu(z)$	925
8.44	Series representation	927
8.45	Asymptotic expansions of Bessel functions	929
8.46	Bessel functions of order equal to an integer plus one-half	933
8.47–8.48	Functional relations	935
8.49	Differential equations leading to Bessel functions	940
8.51–8.52	Series of Bessel functions	942
8.53	Expansion in products of Bessel functions	948
8.54	The zeros of Bessel functions	950
8.55	Struve functions	951
8.56	Thomson functions and their generalizations	953
8.57	Lommel functions	954
8.58	Anger and Weber functions $J_\nu(z)$ and $E_\nu(z)$	957
8.59	Neumann's and Schlöfli's polynomials: $O_n(z)$ and $S_n(z)$	958
8.6	Mathieu Functions	959
8.60	Mathieu's equation	959
8.61	Periodic Mathieu functions	960
8.62	Recursion relations for the coefficients $A_{2r}^{(2n)}$, $A_{2r+1}^{(2n+1)}$, $B_{2r+1}^{(2n+1)}$, $B_{2r+2}^{(2n+2)}$	960
8.63	Mathieu functions with a purely imaginary argument	961
8.64	Non-periodic solutions of Mathieu's equation	962
8.65	Mathieu functions for negative q	962
8.66	Representation of Mathieu functions as series of Bessel functions	963
8.67	The general theory	966
8.7–8.8	Associated Legendre Functions	967
8.70	Introduction	967
8.71	Integral representations	969
8.72	Asymptotic series for large values of $ \nu $	971
8.73–8.74	Functional relations	973
8.75	Special cases and particular values	977
8.76	Derivatives with respect to the order	978
8.77	Series representation	979
8.78	The zeros of associated Legendre functions	981
8.79	Series of associated Legendre functions	981
8.81	Associated Legendre functions with integer indices	983
8.82–8.83	Legendre functions	984
8.84	Conical functions	989
8.85	Toroidal functions	990
8.9	Orthogonal Polynomials	991
8.90	Introduction	991
8.91	Legendre polynomials	992

8.919	Series of products of Legendre and Chebyshev polynomials	997
8.92	Series of Legendre polynomials	997
