Oxide Nanostructures

Growth, Microstructures, and Properties

PAN STANFORD  PUBLISHING

Contents

<i>Foreword by Prof. C. N. R. Rao</i>	xv
<i>Foreword by Prof. Ramesh Chandra Budhani</i>	xvii
<i>Foreword by Prof. Anand Mohan</i>	xix
<i>Foreword by Dr. Simon J. Holland</i>	xxi
<i>Preface</i>	xxv

1. Metal Oxide Nanomaterials: An Overview **1**

Kajal Kumar Dey and Avanih Kumar Srivastava

1.1	Initiation	1
1.2	Orientation with the Nanomaterials	3
1.3	Metal Oxide Nanomaterials: Why Have They Become Indispensable?	9
1.3.1	Photocatalytic Activity	9
1.3.2	Photovoltaic Application	10
1.3.3	Catalysis	12
1.3.4	Sensing Applications	14
1.3.5	Li-Ion Batteries	15
1.3.6	Capacitors	16
1.3.7	Biophysical Functionalities	18
1.3.8	Nanofluid	19
1.3.9	Transparent Conducting Oxides	20
1.3.10	Superconductivity	21
1.3.11	Antimicrobial Agent	21
1.3.12	Thermochromic Materials	21
1.3.13	Electrochromic Materials	22
1.3.14	Piezoelectric Materials	23
1.3.15	Luminescence Materials	23
1.3.16	Field Emitters	24
1.3.17	Lasers	24

1.3.18	Switches	25
1.3.19	Memresistor	25
1.3.20	Chromatographic Support	25
1.3.21	Fuel Cells	26
1.3.22	Optical Recording and Other Information Storage Devices	26
1.3.23	Abrasives and Polishing Agents	26
1.3.24	Ultraviolet Filtration	27
1.4	Various Synthesis Strategies for Metal Oxide Nanomaterials	28
1.4.1	Physical Vapor Deposition	30
1.4.1.1	Thermal evaporation	31
1.4.1.2	Pulsed laser deposition	32
1.4.1.3	Cathodic arc deposition	33
1.4.1.4	Sputtering deposition	34
1.4.1.5	Molecular beam epitaxy	35
1.4.2	Chemical Vapor Deposition	36
1.4.3	Atomic Layer Deposition	37
1.4.4	Spray Pyrolysis	38
1.4.5	Thermochemical or Flame Deposition of Metal Organic Precursors	39
1.4.6	Chemical/Solution Approach	41
1.4.6.1	Coprecipitation	41
1.4.6.2	Hydrothermal/solvothermal approach	43
1.4.6.3	Sol-gel approach	45
1.4.6.4	Microemulsions/micelles approach	47
1.4.6.5	Thermolysis/thermochemical decomposition	49
1.4.6.6	Electrodeposition	50
1.4.6.7	Oxidation and reduction	51
1.4.6.8	Metathesis	52
1.4.6.9	Combustion synthesis	53
1.4.6.10	Biomimetic approach	54

1.4.6.11	Sonochemical approach	55
1.4.6.12	Microwave heating	56
1.4.7	Milling	57
1.4.8	Lithography	58
1.5	Nature of Bonding and Defects	59
1.6	Structural Characterization Tools for Metal Oxide Nanomaterials	63
1.6.1	X-Ray Diffraction	63
1.6.2	Small Angle X-Ray Scattering	65
1.6.3	Scanning Electron Microscopy	65
1.6.4	Transmission Electron Microscopy	66
1.6.5	Scanning Probe Microscopy	67
1.6.6	Differential Scanning Calorimetry	68
1.6.7	Superconducting Quantum Interference Magnetometry	69
1.6.8	Ultraviolet-Visible Spectroscopy	69
1.6.9	Secondary Ion Mass Spectroscopy	70
1.6.10	Bruner–Emett–Teller Gas Adsorption Surface Area Measurement and Pore Structure Analysis	70
1.6.11	X-Ray Photoelectron Spectroscopy	71
1.6.12	Raman Spectroscopy	71
1.6.13	Fourier Transform Infrared Spectroscopy	73
1.6.14	Electron Paramagnetic Resonance/Electron Spin Resonance	74
1.6.15	Luminescence Spectroscopy	74
1.7	The Others (Non-Metal Oxides)	76
1.8	Future Prospects for Metal Oxide Nanomaterials	77
2.	Pulsed Laser Deposition of Nanostructured Oxides for Emerging Applications	99
<i>Carlo S. Casari and Andrea Li Bassi</i>		
2.1	Introduction	100
2.2	Pulsed Laser Deposition of Oxides with Tailored Properties	100

2.2.1	Deposition Parameters Affecting Film Growth	101
2.2.2	Experimental Apparatus	104
2.2.3	Tuning of Morphological Properties of Oxides	105
2.2.4	Tuning Structural Properties and Oxide Phase	106
2.2.5	First Stages of Film Growth	109
2.3	Applications	110
3.	Metastable Phase Selection and Low-Temperature Plasticity in Chemically Synthesized Amorphous $\text{Al}_2\text{O}_3\text{-ZrO}_2$ and $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$	115
	<i>Ashutosh S. Gandhi, Arindam Paul, Shailendra Singh Shekhawat, Umesh Waghmare, and Vikram Jayaram</i>	
3.1	Introduction	115
3.2	Metastable Phase Selection in $\text{Al}_2\text{O}_3\text{-ZrO}_2$ and $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$	118
3.2.1	Phase Selection in $\text{Al}_2\text{O}_3\text{-ZrO}_2$ System	119
3.2.2	Phase Selection in $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$ System	121
3.3	Consolidation of Amorphous Powders of $\text{Al}_2\text{O}_3\text{-ZrO}_2$ and $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$	124
3.4	Plastic Deformation of Glassy $\text{Al}_2\text{O}_3\text{-ZrO}_2$ and $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$	134
3.5	Modelling of the Structure of Amorphous $\text{Al}_2\text{O}_3\text{-Y}_2\text{O}_3$	140
3.6	Concluding Remarks	146
4.	Porous and Hollow Oxide Nanostructures: Synthesis, Stability and Applications	153
	<i>Erumpukuthickal Ashokkumar Anumol and Narayanan Ravishankar</i>	
4.1	Introduction	153
4.2	Porous Structure: Definition	154
4.3	Synthesis Methods for Porous Structures	154
4.3.1	Template-Assisted Methods	155
4.3.1.1	Surfactant template	155
4.3.1.2	Emulsion templating	159
4.3.2	Template-Less Methods	161
4.3.2.1	Hydrothermal/solvothermal synthesis	161

4.3.2.2	Combustion/annealing synthesis	163
4.3.2.3	Aggregation	164
4.3.2.4	Anodization	166
4.4	Applications of Porous Structures	166
4.4.1	Drug Delivery	166
4.4.2	Catalysis and Sensing	167
4.4.3	Li-Ion Batteries	168
4.4.4	Solar Cells	168
4.4.5	Templates	169
4.5	Hollow Structures: Definition	169
4.6	Synthesis Methods for Hollow Structures	170
4.6.1	Template-Assisted Methods	170
4.6.1.1	Polymeric template	171
4.6.1.2	Silica template	174
4.6.1.3	Other oxide materials as template	175
4.6.1.4	Soft template	177
4.6.2	Template-Less Methods	179
4.6.2.1	Kirkendall effect	179
4.6.2.2	Ostwald ripening	182
4.6.2.3	Other methods	184
4.6.2.4	Hollow nanostructures from nanoparticle aggregates	184
4.7	Applications of Hollow Nanostructures	187
4.7.1	Drug Delivery	187
4.7.2	Li-Ion Battery Anode	187
4.7.3	Catalysis and Sensing	188
4.8	Conclusions	189
5.	Doped Tin Oxide Nanomaterials for Chlorine and Hydrogen Gas Detection	201
	<i>Allen Chaparadza, Hoang Tran, and Shankar B. Rananavare</i>	
5.1	Introduction	201
5.2	Synthesis and Characterization of Nanomaterial-Based Devices for Chlorine and Hydrogen Sensing	203

5.2.1	Preparation of Li(p-Type) and Sb (n-Type)-Doped SnO ₂ Nanoparticles	203
5.2.2	n-Doped Tin Oxide Nanowires	204
5.2.3	p-Doped Tin Oxide Nanowires	204
5.2.4	Characterization of Li- and Sb-Doped SnO ₂	205
5.3	Conduction Mechanisms in n- and p-Doped Nanoparticles	208
5.4	Sensors for Cl ₂ and H ₂ Detection	210
5.4.1	Sb-Doped SnO ₂ for Chlorine Detection	211
5.4.2	Li-doped SnO ₂ for Hydrogen Detection	213
5.5	Conclusions and Future Outlook	215
6.	Titanium Oxide Nano- and Submicron-Structured Coating for Ti and Ti-Related Bio-Implants	217
	<i>Shampa Aich and Banasri Roy</i>	
6.1	Introduction	218
6.2	Synthesis Routes	220
6.3	Characterization Techniques	222
6.3.1	Biological Characterization	222
6.3.2	Physical Characterization	225
6.3.2.1	Thickness	225
6.3.2.2	Structural analyses	226
6.3.2.3	Chemical composition and chemical depth profiling	227
6.3.2.4	Morphology and microstructure	228
6.3.2.5	Surface contact/energy and wettability	230
6.3.3	Mechanical Characterization	230
6.4	Biocompatibility of Titanium Oxide Coatings	231
6.4.1	Blood Compatibility	233
6.4.1.1	Blood compatibility of titanium oxide compared to other coating materials	233
6.4.1.2	Effect of thickness	234

6.4.1.3	Effect of chemical nature	235
6.4.1.4	Effect of phase	236
6.4.1.5	Effect of surface	237
6.4.2	Bone compatibility	238
6.4.2.1	Effect of roughness and porosity	238
6.4.2.2	Effect of surface energy and wettability	239
6.4.2.3	Using seeds	240
6.4.2.4	Effect of phase	241
6.5	Conclusions	241
7.	Metal Oxide Nanostructured Films for Photovoltaic Applications	255
	<i>S. K. Tripathi</i>	
7.1	Introduction to Nanotechnology	255
7.1.1	Metal Oxide Nanomaterials	257
7.1.2	Titanium Dioxide as a Material	258
7.2	Crystal Structure of TiO ₂	258
7.3	Electron Transport in TiO ₂	260
7.4	Introduction to Photovoltaics	262
7.4.1	Solar Irradiation	264
7.4.2	Photovoltaic Characterization	265
7.5	Dye-Sensitized Solar Cell	266
7.5.1	Metal Oxide Thin Films for Dye-Sensitized Solar Cell	268
7.5.2	TiO ₂ Photoelectrode with Scattering Layer	269
7.5.3	Metal-Doped Titania (TiO ₂) Photoelectrode	270
7.5.4	Core-Shell Composite of Titania (TiO ₂) and Other Metal Oxides for Photoelectrode	272
7.5.5	TiO ₂ Coupled with Other Semiconductors	274
7.6	Synthesis Techniques	275
7.6.1	Hydrothermal Synthesis	275
7.6.2	Combustion	275
7.6.3	Gas Phase Methods	276

7.6.4	Microwave Synthesis	276
7.6.5	Sol-Gel Processing	277
8.	Nanostructured Materials as Nanoprobes for Bioimaging Applications	283
	<i>S. D. Geethanjali and A. Vadivel Murugan</i>	
8.1	Overview	283
8.2	Introduction	284
8.3	Nanoprobes for Bioimaging Applications	285
8.3.1	Nanostructured Materials as Nanoprobes	285
8.3.1.1	Size of the nanoprobe	285
8.3.1.2	Nanoparticle shape	286
8.3.1.3	Nanoparticle composition	287
8.3.1.4	Nanomaterial functionalization	287
8.3.1.5	Nanoprobe–biomolecule interaction	289
8.3.1.6	Drug delivery route and in vivo targeting	290
8.3.2	Conventional Nanoprobes	290
8.3.2.1	Gold-based nanomaterials	291
8.3.2.2	Semiconductor quantum dots	295
8.3.2.3	Photodynamic therapy	296
8.3.3	Oxide-Based Bioimaging Probes	297
8.3.3.1	Iron oxide–based magnetic bioimaging probes	297
8.3.3.2	Rare earth oxide–based nanoprobes	298
8.3.3.3	Silica-based nanoprobes	299
8.3.3.4	Zinc oxide (ZnO)–based nanoprobes	299
8.3.4	Newer Generation Nanoprobes	300
8.3.4.1	III–V semiconductor nanoprobes	300
8.3.4.2	Lanthanide-based nanoprobes	301
8.3.4.3	Carbon-based nanomaterials as nanoprobes	311
8.4	Conclusion	314

9. Band Energy and Crystal Structure Employing Density Functional Theory 323

Piyush Dua and Avanih Kumar Srivastava

9.1	Importance of Oxide Nanostructures	323
9.2	Zinc Oxide Nanostructures	327
9.2.1	1D ZnO Nanostructures	327
9.2.2	Stability of Various ZnO 1D Nanostructures	328
9.2.3	Geometric and Electronic Structures of Pristine ZnO (6,0) SWNT	329
9.3	TiO ₂ Nanostructures	329
9.3.1	TiO ₂ Nanosheets	332
9.4	Summary	334

10. Paramagnetic Lattice Defects in Natural Crystalline Quartz 345

Shin Toyoda

10.1	Introduction	346
10.2	Paramagnetic Centers Observable in Natural Crystalline Quartz	347
10.2.1	Aluminum Hole Center	347
10.2.2	Germanium Centers	348
10.2.3	Titanium Centers	349
10.2.4	E ₁ ' Center	349
10.3	Formation of the E ₁ ' Center	351
10.4	Decay of Oxygen Vacancies	354
10.5	Formation of Oxygen Vacancies	355
10.6	Applications to Provenance Research	360
10.7	Impurity Centers	362
10.8	Summary	365

11. ZnO Nanoparticles: Defect Structure, Space-Charge Depletion Layer, and Core–Shell Model 371

Emre Erdem and Rüdiger-A. Eichel

11.1	Introduction	371
------	--------------	-----

11.2 Possible Defect Centers in Undoped ZnO Nanomaterials	373
11.2.1 Bulk Defects	374
11.2.2 Surface Defects	376
11.3 Defect Centers in Doped ZnO	376
11.4 Defect Chemistry in ZnO	377
11.5 High-Field, High-Frequency EPR	378
11.6 Space-Charge Depletion Layer and Core-Shell Model	382
11.6.1 Core-Shell Model	383
<i>Index</i>	391
