

12th CIRP Conference on Computer Aided Tolerancing (CIRP CAT 2012)

Procedia CIRP Volume 10

**Huddersfield, United Kingdom
18 – 19 April 2012**

Editors:

X. Jiang

ISBN: 978-1-62993-597-3

TABLE OF CONTENTS

Preface	1
<i>X. Jiang, L. Mathieu, A. Weckenmann</i>	
Statistical Tolerance Analysis of a Mechanism with Gaps based on System Reliability Methods	2
<i>P. Beaucaire, N. Gayton, E. Duc, J. Dantan</i>	
Statistical Tolerancing based on Variation of Point-set	9
<i>J. Yang, J. Wang, Z. Wu, N. Anwer</i>	
Statistical Dynamic Specifications Method for Allocating Tolerances	17
<i>C. Hernandez, R. Tutsch</i>	
A Novel Approach for 3D Part Inspection Using Laser-plane Sensors	23
<i>N. Audfray, C. Mehdi-Souzani, C. Lartigue</i>	
A Simpler and More Formal Geometric Tolerancing Model	30
<i>P. Leonard, E. Pairel, M. Giordano</i>	
Numerical Investigation into the Impact of Dimensional and Geometric Tolerances on the Long-life Fatigue Strength of Mechanical Components	37
<i>P. Gust, C. Schluer</i>	
Cost Estimation Method for Variation Management	44
<i>S. Mirdamadi, A. Etienne, A. Hassan, J. Dantan, A. Siadat</i>	
Inspection Strategies and Multiple Geometric Tolerances	54
<i>G. Moroni, S. Petro</i>	
Optical Multi-Sensor-Measurements in the Shop by Compensating Environmental Influences	61
<i>A. Weckenmann, J. Bernstein</i>	
Accelerated Surface Measurement Using Wavelength Scanning Interferometer with Compensation of Environmental Noise	70
<i>H. Muhamedsalih, X. Jiang, F. Gao</i>	
A Tolerance Analysis Method for Rotating Machinery	77
<i>J. Guo, J. Hong, Z. Yang, Y. Wang</i>	
Algorithm to Calculate the Minkowski Sums of 3-polytopes: Application to Tolerance Analysis	84
<i>D. Teissandier, V. Delos, L. Homri</i>	
Synthetic Error Modeling for NC Machine Tools based on Intelligent Technology	91
<i>X. Yao, J. Fu, Y. Xu, Y. He</i>	
Volumetric Error Compensation for the MScMS-II	98
<i>M. Galletto, L. Mastrogiacono, G. Moroni, S. Petro</i>	
An Investigation of the Repeatability of Nonrigid Parts Measurements: A Case Study of an Aluminum Panel	105
<i>G. Abenhaim, A. Desrochers, A. Tahan</i>	
Curvature-based Registration and Segmentation for Multisensor Coordinate Metrology	112
<i>H. Zhao, N. Anwer, P. Bourdet</i>	
Methodic Design of a Customized Maturity Model for Geometrical Tolerancing	119
<i>A. Weckenmann, G. Akkasoglu</i>	
Computed Tomography as a Tool for Tolerance Verification of Industrial Parts	125
<i>P. Muller, A. Cantatore, J. Andreasen, J. Hiller, L. Chiffre</i>	
Profile Tolerance Verification for Free-form Surfaces Using Medial Axis Transform	133
<i>K. Kale, B. Gurumoorthy</i>	
An Efficient Divide-and-Conquer Algorithm for Morphological Filters	142
<i>S. Lou, X. Jiang, P. Scott</i>	
Adaptive Inspection Plans in Coordinate Metrology based on Gaussian Process Models	148
<i>R. Ascione, G. Moroni, W. Polini, D. Romano</i>	
A New Method to Characterize the Structured Tessellation Surface	155
<i>W. Zeng, X. Jiang, P. Scott, T. Li</i>	
A Novel Algorithm of Posture Best Fit based on Key Characteristics for Large Components Assembly	162
<i>L. Zheng, X. Zhu, R. Liu, Y. Wang, P. Maropoulos</i>	
A Sequential Constraint Solver to Simulate Assembling Operations for Tolerance Analysis	169
<i>P. Franciosa, S. Gerbino, S. Patalano</i>	
Form Errors Impact in a Rotating Plane Surface Assembly	178
<i>J. Grandjean, Y. Ledoux, S. Samper, H. Favreliere</i>	
To Analytically Estimate the 3D Position Deviation of a Holes Pattern due to Fixturing	186
<i>A. Armillotta, G. Moroni, W. Polini</i>	

A Concurrent Design Method for Functional Tolerance and Structure based on the Principle of Decomposition and Reconstitution	194
<i>H. Zhang, Y. Cao, Y. Wei, J. Yang</i>	
Least-squares Fit of Measured Points for Square Line-profiles	203
<i>J. Davidson, S. Savaliya, J. Shah</i>	
Strategy for Testing Conformance to Geometric Dimensioning & Tolerancing Standards	211
<i>S. Frechette, A. Jones, B. Fischer</i>	
An Adaptive Sampling Approach for Digitizing Unknown Free-form Surfaces based on Advanced Path Detecting	216
<i>K. Lu, W. Wang, Y. Wu, Y. Wei, Z. Chen</i>	
On Neural Networks' Ability to Approximate Geometrical Variation Propagation in Assembly	224
<i>L. Andolfatto, F. Thiebaut, M. Douilly, C. Lartigue</i>	
Surface Texture Specification, the More Complete the Better?	233
<i>Q. Qi, X. Jiang, P. Scott, W. Lu</i>	
Hierarchization of Characteristics Applied to the Component Approval Strategy	238
<i>A. Hoecke</i>	
An Information Model for Surface Metrology	251
<i>T. Li, L. Blunt, X. Jiang, W. Zeng</i>	
Three Dimensional Manufacturing Tolerance Design Using Convex Sets	259
<i>J. Zhang, L. Qiao</i>	
Tolerance Analysis and Re-distribution of A Machine Tool Spindle by Negative Tolerancing	267
<i>J. Tsai, S. Wu</i>	
The Assessment of Straightness and Flatness Errors Using Particle Swarm Optimization	271
<i>C. Cui, T. Li, L. Blunt, X. Jiang, H. Huang, R. Ye, W. Fan</i>	
A Generic Method for the Worst Case and Statistical Tridimensional Tolerancing Analysis	276
<i>M. Mansuy, M. Giordano, P. Hernandez</i>	
Dimensional Stability and Variance of Carbon Fiber Reinforced Plastics – Current State and Necessary Future Developments	283
<i>P. Steinle, M. Bohn</i>	
Tolerance Analysis Approach based on the Classification of Uncertainty (Aleatory/Epistemic)	287
<i>J. Dantan, N. Gayton, A. Qureshi, M. Lemaire, A. Etienne</i>	
Establishing the Energy Profile for Geometric Variations of a Planar Surface	294
<i>G. Ameta</i>	
Methodology for Requirement-driven Tolerance Specification of Bevel Gears	299
<i>S. Watrin, H. Binz, B. Lindeloof</i>	
An Ideal Mating Surface Method Used for Tolerance Analysis of Mechanical System Under Loading	306
<i>J. Guo, J. Hong, Y. Wang, Z. Yang</i>	
New Multimedia Geometrical Tolerancing Course	312
<i>Z. Humienny, M. Berta</i>	
First Coordinate Measurements Uncertainty Evaluation Software Fully Consistent with the GPS Philosophy	317
<i>W. Jakubiec, W. Plowucha</i>	
Process Plans and Manufacturing Dimensions for the Steering of Machining: The Copilot-Pro® Methodology	323
<i>E. Pairel, E. Goldschmidt, B. Vayre, B. Abdelhakim, M. Pillet</i>	
Web-enabled, Real-time, Quality Assurance for Machining Production Systems	332
<i>J. Michaloski, Y. Zhao, B. Lee, W. Rippey</i>
