Contents

Preface xi

1 Engineering materials 1
1.1 Introduction 1
1.2 The requirements 2
1.3 The materials 3
1.4 Structure of materials 6
1.5 Processes 13
1.6 The materials society 13

2 Properties of materials 15
2.1 Introduction 15
2.2 Properties 15
2.3 Costs 21
2.4 Data sources 22

3 Mechanical testing 25
3.1 Introduction 25
3.2 The tensile test 25
3.3 Hardness tests 30
3.4 Impact tests 37
3.5 Creep 40
3.6 Fatigue 41
3.7 Other mechanical tests 43
3.8 Factor of safety 46

4 The crystal structure of metals 48
4.1 Introduction 48
4.2 From gas to solid 48
4.3 Metal crystals 49
4.4 Impurities in cast metals 53
4.5 The influence of cooling rates on crystal size 54

5 Casting process 57
5.1 Introduction 57
5.2 Ingot-casting 57
5.3 Sand-casting 58
5.4 Die-casting 60
5.5 Centrifugal-casting 61
5.6 Investment-casting 62

</table>
16.3 Properties of copper 218
16.4 Copper and alloys 218
16.5 The brasses 220
16.6 Tin bronzes 224
16.7 Aluminium bronzes 229
16.8 Copper–nickel alloys 229
16.9 Other copper alloys 232

17 Aluminium and its alloys 235
17.1 Introduction 235
17.2 Extraction of aluminium 235
17.3 Properties of aluminium 236
17.4 Aluminium alloys 237
17.5 Wrought alloys which are not heat-treated 240
17.6 Cast alloys which are not heat-treated 241
17.7 Wrought alloys which are heat-treated 242
17.8 Cast alloys which are heat-treated 248

18 Other non-ferrous metals and alloys 250
18.1 Introduction 250
18.2 Nickel and its alloys 250
18.3 Titanium and its alloys 255
18.4 Magnesium-base alloys 258
18.5 Zinc-base alloys 259
18.6 Bearing metals 261
18.7 Other metals 264

19 Plastics materials and rubbers 268
19.1 Introduction 268
19.2 Types of plastics 268
19.3 Thermoplastics 271
19.4 Thermoplastic materials 274
19.5 Thermosets 287
19.6 Thermoset materials 288
19.7 Elastomers 295
19.8 Recycling of polymers 299

20 Properties of plastics 301
20.1 Introduction 301
20.2 Crystal and glass states 301
20.3 Mechanical properties 303
20.4 Additives 310
20.5 Shaping plastics 312
20.6 Machining polymers 316

21 Ceramics 317
21.1 Introduction 317
21.2 Silicate-based ceramics 318
## 21.3 Asbestos
21.4 Clay products
21.5 Engineering ceramics
21.6 Properties of ceramics
21.7 Cement
21.8 Semiconductors

## 22 Glasses
22.1 Introduction
22.2 Composition and structure of glass
22.3 Glass-transition temperature
22.4 Glass manufacture
22.5 The properties of glass
22.6 Glasses and their uses
22.7 Metallic glasses

## 23 Composite materials
23.1 Introduction
23.2 Particle-hardened composites
23.3 Dispersion-hardened materials
23.4 Mortar and concrete
23.5 Tarmacadam

## 24 Fibre-reinforced composite materials
24.1 Introduction
24.2 Unidirectional composites
24.3 Fibres
24.4 Matrix materials
24.5 Mechanical properties
24.6 Fibre-composite manufacture
24.7 Uses of fibre-reinforced composites
24.8 Reinforced wood
24.9 Reinforced concrete

## 25 Methods of joining materials
25.1 Introduction
25.2 Adhesives
25.3 Soldering and brazing
25.4 Welding
25.5 Arc-welding processes
25.6 Electric resistance welding
25.7 Thermo-chemical welding
25.8 Radiation welding
25.9 Solid-state welding
25.10 Structure of welds
25.11 Welding of plastics
