

Proceedings of the 14th international conference of the **eu**ropean
society for **p**recision **e**ngineering and **n**anotechnology

June 2nd – 6th 2014
Dubrovnik, Croatia

Volume I

Editors:
R. Leach

Proceedings Compilation:
N. Charlton
D. Nyman
D. Phillips

	Keynotes	19V1
K2	Technological Advances in Super Fine Finishing A.T.H. Beaucamp, Y. Namba <i>Dept. of Mech. Eng., Chubu University, 1200 Matsumotocho, Kasugai, Japan.</i>	21V1
K3	Evolution and Development of In-situ Automated Optical Inspection Applied to the Macro-, Micro- and Nano-scale Prof. Liang-Chia Chen <i>Department of Mechanical Engineering, National Taiwan University</i>	40V1
	Oral Session 1: Renewable Energy Technologies	43V1
O1.1	Production and accuracy challenges at wind energy systems Gert Goch ¹ , Wolfgang Knapp ² , Frank Härtig ³ ¹ <i>University of North Carolina at Charlotte (UNCC), Charlotte, NC, USA</i> ² <i>Eidgenössische Technische Hochschule (ETH),-Zürich, Switzerland</i> ³ <i>Physikalisch-Technische Bundesanstalt (PTB), Braunschweig, Germany</i>	45V1
O1.2	Replication of a large size Fresnel type concentration lens for photovoltaic solar cell using spin coating Sung-Ki Nam ¹ , Dong-Yoon Yoo ¹ , Chabum Lee ² , Dong-Ho Lee ² , Sun-Kyu Lee ¹ ¹ <i>Gwangju Institute of Science and Technology, South Korea</i> ² <i>University of South Carolina, USA</i>	51V1
O1.3	The FP7 NMP project Solardesign: On-the-fly alterable Thin-film solar modules for design driven applications N. Adamovic ¹ , A. Zimmermann ² , W. Brenner ¹ ¹ <i>TU Vienna, Institute of Sensor and Actuator Systems, Austria</i> ² <i>Sunplugged GmbH, Austria</i>	55V1
O1.4	Design and fabrication of a coating research machine to explore the nanometer scale coating of glass tubes for Concentrating Solar Power (CSP) systems C.Sansom ¹ , X.Tonnellier ¹ , R.Read ¹ , J.Nicholls ¹ , R.Dorey ¹ ¹ <i>Cranfield University, UK</i>	59V1
	Oral Session 2: Precision Engineering for Medical Products	75V1
O2.1	Effect of machining parameters on precision machining of zirconia ceramics using heated cutting tools Toru Kizaki, Takafumi Kitaguchi, Naohiko Sugita, Mamoru Mitsuishi <i>Department of Mechanical Engineering, School of Engineering, The University of Tokyo,</i>	77V1

O2.2	<p>Development of a teleoperated robotic system for retinal surgery</p> <p>A. Gijbels¹, E.B. Vander Poorten¹, P. Stalmans², D. Reynaerts¹ R. Ambata¹ ¹<i>Department of Mechanical Engineering, University of Leuven, Belgium</i> ²<i>Department of Ophthalmology, University Hospital of Leuven, Leuven, Belgium</i></p>	81V1
O2.3	<p>X-ray computed tomography for wear measurement of prosthetic components</p> <p>S. Carmignato¹, F. Zanini¹, M. Balcon², E. Savio² ¹<i>Department of Management and Engineering, University of Padua, Italy</i> ²<i>Department of Industrial Engineering, University of Padua, Italy</i></p>	85V1
O2.4	<p>Evaluation of vacuum venting and variotherm process for improving the replication by injection moulding of high aspect ratio micro features for biomedical applications</p> <p>M. Sorgato¹, G. Lucchetta¹, E. Savio¹ ¹<i>Department of Industrial Engineering, University of Padova, via Venezia 1, 35131 Padova, Italy</i></p>	89V1
	Oral Session 3: Additive Manufacturing for Precision Engineering	111V1
O3.1	<p>Additive manufacturing in precision engineering applications</p> <p>D. Loncke <i>ASML Netherlands B.V., The Netherlands</i></p>	113V1
O3.2	<p>Study on dissimilar metal fabrication with direct metal lamination by using arc discharge</p> <p>Takeyuki Abe¹, Hiroyuki Sasahara¹ ¹<i>Department of Mechanical Systems Engineering, Tokyo University of Agriculture and Technology, Japan</i></p>	117V1
O3.3	<p>Quality assurance for the complete process chain of Additive Manufacturing with modern metrology techniques</p> <p>G. Kreiseler¹, J. Kroll¹, S. Fulga^{1,2}, I. Effenberger¹ ¹<i>Fraunhofer Institute for Manufacturing Engineering and Automation, Germany</i> ²<i>Politehnica University of Timisoara, Romania</i></p>	121V1
O3.4	<p>Applicability of chemical vapour polishing of additive manufactured parts to meet production-quality.</p> <p>D.B. Pedersen, H.N. Hansen, J.S Nielsen, G. D'Angelo <i>Technical University of Denmark, Department of Mechanical Engineering</i></p>	125V1

	Oral Session 4: Nano and Micro Metrology	143V1
O4.1	Accuracy enhancement of five-axis machining by controller based compensation C. Brecher ¹ , J. Flore ¹ , J. Behrens ¹ , C. Wenzel ¹ <i>¹Fraunhofer Institute for Production Technology IPT, Germany</i>	145V1
O4.2	A simple defect detection technique for high speed roll-to-roll manufacturing A. Krysiński ^{1,2} , J. M. Coupland ³ , R. K. Leach ¹ , G. M. H. Flockhart ² <i>¹National Physical Laboratory, Hampton Road, Teddington, Middlesex, TW11 0LW, UK</i> <i>²Centre for Microsystems and Photonics, University of Strathclyde, Glasgow, Scotland, G1 1XW, UK</i> <i>³Loughborough University,</i>	149V1
O4.3	A novel approach to scanning probe metrology with 3D sensitivity V. Fokkema ¹ , A.J.M. Moers ² , E.J.C. Bos ² , K.R. Koops ¹ <i>¹VSL, The Netherlands, ²Xpress Precision Engineering, The Netherlands</i>	153V1
O4.4	Using grating based X-ray contrast modalities for metrology J. Angel ¹ , T. Lauridsen ² , R. Feidenhansl ^{1,2} , M. S. Nielsen ² , L. De Chiffre ¹ <i>¹Department of Mechanical Engineering, Technical University of Denmark, DK-2800 Kgs. Lyngby, Denmark</i> <i>²University of Copenhagen, Niels Bohr Institute, Nanophysics, DK-2100 København Ø, Denmark</i>	157V1
O4.5	Identification and compensation of volumetric errors with highly accurate grid encoder T. Boye ¹ , G. Günther ¹ <i>¹HEIDENHAIN, Germany</i>	161V1
	Oral Session 5: Ultra Precision Machines	325V1
O5.1	Enhanced tool cutting edge detection for ultra precision diamond machining applying a conventional setting system W. Reiser, C. Brecher, C. Wenzel, J. M. Ellinghaus <i>Blum-Novotest GmbH, Germany; Fraunhofer IPT, Germany</i>	327V1
O5.2	A magnetically preloaded air bearing stage with 5-DOF motion error compensation S.K. Ro ¹ , B.K. Lee ¹ , G. Khim ¹ , J.K. Park ¹ <i>¹Korea Institute of Machinery and Materials, South Korea</i>	331V1
O5.3	Compact XYC-table fluid planar drive system for micro milling B. Denkena, K. M. Litwinski, M. Bergmeier <i>Institute of Production Engineering and Machine Tools (IFW), Leibniz Universität Hannover, Germany</i>	335V1

- O5.4** **Development of vertical-spindle rotary surface grinding machine for large-scale silicon-wafers –static stiffness of grinding spindle and worktable–** **339V1**
A.Yui¹, A.Honda¹, T.Kitajima¹, H.Saito², X.Lu³, A.H.Slocum⁴
¹*National Defense Academy, Japan*
²*Okamoto Machine Tool, Japan*
³*The University of British Columbia, Canada*
⁴*Massachusetts Institute of Technology, USA*

Posters Sessions 1 - 5

Session 1: Renewable Energy Technologies

- P1.01** **River flow energy harvesting by employing piezoelectric eels** **63V1**
E. Kamenar, S. Zelenika, D. Blažević, I Šamanić
University of Rijeka – Faculty of Engineering & Centre for Micro and Nano Sciences and Technologies,
- P1.02** **Experimental study of friction reduction of micro dimples on cylindrical surface** **67V1**
Rendi Kurniawan¹, Tae Jo Ko¹
¹*Yeungnam University 1 and South Korea*
²*Yeungnam University 2 and South Korea*
- P1.03** **High-yield production and manipulation of Si/Ge nanoparticles for energy applications** **71V1**
Seongbeom Kim^{1*}, Dong Suk Kim², Jeong Chul Lee², Jin Young Kim^{1*}
¹*Ulsan National Institute of Science and Technology (UNIST), Republic of Korea*
²*Korea Institute of Energy Research (KIER), Republic of Korea*

Session 2: Precision Engineering for Medical Products

- P2.01** **Needle type temperature probe for both diagnosis and treatment of musculoskeletal pain** **93V1**
Sung-Ki Nam¹, Hyung-II Kim¹, Chang-Ho Byun¹ and Sun-Kyu Lee¹
¹*Gwangju Institute of Science and Technology, South Korea*
- P2.02** **Manufacturing of micro fluidic moulds by combining micro milling and laser structuring** **97V1**
A. Schubert, S. Gross, U. Eckert, J. Edelmann
Fraunhofer Institute for Machine Tools and Forming Technology IWU, Germany

- P2.05** **Dimensional quality control of Ti-Ni dental file by optical coordinate metrology and computed tomography** **102V1**
J.A. Yagüe-Fabra¹, G. Tosello², S. Ontiveros¹, R. Jiménez³, J. Rasmussen²
¹*I3A, Universidad de Zaragoza, Spain*
²*Dep. Mechanical Engineering, Technical University of Denmark, Denmark*
³*Centro Universitario de la Defensa, Zaragoza, Spain*

- P2.06** **Novel fluidic pump design for application in an eye surgery system** **106V1**
B.J. Aalderink¹, H. Jacobs¹, P. Teijgeler²
¹*DEMCON Advanced Mechatronics, Enschede, The Netherlands*
²*D.O.R.C. Dutch Ophthalmic Research Center, Zuidland, The Netherlands*

Session 3: Additive Manufacturing for Precision Engineering

- P3.01** **Rendering of surface-geometries at job-generation level for camouflaging the layered nature of Additively Manufactured parts.** **129V1**
D.B. Pedersen, H.N. Hansen, J.S Nielsen, G. D'Angelo
Technical University of Denmark, Department of Mechanical Engineering

- P3.02** **Freeform precision motion solutions through high tech Additive Manufacturing** **134V1**
G. van Baars, J. Smeltink, M. Barink, M. Limpens, J. de Vreugd, J. van der Werff
TNO, The Netherland

- P3.03** **Additive manufacturing for concrete: a 3D printing principle** **139V1**
H. Valkenaers¹, D. Jansen¹, A. Voet¹, A. Van Gysel¹, E. Ferraris¹
¹*KU Leuven - Department of Mechanical Engineering - Campus De Nayer*

Session 4: Nano and Micro Metrology

- P4.01** **Metrology and characterisation of defects on barrier layers for thin film flexible photovoltaics** **165V1**
M.S. Elrawemi¹, L. Blunt¹ and L. Fleming¹.
¹*University of Huddersfield, UK*

- P4.02** **Absolute distance sensing by dual laser interferometry** **169V1**
K. Thurner¹, P.-F. Braun¹, K. Karrai¹
¹*attocube systems AG, Germany*

P4.03	Investigation of shape measurement method for large-diameter silicon wafer with additional support Yukihiko ITO ¹ , Wataru NATSU ² , Masanori KUNIEDA ³ ¹ <i>Tokyo Metropolitan College of Industrial Technology, Japan</i> ² <i>Tokyo University of Agriculture and Technology, Japan</i> ³ <i>The University of Tokyo, Japan</i>	173V1
P4.04	An interferometric auto-focusing method for on-line defect assessment on a roll-to-roll process using wavelength scanning interferometry H. Muhamedsalih, L. Blunt, H. Martin, X. Jiang and M. Elrawemi <i>University of Huddersfield, UK</i>	177V1
P4.05	Precision measurement technique for rough surface object using self-beat signals of optical frequency comb Taro Onoe, Zongluo Yang, Satoru Takahashi, Kiyoshi Takamasu, Hirokazu Matsumoto <i>The University of Tokyo, Hongo 7-3-1, Bunkyo-ku, Japan</i>	181V1
P4.06	Tactile scanning behaviour of a micro CMM R.H. Bergmans, H.J. Nieuwenkamp, G.J.P. Kok <i>VSL Dutch Metrology Institute, The Netherlands</i>	185V1
P4.07	Surface and thickness measurement of a transparent film using three-wavelength interferometry K. Kitagawa <i>Toray Engineering Co., Ltd., Japan</i>	189V1
P4.08	Wide-range precision displacement measurements by image analysis of diffraction light Y. Uchida ¹ , S. Tachino ¹ , and F. Ozaki ¹ , ¹ <i>Department of Mechanical Engineering, Aichi Institute of Technology</i> <i>1247 Yachigusa, Yakusa-cho, Toyota 470-0392, Japan</i>	193V1
P4.09	In-situ characterisation of the metrological properties of nanoindentation instruments Z. Li, U. Brand, R. Popadic, S. Gao ¹ <i>Department of Mechanical Engineering, Technical University of Denmark, Denmark (DTU)</i>	197V1
P4.10	Toward an automatic measurement of micro cutting tool Giovanni Moroni, Wahyudin P. Syam, Stefano Petró <i>Department of Mechanical Engineering, Politecnico di Milano, Via La Masa 1, 20156 Milan, Italy</i>	201V1
P4.11	In-situ determination of the spring constant of soft AFM cantilevers using a MEMS nanoforce transducer S. Gao, Z. Li, U. Brand <i>Physikalisch-Technische Bundesanstalt, Bundesallee 100, Braunschweig, Germany</i>	205V1

- P4.12 Strategies to improve the measuring time for industrial X-ray 3D Computed Tomography** 209V1
 E. Uhlmann^{1,2}, D. Oberschmidt², N. Sawczyn¹
¹*Institute for Machine Tools and Factory Management, Technische Universität Berlin, Germany*
²*Fraunhofer IPK Institute for Production Systems and Design Technology, Germany*
- P4.13 Characterisation of surfaces produced by robot-assisted polishing (RAP)** 213V1
 K. Mohaghegh, L. De Chiffre
Technical University of Denmark, Denmark
- P4.14 Traceology for polishing process control** 217V1
 Z. Dimkovski, S. Rebggiani, B.-G. Rosén
Halmstad University, Sweden
- P4.16 3D measurement and characterization of ultra-precision aspheric surfaces** 221V1
 N. El-Hayek^{1,2}, H. Noura², N. Anwer³, M. Damak^{1,4}, O. Gibaru¹
¹*Arts et Métiers ParisTech (ENSAM), Laboratory of Information Sciences and Systems (LSIS), 8 Boulevard Louis XIV, 59046 Lille, France*
²*Laboratoire Commun de Métrologie (LNE-CNAM), Laboratoire National de Métrologie et d'Essais (LNE), 1 Rue Gaston Boissier, 75015 Paris, France*
³*Ecole Normale Supérieure de Cachan, The University Research Laboratory in Automated Production, 61 avenue du Président Wilson, 94235 Cachan, France*
⁴*GEOMNIA: 3D Metrology Engineering and Software Solutions, 165 Avenue de Bretagne, EuraTechnologies 59000 Lille, France*
- P4.17 Evaluation of the potential of inline tool wear monitoring in micro milling** 225V1
 Prof. Dr.-Ing Robert Schmitt^{1,2}, Dipl.-Ing Christian Hill²
¹*WZL RWTH Aachen/Fraunhofer IPT, Aachen, Germany*
²*Fraunhofer Institute for Production Technology - IPT, Germany*
- P4.18 Long term stability of silicon roughness standards** 229V1
 G. Baršić¹, S. Mahović¹, M. Katić¹, V. Šimunović¹
¹*Faculty of Mechanical Engineering and Naval Architecture, Croatia*
- P4.19 The effect of scattered light sensor orientation on roughness measurement of curved polished surfaces** 233V1
 L. Pilný, G. Bissacco, L. De Chiffre
Technical University of Denmark, Denmark
- P4.20 Flow-Induced nanovibrations in two types of air bearing spindles** 237V1
 M. Liebers, H. Arneson, B. Knapp, J. Martin, D. Oss
Professional Instruments Company, Hopkins, Minnesota, USA

- P4.21** **Development of surface plasmon resonance microscope with gratings for nanocomposite dispersion state observation** **241V1**
 T. Maehara¹, K. Ichihashi², Y. Mizutani³, and T. Iwata³
¹The University of Tokushima in Japan
²Graduate School of Advanced Technology and Science, The University of Tokushima in Japan
³Institute of Technology and Science, The University of Tokushima in Japan
- P4.22** **Measurements of the thickness of a paint film on a metal surface by a double-modulation terahertz ellipsometer** **245V1**
 H.Uemura¹, Y.Mizutani¹, T.Yasui^{1,2}, and T.Iwata¹
¹Institute of Technology and Science, University of Tokushima in Japan
²Graduate School of Engineering Science, Osaka University in Japan
- P4.23** **A study on the surface roughness of a thin HSQ coating on a fine milled surface** **249V1**
 K. Mohaghegh¹, H.N. Hansen¹, H. Pranov², G. Kofod²
¹Department of Mechanical Engineering, Technical University of Denmark, Denmark
²InMold Biosystems, Denmark
- P4.24** **Accurate and traceable calibration of critical dimensions based on CD-AFM and TEM** **253V1**
 G. Dai, K. Hahm, J Fluegge, H Bosse
Physikalisch-Technische Bundesanstalt (PTB), Germany
- P4.25** **Improving the accuracy of EDM manufacturing to the limits using an advanced clamping system and a μ CMM** **257V1**
 M. Neugebauer, R. Meeß
Physikalisch-Technische Bundesanstalt (PTB), Germany
- P4.26** **An evaluation of stiffness modulating techniques for a micro-CMM tactile probe** **261V1**
 K. Alblalaid¹, P. Kinnell¹, S. Ratchev¹
¹Precision Manufacturing Centre, University of Nottingham, UK.
- P4.27** **Observations of the interaction forces between a measurement surface and a vibrating probe for a micro-scale CMM** **265V1**
 Daewoong Hong¹, Young-Man Choi², and Jaehwa Jeong¹
¹Department of Control and Instrumentation Engineering, Korea Univ., South Korea
²Department of Printed Electronics Advanced Manufacturing Systems Research Division, Korea Institute of Machinery & Materials, South Korea
- P4.28** **A 5 degrees of freedom μ CMM** **269V1**
 A. Küng, F. Meli and A. Nicolet
Federal Institute of Metrology METAS

- P4.29** **Optimising capacitive displacement sensors to achieve long term, sub-nanometre stability for nano-positioning applications** **273V1**
 Bugnar, H. Patel, S.G. Alcock, S. Scott
Diamond Light Source, Oxfordshire, OX11 0DE, United Kingdom
- P4.30** **Finite element analysis of micro gears for the prediction of their lifetime** **277V1**
 B. Haefner¹, M. Quiring¹, M. Hirtler¹, G. Lanza¹
¹*Karlsruhe Institute of Technology, wbk Institute of Production Science, Germany*
- P4.31** **Multi-scale geometric analyses and the metrology of surfaces created by micro-EDM** **281V1**
 A.C.Lemoine¹, M.A.Gleason¹, S.P. Kordell¹, J.M.Hyde¹, J.Montgomery², C.A. Brown¹
¹*Surface Metrology Lab, WPI, Worcester, MA, USA;* ²*SmaTec Lisle, Illinois, USA*
- P4.32** **Estimating deformation of a free-floating wafer chuck** **285V1**
 J.G. Vogel, J.W. Spronck, R.H. Munnig Schmidt
Delft University of Technology, The Netherlands
- P4.33** **Cylindrical lenses based spectral domain low-coherence interferometry for on-line surface inspection** **289V1**
 Dawei Tang, F. Gao, X. Jiang
University of Huddersfield, Huddersfield HD1 3DH, UK
- P4.34** **An experimental study of computed tomography error sources by using an open CT system** **293V1**
 J.A. Yagüe-Fabra¹, L. Franco², R. Jiménez³, S. Ontiveros¹
¹*ISA, Universidad de Zaragoza, Spain*
²*AIMEN Technological Center, Spain*
³*Centro Universitario de la Defensa, Zaragoza, Spain*
- P4.35** **Comparison of ultra-precision tactile and optical profilometry freeform measurement systems** **297V1**
 Th. Arnold, G. Boehm, H. Paetzelt
Leibniz-Institut für Oberflächenmodifizierung, Germany
- P4.36** **Interferometric characterization of dimensional and thermal stability of materials and joints** **301V1**
 H. Lorenz, R. Schödel
Physikalisch-Technische Bundesanstalt (PTB), Germany
- P4.37** **Investigation on the thermal behaviour of an ultra-high precision system used in dimensional metrology** **305V1**
 K. Bouderbala^{1,2}, H. Nouria¹, E. Videcoq², M. Girault², J. Salgado¹ and D. Petit²
¹*Laboratoire Commun de Métrologie (LCM), Laboratoire National de Métrologie et d'Essais (LNE), 1 rue Gaston Boissier, Paris, 75015 Paris, France.*
²*Prime Institut, Téléport 2, 1 avenue Clément Ader, BP 40109, F86961 Futuroscope Chasseneuil cedex*

P4.38	Performance verification of a dual sensor stage A.Yacoot ¹ , J. Mountford ¹ , M. Tedaldi ¹ , B. Reid ² , S. Levy ² ¹ National Physical Laboratory, Teddington, Middlesex TW11 0LW UK ² Queensgate Instruments, Woodland Road, Torquay, Devon, TQ2 7AY, UK	309V1
P4.39	Dynamic characterization of an air bearing spindle as a tool to predict asynchronous error B. Knapp ¹ , D. Oss ¹ , D. Arneson ¹ , M. Liebers ¹ , and E. Marsh ² ¹ Professional Instruments Company, Hopkins, Minnesota, USA ² The Pennsylvania State University, University Park, Pennsylvania, USA	313V1
P4.40	Study of a capacitive sensing technology for the measurement of perpendicularity of narrow-deep slot-walls in precision molds S.T. Chen ¹ , S.M. Lin ² ^{1,2} National Taiwan Normal University, Taiwan, R.O.C.	317V1
P4.42	Increasing sensitivity while reducing crosstalk of the force sensor in atomic force microscopes J. Steininger, R. Paris, G. Schitter Vienna University of Technology, Automation and Control Institute (ACIN), Austria	321V1
Session 5: Ultra Precision Machines		
P5.01	Characteristics of bearing stiffness of a spindle with high stiffness water hydrostatic thrust bearing for ultra-precision machine tool Yohichi Nakao ¹ , Kohei Yamada ¹ , Kohei Nagasaka ¹ , Kenji Suzuki ¹ ¹ Kanagawa University, Japan	343V1
P5.02	Linear stepping actuator with ultra-fine resolution using coaxial differential ball screw S. Fukada ¹ , T. Mimura ¹ , H. Sato ¹ , D. Kobayashi ¹ ¹ Shinshu University, Japan	347V1
P5.04	The design and development of a novel 'Twin Turret' machining platform Mark Stocker. Cranfield Precision, Division of Cinetic Landis Ltd, UK	351V1
P5.05	Experimental validation of the reproducibility of a position measurement system with nanometre uncertainty N. Bosmans ¹ , J. Qian ¹ , D. Reynaerts ¹ ¹ KU Leuven, Department of Mechanical Engineering, Belgium	356V1

P5.06	Precision positioning system with high-speed FPGA-based closed loop control E. Kamenar ¹ , S. Zelenika ¹ , M. Franulović ¹ <i>¹University of Rijeka – Faculty of Engineering & Centre for Micro and Nano Sciences and Technologies, Vukovarska 58, 51000 Rijeka, CROATIA</i>	360V1
P5.07	Influence of production tolerances on the performance of a piezoelectric nanometer positioning system J. Rosseels, M. Uyttebroeck, W. Heylen, J. Swevers, D. Reynaerts <i>KU Leuven, Department of Mechanical Engineering, Belgium</i>	364V1
P5.08	Development of a mechanical amplifier considering the dynamic behaviour at resonance excitation C. Oberländer, J.P. Wulfsberg <i>Helmut-Schmidt-University, University of the Federal Armed Forces Hamburg, Germany</i>	368V1
P5.10	Linear nano-positioning stage using ferrofluid bearings R. Deng, S. van Veen, M. Café, J.W. Spronck, and R.H. Munnig Schmidt <i>PME: Mechatronic System Design, Delft University of Technology, the Netherlands</i>	372V1
P5.11	Vibration isolation system design and analysis for ultraprecision roll machining machine J. Shim, J.S. Oh, C.H. Park <i>Advanced Manufacturing Systems Division, Korea Institute of Machinery & Materials, KOREA</i>	376V1
P5.12	Test setup for the characterization of hydrostatic bearings with micro gap sizes M. Fritz ¹ , T. Oettl ¹ , D. Janitza ¹ , B. Kuhfuss ² <i>¹KERN Microtechnik GmbH, Germany</i> <i>²bime Bremen Institute for Mechanical Engineering</i>	380V1
P5.13	Design and experiment of PZT 3-DOF stage Hak Jun Lee, Jae Hyun Park, Myeong Hyeon Kim, Si Woong Woo, Jae Hun Jung, Dae Gab Gweon ¹ , Chun Sam Song, Ei Ho Choi ² <i>¹Korea Advanced Institute of Science and Technology, Korea</i> <i>²Laser Technology Solution, Korea</i>	384V1
P5.14	Numerical modelling of piezoelectric vibration energy scavenging bimorphs D. Blažević, S. Zelenika <i>University of Rijeka - Faculty of Engineering & Centre for Micro and Nano Sciences and Technologies, Vukovarska 58, 51000 Rijeka, CROATIA</i>	389V1
P5.15	Hybrid voice coil actuator with novel high-precision force control device based on incremental sensors T. Haase, R. Gloess <i>Physik Instrumente (PI) GmbH & Co. KG</i>	393V1
