

**ISEC
2014**

**16th International Stirling
Engine Conference**
24-26 September 2014 Bilbao, Spain

Contents

Akazawa, T. <i>SiC Ceramics Heater for Free Piston Type of Stirling Engine</i>	1
Alexakis, A. <i>A 2-Dimensional Computational Fluid Dynamics Approach to the Analysis of the Working Process of a Wankel-Type Stirling Machine</i>	11
Barreno, I. <i>Numerical study of the friction losses in Stirling engine heat exchangers</i> ..	21
Bello, F. <i>A CFD Analysis of the Air Flow through the Matrix Regenerator of Stirling Engines</i>	58
Campos, A. <i>Simulation of a latent heat thermal storage system within a Stirling based microCHP residential installation</i>	72
Cheng, C-H. <i>Experimental and Theoretical Study of a 90-K Beta-Type Stirling Cooler with Rhombic-Drive Mechanism</i>	87
Cordon, M. <i>A non-conventional double acting Stirling Engine design methodology</i> ...	97
Costa, C. <i>Figure of Merit Analysis of a Stirling Engine Regenerator Matrix through Experimental Studies</i>	112
Deetlefs, I.N. <i>Design, simulation, manufacture and testing of a free-piston Stirling engine electric generator</i>	122
Flannery, B. <i>Hybrid Stirling Engine-Adsorption Chiller for Truck APU Applications</i>	132
Fula, A. <i>Mechanical design and first test results of an Ericsson engine</i>	142
Gheith, R. <i>Parametric optimization of a Gamma type Stirling engine</i>	151
Ghozzi, S. <i>New configuration of Medium Temperature Difference (MTD) Free-Piston Stirling Engine for Power Generation</i>	160
G.Gkounis. <i>Assessment of the Performance of IC and Stirling engine based Micro Combine Heat and Power systems in UK residential conditions</i>	168
Glushenkov, M. <i>Regenerative Heat to Mechanical Energy Converter with Dense Working Fluid</i>	177

Gonzalez, A. <i>Design and building of a Stirling engine for microgeneration as a learning experience for future Industrial Engineers</i>	187
Gorga, R.D. <i>An Optimization Algorithm of Stirling Engine Performance for Low-Grade Heat Recovery</i>	199
Gros, J. <i>How to start researching in thermoacoustics</i>	217
Gschwendtner, M. <i>The Myth about Dead Volume in Stirling Engines</i>	229
Hamaguchi, K. <i>Experiment of a Single-Piston Stirling Engine and its Simple Analysis</i>	250
Hiratsuka, Y. <i>Development of 150W at 70K Split Stirling Cryocooler for High-temperature Superconductor Devices</i>	256
Huang, Y. <i>Analysis and Experiment on Exhaust Heat Recovery of a Gasoline Engine by a Stirling Engine</i>	261
Ibsaine, R. <i>A new heat driven compressor for heat pump application</i>	271
Jacquot, A. <i>Modeling of the thermodynamics, kinematics, and dynamics of a beta Stirling engine</i>	280
Kato, Y. <i>Which is better for regenerator matrix, metal gauze or smooth channel?</i>	286
Khuel, H-D. <i>Operating Characteristics of a Laboratory-Scale, Convertible Stirling-Vuilleumier-Hybrid CHP System Including a Reversed-Rotation Stirling Mode</i>	294
Langdon-Arms, S. <i>Performance of Heat-powered Unconstrained 4 Cylinder Double-acting Alphas-type Liquid Piston Stirling Cooler</i>	305
Lintao, W. <i>Dynamic balance design technology for a V-type Stirling engine</i>	320
Lu, T. <i>Numerical and Experimental Investigation of a MILD Combustion Burner for Stirling Engines</i>	325
Mahkamov, K. <i>A Novel Solar Cooling system Based on a Fluid Piston Converter</i>	333
Malliotakis, E. <i>An evaluation of energy saving potentials for districts served by distributed Stirling m-CHP units</i>	341
Mangion, R. <i>A medium temperature solar powered Stirling engine – a case of project based learning</i>	359

Mangion, R. <i>Development of a Stirling engine powered by parabolic trough collectors</i>	370
Malliotakis, E. <i>Performance monitoring of Stirling CHP units in an industrial district in Poland</i>	387
Marra, F.S. <i>Setup of an integrated Stirling Engine - Fluidized Bed (SE-FB) experimental system</i>	399
Martinez, J.A. <i>Portable solar cooker that can also generate electric power</i>	410
Mesonero, I. <i>Characterisation and simulation of a restored V-160 Stirling Engine</i>	418
Nilsson, M. <i>Performance testing of a Stirling engine, with implementation of high speed pressure measurements in the working gas channel</i>	430
Peng, H. <i>Research results of the characteristics in the Stirling engine regenerator</i>	442
Pfeiffer, J. <i>Analytical Modeling of Appendix Gap Losses in Stirling Cycle Machines</i> ..	451
Pinedo, B. <i>Tribological study of different sealing solutions for a Stirling engine</i>	464
Rogdakis, E. <i>Numerical Analysis of Stirling Engines Using Advanced Thermodynamic Quasi-steady Approaches</i>	472
Rogdakis, E. <i>Performance Characteristics of the Vuilleumier Heat Pump</i>	490
Saito, T. <i>A small-scale co-generation system fueled by wood pellets</i>	513
Sala, F. <i>Preliminary design criteria of Stirling Engines taking into account real gas effects</i>	521
Sowale, A. <i>Numerical Modelling of Free Piston Stirling Cycle Machines</i>	535
Stempka, J. <i>Concept of modified crank mechanism, characteristics and thermodynamic processes within the Stirling engine</i>	542
Stolyarov, S.P. <i>Heat exchange model in Stirling Engine regenerator</i>	551
Takeuchi, M. <i>The passive generation system combined wood chip boiler and Stirling engine</i>	559
Toda, F. <i>Proposal of the Performance Analysis for Stirling Engine</i>	568

Ulloa, C. <i>Application of a transient model for simulation of a Stirling-Based CHP system</i>	576
Vavra, J. <i>Tools for a Real Stirling Engine Cycle Thermodynamic Analysis</i>	588
Yang, H-S. <i>Development of a 500-W Beta-Type Stirling Engine by a Modified Non-Ideal Adiabatic Model</i>	600
Zhou, J. <i>Optimum design of piston rod used in Wobble Member Transmission Mechanism</i>	609
Poster session.....	616
Awards.....	618
