Abstract 1

1 Introduction 3

2 WCET analysis and multi-core platforms 7
   2.1 A background on WCET analysis 7
   2.2 Challenges in WCET analysis for multi-core architectures 17

3 WCET analysis for multi-core platforms 21
   3.1 Modeling shared caches 22
   3.2 Modeling shared buses 40
   3.3 Modeling timing interactions 63
   3.4 Discussion about analysis complexity 88
   3.5 Experimental evaluation 91
   3.6 Data caches and branch target buffers 105
   3.7 A survey of related techniques 107

4 WCET optimization for multi-core platforms 109
   4.1 Optimization of worst-case response time 109
   4.2 WCRT optimization approach 110
   4.3 Cost function 112
   4.4 Optimization algorithm 114
4.5 Simplified algorithm ........................................ 123
4.6 Memory consumption ....................................... 124
4.7 Experimental results ....................................... 125
4.8 A survey of related techniques ............................ 131

5 Time-predictable multi-core architecture .............. 135
  5.1 Resource isolation ........................................ 135
  5.2 Usage of software controlled memory ................ 138
  5.3 Extension of instruction set architecture (ISA) .... 141

6 Discussion and future work ............................... 143
  6.1 Summary of recent development ......................... 143
  6.2 Limitations imposed by current approaches .......... 144
  6.3 Other limitations ....................................... 145
  6.4 Analysis pessimism ..................................... 146
  6.5 Research challenges in future .......................... 147

7 Conclusions .................................................. 151

Acknowledgements ............................................. 153
