

**Bulk and Surface Plastic Deformation of Aluminium Alloys with
Consideration to Environmental Effects**

Doctoral Thesis
To be awarded the degree
Doctor of Engineering (Dr.-Ing.)

Submitted by
Mustafa Ahmed Abdulstaar, M.Sc.
from Baghdad, Iraq

Approved by
The Faculty of Natural and Materials Science,
Clausthal University of Technology

Date of Oral Examination
01.10.2014

Table of Contents

1	Introduction	1
1.1	Introduction	1
1.2	Aims and objectives.....	2
2	Literature Survey	3
2.1	Typical properties of aluminium	3
2.2	Classification of aluminium alloys	4
2.2.1	Commercially pure aluminium (Al 1050).....	5
2.2.2	Aluminium-Magnesium-Silicon alloy (Al 6082).....	5
2.2.3	Aluminium-Magnesium alloy (Al 5083).....	8
2.3	Corrosion behaviour of aluminium.....	8
2.3.1	Pitting corrosion	9
2.4	Severe plastic deformation (SPD)	11
2.4.1	Microstructural fragmentation by SPD	12
2.4.2	Limitation of SPD methods.....	13
2.5	Mechanical surface treatments	15
2.5.1	Shot peening	16
2.5.2	Ball-burnishing.....	18
3	Experimental Procedure	20
3.1	Materials	20
3.2	Thermo-mechanical treatment	20
3.2.1	Heat treatment	20
3.2.2	Rotary Swaging	21
3.3	Tensile Testing	22
3.4	Microstructure analysis.....	23
3.4.1	Optical microscopy (OM)	23
3.4.2	Scanning electron microscopy (SEM).....	23
3.5	Mechanical surface treatments	24
3.5.1	Shot peening (SP).....	24
3.5.2	Ball-burnishing (BB).....	25
3.6	Surface layer properties	26
3.6.1	Surface roughness	26
3.6.2	Microhardness	27

3.6.3	Residual stress analysis	27
3.7	Fatigue testing.....	28
3.8	Corrosion fatigue testing	29
3.9	Electrochemical measurements	30
4	Results and Discussion	33
4.1	Microstructures	33
4.2	Tensile Properties	34
4.3	Severe plastic deformation of Al 1050 by rotary swaging	36
4.3.1	Microstructure evolution during rotary swaging and post-swaging annealing ..	36
4.3.2	Mechanical properties development during rotary swaging and post-swaging annealing	41
4.3.3	Effect of rotary swaging and post-swaging annealing on fatigue properties	44
4.3.4	Effect of rotary swaging on corrosion resistance of Al 1050.....	47
4.4	Surface treatments	50
4.4.1	Effects on surface roughness.....	50
4.4.2	Effects on microhardness-depth profile	51
4.4.3	Effects on residual stress-depth profile	53
4.4.4	Effects on fatigue properties	55
4.4.5	Effects on pre-corrosion	58
4.4.6	Effects on corrosion fatigue	62
	Conclusions	68
	References	70
