Chemistry and Biochemistry

Chapter 1	The Chemistry of Selenium	3
	<i>Daniel Perrone, Mariana Monteiro, and Juliana Côrtes Nunes</i>	
1.1	Chemical Properties of Selenium	3
1.2	Organoselenium Compounds	6
1.3	Selenium in Soil and Foods	9
	Summary Points	11
	Keys Facts of Selenoproteins	11
	Definitions and Explanations of Key Terms	12
	List of Abbreviations	13
	References	13
Chapter 2	Biochemistry and Molecular Biology of Selenoproteins	16
	<i>Noelia Fradejas, Doreen Braun, Sandra Seeher, and Ulrich Schweizer</i>	
2.1	Selenoproteins in Mammals	16
2.1.1	Thioredoxin Reductases	16
2.1.2	Glutathione Peroxidases	17
2.1.3	Selenoprotein P	17
2.1.4	Selenoprotein N	22
2.1.5	Iodothyronine Deiodinases	22
2.1.6	Selenoprotein R is a Methionine-Sulfoxide-Reductase	22
2.1.7	Selenoproteins Involved in Protein Biosynthesis, Folding or Degradation	23

Food and Nutritional Components in Focus No. 9
Selenium: Chemistry, Analysis, Function and Effects
Edited by Victor R. Preedy

© The Royal Society of Chemistry 2015

Published by the Royal Society of Chemistry, www.rsc.org

2.2 Selenoprotein Biosynthesis	23
2.2.1 Biosynthesis of Selenocysteine	23
2.2.2 Translation of Selenoproteins	26
Summary Points	32
Key Facts: Recoding of UGA	32
Key Facts: Mutations in SECISBP2	32
Definitions	33
List of Abbreviations	33
References	34
Chapter 3 Synthesis of Organoselenium Derivatives of Biological Relevance	40
<i>Óscar López, Penélope Merino-Montiel, and José G. Fernández-Bolaños</i>	
3.1 Introduction	40
3.2 Isoselenocyanates and Related Selenoxo Compounds	41
3.3 Selenosugars	45
3.4 Ebselen and Derivatives	52
3.5 Miscellaneous	55
Summary Points	58
Key Facts	58
Definitions of Words and Terms	58
List of Abbreviations	59
Acknowledgements	60
References	60
Chapter 4 Chemistry and Activity of Selenium Dioxide and Selenite Ions	65
<i>Daniel L. Morris</i>	
4.1 Introduction	65
4.2 Oxidation State and Speciation in Aqueous Solution	66
4.3 SeO_3^{2-} as a Nutritional Supplement	68
4.4 Pro-Oxidant Behavior	68
4.4.1 Oxidative Activity of SeO_2	68
4.4.2 ROS Formation and SeO_3^{2-}	69
4.4.3 Chemopreventive and Chemotherapeutic Activity of SeO_3^{2-}	70
4.5 Interactions with Metal Ions	71
4.5.1 Role of SeO_3^{2-} in Mediating Metal Toxicity	71
4.5.2 SeO_2 and SeO_3^{2-} as Antioxidants	72
4.6 Conclusion	73

Summary Points	74
Key Facts	74
Definitions and Explanation of Key Terms	76
List of Abbreviations	77
References	77

Chapter 5 Chemistry and Biochemistry: Selenium Species in Fish 81

*Mamoru Haratake, Kaori Koga, Sakura Yoshida,
Takeshi Fuchigami, and Morio Nakayama*

5.1 Background	81
5.2 Selenoproteins	82
5.3 Low Molecular Mass Organoselenium Compounds	85
5.4 Conclusions	92
Summary Points	92
Key Facts	92
Key Facts of Selenoprotein L (SelL)	92
Key Facts of Fish 15 kDa Selenoprotein-like Protein (Fep15)	93
Definitions of Words and Terms	93
List of Abbreviations	94
References	94

Analysis

Chapter 6 Current Analytical Strategies and Techniques Related to Selenoproteins in Foods 103

*Miguel Ángel García-Sevillano, Macarena González-Fernández,
Tamara García-Barrera, and José Luis Gómez-Ariza*

6.1 Introduction	103
6.1.1 Selenoproteins in Food	104
6.2 The Role of ICP-MS in Selenoproteins Speciation	104
6.3 Sample Preparation Procedures for Selenoproteins Speciation	106
6.3.1 Conventional Sample Preparation Procedures for Selenoproteins Speciation	106
6.3.2 New Trends in Extraction Procedures for Selenoproteins from Food Matrices	107
6.3.3 Cleanup Procedures	108
6.3.4 Stability of Selenoproteins During Storage	109
6.4 Current Analytical Strategies and Hyphenated Techniques for Selenoproteins Speciation in Foods	109

6.4.1 Separation and Detections Techniques for Selenoproteins Based on Liquid Chromatography	110
6.4.2 Electrophoretic Techniques	113
6.4.3 Isotopic Dilution Analysis in Selenoproteins Quantification	114
6.4.4 Speciation Methods to Evaluate Selenium Status in Human	115
6.5 Selected Cases Studies	115
6.5.1 Selenoproteins in Meat	115
6.5.2 Selenoproteins in Seafood	116
6.5.3 Selenoproteins in Milk	117
6.5.4 Selenoproteins in Vegetables	118
6.5.5 Selenoproteins in Food Supplements	118
Summary Points	121
Key Facts of Selenium in Foods	121
Key Facts of Selenium Analysis in Foods	121
Definitions of Words and Terms	122
List of Abbreviations	122
References	124

Chapter 7 Focus on Determination of Selenocysteine and Selenomethionine in Foodstuffs of Animal Origin by 2D Size-Exclusion Reversed-Phase HPLC-ICP-MS **126**

Katarzyna Bierla, Simon Godin, Ryszard Lobinski, and Joanna Szpunar

7.1 Introduction	126
7.2 Selenium in Foodstuffs of Animal Origin	128
7.2.1 Meat and Meat Products	128
7.2.2 Dairy Products	129
7.2.3 Eggs	130
7.2.4 Fish	130
7.3 Determination of Selenomethionine and Selenocysteine by 2D HPLC-ICP-MS	131
7.3.1 Analytical Procedure	131
7.3.2 Selenoamino Acid Distribution in Foodstuffs of Animal Origin	135
7.4 Conclusions	138
Summary Points	138
Key Facts of Selenoaminoacids Determination	138
Definitions of Key Terms	139
List of Abbreviations	140
References	140

Chapter 8	Some Aspects of Selenium Determination Employing Solid-Phase Extraction and Atomic Absorption Spectrometry	144
	<i>Ana Lúcia Silva Figueiredo de Paiva, Ayla Campos do Lago, Grazielle Cabral de Lima, Célio Wisniewski, Cristiana Schmidt de Magalhães, and Pedro Orival Luccas</i>	
8.1	Introduction	145
8.1.1	Se species and Concentrations in Different Samples	145
8.1.2	Techniques Used in Selenium Determination	148
8.1.3	Solid-Phase Extraction (SPE) to Determine Se	149
	Summary Points	152
	Key Facts: Analytical Aspects in Selenium Determination	152
	Definitions of Words and Terms	153
	List of Abbreviations	154
	References	155
Chapter 9	Identification of Selenometabolites in Animals and Plants by Mass Spectrometry	158
	<i>Yasumitsu Ogra</i>	
9.1	Analytical Techniques for the Detection and Identification of Selenometabolites	158
9.1.1	Inductively Coupled Argon Plasma Mass Spectrometry and Speciation	158
9.1.2	Electrospray Ionization Mass Spectrometry	160
9.1.3	Other Techniques	161
9.2	Identification of Selenometabolites	162
9.2.1	Selenosugars	162
9.2.2	Unique Selenoamino Acids	163
9.3	Conclusion	168
	Summary Points	168
	Key Facts of Selenometabolites	168
	Definitions and Explanations of Key Terms	169
	List of Abbreviations	169
	References	170
Chapter 10	Bioavailability of Selenium and Selenium Compounds in Foodstuff by <i>In Vivo</i> Testing	173
	<i>Jorge Moreda-Piñeiro and Antonio Moreda-Piñeiro</i>	
10.1	Introduction	173
10.1.1	Bioaccessibility/Bioavailability/Bioactivity Definitions	174
10.1.2	Bioavailability Assessment: <i>In Vivo</i> Tests	176

10.2	<i>In Vivo</i> Testing for Assessing Selenium Species Bioaccessibility/Bioavailability	179
10.2.1	<i>In Vivo</i> Tests in Humans	179
10.2.2	<i>In Vivo</i> Tests in Animals	182
	Summary Points	187
	Key Facts of <i>In Vivo</i> Testing for Bioavailability Assessment	188
	Definitions of Words and Terms	188
	Abbreviations and Acronyms	189
	References	189
Chapter 11	Bioavailability of Selenium and Selenium Compounds in Foodstuff by <i>In Vitro</i> Testing	197
	<i>Jorge Moreda-Piñero and Antonio Moreda-Piñero</i>	
11.1	Introduction	197
11.2	Bioavailability Assessment: <i>In Vitro</i> Tests	198
11.2.1	<i>In Vitro</i> Static Models	199
11.2.2	<i>In Vitro</i> Dynamic Models	203
11.3	<i>In Vitro</i> Gastrointestinal Extraction Methods to Selenium Species Bioaccessibility/Bioavailability in Foodstuff	204
11.3.1	Oral Bioaccessibility/Bioavailability of Selenium in Food Samples	204
11.3.2	Effect of Food Processing on Selenium Species Bioaccessibility/Bioavailability	212
11.3.3	Effect of Sample Composition on Selenium Species Bioaccessibility/Bioavailability	213
	Summary Points	214
	Key Facts of <i>In Vitro</i> Testing for Bioavailability Assessment	215
	Definitions of Words and Terms	215
	Abbreviations and Acronyms	216
	References	216
Chapter 12	Assay of Selenium in Dietary Supplements	221
	<i>Krzysztof Jankowski, Anna Tyburska-Staniewska, and Marta Jankowska</i>	
12.1	Introduction	221
12.2	Basic Characteristics of Selenium-Containing Dietary Supplements	223
12.3	Sample Pretreatment and Separation of Selenium	224
12.4	Instrumental Techniques for Selenium Assay in Dietary Supplements	226
12.4.1	Electrochemical Methods	226
12.4.2	Spectroscopic Methods	227
12.5	Selenium Speciation in Dietary Supplements	229

<i>Contents</i>	xiii
12.6 Conclusions	232
Summary Points	233
Key Facts	234
Key Facts of Inductively Coupled Plasma/Optical Emission Spectrometry (ICP-OES)	234
Key Facts of Inductively Coupled Plasma/Mass Spectrometry (ICP-MS)	234
Key Facts of Electrothermal Atomic Absorption Spectrometry (ETAAS)	234
Definitions of Words and Terms	234
List of Abbreviations	236
References	236
Chapter 13 Selenium as a Modulator of Fourier Transform Infrared Spectra in Cancer	240
<i>Anshoo Malhotra and D. K. Dhawan</i>	
13.1 Introduction	240
13.1.1 Sources of Selenium	241
13.1.2 Selenoproteins and their Biosynthesis	242
13.1.3 Selenium – Its Role in Cancer	243
13.2 Fourier Transform Infrared (FTIR) Spectroscopy	245
13.2.1 FTIR – Applications in Medical Sciences	246
13.2.2 FTIR Spectra	247
13.3 Selenium and FTIR Spectra	248
13.4 Future Prospects	252
Summary Points	253
Key Facts	253
Definition of Words and Key Terms	253
List of Abbreviations	254
References	254
Chapter 14 Selenium Status Assessment by Questionnaire in Clinical and Cardiovascular Studies	258
<i>Yap-Hang Chan and Hung-Fat Tse</i>	
14.1 Introduction: Need for Selenium Status Assessment Tools in Clinical Studies	258
14.2 Clinical Assessment Tools for Long-Term Exposures	259
14.2.1 Food-Frequency Questionnaires (FFQ)	259
14.2.2 Other Questionnaire-Based Assessment Options	260
14.3 Comparison of FFQ with Clinical Biomarkers for Assessment of Selenium Status	260
14.3.1 Duration of Exposure Assessed – Long Term <i>versus</i> Short Term	260

14.3.2	Categorized <i>versus</i> Continuous Estimates	261
14.3.3	Geographical Variations	261
14.3.4	Seasonality	262
14.3.5	Assessment and Adjustment for Other Dietary Factors	262
14.3.6	Recall Bias	262
14.3.7	Noninvasiveness	263
14.3.8	Timeliness	263
14.3.9	Selenium as an Acute Phase Reactant	263
14.4	Summary and Future Research Prospects	263
	Summary Points	265
	Definition of Key Words and Terms	265
	Key Facts of Food-Frequency Questionnaire (FFQ)	266
	List of Abbreviations	267
	References	267

Function and Effects

Chapter 15	Functional Foods Enriched in Selenium	273
	<i>Tamara García-Barrera, José Luis Gómez-Ariza, Verónica Gómez-Jacinto, Inés Garbayo Nores, Carlos Vilchez Lobato, and Zivan Gojkovica</i>	
15.1	Functional Foods, Nutraceuticals and Ready-to-Use Therapeutic Foods: Selenium-Enriched Foods	273
15.2	Selenium Biotransformation in Microalgae and Yeast	275
15.2.1	Selenized Yeast as Selenium Source	275
15.2.2	Microalgae as Selenium-Containing Functional Food	276
15.3	Nutritional Significance and Toxicological Aspects of Selenium Species	279
15.4	Selenium Bioaccessibility and Bioavailability in Food	281
15.4.1	Selenium Bioavailability in Fish	282
15.4.2	Selenium Bioavailability in Meat	283
15.4.3	Selenium Bioavailability in Milk and Derived Products	283
15.4.4	Selenium Bioavailability in Se-Fortified Foodstuffs	283
15.5	Antagonistic and Synergistic Interactions of Selenium with Other Elements	284
15.5.1	Selenium Against Mercury Toxicity	285
15.5.2	The Interaction of Selenium and Iodine in Human Health: Food Supplemented with Iodine and Selenium	285

Summary Points	287
Key Facts of <i>Saccharomyces cerevisiae</i>	287
Definitions of Words and Terms	288
List of Abbreviations	288
References	289

Chapter 16 Selenium in Parenteral Nutrition 291
Malki Miller and Sathyaprasad Burjonrappa

16.1 A Historical Overview	291
16.2 Physiology and Biological Function	293
16.3 Dosage Guidelines	293
16.4 A Focus on Critical Care	295
16.4.1 Sepsis	296
16.4.2 Burns	296
16.4.3 Gastrointestinal Surgery	297
16.5 Pharmacology	297
16.6 Monitoring Selenium Status	298
16.7 Summary	299
Summary Points	299
Key Facts	300
Key Facts of the Development of Parenteral Nutrition	300
Key Facts of Parenteral Nutrition	301
Definitions	302
List of Abbreviations	303
References	303

Chapter 17 Biofortification of Fruit and Vegetables with Selenium 304
Marian McKenzie, Ross Lill, Stephen Trolove, and David Brummell

17.1 Introduction	304
17.2 Brassica Crops	306
17.3 Alliums	309
17.4 Leafy Vegetables	310
17.5 Shoots and Sprouts	311
17.6 Fruit	312
17.7 Root Crops	314
17.8 Mushrooms	314
17.9 Conclusions and Future Prospects	315
Summary Points	316
Key Facts of Human Se Nutrition	317
Key Facts of Se Metabolism in Plants	317
Definitions of Words and Terms	318
List of Abbreviations	318
Acknowledgements	319
References	319

Chapter 18	Biofortification of Legumes with Selenium in Semiarid Conditions	324
	<i>M. J. Poblaciones, S. Rodrigo, and O. Santamaria</i>	
18.1	Selenium	324
18.2	Importance of Legumes in Cropping Systems	327
18.3	Legumes in the Mediterranean Diet	327
18.4	Selenium Biofortification in the Main Legume Crops under Mediterranean Conditions	328
18.4.1	Beans	329
18.4.2	Peas	329
18.4.3	Chickpeas	331
18.4.4	Lentils	333
18.5	Other Considerations for Se Agronomic Biofortification under Semiarid Conditions	334
	Summary Points	335
	References	336
Chapter 19	Selenium in Saliva and Impact on Health	341
	<i>Ebru Emekli-Alturfan, Ayşen Yarat, and Serap Akyüz</i>	
19.1	Saliva and Salivary Components	341
19.2	Salivary Selenium	342
19.3	Selenium and Teeth	344
19.4	Selenium and Dental Caries	345
19.5	Cariogenic Effect of Selenium in Laboratory Animals	346
19.6	The Role of Selenium in the Antioxidant Activity of Saliva	347
19.7	Conclusion	349
	Summary Points	349
	Key Facts of Salivary Selenium	349
	Key Facts of Selenium and Teeth	350
	Definitions of Words and Terms	350
	List of Abbreviations	351
	References	351
Chapter 20	Selenohomolanthionine and Its Potential Use in Medicine and Nutrition	354
	<i>Yasumitsu Ogra</i>	
20.1	Identification of Selenohomolanthionine and Its Derivatives in Biota	354
20.2	Biosynthetic Pathway of Selenohomolanthionine in Plants	356
20.3	Metabolic Pathway of Selenohomolanthionine in Animals	357
20.4	Antiseptic Effect of Selenohomolanthionine	358

<i>Contents</i>	xvii
Summary Points	359
Key Facts of Selenohomolanthionine	360
Definitions and Explanations of Key Terms	360
List of Abbreviations	360
References	360
Chapter 21 Therapy with Selenium Cocktails and Co-use of Lycopene and Selenium	363
<i>Letteria Minutoli, Francesco Squadrito, Domenica Altavilla, and Herbert Marini</i>	
21.1 Selenium	363
21.1.1 General Aspects	363
21.1.2 Selenium Deficiency	364
21.1.3 Selenium and Cancer	364
21.1.4 Selenium and Other Human Diseases	365
21.1.5 Selenium Toxicity	365
21.2 Lycopene	367
21.2.1 General Aspects	367
21.2.2 Lycopene and Cancer	367
21.2.3 Lycopene and Other Human Diseases	368
21.3 Co-use of Selenium, Lycopene and <i>Serenoa repens</i>	368
21.4 Conclusions	371
Summary Points	371
Key Facts of Selenium, Lycopene and <i>Serenoa repens</i>	372
List of Abbreviations	372
References	373
Chapter 22 Selenium and Cancer	377
<i>Katarzyna Jaworska-Bieniek, Marcin Lener, Magdalena Muszyńska, Pablo Serrano-Fernández, Grzegorz Sukiennicki, Katarzyna Durda, Tomasz Gromowski, Satish Gupta, Józef Kładny, Anna Wiechowska-Kozłowska, Tomasz Grodzki, Ewa Jaworowska, Jakub Lubiński, Barbara Górecka-Szyl, Grażyna Wilk, Tomasz Huzarski, Tomasz Byrski, Cezary Cybulski, Jacek Gronwald, Tadeusz Dębniak, Olgierd Ashuryk, Aleksandra Tołoczko-Grabarek, Antoni Morawski, Rodney J. Scott, Anna Jakubowska, and Jan Lubiński</i>	
22.1 Introduction	378
22.2 Forms of Selenium and Its Metabolism in Organisms	378
22.3 Medical Applications	380
22.3.1 Selenium and Cancer Mortality	380
22.3.2 Selenium as a Marker of Selection for Control Examinations in Surveillance	381
22.3.3 Selenium and Cancer Prevention	383
22.4 Summary	384

Summary Points	385
Key Facts	385
Definitions of Words and Terms	385
List of Abbreviations	387
References	387
Chapter 23 Selenium and Skin Cancer	391
<i>Pamela B. Cassidy, Sancy A. Leachman, and Philip J. Moos</i>	
23.1 Etiology and Genetics of Skin Cancers	391
23.2 Dietary Selenium and Selenium Metabolism	393
23.3 Se and the Risk for Skin Cancer	394
23.4 Selenoproteins and the Skin	398
23.4.1 Glutathione Peroxidases	398
23.4.2 Methionine Sulfoxide Reductase	399
23.4.3 Thioredoxin Reductases	399
23.5 Studies of Se and Skin Cancer in Model Systems	400
Summary Points	403
Key Facts of Skin Cancer	403
Definitions and Explanations of Key Terms	403
List of Abbreviations	404
References	405
Chapter 24 Selenium and Cancer Metastasis	408
<i>Yu-Chi Chen and Andrea M. Mastro</i>	
24.1 Selenium in Cancer	408
24.1.1 Overview	408
24.1.2 Preclinical and Clinical Evidence for the Beneficial Effect of Se in Regard to Cancer	409
24.2 Se in Cancer Metastasis	410
24.2.1 Se and Cancer Metastasis	410
24.2.2 Metastasis	412
24.2.3 The Effect of Se on Cell Integrity and Epithelial-Mesenchymal Transition (EMT)	412
24.2.4 The Effect of Se on Cell Migration, Invasion and Extracellular Matrix (ECM) Degradation	415
24.2.5 Angiogenesis	418
24.2.6 The Effects of Se on ECM Degradation and Angiogenesis	419
24.3 The Future and Challenges of the Application of Se on Cancer and Metastasis Prevention	422
Summary Points	423
Key Facts of Metastasis	423
Definitions	424
List of Abbreviations	424
References	425

Chapter 25	The Selenium and Vitamin E Cancer Prevention Trial (SELECT): Prevention of Prostate Cancer Using Selenium and/or Vitamin E in the SELECT Cancer Prevention Trial	428
	<i>Holly L. Nicastro and Barbara K. Dunn</i>	
25.1	Prostate Cancer	428
25.2	Selenium	430
25.2.1	Definition and Sources	430
25.2.2	Metabolism and Biological Activities	430
25.2.3	Nutritional Requirements	432
25.3	Vitamin E	433
25.3.1	Definition and Sources	433
25.3.2	Metabolism and Biological Activities	434
25.3.3	Nutritional Requirements	434
25.4	Rationale for SELECT	435
25.4.1	Prostate-Cancer Prevention by Selenium	435
25.4.2	Prostate-Cancer Prevention by Vitamin E	438
25.4.3	Prostate-Cancer Prevention by Selenium and Vitamin E Combined	440
25.5	SELECT	442
25.5.1	Rationale and Objectives	442
25.5.2	Agent Formulations and Dose	442
25.5.3	Trial Design and Outcome Ascertainment	443
25.5.4	Cohort	443
25.5.5	Primary Endpoint Results	444
25.5.6	Secondary Endpoints, Adverse Outcomes, and Adherence	444
25.6	Why Didn't SELECT Produce Expected Results?	447
25.6.1	Acceptance of Null Hypothesis	447
25.6.2	Agent	447
25.6.3	Cohort	448
25.6.4	Design	450
25.7	Implications and Future Directions	451
	Summary Points	452
	Key Facts	452
	Definitions of Words and Terms	453
	List of Abbreviations	454
	References	455
Chapter 26	Selenium in Autoimmune Thyroiditis	458
	<i>D. Nacamulli, D. Petricca, C. Mian, and C. Betterle</i>	
26.1	Introduction	458
26.2	Selenium Supplementation in Hashimoto Thyroiditis	461
26.2.1	Effects of Selenium Supplementation on Thyroid Autoantibodies	461

26.2.2	Effects of Selenium Supplementation on Thyroid Echogenicity	465
26.2.3	Effects of Selenium Supplementation on Circulating Cytokine Production	466
26.2.4	Effects of Selenium Supplementation on TSH and Thyroid Hormones	466
26.3	Selenium Supplementation in Postpartum Thyroiditis	466
26.4	Selenium Supplementation in Graves' Disease and Graves' Orbitopathy	467
26.5	Discussion	468
	Summary Points	472
	Key Facts	472
	Definitions of Key Terms	473
	List of Abbreviations	474
	References	475
Chapter 27	Selenoproteins in Brain	479
	<i>Ulrich Schweizer and Sandra Seher</i>	
27.1	Selenoproteins in the Brain	479
27.1.1	Mice Deficient in Selenoprotein P Paved the Way to the Discovery that Selenium is Essential for Brain Function	479
27.1.2	Selenoprotein P and Its Endocytic Receptors Rationalize a Model of Selenium Transport to the Brain	480
27.1.3	Most Selenoproteins are Expressed in Neurons	481
27.2	Functions of Selenoproteins in the Brain	482
27.2.1	Selenoproteins Are Essential for Neuronal Development and Survival	483
27.2.2	Inhibitory Interneurons of the Parvalbumin+ Class are Most Sensitive to Impaired Selenoprotein Expression	483
27.2.3	The Role of Glutathione Peroxidase 4 and Vitamin E	484
27.2.4	Other Potentially Essential Selenoproteins	485
27.3	Human Brain Disorders and Selenoproteins	486
27.3.1	Mutations in Selenocysteine Synthase in Humans Lead to Progressive Cerebello Cerebral Atrophy	487
27.3.2	Mutations in the <i>SECISBP2</i> Gene in Humans Lead to a Multisystem Disorder also Involving the Central Nervous System	487

27.3.3 Evidence that Selenoproteins are Related to Major Neurodegenerative Disorders	488

Chapter 29 Current Clinical Perspectives of Selenium in Vascular Function and Cardiomyopathy **516**

Yap-Hang Chan and Hung-Fat Tse

29.1 Introduction	516
-------------------	-----

29.2 Selenium Deficiency and Relation to Cardiovascular Events	517
--	-----

29.3 Clinical Evidence of Selenium Impacting on Vascular Function	518
---	-----

29.3.1	Clinical Observational Studies	518
29.3.2	Clinical Interventional Studies	519
29.4	Selenium in Other Endothelial Dysfunction-Related Clinical Conditions	522
29.4.1	Rheumatoid Arthritis	523
29.4.2	Pre-eclampsia	523
29.5	Selenium Deficiency, Cardiomyopathy and Heart Failure	523
29.6	Genetic Polymorphisms of Selenoprotein: Cardiovascular Implications	524
29.7	The Selenium Paradox	525
29.8	Current Recommendations and Future Directions	525
	Summary Points	526
	Key Facts	526
	The Key Facts of Heart Failure, Including Pathophysiological Features, Clinical Symptoms and Diagnosis	527
	Definitions of Words and Terms	527
	List of Abbreviations	528
	References	529
Chapter 30	Selenium and the Heart	534
	<i>Jacob Joseph</i>	
30.1	Introduction	534
30.2	Selenium Deficiency and Cardiomyopathy	535
30.2.1	Keshan Disease	535
30.3	Selenium and Ischemic Myocardial Diseases	536
30.3.1	Myocardial Infarction	536
30.3.2	Myocardial Ischemia–Reperfusion	537
30.4	Doxorubicin (Adriamycin)-Induced Cardiomyopathy and Selenium	538
30.5	Selenium, Redox–Methylation Balance and the Heart	538
30.5.1	Selenium, <i>via</i> the Methionine–Homocysteine Cycle, Affects Redox and Methylation Potential	539
30.5.2	Selenium and Myocardial Dysfunction: Role of Redox–Methylation Balance	540
30.6	Selenistasis – Selenium in Health and Disease	544
30.7	Conclusions	545
	Summary Points	546
	Key Facts	546
	Definitions of Words and Terms	547
	List of Abbreviations	547
	References	548

Chapter 31	Selenium and Kashin–Beck Disease	552
	<i>Xiong Guo, Yu-jie Ning, and Xi Wang</i>	
31.1	The History of Kashin–Beck Disease	552
31.1.1	Epidemiological Distribution	553
31.1.2	Clinical and Radiographic Changes	554
31.1.3	Hypothesis of Se Deficiency Causing KBD	556
31.2	The Etiological Relationship between Se Deficiency and Kashin–Beck Disease	556
31.2.1	Cross-Sectional Study	556
31.2.2	Prospective Studies	558
31.2.3	The Natural Decrease in KBD Prevalence	558
31.3	Biological Changes Related to Low Se in KBD Patients	559
31.3.1	Metabolic Disorders in Kashin–Beck Disease Caused by Se Deficiency	559
31.3.2	Regulatory Factors and Gene Expression in KBD	560
31.4	Short Tandem Repeats (STRs) and Single Nucleotide Polymorphisms (SNPs) in KBD Patients	561
31.5	Animal KBD Model with Low-Se Diet	562
31.6	The Preventive and Therapeutical Effect of Se Supplement	563
31.6.1	The Effect of Se Supplements on Articular Chondrocytes	564
31.6.2	Sodium Selenite Tablets	564
31.6.3	Se-Enriched Salt	565
31.6.4	Se-Fortified Wheat	565
31.6.5	Se Supplement Combined with Other Elements	566
31.6.6	Nano-Se-Chondroitin Sulfate	567
31.7	Conclusions	567
	Summary Points	567
	Key Facts of Kashin–Beck Disease (KBD)	567
	Definitions of Words and Terms	568
	List of Abbreviations	569
	References	569
Chapter 32	Selenium, the Placenta and Trophoblast Mitochondrial Oxidative Stress	572
	<i>Anthony V. Perkins</i>	
32.1	The Importance of the Placenta to Lifelong Health	572
32.2	Importance of Micronutrition to Placental Health	573
32.3	Placental Oxidative Stress	574
32.4	Mitochondrial Oxidative Stress	576

32.5	The Role of Selenium in Human Health and Reproduction	579
32.6	Importance of Selenium in Human Pregnancy	580
	Summary Points	583
	Key Facts	583
	Definitions of Words and Terms	584
	List of Abbreviations	584
	References	585
Chapter 33	Selenium and Antioxidant Microgels	589
	<i>Yushi Bai, Tiezheng Pan, Quan Luo, and Junqiu Liu</i>	
33.1	Introduction	589
33.2	Antioxidant Microgels	592
33.2.1	Microgels as “Smart” Materials to Build an Artificial Antioxidant	592
33.2.2	Microgels as Platform to Construct a Synergistic Antioxidant Enzymatic System	596
33.3	Summary and Perspective	601
	Summary Points	602
	Key Facts	602
	Key Facts of Antioxidants	602
	Key Facts of Enzyme Assay	603
	Definitions of Words and Terms	603
	List of Abbreviations	604
	References	605
	Subject Index	608
