Contents

List of contributors	xi
Woodhead Publishing Series in Food Science, Technology and Nutrition	xiii
Preface	xxv
1 Antioxidants: principles and applications	1
<i>F. Shahidi</i>	
1.1 Introduction	1
1.2 Phenolic compounds in plant foods and natural health products and their structural features	2
1.3 Mixed tocopherols	9
1.4 Green tea	10
1.5 Rosemary and other herbs and spices	11
1.6 Food processing adjuncts as antioxidants	11
1.7 Legal status of antioxidants	12
References	12
Part One Types of antioxidant for food preservation	15
2 Carotenes and xanthophylls as antioxidants	17
<i>Delia B. Rodriguez-Amaya</i>	
2.1 Introduction	17
2.2 Antioxidant activity	18
2.3 Prooxidant activity	19
2.4 Interaction with other dietary antioxidants	20
2.5 Role in human health	21
2.6 Carotenes	22
2.7 Xanthophylls	29
2.8 Final considerations	39
References	39
3 Synthetic phenolics as antioxidants for food preservation	51
<i>A. Makahleh, B. Saad, M.F. Bari</i>	
3.1 Introduction and background	51
3.2 Physical and chemical properties	53

3.3	Toxicology	53
3.4	Regulations in various countries	56
3.5	Prevalence of SPAs in food	56
3.6	Analytical methods for the determination of SPAs	61
3.7	Conclusion	74
	List of abbreviations	74
	References	75
4	Metal chelators as antioxidants for food preservation	79
	<i>K.E. Allen</i>	
4.1	Introduction	79
4.2	Catalytic metals	80
4.3	Reactive oxygen species	81
4.4	Ethylenediaminetetraacetic acid	83
4.5	Sodium tripolyphosphate	87
4.6	Citric acid	89
4.7	Nontraditional metal chelators	92
4.8	Sources of additional information	95
	References	95
5	Amino acids, peptides, and proteins as antioxidants for food preservation	105
	<i>R.E. Aluko</i>	
5.1	Introduction	105
5.2	Antioxidant properties of free amino acids	106
5.3	Antioxidant proteins	110
5.4	Antioxidant peptides and protein hydrolysates	111
5.5	Other potential health effects	132
5.6	Conclusions and future direction	133
	References	134
6	Tocopherols and tocotrienols as antioxidants for food preservation	141
	<i>Afaf Kamal-Eldin, Elizabeth Budilarto</i>	
6.1	Introduction	141
6.2	Structures and properties of tocopherols and tocotrienols	142
6.3	Tocopherols and tocotrienols as the main antioxidants for lipids: mechanisms of antioxidant action	143
6.4	Paradoxes in the antioxidant efficacy of tocopherols	145
	References	154
7	Food antioxidant conjugates and lipophilized derivatives	161
	<i>Karin Schwarz</i>	
7.1	Introduction	161
7.2	Gallic acid and its esters in oil–water emulsions	162
7.3	Partitioning of gallates in emulsions	162

7.4	Antioxidant activity of gallates in emulsions	164
7.5	Antioxidant activity of alpha-tocopherol and trolox	166
7.6	Ascorbyl palmitate and ascorbic acid	169
7.7	Sinapic acid and its conjugates	170
7.8	Activity of antioxidants and their conjugates in bulk oil, o/w and w/o emulsions	171
7.9	Activity of antioxidants and their conjugates in processed meat	172
	References	173
8	Rosemary and sage extracts as antioxidants for food preservation	177
	<i>Donald R. Berdahl, Jill McKeague</i>	
8.1	Introduction	177
8.2	Rosemary and sage – two Laminaceae (Labiatae) herbs	177
8.3	History of rosemary and sage extracts as antioxidants	179
8.4	Antioxidant species present in rosemary and sage	179
8.5	Production of extracts	195
8.6	General types of rosemary extracts available commercially	201
8.7	Application of rosemary and sage antioxidants in foods, singly and in combination with other natural antioxidants	202
8.8	Regulatory status	211
8.9	Conclusion	211
	Acknowledgements	211
	References	211
9	Tea extracts as antioxidants for food preservation	219
	<i>H. Karaosmanoglu, P.A. Kilmartin</i>	
9.1	Introduction	219
9.2	Types of tea and their contents	219
9.3	Applications of tea extracts as antioxidant food additives	223
9.4	Conclusions	229
	References	230
10	Natural plant extracts as antioxidants for food preservation	235
	<i>Chia-Jui Weng, Gow-Chin Yen</i>	
10.1	Introduction	235
10.2	Functionality of antioxidants in dietary plants	235
10.3	Antioxidant properties and application of natural plant extracts and/or bioactives	238
10.4	Commentary and future trends of food antioxidants	246
	References	247
11	Herbs and spices as antioxidants for food preservation	251
	<i>Milda E. Embuscado</i>	
11.1	Introduction	251
11.2	Classification of spices and herbs	254

11.3	Lipid oxidation in foods	255
11.4	Antioxidants from spices and herbs	257
11.5	Desirable properties of antioxidants	263
11.6	Different forms of antioxidants from spices and herbs for food application	271
11.7	Evaluation of antioxidant activity of spices and herbs	272
11.8	Summary and future trends	280
	Acknowledgement	280
	References	280
Part Two The performance of antioxidants in different food systems		285
12	Methods for the assessment of antioxidant activity in foods	287
	<i>Y. Zhong, F. Shahidi</i>	
12.1	Lipid oxidation and its action mechanisms	287
12.2	Antioxidants	288
12.3	Chemical assays	290
12.4	Antioxidant evaluation in food model systems	305
12.5	Assessment of antioxidant activity in biological model systems	317
12.6	Summary	322
	References	322
13	Synergistic interactions between antioxidants used in food preservation	335
	<i>Rong Tsao</i>	
13.1	Introduction	335
13.2	Interactions of antioxidants	337
13.3	Practical considerations in dealing with synergistic interaction of antioxidants	343
13.4	Conclusion	344
	References	344
14	The use and effectiveness of antioxidants in lipids preservation: beyond the polar paradox	349
	<i>M. Laguerre, J. Lecomte, P. Villeneuve</i>	
14.1	Introduction	349
14.2	The polar paradox paradigm: entering the antioxidant chemistry into a rational era	350
14.3	Efficacy of food antioxidants in bulk oils	354
14.4	Efficacy of food antioxidants in lipid dispersions and living cells	362
14.5	Conclusion	368
	References	369

15	The use of antioxidants in the preservation of edible oils	373
	<i>Liuping Fan, N.A. Michael Eskin</i>	
15.1	Introduction	373
15.2	Antioxidant regulatory status in fats and oils	374
15.3	Major fats and oils	375
15.4	Application of natural antioxidants in fats and oils	382
15.5	Conclusion	384
	References	384
16	The use of antioxidants in the preservation of food emulsion systems	389
	<i>C. Jacobsen, A.-D.M. Sørensen</i>	
16.1	Introduction	389
16.2	Lipid oxidation in emulsions	389
16.3	Antioxidants	391
16.4	Antioxidant protection in emulsified food products	394
16.5	Conclusions	408
16.6	Future trends	408
	References	408
17	The use of antioxidants in the preservation of cereals and low-moisture foods	413
	<i>F. Shahidi, Anoma Chandrasekara</i>	
17.1	Introduction	413
17.2	Antioxidants in cereals	414
17.3	Phenolic compounds	415
17.4	Phenolic acids	416
17.5	Flavonoids	418
17.6	Alkylresorcinols	419
17.7	Lignans	419
17.8	Avenanthramides	422
17.9	Carotenoids	424
17.10	Tocopherols and tocotrienols	425
17.11	Phytosterols	427
17.12	Phytic acid	427
	References	428
18	The use of antioxidants in ready-to-eat (RTE) and cook-chill food products	433
	<i>Anoma Chandrasekara, F. Shahidi</i>	
18.1	Introduction	433
18.2	Fruit and vegetable products	435
18.3	Cereal products	437
18.4	Meat, fish and their products	442
18.5	Beverages	443

18.6	Chocolates	443
18.7	Peanut butter	443
18.8	Conclusion	444
	References	444
19	The use of antioxidants in the preservation of snack foods	447
	<i>M. Carunchia, L. Wang, J.H. Han</i>	
19.1	Antioxidants from snack ingredients	447
19.2	Effects of snack processing on antioxidant activity	457
19.3	Antioxidants in commercial snack products	462
	Disclaimer	468
	References	468
	Index	475
