Contents

Section 1: Heat transfer enhancements

Ribbed double pipe heat exchanger: experimental analysis <i>H. H. Al-Kayiem & L. N. Al-Habeeb</i>	3
A numerical study of heat diffusion using the Lagrangian particle SPH method and the Eulerian Finite-Volume method: analysis of convergence, consistency and computational cost <i>C. A. D. Fraga Filho, D. F. Pezzin & J. T. A. Chacaltana</i>	15
The effect of flow pulsation on the heating performance of panel radiators in central heating systems: CFD analysis <i>M. Embaye, R. K. Al-Dadah & S. Mahmoud</i>	27
Entropy generation analysis of engineered heat transfer fluids under a constant surface temperature <i>G. Soriano, G. Bravo, P. Guevara & F. Porras</i>	39
The investigation of radiative heat transfer across molten mold flux film during the continuous casting of steels <i>D. W. Yoon, J. W. Cho & S. H. Kim</i>	51
An investigation into the influence of micro structures on nucleate boiling processes <i>A. Schubert, M. Zinecker, M. Hackert-Oschätzchen, M. Lausberg & A. Schulz</i>	61
Carbon nanotubes suspended in ethylene glycol yield nanofluids with enhanced heat transfer properties <i>H. B. Cheng, W. T. Ma, W. Hu, J. F. Wu, J. Xiao, Z. B. Chen, Q. J. Zhang & N. M. Wereley</i>	73

Section 2: Heat recovery

The thermal conductance of collection tubes in geothermal energy systems <i>R. L. Frederick & A. Zenteno</i>	83
Waste energy recovery analysis of a diesel engine exhaust system <i>J. Merkisz, P. Fuc, P. Lijewski & A. Ziolkowski</i>	93
The simulation of a Rankine based Waste Heat Recovery system for a heavy duty diesel engine <i>C. Paz, A. Eiris, J. Porteiro & E. Suarez</i>	103

Section 3: Heat exchangers

Analysis of the boundary conditions for pyramidal spine fins in extended surface heat transfer <i>R. G. Carranza & J. Ospina</i>	115
An experimental investigation into the effects of fin structure and surface type on the efficiency of heat exchangers used for dehumidification <i>G. Sir, Ö. Balioğlu & S. U. Onbaşıoğlu</i>	123
A concept for the integrated 3D flow, heat transfer and structural calculation of compact heat exchangers <i>F. Yang, K. Mohrlök, U. Schaeffer & R. Stier</i>	133

Section 4: Heat transfer in energy producing devices

A numerical simulation of the combustion processes of wood pellets <i>J. Ahn & H. J. Kim</i>	149
A heat transfer model of a PV panel integrated with a “Rainscreen Cladding System” <i>D. Knera & D. Heim</i>	157
Heat transfer optimization in a fluidized bed biomass gasification reactor <i>R. K. Thapa & B. M. Halvorsen</i>	169
The efficiency of a two-phase nozzle as a motion force for power generation from low-temperature resources <i>S. Vahaji, A. Akbarzadeh, A. Date, S. C. P. Cheung & J. Y. Tu</i>	179

Identification of the objective function for optimization of a Seasonal Thermal Energy Storage system <i>J. Milewski, L. Szablowski & W. Bujalski</i>	191
--	-----

Section 5: Heat and mass transfer

The computational simulation of coupled heat and moisture transport as a tool for predicting the degradation of sedimentary porous rocks in historical masonry <i>V. Kočí, Z. Pavlík, J. Fořt & R. Černý</i>	205
---	-----

CFD simulation and analysis of a gas to water two-phase closed thermosyphon-based heat exchanger <i>J. B. Ramos, A. Z. Chong, C. Tan, J. Matthews, M. A. Boocock & H. Jouhara</i>	217
--	-----

Simulation of binary mixtures condensation using higher order methods <i>H. Deng, M. Fernandino & C. A. Dorao</i>	229
--	-----

Finite element analysis of the sap flow measurement method with continuous needle heating in the sapwood of trees <i>M. Trcala & J. Čermák</i>	241
---	-----

The thermal and mechanical performance of cement-based composites with enhanced thermal insulation properties <i>Z. Pavlík, M. Záleská, M. Pavlíková & R. Černý</i>	251
--	-----

Section 6: Convection and radiation

A comparison of the efficacy of greenhouse gas forcing and solar forcing <i>R. A. Irvine</i>	263
---	-----

A parallel finite-volume spatial/angular agglomeration multigrid method for radiative heat transfer computation <i>G. N. Lygidakis & I. K. Nikolos</i>	275
---	-----

Conditioning systems by radiant surfaces: comparative analysis of thermal ceramic panels versus the conventional systems in a museum <i>V. Echarri, A. Galiano, M. I. Pérez-Millán & A. B. González-Avilés</i>	287
---	-----

The underhood aerothermal management of leakage zones: temperature measurements <i>M. Khaled, M. Ramadan, A. Elmarakbi, F. Harambat & H. Peerhossaini</i>	303
---	-----

Section 7: Multiphase flow heat transfer

The thermal performance of thermosyphons employing nanofluids <i>T. Grab & M. H. Buschmann</i>	315
---	-----

Flow instabilities in a vertical tube reboiler <i>M. Kessler & S. Kabelac</i>	325
--	-----

The experimental determination of heat transfer and pressure drop during condensation in a plate heat exchanger with corrugated plates <i>A. Müller & S. Kabelac</i>	337
--	-----

The cavitation phenomenon: a literature survey <i>A. Alhelfi & B. Sunden</i>	351
---	-----

Experiments and volume-of-fluid (VOF) simulations of a three-fluid dam-break <i>M. Furuya, Y. Oka, M. Satoh, S. Lo & T. Arai</i>	363
--	-----

Section 8: Modelling and experiments

Modelling of the thermal behaviour of heat pipes <i>B. Fadhl, L. C. Wrobel & H. Jouhara</i>	377
--	-----

The modelling of air supply system efficiency in refrigerated vehicles <i>R. A. Pitarma & J. E. Ramos</i>	391
--	-----

Heat flux from stagnation-point hydrogen-methane-air flames: experiment and modelling <i>M. S. Elmnefi, S. Staude, U. Bergmann & B. Atakan</i>	401
--	-----

Sensitivity analysis of the Künzle model: application to the study of the hygrothermal transfer in a tuffeau wall <i>I. Othmen, Ph. Poullain, A. Caucheteux & N. Leklou</i>	417
---	-----

Numerical simulation for the drying shrinkage of autoclaved aerated concrete <i>J. Kočí, J. Maděra, T. Koudelka, J. Kruis & R. Černý</i>	429
--	-----

Characterization of the temperature dependent behavior of snappy phenomenon by the switching-off of GaAs power diode structures <i>A. Koel, T. Rang & G. Rang</i>	439
The temperature reduction of components in the induction hobs of domestic kitchens by numerical and visualization models <i>E. Castillo, M. Miana, L. Sanagustin, I. Hupont, M. Valencia & S. Aranda</i>	451
Fuel temperature estimation and energy balance within an UAV integral wing fuel tank <i>P. Blázquez</i>	463
A numerical analysis of heating tissue using the two-temperature model <i>E. Majchrzak & Ł. Turchan</i>	477
 Section 9: Experimental and measuring technologies	
Quantitative measuring methods applied for the mixing phenomena of film cooling <i>K. Takeishi, M. Komiyama & Y. Oda</i>	491
The experimental determination of the thermal conductivity of melting chocolate: thermal resistance analogies and free convection boundary conditions <i>M. M. Dreger & L. Pitol-Filho</i>	505
Is the performance of a virtual sensor employed for the prediction of the ledge thickness inside a metallurgical reactor affected by the thermal contact resistance? <i>M. LeBrewx, M. Désilets & M. Lacroix</i>	517
Author index	527
