

ANNUAL TRANSACTIONS
THE NORDIC RHEOLOGY SOCIETY

VOLUME 23
2015

PAPERS PRESENTED AT
THE NORDIC RHEOLOGY CONFERENCE
KARLSTAD, SWEDEN, August 19 – 20, 2015

General papers
and
Papers from the special session on
Particulate and fibrous dispersions

Editor: R. Kádár

Contents 2015

Invited papers

- Multi Particle Tracking Microrheology Probing Structure and Flow of Heterogeneous Complex Fluids 3
N. Willenbacher
- Multi-scale modeling and advanced simulation of concentrated fibrous suspensions 5
F. Chinesta, E. Abisset-Chavanne, and R. Keunings
- Rheological requirements for continuous filament spinning of cellulose-ionic liquid solutions 13
M. Hummel, A. Michud, S. Asaadi, Y. Ma, L. K. J. Hauru, E. Hartikainen, and H. Sixta

General rheology and rheometry

- Rheological analysis of the low-temperature dynamics of bitumens 23
O.-V. Laukkanen, H. H. Winter, and H. Soenen
- Combined use of SEC/GPC, rotational, microfluidics and micro-rheology for characterization of Hyaluronic acid solutions 27
M. Larsson and J. Duffy
- Novel Vacuum Compression Molding as a Tool for Sample Preparation in Rotational Melt Rheology 35
D. Treffer, A. Troiss, and J. Khinast
- Oscillatory and compression measurements of stimuli-responsive hydrogels 37
H. Hosseini, H. Tenhu, and S. Hietala
- Macroporous alginate gels 39
E. Schuster and A. Ström
- Establishing an experimental pre-conditioning procedure for rheological characterization of oil based drilling fluids 43
D. Assembayev and V. Myrseth
- Drilling fluid rheology at challenging drilling conditions - an experimental study using a 1000 bar pressure cell 45
A. Torsvik, V. Myrseth and H. Linga

Pressure Sensitive Adhesives for Ostomy Care <i>T. Floch, O. Hassager and B. Bingól</i>	53
An enhanced rotational rheometer system with two motors <i>J. Lauger</i>	55
Effect of shear vs. extensional flow during swallowing <i>M. Stading, W. Qazi, M. Nystrom, M. Berta, M. Bulow, O. Ekberg</i>	63

Non-Newtonian fluid mechanics and flow simulations

Dynamics of stagnant Taylor bubbles in vertical upward pipe flow with Venturi obstruction and non-Newtonian liquids <i>R. W. Time and A. H. Rabenjafimanantsoa</i>	69
Characterization of microscopic drainage and breaking mechanisms in non-Newtonian water-oil emulsions <i>R. W. Time and A. H. Rabenjafimanantsoa</i>	79
Impact of jet impingement on a flat bed of particles and scour hole development mechanism in Newtonian and non-Newtonian fluids <i>A. H. Rabenjafimanantsoa and R. W. Time</i>	91
Reconstructed nonlinear dynamics and its applications to complex fluid flows: focus on melt flow extrusion instabilities <i>R. Kadar</i>	99

Particulate and fibrous dispersions

Spontaneous dispersion of particles on fluid-liquid interfaces <i>P. Singh, N. Musunuri, and I. S. Fischer</i>	109
Electric field driven hierarchical self-assembly of monolayers of mixtures of particles <i>N. Musunuri, K. Shah, M. Hossain, S. K. Gurupatham, E. Amah, I. Fischer, and P. Singh</i>	115
The effect of coherent fiber flocs on the shear strength and yield stress of cellulosic fiber suspensions <i>A. Oko, A. Swerin, J. Mackenzie, and F. Lundell</i>	123
Effect of Pluronic F127 triblock copolymer adsorption on the colloidal stability and rheological performance of silica dispersions <i>Y. Petkova-Olsson, H. Ullsten, and L. Jarnstrom</i>	125

Microfibrillated Cellulose Suspensions in Slot Flow <i>V. Kumar, D. Bousfield, and M. Toivakka</i>	131
Rheology to understand operational parameter: as a predictive method to avoid off specifications and maximizing the packaging process <i>S. Carrà, F. Chiozza, F. Curto, M. Ferraioli</i>	135
Impact of dispersing agents on the flow behavior of montmorillonite-starch coating formulations <i>E. Olsson, C. Johansson, and L. Järnström</i>	143

Food and pharmaceutical rheology

Effects of enzymes and liginosulfonate addition on tensile strength, surface hydration properties and underwater swelling rate of microalgae pellets <i>C. Salas-Bringas, A. M. Catargiu, D. Miladinovic, R. Barfod Schüller and N. Mišljenović</i>	153
Characterization of animal soft tissue for development of a new <i>in vitro</i> model for drug release in intramuscular injections <i>J. Aho and S. Baldursdóttir</i>	161
The release of Lyzozyme from tablets coated with Poly (vinyl acetate). A study on the correlation between intrinsic viscosity and protein diffusion <i>N. Musunuri, K. Shah, M. Hossain, S. K. Gurupatham, E. Amah, I. Fischer, and P. Singh</i>	167
Rheology of salmon skin mucus <i>C. Taylor Nordgård, K. Ingar Draget, and T. Seternes</i>	175
Comparison between formagraph and low amplitude oscillation rheometry in monitoring coagulation properties of acid induced gels in bovine milk <i>I. Appelesy Ketto, R. Barfod Schüller, E.-O. Rukke, A. Grethe Johansen, and S. B. Skeie</i>	181

Poster presentations

On the Improvement of Magnetorheological Elastomer Oxidation Stability <i>M. Sedlacik, V. Pavlinek, and T. Plachy</i>	191
Edible Boger fluid and its rheology at human physiological conditions <i>W. Qazi, M. Nyström, O. Ekberg, and M. Stading</i>	195
Calibration of a Jar-Tester replicated in a Rotational Rheometer <i>E. Alvarenga, R. Barfod Schüller, and C. Salas-Bringas</i>	199

<i>In-Vitro</i> Dynamic Model of the Stomach and Small Intestine for Milk Products with Rheological Monitoring - First Prototype <i>C. Salas-Bringas, S. Stenberg, M. Tysse, T. Devold, G. Vegarud, I. Comi, R. Ulleberg, E.-O Rukke, and R. Barfod Schüller</i>	207
Electrorheology of Barium Titanates - The Role of the Particle Size <i>T. Plachy, L. Munster, I. Kuritka, and V. Pavlinek</i>	215
Calculation of shear rate for strand filling compounds in High Voltage XLPE Submarine Cables <i>S. V. Ouren and B. Toure</i>	221
Melt Rheology of Selected Pharmaceutical Polymers for Hot Melt Extrusion <i>D. Treffer, A. Troiss, and J. Khinast</i>	223
Investigation of the correlation between electrospinnability and viscosity <i>X. Liu, S. Baldursdottir, H. Qu, L. P. Christensen, J. Rantanen, M. Yang</i>	225
Rheological characteristics of corn flour used during waterfowl feeding - influence of grinding and temperature <i>E.-O. Rukke, L. Fortun-Lamothe, C. Pautot, and R. Barfod Schüller</i>	231
Rheology of fine- and large- particulated feed used during waterfowl overfeeding characterized by a ball measuring system <i>E.-O. Rukke, L. Fortun-Lamothe, C. Pautot, and R. Barfod Schüller</i>	239
