Stability and error analysis for a numerical scheme to approximate elastic flow

Dissertation

zur Erlangung des akademischen Grades

doctor rerum naturalium
(Dr. rer. nat.)

von Dipl.-Math. Alina Bondarava
geb. am 19. Februar 1988 in Gomel, Weißrussland

genehmigt durch die Fakultät für Mathematik
der Otto-von-Guericke-Universität Magdeburg

Gutachter: Prof. Dr. Klaus Deckelnick
Prof. Paola Pozzi, PhD

eingereicht am: 30.06.2015
Verteidigung am: 29.10.2015

Contents

1 Introduction **1**
- 1.1 Overview. Problem formulation 1
- 1.2 Research studies. Willmore functional 6
- 1.3 Thesis outline 8

2 Analytic Foundations. Discretization. Initial conditions **11**
- 2.1 Analytic foundations 11
- 2.2 Discretization 12
- 2.3 Initial conditions 14

3 Existence and uniqueness result. Second equation of the scheme **15**
- 3.1 Existence and uniqueness result 16
  - 3.1.1 Existence of the discrete solution 16
  - 3.1.2 Uniqueness of the discrete solution 21
  - 3.1.3 Proof of Theorem 3.1 25
- 3.2 Second equation of the scheme 25

4 Error analysis **27**
- 4.1 Error bounds. Induction argument 27
- 4.2 Position vector 31
- 4.3 Curvature vector 41
- 4.4 Combined result 48
- 4.5 Tangent vector 69
- 4.6 Numerical scheme. Spatial derivative of the curvature vector 72
  - 4.6.1 Fully discrete numerical scheme 72
  - 4.6.2 Spatial derivative of the curvature vector 76
- 4.7 Discrete length element 87
- 4.8 Discrete Gronwall's argument 93

5 Completion of Induction argument. A posteriori estimates **101**
- 5.1 Completion of Induction argument 101
- 5.2 A posteriori estimates 108

6 Summary **109**

Appendices 111

Appendix A 111

Appendix B 127

Bibliography 131
