Contents

Preface ix

Notation xi

Acronyms xv

1 Dynamic Mode Decomposition: An Introduction 1
- 1.1 DMD . . . 2
- 1.2 Formulating the DMD architecture . . . 3
- 1.3 The DMD algorithm . . . 7
- 1.4 Example code and decomposition . . . 11
- 1.5 Limitations of the DMD method . . . 15
- 1.6 Broader context of equation-free methods . . . 18
- 1.7 Interdisciplinary connections of DMD . . . 22

2 Fluid Dynamics 25
- 2.1 Modal decomposition in fluids . . . 25
- 2.2 Applications of DMD in fluids . . . 31
- 2.3 Example: Re = 100 flow around a cylinder wake . . . 33

3 Koopman Analysis 39
- 3.1 Spectral theory and eigenfunction expansions . . . 39
- 3.2 The Koopman operator . . . 43
- 3.3 Connections with DMD . . . 46
- 3.4 Example dynamical systems . . . 49

4 Video Processing 55
- 4.1 Background/foreground video separation . . . 55
- 4.2 RPCA and DMD . . . 56
- 4.3 DMD for background subtraction . . . 58
- 4.4 Simple example and algorithm . . . 60
- 4.5 DMD for video surveillance . . . 63

5 Multiresolution DMD 71
- 5.1 Time-frequency analysis and the Gábor transform . . . 71
- 5.2 Wavelets and MRA . . . 72
- 5.3 Formulating mrDMD . . . 75
- 5.4 The mrDMD algorithm . . . 78
- 5.5 Example code and decomposition . . . 80

5.6 Overcoming translational and rotational invariances 87

6 DMD with Control 91
6.1 Formulating DMDc 91
6.2 The DMDc algorithm 96
6.3 Examples 97
6.4 Connections to system identification methods 100
6.5 Connections to Koopman operator theory 101

7 Delay Coordinates, ERA, and Hidden Markov Models 105
7.1 Delay coordinates and shift-stacking data 105
7.2 Connection to ERA and Hankel matrices 109
7.3 HMMs 113

8 Noise and Power 119
8.1 Power spectrum 119
8.2 Truncating data and singular value thresholding 126
8.3 Compensating for noise in the DMD spectrum 128

9 Sparsity and DMD 133
9.1 Compressed sensing 134
9.2 Sparsity-promoting DMD 137
9.3 Sub-Nyquist sampled DMD 139
9.4 Compressed DMD 140
9.5 Code for compressed DMD 150

10 DMD on Nonlinear Observables 159
10.1 Koopman observables 159
10.2 Nonlinear observables for partial differential equations 160
10.3 Extended and kernel DMD 166
10.4 Implementing extended and kernel DMD 172

11 Epidemiology 177
11.1 Modeling infectious disease spread 177
11.2 Infectious disease data 179
11.3 DMD for infectious disease data 180
11.4 Examples 181
11.5 The epidemiological interpretation of DMD modes 184

12 Neuroscience 185
12.1 Experimental techniques to measure neural activity 185
12.2 Modal decomposition in neuroscience 187
12.3 DMD on neural recordings 188

13 Financial Trading 195
13.1 Financial investment and algorithmic trading 195
13.2 Financial time-series data and DMD 197
13.3 Trading algorithms and training 200
13.4 Trading performance 204

Glossary 207
