1. General Introduction	1
<i>P. Yuan, F. Bergaya, and A. Thill</i>	

Part I

Geology and Mineralogy of Nanosized Tubular Clay Minerals

2. Geology and Mineralogy of Nanosized Tubular Halloysite	12
<i>E. Joussein</i>	
2.1 Introduction	12
2.2 Background History and Nomenclature	12
2.3 Genesis and Occurrence	15
2.3.1 Geological Processes of Main Halloysite Ores and Soils	15
2.3.2 Genetic Relation Between Halloysite and Kaolinite	16
2.3.3 Main Halloysite Ore Deposit in the World	17
2.4 Mineralogical Characterisation	24
2.4.1 Crystal Structure	24
2.4.2 Chemical Composition and Affecting Factors	32
2.4.3 Morphology and Origin of Its Diversity	34
2.4.4 Hydration and Dehydration: An Important Fingerprint of Their Properties	35
2.5 Concluding Remarks	40
References	41
3. Geology and Mineralogy of Imogolite-Type Materials	49
<i>C. Levard and I. Basile-Doelsch</i>	
3.1 Introduction	49
3.2 Structural Properties of Imogolite-Type Materials	50
3.2.1 Imogolite	50
3.2.2 Allophanes	50

3.2.3	Typical Methodology Applied to Differentiate Imogolite and Allophanes	52
3.2.4	Imogolite, Allophane, Proto-Imogolite and Proto-Allophane: Multiple Names for a Single Material?	52
3.3	Occurrence and Formation of Imogolite-Type Materials in Geologic and Pedologic Environments	54
3.3.1	Occurrence and Formation in the Geological Environment	54
3.3.2	Occurrence and Formation in Soil	55
3.4	Reactivity and Effect on Soil Properties	58
3.4.1	Phosphate	58
3.4.2	Metals	59
3.4.3	Organic Matter	60
3.5	Concluding Remarks	61
	References	62

Structure and Properties of Nanosized Tubular Clay Minerals

4.	Physicochemical Properties of Halloysite	67
	<i>H. Yang, Y. Zhang, and J. Ouyang</i>	
4.1	Introduction	67
4.2	Surface and Colloidal Properties of Halloysite	68
4.2.1	Cation Exchange Capacity	68
4.2.2	Specific Surface Area and Porosity	71
4.2.3	Dispersion Behaviour in Water	71
4.2.4	Hydrophilicity and Hydrophobicity	75
4.3	Mechanical Properties of Halloysite	76
4.4	Chemical Stability of Halloysite Under Acid and Alkaline Treatments	81
4.4.1	Effect of Acid Treatment on Halloysite	81
4.4.2	Effect of Alkali Treatment on Halloysite	85
4.5	Concluding Remarks	86
	References	87
5.	Characterisation of Halloysite by Electron Microscopy	92

5.1	Introduction	92
5.2	Background of Electron Microscopy	92
5.3	Morphological Analysis	94
5.4	Electron Diffraction	97
5.5	HRTEM Imaging of the Crystal Structure	101

5.6 Reconciliation of ED and HRTEM Results	108
5.7 Formation Mechanism of Halloysite Structure	110
5.8 Concluding Remarks	112
References	112
6. Characterisation of Halloysite by Spectroscopy	115
<i>J.T. Kloprogge</i>	
6.1 Introduction	115
6.2 Brief Presentation of Various Spectroscopic Methods	116
6.2.1 Infrared Spectroscopy	116
6.2.2 Raman Spectroscopy	117
6.2.3 X-Ray Photoelectron Spectroscopy	118
6.2.4 Solid-State Magic-Angle-Spinning Nuclear Magnetic Resonance Spectroscopy	118
6.2.5 Mössbauer Spectroscopy	119
6.2.6 Electron Spin Resonance Spectroscopy	120
6.3 Infrared and Raman Spectroscopy of Halloysite and Related Kaolin Minerals	120
6.3.1 The Hydroxyl Groups and Interlayer Water	120
6.3.2 Halloysite Layers	125
6.4 Other Spectroscopic Characterisations of Halloysite	128
6.4.1 X-Ray Photoelectron Spectroscopy	128
6.4.2 Solid-State MAS-NMR	129
6.4.3 ESR, Mössbauer and Cathodeluminescence Techniques	131
6.5 Concluding Remarks	134
References	134
7. Thermal-Treatment-Induced Deformations and Modifications of Halloysite	137
<i>P. Yuan</i>	
7.1 Introduction	137
7.2 Dehydration of Halloysite Under Thermal Treatment—Effects of Temperature	139
7.3 Structural Changes and Phase Transformations of Halloysite Under Calcination	145
7.4 Deformations in Texture and Morphology of Halloysite Under Calcination and Related Modifications in Surface Reactivities	153
7.4.1 Deformations in Texture and Morphology	153
7.4.2 Changes in Surface Reactivities	156
7.5 Some Applications of Heat-Treated Halloysite	159
7.6 Concluding Remarks	161
References	162

8. Surface Modifications of Halloysite	167
<i>D. Tan, P. Yuan, D. Liu, and P. Du</i>	
8.1 Introduction	167
8.2 Chemical Modification of the Internal Lumen Surface	170
8.2.1 Grafting of Organosilane onto the Internal Aluminol Groups	170
8.2.2 Grafting of Other Organic Compounds onto Internal Aluminol Groups	175
8.3 Modification of the External Surface	178
8.3.1 Surfactant, Polymer and Biopolymer Coatings	178
8.3.2 Organosilane Modification of Calcined Halloysite	180
8.4 Modification of the Interlayer Surface	181
8.4.1 Intercalation of Guest Molecules into the Interlayer Space	181
8.4.2 Grafting of Organics in the Interlayer Space	185
8.5 Applications of Surface-Modified Halloysite	191
8.5.1 Halloysite Polymer Nanocomposite	191
8.5.2 Controlled Loading and Release of Guest Molecules	192
8.5.3 Pollution Remediation	194
8.6 Concluding Remarks	195
References	196
9. Physicochemical Properties of Imogolite	202
<i>A. Fernandez-Martinez and L.J. Michot</i>	
9.1 Introduction	202
9.2 Surface Properties of Imogolite	203
9.2.1 Surface Charge	203
9.2.2 Electrokinetic Phenomena	207
9.3 Chemisorption and Physisorption	208
9.3.1 Gas Adsorption Properties	209
9.3.2 Metal/Metalloid Adsorption in the Liquid Phase	215
9.4 Conclusive Remarks	217
References	218
10. Characterisation of Imogolite by Microscopic and Spectroscopic Methods	223
<i>A. Thill</i>	
10.1 Introduction	223
10.2 Microscopic Methods	224
10.2.1 Atomic Force Microscopy and Scanning Tunneling Microscopy	224
10.2.2 Transmission Electron Microscopy	226
10.2.3 Cryo-TEM	228

10.3 Spectroscopic Methods	230
10.3.1 Fourier Transformed Infrared Spectroscopy	230
10.3.2 Nuclear Magnetic Resonance	232
10.3.3 X-Ray Absorption Including X-Ray Absorption Near Edge Structure and Extended X-Ray Absorption Fine Structure	235
10.3.4 X-Ray Photoelectron Spectroscopy	236
10.4 Scattering Methods	237
10.4.1 Dynamic Light Scattering	237
10.4.2 X-Ray-Based Analysis	237
10.5 Chemical and Mass Analysis	243
10.5.1 Chemical Composition	243
10.5.2 Gas Adsorption	243
10.5.3 Water Adsorption and Thermogravimetric Analysis	246
10.6 Concluding Remarks	248
References	248
11. Deformations and Thermal Modifications of Imogolite	254
<i>S. Rouzière, M.S. Amara, E. Paineau, and P. Launois</i>	
11.1 Introduction	254
11.2 X-Ray Scattering Formalism	256
11.2.1 Individual Nanotubes	256
11.2.2 Nanotubes Organised in Bundles	260
11.2.3 Typical Experimental Setup	262
11.3 Ovalisation of the Imogolite	263
11.4 Hexagonalisation of the Imogolite	266
11.5 Dehydroxylation and High-Temperature Structural Transformations	270
11.6 Concluding Remarks	275
References	276
12. Surface Chemical Modifications of Imogolite	279
<i>B. Bonelli</i>	
12.1 Introduction	279
12.2 Modification of the Inner Pores of Imogolite	283
12.2.1 Direct Synthesis Methods	283
12.2.2 Postsynthesis Methods	285
12.2.3 Properties of the Obtained Materials	286
12.3 Modification of the Outer Surface of Imogolite	290
12.3.1 Grafting of Organic Molecules	290
12.3.2 Reactivity of Outer Surfaces	294
12.4 Surface Properties of the Lamellar Phases Deriving from Imogolite Thermal Collapse	301
12.5 Concluding Remarks	303
References	304

13. Liquid-Crystalline Phases of Imogolite and Halloysite Dispersions	308
<i>P. Davidson and I. Dozov</i>	
13.1 Introduction	308
13.2 Structures of Liquid Crystals	309
13.3 The Nematic Phase of Imogolite Nanotubes	312
13.4 The Columnar Phase of Imogolite Nanotubes	320
13.5 Anisotropy of clay polymer nanocomposites Based on Imogolite Nanotubes	323
13.6 Liquid-Crystalline Phases of Halloysite, Another Rodlike Tubular Clay Mineral	326
13.7 Concluding Remarks	326
References	327
14. Molecular Simulation of Nanosized Tubular Clay Minerals	331
<i>H.A. Duarte</i>	
14.1 Introduction	331
14.2 Computational Aspects	332
14.2.1 Force Field Simulations	332
14.2.2 Density-Functional Theory	333
14.2.3 Self-consistent-Charge Density-Functional Tight-Binding Method	335
14.3 Imogolites	336
14.3.1 Imogolite Model	336
14.3.2 Imogolite: Aluminosilicate Nanotubes	337
14.3.3 Aluminogermanate Nanotubes	342
14.3.4 Other Imogolite-like Nanotubes	344
14.3.5 Modification of Imogolite	347
14.4 Halloysite	349
14.5 Chrysotile and Nano-Fibriform Silica	351
14.6 Concluding Remarks	353
References	355

Part III

Synthesis of Nanosized Tubular Clay Minerals

15. Why a 1:1 2D Structure Tends to Roll?: A Thermodynamic Perspective	361
<i>L. Belloni and A. Thill</i>	
15.1 Introduction	361
15.2 Equilibrium Energy of a Single Nanotube	362
15.2.1 Single-Walled (SW) Case	365

15.2.2 Double-Walled (DW) Case	366
15.2.3 Multi-Walled (MW) Case	367
15.2.4 Scroll (SC) Case	369
15.3 Entropy of the Mixing of Platelets and Nanotubes	373
15.3.1 Proto-Imogolites	373
15.3.2 MW Imogolites	377
15.3.3 General Mixture of Protos and MW Imogolites	379
15.4 Density–Temperature Phase Diagram of Nanosized Cylinders	380
15.4.1 Most Favourable SW, $n_0 \approx 1$, So $m_0 = 1$ (Energy and Entropy Favour SW)	381
15.4.2 Most Favourable DW, $n_0 \approx 2$, So $m_0 = 2$ (Energy Favours DW but Entropy Favours SW)	382
15.5 Concluding Remarks	386
References	386
16. Formation Mechanisms of Tubular Structure of Halloysite	387
<i>J. Niu</i>	
16.1 Introduction	387
16.2 Formation Mechanisms of the Tubular Structure of Halloysite	388
16.2.1 Mismatch Between Octahedral and Tetrahedral Sheets	388
16.2.2 Attraction Among Interlayer Hydroxyl Groups in Octahedrons	394
16.2.3 Surface Tension of Water	394
16.2.4 Comparison of Three Mechanisms	396
16.2.5 Other Factors Affecting Rolling	396
16.3 Experimental Observation of Rolling of Kaolinite	398
16.3.1 Rolling Mechanisms in Synthesis of Kaolinite Nanoroll	398
16.3.2 Rolling in Natural Transformation from Kaolinite to Halloysite	401
16.4 Concluding Remarks	404
References	405
17. Halloysite-like Structure via Delamination of Kaolinite	409
<i>J. Matusik</i>	
17.1 Introduction	409
17.2 Early Delamination Studies	412
17.3 Two-Step Delamination and Rolling Procedures	414
17.4 One-Step Delamination and Rolling Procedures	418
17.5 Delamination and Rolling Procedures Involving the Use of Polymers and Ionic Liquids	422
17.6 Concluding Remarks	424
References	425

18. From Molecular Precursor to Imogolite Nanotubes	429
<i>A. Thill</i>	
18.1 Introduction	429
18.2 Summary of Synthesis Methods	429
18.2.1 Main Chemical Recipes	429
18.2.2 Aluminium Salts and Silicon Sources	430
18.2.3 Aluminium Salts and Sodium Silicates	432
18.2.4 Aluminium and Silicon Alkoxides	432
18.2.5 Other Recipes	433
18.3 Influence of Some Important Parameters: Concentration, Al/Si and OH/Al Ratios	434
18.3.1 Concentration Range	434
18.3.2 Al/Si Ratio	435
18.3.3 OH/Al Ratio	436
18.4 Imogolite Formation Mechanism	438
18.4.1 Aluminium Hydrolysis and Condensation	438
18.4.2 Silicon Hydrolysis and Condensation	440
18.4.3 From Polycation to Proto-Imogolite	441
18.5 Proto-Imogolite Shape and Interaction	444
18.6 Imogolite Growth Mechanism (Kinetic Models)	450
18.7 Concluding Remarks	452
References	454
19. Imogolite-Like Family	458
<i>N. Arancibia-Miranda and M. Escudéy</i>	
19.1 Introduction	458
19.2 Theoretical Predictions Concerning the Extent of the Imogolite-like Family	459
19.3 Synthesis Strategies to Successfully Obtain New Imogolite-like Family Members	462
19.3.1 Examples of Imogolite-Like Nanoparticles Obtained Through Coprecipitation	463
19.3.2 Examples of Imogolite-Like Nanoparticles Obtained Through Postmodifications	465
19.4 Examples of Imogolite-Like Family Nanoparticles	469
19.4.1 Aluminogermanate Nanotubes/Nanospheres	469
19.4.2 Iron-Containing Imogolite	474
19.4.3 Oxy-imogolite	477
19.5 Possible Projection	478
19.6 Concluding Remarks	479
References	480

Part IV

Applications of Nanosized Tubular Clay Minerals

20. An Overview on the Safety of Tubular Clay Minerals	485
<i>M.-C. Jaurand</i>	
20.1 Introduction	485
20.1.1 The HARN Paradigm	485
20.1.2 Specific Industrial Applications of Asbestos and Carbon Nanotubes—The Different Spin-Off Effects in Terms of Toxicological Issues	487
20.2 Potential Health Injury Resulting from Industrial Uses of Halloysite and Imogolite	488
20.2.1 Uses of Halloysite and Imogolite	488
20.2.2 Spin-Off in Occupational, Environmental and Therapeutic Issues	488
20.3 The Biological Effects of Potential Interest in the Toxicology of Nanotubular Particles	489
20.3.1 Experimental Studies on the Biological Effects of Halloysite	489
20.3.2 Experimental Studies on the Biological Effects of Imogolite	496
20.3.3 Outline of Studies Carried Out so Far and Perspectives	500
20.4 Determinants of Nanoparticle Toxicity and Mechanisms	501
20.4.1 Determinants of Nanoparticle Toxicity	501
20.4.2 Mechanism of Action	501
20.4.3 Comparison of Halloysite, Imogolite and Related Nanotube Characteristics	502
20.5 Concluding Remarks and Perspectives	503
References	504
21. Halloysite Polymer Nanocomposites	509
<i>J. Huang, Z.H. Tang, X.H. Zhang, and B.C. Guo</i>	
21.1 Introduction	509
21.2 Processing Methods for the Fabrication of Halloysite Polymer Nanocomposites	510
21.2.1 Solution Mixing	510
21.2.2 Melt Mixing	512
21.2.3 In Situ Polymerization	515
21.2.4 Electrospinning and Melt Spinning	518
21.2.5 Layer-by-Layer Self-assembly	519
21.2.6 Electrophoretic Deposition	521
21.2.7 Latex Coagulation	522

21.3	Interface Interaction in Halloysite Polymer Nanocomposites	523
21.3.1	Covalent Bonding	524
21.3.2	Hydrogen Bonding	526
21.3.3	Interfacial Charge Transferring	527
21.3.4	Complexation	529
21.4	Multiple Effects of Halloysite on Polymer Nanocomposites	530
21.4.1	Mechanical Reinforcement	530
21.4.2	Thermal Stability and Flame Resistance	533
21.4.3	Crystallization Behaviour	535
21.4.4	Dielectric Property	538
21.4.5	Wettability Properties	540
21.4.6	Biocompatibility and Related Properties	541
21.5	Concluding Remarks	543
	References	544
22.	Halloysite for Controllable Loading and Release	554
	<i>E. Abdullayev and Y. Lvov</i>	
22.1	Introduction	554
22.2	Aspects of Halloysite Structure Related to Controlled-Release Applications	556
22.3	Loading and Release Characteristics of Unmodified Halloysite Nanotubes	559
22.3.1	Loading Active Agents Within Halloysite Lumens	559
22.3.2	Release Characteristics of Unmodified Halloysite Nanotubes	564
22.4	Strategies for Controlling the Loading Capacity and Release Rate of Active Agents	570
22.4.1	Selective Lumen Etching	570
22.4.2	Formation of Halloysite Nanotube Release Stoppers	571
22.4.3	Polymeric Shells on Halloysite Nanotubes	577
22.4.4	Surface Functionalisation of Halloysite for Controlled Release	581
22.5	Potential Applications of Halloysite as a Controlled-Release Nanocontainer	588
22.5.1	Functional Halloysite Polymer Nanocomposites and Coatings	588
22.5.2	Polymer Scaffolds for Tissue Engineering and Wound Healing	590
22.5.3	Bone Cements and Implants	595
22.5.4	Cosmetics	597
22.5.5	Biomedical Devices	598
22.6	Concluding Remarks	599
