Biography of the Author vii

Introduction ix

1. Major Structural Units of Costa Rica

1. Northern Plains Extension of the Nicaragua Graben 2
2. Guanacaste and Central Quaternary Volcanic Ranges 5
3. Tempisque River Tectonic Depression 14
4. Tilaran's Tertiary Mountain Range 14
5. Talamanca Mountain Range 15
6. The Pacific Littoral 19
7. The Caribbean Littoral 20

2. Natural Shape Types in Costa Rica

1. Paleoglacier and Paleonival Forms 24
2. Multifaceted Shapes 26
3. Multiconvex Modeling 28
4. Piedmont Accumulation Shapes 29
5. Large Quaternary Volcano Shapes 32
6. Floodplain Shapes 34

3. Regional Study of Large Morphological Units and the Coast

1. Volcanic Morphology 45
2. Barbilla Volcanic Sector 55
3. Moravia del Chirripó Caldera 56
4. Ending Tertiary Volcanism 74
5. Late Tertiary Volcanic Cone Evidence on Talamanca's Southwest Slopes 77

4. The Central Volcanic Mountain Range

1. Platanar—Porvenir Volcanic Complex 82
2. Poas Volcanic Structure 88
3. Congo Volcano 91

4. Barva Volcano 92
5. Molejon Collapsed Caldera 94
6. Cacho Negro Volcano 94
7. Santa Clara Caldera 96
8. Irazu Volcano 97
9. Las Nubes Volcano, Part of the Irazu Complex 97
10. Flores Volcanic Complex 102
11. Turrialba Volcano 102

5. Central Valley Geomorphology

1. Eastern Central Valley 109
2. Reventazon River 111
3. Western Central Valley 120
4. Central Valley Morphogenesis 130

6. Tilaran Mountain Range

1. Northeast Watershed or San Carlos Slope 137
2. Tilaran Southwest Watershed 139
3. Mount Turrubares Volcano Sector 145

7. Guanacaste Volcanic Mountain Range

1. El Hacha Volcanic Ruins 155
2. Orosí Volcano 155
3. Cacao Volcano 157
4. Rincon de la Vieja Volcano 159
5. Miravalles Volcano and Guayabo Collapsed Caldera 162
6. Guayabo Caldera 164
7. Tenorio Volcano 166
8. Lake Arenal Sector 167

8. Geomorphology of Guanacaste

1. Nicoya Peninsula 173
2. Tempisque River Tectonic Depression 182
3. The Ignimbrite Plateau 186

9. Coastal Geomorphology of Costa Rica

1. The Pacific Coast 192
2. Pacific Littoral Morphology 197
3. Nicoya Peninsula Littoral 198
4. Nicoya Gulf Sector 204
5. Puntarenas Sea Arrow 206
6. The Central Pacific Littoral of Costa Rica 206
7. Baru River—Coronado Elevated Coast Sector 211
8. The Pacific Southeast Coast Sector of Costa
Rica 212
9. Basalt and Sandstone Littoral Platform
Morphology 215
10. Cyclic Origin Levels 217
11. The Caribbean Coast 218

10. Cocos Island Geomorphology

1. An Eminently Volcanic Island 229

11. Costa Rica Quaternary Chronology Proposal

1. Fluvial Levels 236
2. Tilaran Pacific Watershed Alluvial Fans 241
3. Caribbean Coast Paleocliffs 241
4. The Lower Quaternary (2,000,000 to 300,000
Years BP) 244
5. The Middle Quaternary 246
6. The Upper Quaternary 248

Conclusion 255

Glossary 257
