## **PART I**

### **Water resources and ecology**

<b>1 Water resources and demand</b>	<b>3</b>
1.1 <i>Hydrological cycle</i>	3
1.2 <i>Surface waters</i>	6
1.2.1 <i>Rivers and lakes</i>	6
1.2.2 <i>Reservoirs</i>	10
1.3 <i>Groundwater</i>	12
1.3.1 <i>Aquifers</i>	12
1.3.2 <i>Groundwater quality</i>	17
1.4 <i>Water demand</i>	19
1.5 <i>Peak water</i>	24
1.6 <i>The catchment as area of study</i>	30
<i>References</i>	31
<i>Further Reading</i>	32
<b>2 Factors determining the distribution of animals and plants in freshwaters</b>	<b>35</b>
2.1 <i>Introduction</i>	35
2.2 <i>Natural dispersion</i>	37
2.2.1 <i>Expected species</i>	37
2.2.2 <i>Alien or exotic species</i>	37
2.3 <i>Catchment water quality</i>	41
2.4 <i>Dissolved solids</i>	43
2.5 <i>Dissolved oxygen and temperature</i>	47
2.6 <i>Suspended solids</i>	50
2.7 <i>Lotic systems</i>	52
2.7.1 <i>River flow and substrate</i>	52
2.7.2 <i>River zonation</i>	57

2.8	<i>Lentic systems</i>	57
2.9	<i>Effect of climate change</i>	60
	<i>References</i>	62
	<i>Further Reading</i>	62
<b>3</b>	<b>Basic aquatic ecosystems</b>	<b>65</b>
3.1	<i>Introduction</i>	65
3.2	<i>Community structure</i>	65
3.2.1	<i>Phototrophic–autotrophic (producers)</i>	67
3.2.2	<i>Heterotrophic (decomposers)</i>	68
3.2.3	<i>Detritivores (consumers)</i>	68
3.2.4	<i>Herbivores (consumers)</i>	69
3.2.5	<i>Predators (consumers)</i>	69
3.3	<i>Allochthonous and autochthonous inputs</i>	69
3.4	<i>Functional feeding groups</i>	72
3.5	<i>Habitat zonation</i>	79
3.6	<i>Lentic ecology</i>	86
	<i>References</i>	89
	<i>Further Reading</i>	90
<b>4</b>	<b>Microorganisms in pollution control</b>	<b>91</b>
4.1	<i>Introduction</i>	91
4.2	<i>Nutritional classification</i>	91
4.3	<i>Oxygen requirement of bacteria</i>	94
4.4	<i>Microbial oxygen demand</i>	95
4.4.1	<i>Self-purification</i>	95
4.4.2	<i>Oxygen balance</i>	97
4.4.3	<i>Re-aeration</i>	97
4.4.4	<i>The oxygen-sag curve</i>	100
4.5	<i>The biochemical oxygen demand (BOD) test</i>	106
	<i>References</i>	112
	<i>Further Reading</i>	112
<b>5</b>	<b>Water pollution</b>	<b>113</b>
5.1	<i>Introduction</i>	113
5.2	<i>Toxic substances</i>	114
5.3	<i>Suspended solids</i>	119
5.3.1	<i>Inert solids</i>	119
5.3.2	<i>Oxidizable solids</i>	121
5.4	<i>Deoxygenation</i>	122
5.5	<i>Addition of non-toxic salts</i>	124
5.5.1	<i>Eutrophication</i>	127
5.5.2	<i>Algal toxins</i>	130
5.6	<i>Heating of the water</i>	132
5.7	<i>Effect on the buffering system</i>	133

- 5.7.1 *Acid rain* 134
- 5.7.2 *Acid mine drainage* 135
- 5.8 *Groundwater pollution* 138
- References* 139
- Further Reading* 141

## **PART II**

### **Water quality management and assessment**

- 6 Water basin management** **145**
  - 6.1 *Introduction* 145
    - 6.1.1 *Basic management programme for rivers* 145
    - 6.1.2 *Water quality and catchment management plans* 148
  - 6.2 *The water framework directive* 154
    - 6.2.1 *Introduction* 154
    - 6.2.2 *River basin characterization* 155
    - 6.2.3 *Implementation of the WFD* 159
    - 6.2.4 *River basin planning and monitoring* 159
    - 6.2.5 *Ecological classification system for surface water and groundwater* 161
    - 6.2.6 *Priority and other specific polluting substances* 162
  - 6.3 *Flood control and diffuse pollution* 169
    - 6.3.1 *Sustainable drainage systems* 173
    - 6.3.2 *Agriculture and forestry* 177
  - References* 180
  - Further Reading* 181
- 7 Water quality and regulation** **183**
  - 7.1 *Introduction* 183
  - 7.2 *Potable waters* 183
  - 7.3 *Surface waters not used primarily for supply* 194
  - 7.4 *Priority substances and wastewaters* 203
  - 7.5 *Groundwaters* 206
  - 7.6 *Regulation* 209
  - 7.7 *Integrated Pollution Prevention and Control* 210
  - References* 211
  - Further Reading* 211
- 8 Water quality assessment** **213**
  - 8.1 *Physico-chemical and biological surveillance* 213
  - 8.2 *Impact assessment* 214
    - 8.2.1 *Strategic environmental assessment* 214
    - 8.2.2 *Environmental impact assessment* 215
    - 8.2.3 *Appropriate assessment* 215

- 8.3 *Sampling surface waters* 218
  - 8.3.1 *Sampling programmes* 218
  - 8.3.2 *Mixing* 220
  - 8.3.3 *Safety* 222
  - 8.3.4 *Hydrology* 223
    - 8.3.4.1 *Current metering* 224
    - 8.3.4.2 *Dilution gauging* 225
    - 8.3.4.3 *Weirs* 226
  - 8.3.5 *Chemical sampling* 228
  - 8.3.6 *Biological sampling* 229
- 8.4 *Biological indices* 234
  - 8.4.1 *Pollution indices* 236
    - 8.4.1.1 *Early descriptive classification* 236
    - 8.4.1.2 *Polysaprobic zone (P) – Extremely heavily polluted zone* 236
    - 8.4.1.3  *$\alpha$ -Mesosaprobic zone ( $\alpha$ -M) – Oxidation zone of heavy pollution* 237
    - 8.4.1.4  *$\beta$ -Mesosaprobic zone ( $\beta$ -M) – Oxidation zone of moderate pollution* 238
    - 8.4.1.5 *Oligosaprobic zone (O) – Zone of complete oxidation* 238
    - 8.4.1.6 *Saprobity index* 238
    - 8.4.1.7 *Trent biotic index* 239
    - 8.4.1.8 *Chandler biotic score index* 245
    - 8.4.1.9 *BMWP biotic index* 246
    - 8.4.1.10 *Irish biotic score index* 249
    - 8.4.1.11 *The Gammarus:Asellus ratio* 252
    - 8.4.1.12 *Other applications* 252
  - 8.4.2 *Diversity indices* 252
    - 8.4.2.1 *Indices of community diversity* 252
    - 8.4.2.2 *Sequential comparison index* 254
  - 8.4.3 *Using biological indices* 255
  - 8.4.4 *Multivariate analysis* 257
- 8.5 *Toxicity and treatability assessment* 260
  - 8.5.1 *Types of testing* 260
  - 8.5.2 *Respiration inhibition tests* 261
    - 8.5.2.1 *The activated sludge respiration inhibition test* 261
    - 8.5.2.2 *The BOD inhibition test* 262
  - 8.5.3 *Microtox® bioassay test* 262
  - 8.5.4 *Daphnia and other organisms* 263
    - 8.5.4.1 *Daphnia magna* 263
- 8.6 *Chemical data* 267
  - 8.6.1 *Chemical indices* 267
  - 8.6.2 *Mass balance and modelling* 269
- 8.7 *European water quality assessment classification* 272
  - 8.7.1 *Biological and physico-chemical assessment* 272
  - 8.7.2 *Aesthetic and habitat assessment* 275

*References* 278  
*Further Reading* 281

## **PART III**

### **Pollution control**

- 9 Nature of wastewater** 285
- 9.1 *Surface run-off and wastewater collection* 285
  - 9.2 *Composition and characterization of wastewater* 289
    - 9.2.1 *Composition of wastewater* 289
    - 9.2.2 *Characterization of wastewater* 297
  - 9.3 *Industrial and agricultural wastewaters* 298
  - 9.4 *Charging* 300
  - 9.5 *Working with sewage* 302
- References* 303  
*Further Reading* 303
- 10 Introduction to wastewater treatment** 305
- 10.1 *Requirements of treatment* 305
  - 10.2 *Basic unit processes* 308
    - 10.2.1 *Preliminary processes* 310
    - 10.2.2 *Primary sedimentation (primary treatment)* 314
    - 10.2.3 *Biological (secondary) treatment* 322
      - 10.2.3.1 *Basis of secondary treatment* 322
      - 10.2.3.2 *Bacterial kinetics* 329
      - 10.2.3.3 *Rates of reaction* 331
      - 10.2.3.4 *Enzyme reactions* 334
      - 10.2.3.5 *Environmental factors affecting growth* 335
      - 10.2.3.6 *Kinetic equations of bacterial growth* 336
      - 10.2.3.7 *Secondary settlement* 339
    - 10.2.4 *Tertiary treatment* 340
    - 10.2.5 *Sludge treatment* 341
  - 10.3 *Pre-treatment of industrial wastewaters* 341
  - 10.4 *Design of wastewater treatment plants* 343
    - 10.4.1 *Selection of processes* 343
    - 10.4.2 *Supervisory control and data acquisition* 347
    - 10.4.3 *Example of treatment plant* 347
- References* 351  
*Further Reading* 351
- 11 Activated sludge** 353
- 11.1 *The process* 353
  - 11.2 *Process control* 353
    - 11.2.1 *Biomass control* 355

- 11.2.1.1 *Mixed liquor suspended solids* 355
- 11.2.1.2 *Sludge residence time or sludge age* 356
- 11.2.2 *Plant loading* 357
- 11.2.3 *Sludge settleability* 358
- 11.2.4 *Sludge activity* 360
- 11.3 *Modes of operation* 360
  - 11.3.1 *Aeration* 360
  - 11.3.2 *Aeration management* 362
  - 11.3.3 *Oxygen transfer* 365
  - 11.3.4 *The use of pure oxygen* 367
- 11.4 *Aeration tank design* 367
  - 11.4.1 *Tank configuration* 367
  - 11.4.2 *Completely mixed reactors* 368
- 11.5 *Common modifications* 372
  - 11.5.1 *Tapered aeration (plug flow)* 372
  - 11.5.2 *Contact stabilization (both plug and completely mixed)* 372
  - 11.5.3 *Incremental feeding or step aeration (plug flow)* 372
  - 11.5.4 *Sequencing batch reactors* 373
  - 11.5.5 *Low-area high-rate systems* 375
- 11.6 *Ecology* 376
- 11.7 *Operational problems* 377
  - 11.7.1 *Flocculation* 377
  - 11.7.2 *Floc morphology* 378
  - 11.7.3 *Sludge problems* 379
  - 11.7.4 *Identifying problems* 382
    - 11.7.4.1 *Sludge settleability* 383
    - 11.7.4.2 *Cone test* 383
    - 11.7.4.3 *Floc morphology* 383
    - 11.7.4.4 *Filament counting* 386
- 11.8 *Remedial measures* 388
  - 11.8.1 *Operational control* 388
    - 11.8.1.1 *Dissolved oxygen* 388
    - 11.8.1.2 *Septicity of sewage* 388
    - 11.8.1.3 *Nutrient balance* 388
    - 11.8.1.4 *Nature of substrate* 388
    - 11.8.1.5 *Controlling sludge loading ratio* 388
  - 11.8.2 *Chemical addition* 389
    - 11.8.2.1 *Biocides* 389
    - 11.8.2.2 *Flocculants* 389
  - 11.8.3 *Process modification* 389
    - 11.8.3.1 *Mixing pattern* 389
    - 11.8.3.2 *Selector or contact tank* 389
    - 11.8.3.3 *Anoxic zones* 390
- 11.9 *Nutrient removal* 390
  - 11.9.1 *Denitrification* 390
  - 11.9.2 *Phosphorus removal* 394

- 11.9.3 *Biological nutrient removal systems* 396
  - 11.9.3.1 *The Bardenpho process* 396
  - 11.9.3.2 *Sequencing batch reactors* 397

*References* 398

*Further Reading* 399

## 12 Fixed-film systems

401

- 12.1 *The basis of the process* 401
  - 12.2 *Biofiltration* 401
    - 12.2.1 *Film development* 402
    - 12.2.2 *Design and modifications* 407
    - 12.2.3 *Operational problems* 411
      - 12.2.3.1 *Ponding* 411
      - 12.2.3.2 *Nitrification* 413
      - 12.2.3.3 *Fly nuisance* 414
  - 12.3 *Rotating biological contactors* 415
  - 12.4 *Submerged fixed-film reactors* 417
    - 12.4.1 *Introduction* 417
    - 12.4.2 *Fluidized bed reactors* 418
    - 12.4.3 *Biological aerated flooded filters* 419
    - 12.4.4 *Submerged aerated filters* 422
    - 12.4.5 *Moving bed biofilm reactor* 423
  - 12.5 *Nitrifying and denitrifying filters* 423
  - 12.6 *Waste gas treatment* 424
- References* 425
- Further Reading* 426

## 13 Natural treatment systems

427

- 13.1 *Introduction* 427
  - 13.2 *Stabilization ponds* 427
    - 13.2.1 *Anaerobic lagoons* 428
    - 13.2.2 *Oxidation ponds* 431
      - 13.2.2.1 *Facultative ponds* 431
      - 13.2.2.2 *Maturation (tertiary) ponds* 434
      - 13.2.2.3 *River purification lakes* 435
    - 13.2.3 *Aeration lagoons* 436
  - 13.3 *Plants and wetlands* 436
    - 13.3.1 *Plants* 436
    - 13.3.2 *Wetlands* 438
      - 13.3.2.1 *Reed beds* 438
  - 13.4 *Land treatment* 443
    - 13.4.1 *Surface irrigation* 443
    - 13.4.2 *Overland flow* 443
    - 13.4.3 *Infiltration–percolation* 444
- References* 446
- Further Reading* 447

---

<b>14 Anaerobic processes</b>	<b>449</b>
14.1 Introduction	449
14.2 Flow-through systems (digestion)	451
14.2.1 Design	454
14.2.2 Operation	458
14.2.3 Hydrolysis	460
14.3 Biogas and other products of digestion	461
14.4 Contact anaerobic systems	463
14.4.1 Anaerobic activated sludge	464
14.4.2 Up-flow anaerobic sludge blanket process	464
14.4.3 Static media filter	464
14.4.4 Fluidized and expanded media	465
References	465
Further Reading	466
<b>15 Sludge treatment and disposal</b>	<b>467</b>
15.1 Sludge characteristics	467
15.2 Sludge treatment	469
15.2.1 Thickening	469
15.2.2 Stabilization	473
15.2.2.1 Anaerobic and aerobic digestion	473
15.2.2.2 Lime stabilization	474
15.2.2.3 Thermal drying	475
15.2.3 Dewatering	476
15.2.3.1 Sludge drying beds	477
15.2.3.2 Filter presses	478
15.2.3.3 Conditioners	479
15.2.3.4 Belt presses	481
15.2.3.5 Sludge reed beds	482
15.2.3.6 Other systems	482
15.3 Sewage sludge disposal	483
15.3.1 Incineration	485
15.3.2 Sea disposal	485
15.3.3 Landfill	486
15.3.4 Disposal to agricultural land	486
15.3.4.1 Heavy metal contamination	487
15.3.4.2 General sludge application guidelines	489
15.3.4.3 EU guidelines	490
15.3.4.4 Other guidelines	492
15.3.5 Composting and other uses	493
15.3.5.1 The composting process	494
15.3.5.2 Operational factors	494
15.3.5.3 Composting systems	496
15.3.5.4 Straw composting	499

15.3.5.5 *Product quality* 499

15.3.5.6 *Other processes* 500

*References* 501

*Further Reading* 502

## **16 On-site and small-scale treatment systems** 503

16.1 *Challenges of small-scale treatment* 503

16.2 *Cesspools* 503

16.3 *Septic tanks* 505

16.3.1 *The process* 506

16.3.2 *Design and operation* 508

16.4 *Percolation or infiltration areas* 513

16.5 *Small complete treatment systems* 515

16.5.1 *Biological or submerged aerated filters* 516

16.5.2 *RBCs and percolating filters* 517

16.5.3 *Sand filtration* 517

16.5.4 *Peat filters* 517

16.5.5 *Discharge of secondary effluents* 519

*References* 520

*Further Reading* 521

## **PART IV**

### **Drinking water treatment and supply**

## **17 Water treatment and distribution** 525

17.1 *Introduction to treatment* 525

17.2 *Unit processes* 529

17.2.1 *Preliminary screening* 529

17.2.2 *Storage* 530

17.2.3 *Aeration* 531

17.2.4 *Chemical pre-treatment* 531

17.2.5 *Coagulation* 531

17.2.6 *Sedimentation* 533

17.2.7 *Filtration* 536

17.2.7.1 *Rapid gravity filters* 536

17.2.7.2 *Slow sand filters* 538

17.2.8 *Disinfection* 540

17.2.8.1 *Hypochlorite* 542

17.2.9 *Fluoridation* 545

17.2.10 *Advanced water treatment* 545

17.2.11 *Sludge production and disposal* 545

17.3 *Water distribution* 547

*References* 550

*Further Reading* 551

## 20 Pathogens and their removal

617

- 20.1 Introduction 617
  - 20.1.1 Classification of pathogens 617
  - 20.1.2 Strategies for controlling pathogen transfer 618
- 20.2 Waterborne pathogens 620
  - 20.2.1 Primary bacterial pathogens 620
    - 20.2.1.1 Salmonella 620
    - 20.2.1.2 Shigella 621
    - 20.2.1.3 Vibrio (cholera) 621
  - 20.2.2 Opportunistic bacterial pathogens 622
    - 20.2.2.1 Campylobacter 623
    - 20.2.2.2 Escherichia coli 0157:H7 623
    - 20.2.2.3 Mycobacteria 623
    - 20.2.2.4 Aeromonads 624
    - 20.2.2.5 Legionella pneumophila 624
