

Heat Transfer XIV

**Simulation and Experiments in Heat Transfer
and its Applications**

Editors

B. Sundén

Contents

Numerical investigation of superheater tube failure <i>H. H. Al-Kayiem & T. M. B. Albarody</i>	1
Superposition method for multi rows of a film cooling hole on a turbine stationary vane surface <i>K. Takeishi, Y. Oda, T. Nagao & H. Sakamoto</i>	11
A numerical model of rotating bearings for thermo-mechanical coupled analysis <i>J. Nam, H. S. Ryou & S. W. Cho</i>	25
Thermal networks from the heat equation by using the finite element method <i>I. Naveros, C. Ghiaus, J. Ordoñez & D. P. Ruíz</i>	33
Turbulent Rayleigh–Bénard convection scaling in a vertical channel using the lattice Boltzmann method <i>Y. Wei & H. Dou</i>	45
Heat transfer analysis in wire bundles for aerospace vehicles <i>S. L. Rickman & C. J. Iannello</i>	53
Application of frictional heat signatures for prediction of structural vibrational characteristics <i>S. M. Talai, D. A. Desai & P. S. Heyns</i>	65
Large eddy simulation of flame propagation from leakage of naphtha in a cracking furnace <i>J. Ahn & S. Jang</i>	77
Heat transfer characteristics of a two-phase closed thermosyphon considering the working fluid filling ratio <i>S. H. Oh, S. I. Kim, J. W. Choi, K. J. Lee & W. P. Chun</i>	87

Polymeric hollow fiber heat exchangers <i>M. Raudenský, I. Astrouski & T. Bozova</i>	95
Radiant heat transfer reduction methods in heat insulation of power equipment <i>A. V. Ryzhenkov, S. I. Pogorelov, N. A. Loginova, A. F. Mednikov & A. B. Tkhabisimov</i>	107
Study of longitudinal heat transfer in low temperature heat pipes with axial grooves and discrete metal fibres for space thermal control systems <i>V. Baturkin & T.-M. Ho</i>	115
Effect of processor layout on the thermal performance of fully immersed liquid-cooled microelectronics <i>Y. Al-Anii, A. Almaneea, N. Kapur, J. Summers & H. Thompson</i>	127
Effects of radiation on mixed convection in power law fluids along a vertical wedge embedded in a saturated porous medium under prescribed surface heat flux condition <i>S. R. Qureshi, Q. Ali & W. A. Khan</i>	139
Heat exchangers for solar pond applications <i>R. L. Frederick & C. Riobó</i>	151
Energy efficiency of flooded roofs: the University of Alicante Museum <i>V. Echarrri Iribarren, A. Espinosa Fernández & A. Galiano Garrigós</i>	163
Investigation of thermal comfort in the office by means of a thermal manikin <i>J. Fišer, J. Pokorný & M. Jícha</i>	177
Fibre-based temperature measurement (DTS) in coil-wound heat exchangers for LNG production <i>R. Hoffmann, R. Flüggen, C. Richardt, J. Ferstl, C. Kerber & K. Braun</i>	185
Author index	197
