Non-Traditional Stable Isotopes

82 *Reviews in Mineralogy and Geochemistry* 82

TABLE OF CONTENTS

1 Non-Traditional Stable Isotopes: Retrospective and Prospective

Fang-Zhen Teng, Nicolas Dauphas, James M. Watkins

INTRODUCTION	1
THE δ NOTATION	3
GUIDELINES FOR SELECTING REFERENCE MATERIALS	4
EMERGING ISOTOPE SYSTEMS	6
Stable potassium isotope geochemistry	7
Titanium isotope geochemistry	8
Vanadium isotope geochemistry	10
Stable rubidium isotope geochemistry	11
Stable strontium isotope geochemistry	11
Cadmium isotope geochemistry	13
Tin isotope geochemistry	15
Antimony isotope geochemistry	15
Stable tellurium isotope geochemistry	16
Barium isotope geochemistry	16
Stable neodymium isotope geochemistry	18
CONCLUSIONS	20
ACKNOWLEDGMENTS	20
REFERENCES	20

2 Equilibrium Fractionation of Non-traditional Isotopes: a Molecular Modeling Perspective

Marc Blanchard, Etienne Balan, Edwin A. Schauble

INTRODUCTION	27
THEORETICAL FRAMEWORK	28
Equilibrium fractionation theory	28
Approximate formula based on force constants	33
MODELING APPROACHES	35
Quantum-mechanical molecular modeling	35
Theoretical studies of non-traditional stable isotope fractionation	37

Modeling isotopic properties of liquid phases.....	40
Beyond harmonic approximation: Path integral molecular dynamics.....	43
MÖSSBAUER AND NRIXS SPECTROSCOPY	45
MASS-INDEPENDENT FRACTIONATION AND VARIATIONS IN MASS LAWS.....	47
Variability in mass laws for common fractionations	48
Mass-independent fractionation in light elements (O and S)	50
Mass-independent fractionation in non-traditional elements (Hg, Tl, and U)	50
Mass-independent fractionation signatures in heavy elements, versus light elements	53
<i>Ab initio</i> methods for calculating field shift fractionation factors.....	53
Isomer shifts from Mössbauer spectroscopy	55
CONCLUSIONS.....	55
ACKNOWLEDGMENTS.....	56
REFERENCES	56

3 Equilibrium Fractionation of Non-Traditional Stable Isotopes: an Experimental Perspective

Anat Shahar, Stephen M. Elardo, Catherine A. Macris

INTRODUCTION	65
FACTORS INFLUENCING EQUILIBRIUM FRACTIONATION FACTORS.....	66
PROOF OF EQUILIBRIUM IN ISOTOPE EXPERIMENTS	67
Time series.....	67
Multi-direction approach.....	68
Three-isotope exchange method.....	69
Kinetic effects.....	72
EXPERIMENTAL METHODS	73
Low temperature experiments	73
High temperature, low pressure experiments	74
High temperature and pressure experiments	76
NRIXS and diamond anvil cell experiments	78
POST-EXPERIMENT ANALYSIS	80
CONCLUSIONS.....	80
ACKNOWLEDGMENTS.....	81
REFERENCES	81

4 Kinetic Fractionation of Non-Traditional Stable Isotopes by Diffusion and Crystal Growth Reactions

James M. Watkins, Donald J. DePaolo, E. Bruce Watson

INTRODUCTION	85
Organization of the article	86
ISOTOPE FRACTIONATION BY DIFFUSION	86
Expressions for diffusive fluxes.....	87
Isotopic mass dependence of diffusion in “simple” systems.....	87
Isotopic mass dependence of diffusion in aqueous solution	88

Isotopic mass dependence of diffusion in silicate melts	90
Isotopic mass dependence of diffusion in minerals and metals.....	92
DIFFUSIVE BOUNDARY LAYERS IN THE GROWTH MEDIUM.....	94
ISOTOPE FRACTIONATION BY COMBINED REACTION AND DIFFUSION	102
General framework for crystal growth from an infinite solution.....	102
Crystal growth and kinetic isotope effects	105
Interpreting the model parameters.....	107
Stable isotope fractionation during electroplating.....	110
Stable isotope fractionation of trace elements.....	113
THE ROLE OF THE NEAR SURFACE OF CRYSTALS	115
The growth entrapment model (GEM).....	116
The surface reaction kinetic model (SRKM), growth entrapment model (GEM), and isotopes	118
PERSPECTIVES	120
ACKNOWLEDGMENTS.....	121
REFERENCES	121

5 In Situ Analysis of Non-Traditional Isotopes by SIMS and LA–MC–ICP–MS: Key Aspects and the Example of Mg Isotopes in Olivines and Silicate Glasses

*Marc Chaussidon, Zhengbin Deng, Johan Villeneuve, Julien Moureau Bruce Watson,
Frank Richter, Frédéric Moynier*

INTRODUCTION	127
Notations used for Mg isotopes.....	128
INSTRUMENTATION FOR IN-SITU STABLE ISOTOPE ANALYSIS	128
MC–SIMS analysis.....	129
LA–MC–ICP–MS analysis.....	129
LIMITATIONS FOR IN-SITU STABLE ISOTOPES ANALYSIS	130
Limitations due to the small amount of sample analyzed	131
Limitations due to matrix effects on ion yield.....	131
Limitations due to instrumental isotopic fractionation.....	133
STANDARDS AND ANALYTICAL APPROACH USED FOR MG IN THE PRESENT STUDY	136
Set of standards studied.....	136
MC–SIMS for Mg isotopic analysis.....	137
LA–MC–ICP–MS for Mg isotopic analysis.....	138
Solution MC–ICP–MS for Mg isotopic analysis	138
MAGNESIUM ION EMISSION DURING IN SITU ANALYSIS	140
Fundamental differences for Mg ion yield between SIMS and laser ablation ICP–MS.....	140
Possible origin of the complex matrix effects on ion yield for SIMS	143
MAGNESIUM INSTRUMENTAL ISOTOPIC FRACTIONATION	145
Similarities and differences for Mg instrumental isotopic fractionation between SIMS and laser ablation ICP–MS	145
Matrix effects during ionization of solutions in MC–ICP–MS	147
Matrix effects specific to in situ analysis	149
MEASUREMENT OF THE THREE MAGNESIUM ISOTOPES.....	152

The need for high-precision in situ three Mg isotopes analysis in cosmochemistry. 152
The question of potential isobaric interferences..... 153
The question of the mass fractionation law used to correct for instrumental
isotopic fractionation..... 154
Mg instrumental mass fractionation law for MC–SIMS analyses..... 155
Mg instrumental mass fractionation law for LA–MC–ICP–MS analyses..... 158
SUMMARY AND PERSPECTIVES 158
ACKNOWLEDGMENTS..... 159
REFERENCES 159

6 Lithium Isotope Geochemistry

Sarah Penniston-Dorland, Xiao-Ming Liu, Roberta L. Rudnick

INTRODUCTION 165
LITHIUM SYSTEMATICS..... 167
 Li in minerals..... 168
 Li partitioning..... 168
 Equilibrium Isotope Fractionation..... 170
 Diffusion and kinetic isotopic fractionation..... 174
METHODS 176
 Whole rock analyses..... 176
 In situ analyses 177
EXTRATERRESTRIAL LITHIUM RESERVOIRS 178
 The interstellar medium and the Sun..... 178
 Meteorites and their components..... 179
 Moon 181
TERRESTRIAL LITHIUM RESERVOIRS 181
 Mantle peridotites..... 181
 Basalts 188
 Arc lavas..... 190
 Continental crust..... 191
 Seawater 192
 Rivers..... 193
 Lakes..... 193
 Groundwater 194
 Hydrothermal fluids..... 194
IGNEOUS PROCESSES 195
 Differentiation 195
 Eruptive processes 196
METAMORPHIC PROCESSES..... 197
 Dehydration 197
 Redistribution of Li through fluid infiltration..... 198
 Diffusion..... 199
CONTINENTAL WEATHERING PROCESSES..... 199
 Weathering profiles..... 201
 Rivers..... 201
LITHIUM AS A TRACER OF CONTINENTAL WEATHERING
THROUGH TIME..... 204

FUTURE DIRECTIONS	205
Weathering processes and Li fractionation experiments	205
Continental weathering through time	205
Geospeedometry	206
ACKNOWLEDGMENTS	206
REFERENCES	206

Magnesium Isotope Geochemistry

Fang-Zhen Teng

INTRODUCTION	219
MAGNESIUM ISOTOPIC ANALYSIS	221
Nomenclature	221
Standard and reference materials	222
Instrumental Analysis	229
Sample preparation	229
MAGNESIUM ISOTOPIC SYSTEMATICS	
OF EXTRATERRESTRIAL RESERVOIRS	230
Magnesium isotopic composition of chondrites	231
Magnesium isotopic composition of differentiated meteorites	232
Magnesium isotopic composition of the Moon	232
MAGNESIUM ISOTOPIC SYSTEMATICS OF THE MANTLE	234
Mantle xenoliths	234
Oceanic basalts	236
Abyssal peridotites and ophiolites	237
Continental basalts	239
MAGNESIUM ISOTOPIC SYSTEMATICS OF THE OCEANIC CRUST,	
CONTINENTAL CRUST AND HYDROSPHERE	241
Magnesium isotopic composition of the oceanic crust	241
Magnesium isotopic composition of the continental crust	243
Magnesium isotopic composition of the hydrosphere	247
MAGNESIUM ISOTOPIC SYSTEMATICS OF CARBONATES	250
Abiogenic carbonates	250
Biogenic carbonates	254
Carbonate precipitation experiments and theoretical calculations	255
BEHAVIOR OF MAGNESIUM ISOTOPES	
DURING MAJOR GEOLOGICAL PROCESSES	256
Behavior of Mg isotopes during biological processes	256
Behavior of Mg isotopes during continental weathering	257
Behavior of Mg isotopes during magmatic differentiation	263
Behaviors of Mg isotopes during metamorphic dehydration	264
HIGH-TEMPERATURE MAGNESIUM ISOTOPE FRACTIONATION	267
High-temperature equilibrium inter-mineral Mg isotope fractionation	267
Diffusion-driven kinetic Mg isotope fractionation	270
APPLICATIONS AND FUTURE DIRECTIONS	276
ACKNOWLEDGMENTS	278
REFERENCES	278

8 Silicon Isotope Geochemistry

Franck Poitrasson

ELEMENT PROPERTIES.....	289
NOMENCLATURE, REFERENCE MATERIALS AND ANALYTICAL TECHNIQUES.....	290
ELEMENTAL AND ISOTOPIC ABUNDANCES IN MAJOR RESERVOIRS	294
Extraterrestrial reservoirs	294
Terrestrial reservoirs	301
ELEMENTAL AND ISOTOPIC BEHAVIORS DURING MAJOR GEOLOGICAL PROCESSES.....	317
Diffusion, condensation and evaporation	317
Igneous processes	322
Metamorphic processes	325
Low temperature processes	325
Biological processes	330
IMPORTANT IMPLICATIONS AND FUTURE DIRECTIONS	333
ACKNOWLEDGMENTS.....	336
REFERENCES	337

9 Chlorine Isotope Geochemistry

Jaime D. Barnes, Zachary D. Sharp

INTRODUCTION	345
CHLORINE ISOTOPE NOMENCLATURE AND STANDARDS.....	346
CHLORINE ISOTOPE ANALYTICAL METHODS	346
Isotope ratio mass spectrometry (IRMS).....	346
Thermal ionization mass spectrometry (TIMS)	347
Secondary ion mass spectrometry (SIMS)	348
Laser ablation inductively coupled plasma mass spectrometry (LA-ICP-MS).....	348
ISOTOPIC FRACTIONATION	348
Equilibrium Cl isotope fractionation—theoretical constraints.....	348
Equilibrium Cl isotope fractionation—experimental constraints.....	349
Kinetic Cl isotope fractionation—Cl loss	351
CHLORINE ISOTOPIC COMPOSITION OF VARIOUS GEOLOGIC RESERVOIRS	351
Mantle/OIB/mantle derived material.....	351
Seawater and seawater-derived chloride.....	353
Sediments	355
Altered Oceanic Crust (AOC)	355
Serpentinites	357
Perchlorates	357
Extraterrestrial Materials	358
CHLORINE ISOTOPES AS A TRACER	364
Tracer through subduction zones.....	364
Crustal fluids	365
Tracer in ore deposits	368

Environmental	370
SUMMARY	370
ACKNOWLEDGMENTS	371
REFERENCES	371

Chromium Isotope Geochemistry

Liping Qin, Xiangli Wang

INTRODUCTION	379
Chemical properties of Cr	379
Research History of the Cr isotopic System.....	380
ANALYTICAL METHODS AND NOTATION.....	382
Analytical methods.....	382
Notation	385
CHROMIUM ISOTOPE COSMOCHEMISTRY	386
⁵³ Mn– ⁵³ Cr short-lived chronometer	386
⁵⁴ Cr anomalies.....	387
CHROMIUM ISOTOPIC FRACTIONATION	
IN HIGH-TEMPERATURE SETTINGS	388
Bulk silicate earth and meteorites.....	388
Serpentinization and metamorphism.....	389
MECHANISMS OF CR ISOTOPIC FRACTIONATION	
IN LOW-TEMPERATURE SETTINGS.....	390
Reduction.....	390
Equilibrium Cr isotopic fractionation and Cr(III)–Cr(VI) isotope exchange in aqueous systems	397
Oxidation	398
Adsorption	398
Coprecipitation	398
CHROMIUM ISOTOPIC VARIATIONS IN SURFACIAL ENVIRONMENTS	399
Groundwater	399
Weathering systems	399
Rivers and seawater	400
Cr isotope mass balance	401
The Cr isotope system as a paleo-redox proxy.....	403
CONCLUDING REMARKS AND OUTLOOK.....	407
ACKNOWLEDGEMENT	408
REFERENCES	408

11

Iron Isotope Systematics

Nicolas Dauphas, Seth G. John, Olivier Rouxel

INTRODUCTION	415
METHODOLOGY	417
Rocks and solid samples.....	418
Water samples.....	423
<i>In situ</i> analyses	424
Isotopic anomalies and mass-fractionation laws	428

KINETIC AND EQUILIBRIUM FRACTIONATION FACTORS.....	429
Kinetic processes.....	430
Equilibrium processes.....	433
IRON ISOTOPES IN COSMOCHEMISTRY.....	451
Nucleosynthetic anomalies and iron-60.....	451
Overview of iron isotopic compositions in extraterrestrial material.....	454
HIGH-TEMPERATURE GEOCHEMISTRY.....	456
Partial mantle melting.....	462
Impact evaporation and core formation.....	464
Fractional crystallization, fluid exsolution, immiscibility, and thermal (Soret) diffusion.....	466
A new tool to improve on geospeedometry reconstructions in igneous petrology.....	469
IRON BIOGEOCHEMISTRY.....	470
Microbial cycling of Fe isotopes.....	470
Fe isotopes in plants, animals, and humans.....	472
FLUID–ROCK INTERACTIONS.....	473
High- and low-temperature alteration processes at the seafloor.....	473
Rivers and soils.....	475
Mineral deposits.....	475
IRON BIOGEOCHEMICAL CYCLING IN THE MODERN OCEAN.....	477
The importance of iron in the global ocean.....	477
Sources and sinks for Fe in the ocean.....	478
Using Fe isotopes to trace sources of Fe in the oceans.....	482
Internal cycling of Fe isotopes within the ocean.....	482
THE GEOLOGICAL RECORD AND PALEOCEANOGRAPHIC APPLICATIONS.....	483
The ferromanganese crust record.....	483
Oceanic anoxic events.....	485
The Precambrian record.....	486
The archive of iron formations.....	486
Black Shales and Sedimentary Pyrite Archives.....	490
CONCLUSION.....	492
ACKNOWLEDGMENTS.....	492
REFERENCES.....	493

12

The Isotope Geochemistry of Ni

Tim Elliott, Robert C. J. Steele

INTRODUCTION.....	511
Notation.....	511
NUCLEOSYNTHETIC NI ISOTOPIC VARIATIONS.....	513
EXTINCT ⁶⁰ Fe AND RADIOGENIC ⁶⁰ Ni.....	520
MASS-DEPENDENT Ni ISOTOPIC VARIABILITY.....	526
Magmatic systems.....	526
Weathering and the hydrological cycle.....	532
Biological systems.....	534
OUTLOOK.....	536
ACKNOWLEDGMENTS.....	537
REFERENCES.....	537

13

The Isotope Geochemistry of Zinc and Copper

Frédéric Moynier, Derek Vance, Toshiyuki Fujii, Paul Savage

INTRODUCTION	543
METHODS	545
ZINC AND COPPER ISOTOPE FRACTIONATION FACTORS	
FROM AB INITIO METHODS	548
ZINC AND COPPER IN EXTRA-TERRESTRIAL SAMPLES	
AND IGNEOUS ROCKS	557
ZINC AND COPPER IN LOW TEMPERATURE GEOCHEMISTRY	566
Experimental constraints on fractionation mechanisms	568
Cu–Zn isotopes in the weathering–soil–plant system	576
The oceans: inputs, outputs and internal cycling of Cu and Zn isotopes	581
Cu and Zn isotopes in the Anthropocene.....	589
ACKNOWLEDGMENTS.....	591
REFERENCES	591

14

Germanium Isotope Geochemistry

Olivier J. Rouxel, Béatrice Luais

INTRODUCTION	601
METHODS	602
Early methods to measure Ge isotope ratios	602
State of the art analytical methods.....	603
Sample dissolution issues.....	605
Chemical purification of samples.....	606
Hydride generation (HG) MC-ICPMS	606
Interference issues	607
Notation	607
Analytical precision	608
Ge isotope standards and reference materials	609
THEORETICAL CONSIDERATIONS AND EXPERIMENTAL CALIBRATIONS	612
Equilibrium fractionation factors	612
Kinetic processes	613
Diffusion of Ge in silicate melts.....	614
HIGH-TEMPERATURE GEOCHEMISTRY	616
Fundamentals of Ge high-temperature geochemistry.....	616
Cosmochemistry of Ge isotopes.....	621
GERMANIUM ISOTOPE SYSTEMATICS IN IGNEOUS,	
MANTLE-DERIVED ROCKS, AND METAMORPHIC ROCKS	626
The Ge isotopic composition of the Earth silicate reservoirs.....	626
Germanium recycling into the mantle: an attempt to evaluate mantle homogeneity	628
Ore deposits	629
LOW-TEMPERATURE GEOCHEMISTRY	631
Fundamentals of Ge low-temperature geochemistry.....	631
Germanium isotope systematics in low-temperature marine environments.....	634
Ge isotope fractionation during low temperature weathering	639

Germanium isotope systematics of hydrothermal waters.....	639
A preliminary oceanic Ge budget.....	641
The potential for paleoceanography and the rock record.....	644
CONCLUSION.....	647
ACKNOWLEDGMENTS.....	647
REFERENCES.....	648

15 Selenium Isotopes as a Biogeochemical Proxy in Deep Time

Eva E. Stüeken

INTRODUCTION AND OVERVIEW.....	657
NOMENCLATURE, REFERENCE MATERIALS AND ANALYTICAL TECHNIQUES.....	659
ELEMENTAL AND ISOTOPIC ABUNDANCES IN MAJOR RESERVOIRS.....	661
Terrestrial and extraterrestrial igneous terrestrial reservoirs.....	661
Reservoirs at the Earth's surface.....	663
SELENIUM IN BIOLOGY.....	666
ISOTOPIC FRACTIONATION PATHWAYS.....	667
GEOBIOLOGICAL APPLICATIONS.....	670
Developing a mass balance for the modern ocean.....	670
Implications and predictions.....	673
Selenium isotopes in deep time.....	674
CONCLUSIONS AND FUTURE DIRECTIONS.....	677
ACKNOWLEDGMENTS.....	677
REFERENCES.....	677

16 *Good Golly, Why Moly?* The Stable Isotope Geochemistry of Molybdenum

Brian Kendall, Tais W. Dahl, Ariel D. Anbar

INTRODUCTION.....	683
ANALYTICAL CONSIDERATIONS.....	684
Data reporting.....	684
Chemical separation.....	685
Mass Spectrometry.....	686
CHEMICAL AND BIOLOGICAL CONTEXT.....	688
Aqueous geochemistry.....	688
Biology.....	690
FRACTIONATION FACTORS.....	692
Adsorption to Mn oxides.....	692
Adsorption to Fe oxides and oxyhydroxides.....	693
Sulfidic species.....	694
Biological processes.....	694
High-temperature melt systems.....	695
MOLYBDENUM ISOTOPES IN MAJOR RESERVOIRS.....	696
Meteorites.....	696
The mantle and crust.....	697
The oceans.....	699
Lakes.....	706

APPLICATION TO OCEAN PALEOREDOX.....	706
Local depositional conditions.....	707
Reconstructing the oceanic Mo isotope mass balance	708
Inferring seawater $\delta^{98}\text{Mo}$ from sedimentary archives.....	710
Tracing atmosphere–ocean oxygenation using Mo isotopes.....	712
Part 1: Searching for free O_2 in the Archean surface environment.....	712
Part 2: Tracing global ocean oxygenation in the post-GOE world.....	714
APPLICATION TO NATURAL RESOURCES.....	717
Ore deposits.....	717
Petroleum systems.....	722
Anthropogenic tracing.....	722
CONCLUSIONS.....	723
ACKNOWLEDGMENTS.....	724
REFERENCES.....	724

17 Recent Developments in Mercury Stable Isotope Analysis

Joel D. Blum, Marcus W. Johnson

INTRODUCTION	733
Element properties.....	734
Hg isotope nomenclature.....	734
Reference materials.....	735
Analytical advances.....	735
Isobaric and molecular interferences.....	737
Reagent blanks and sample carryover.....	740
Matrix effects and the need to remove matrix materials	741
Recommendations for analyses.....	744
ISOTOPIC ABUNDANCES IN MAJOR RESERVOIRS	745
Isotopic behaviors during major geological processes.....	748
NEW FRONTIERS IN HG ISOTOPE ANALYSIS.....	749
Isotopic composition of methyl mercury.....	749
Separation of Hg from low concentration waters.....	750
Separation of Hg from atmospheric gases.....	750
Even-mass MIF	751
FUTURE DIRECTIONS	752
ACKNOWLEDGMENTS.....	753
REFERENCES	753

18 Investigation and Application of Thallium Isotope Fractionation

Sune G. Nielsen, Mark Rehkämper, Julie Prytulak

ABSTRACT.....	759
INTRODUCTION	760
METHODOLOGY	762
Mass spectrometry.....	762
Chemical separation of thallium.....	762
Measurement uncertainties and standards.....	764

THALLIUM ISOTOPE VARIATION IN EXTRATERRESTRIAL MATERIALS	765
The ^{205}Pb – ^{205}Tl decay system.....	765
Chondritic meteorites	766
Iron meteorites.....	767
Limitations of the ^{205}Pb – ^{205}Tl chronometer	770
THALLIUM ISOTOPE COMPOSITION OF THE SOLID EARTH	771
The primitive mantle	771
The continental crust	771
THALLIUM ISOTOPE COMPOSITION OF SURFACE RESERVOIRS	772
Volcanic degassing	772
Weathering and riverine transport of Tl.....	773
Anthropogenic mobilization of Tl.....	774
The isotope composition of seawater	775
THE MARINE MASS BALANCE OF THALLIUM ISOTOPES.....	776
Thallium isotopes in marine input fluxes	776
Thallium isotope compositions of marine output fluxes	780
CAUSES OF THALLIUM ISOTOPE FRACTIONATION.....	782
APPLICATIONS OF THALLIUM ISOTOPES	784
Studies of Tl isotopes in Fe–Mn crusts	784
Calculation of hydrothermal fluid fluxes using Tl isotopes in the ocean crust.....	786
High temperature terrestrial applications	787
FUTURE DIRECTIONS AND OUTLOOK	791
