Contents

Foreword	xiii
Preface to the Second Edition.....	xvii
Acknowledgments	xix
Authors	xxi
1 Introduction	1
1.1 Motivation	1
1.2 Advanced Materials.....	1
1.3 Rapid Solidification Processing	3
1.4 Mechanical Alloying	5
1.5 Outline of the Book.....	6
References	7
2 Metallic Glasses	9
2.1 Introduction	9
2.2 Distinction between Crystals and Glasses.....	10
2.3 Differences between Amorphous Alloys and Metallic Glasses.....	11
2.4 Concepts of Glass Formation.....	13
2.5 Thermodynamics and Kinetics of Glass Formation	16
2.5.1 Thermodynamic Stability.....	17
2.5.2 Kinetics of Glass Formation	18
2.6 Methods to Synthesize Metallic Glasses	21
2.6.1 Vapor-State Processes.....	21
2.6.2 Liquid-State Processes.....	22
2.6.3 Solid-State Processes	23
2.6.3.1 Hydrogen-Induced Amorphization	23
2.6.3.2 Multilayer Amorphization.....	24
2.6.3.3 Pressure-Induced Amorphization	24
2.6.3.4 Amorphization by Irradiation.....	24
2.6.3.5 Severe Plastic Deformation.....	24
2.6.3.6 Accumulative Roll Bonding.....	26
2.7 Bulk Metallic Glasses	27
2.7.1 Characteristics of Bulk Metallic Glasses	27
2.7.2 Origins of Bulk Metallic Glasses	28
2.8 High-Entropy and Pseudo-High-Entropy Bulk Metallic Glasses.....	30
2.9 Potential Resources in the Literature on Metallic Glasses.....	33
References	34
3 Glass-Forming Ability of Alloys.....	45
3.1 Introduction	45
3.2 Critical Cooling Rate	46
3.2.1 $T-T-T$ Diagrams.....	47
3.2.2 Measurement of R_c	49
3.2.3 Effect of Alloying Elements.....	50

3.3	Reduced Glass Transition Temperature.....	54
3.4	Deep Eutectics	56
3.5	Topological Models.....	59
	3.5.1 Atomic Size Mismatch	60
	3.5.2 Egami and Waseda Criterion	60
3.6	Bulk Metallic Glasses	61
3.7	Inoue Criteria.....	62
	3.7.1 The ΔT_x Criterion	63
	3.7.2 The t_{\max} Criterion	65
3.8	Exceptions to the Inoue Criteria	66
	3.8.1 Less Than Three Components in an Alloy System.....	66
	3.8.2 Negative Heat of Mixing.....	67
	3.8.3 Other Exceptions.....	68
3.9	New Criteria	69
3.10	Transformation Temperatures of Glasses.....	70
	3.10.1 The γ Parameter	70
	3.10.2 The γ_m Parameter	75
	3.10.3 The α and β Parameters.....	75
	3.10.4 The δ Parameter	77
	3.10.5 The T_{rx} Parameter.....	77
	3.10.6 The K_{gl} Parameter.....	78
	3.10.7 The ϕ Parameter.....	78
	3.10.8 The <i>New</i> β Parameter.....	79
	3.10.9 The ω Parameter.....	80
	3.10.10 The ω_m Parameter.....	81
	3.10.11 The θ Parameter	81
	3.10.12 The ζ Parameter.....	82
	3.10.13 An Overview of All the Criteria Based on Transformation Temperatures.....	82
3.11	Thermodynamic and Computational Approaches.....	85
	3.11.1 Miedema Model	86
	3.11.2 The G_{CE} Parameter	88
	3.11.3 The γ^* Parameter.....	88
	3.11.4 The γ^{FP} Parameter.....	90
	3.11.5 The P_{HSS} Parameter	90
	3.11.6 The θ' Parameter	90
	3.11.7 The Q Parameter	91
	3.11.8 Computational Approaches	92
3.12	Structural and Topological Parameters	93
	3.12.1 Egami's Atomistic Approach.....	94
	3.12.2 Miracle's Topological Criterion.....	97
	3.12.3 Average Bond Constraint Model	106
	3.12.4 Mandal Model	106
	3.12.5 The σ Parameter	108
	3.12.6 Fang's Criterion of Bond Parameters	110
3.13	Physical Properties.....	115
	3.13.1 Minimum Molar Volume.....	115
	3.13.2 Density	116
	3.13.3 Viscosity	117

3.13.4	The <i>New</i> δ Parameter	117
3.14	Miscellaneous Criteria	118
3.14.1	Enthalpy of Vacancy Formation	118
3.14.2	Electron Concentration	119
3.14.3	Local Ordering	120
3.14.4	Fragility Parameter	120
3.14.5	Electrical Transport Properties	121
3.14.6	Miscellaneous	122
3.15	Criteria for Glass Formation by Non-Solidification Methods	122
3.16	Concluding Remarks	125
	References	126
4	Synthesis of Bulk Metallic Glasses	139
4.1	Introduction	139
4.2	Principles of Rapid Solidification Processing	139
4.3	General Techniques to Achieve High Rates of Solidification	140
4.4	Melt Spinning	141
4.5	Bulk Metallic Glasses	143
4.5.1	Flux Melting Technique	144
4.5.2	Role of Contamination	146
4.6	Bulk Metallic Glass Casting Methods.....	148
4.6.1	Water-Quenching Method.....	148
4.6.2	High-Pressure Die Casting.....	150
4.6.3	Copper Mold Casting.....	152
4.6.4	Cap-Cast Technique	155
4.6.5	Suction-Casting Method.....	156
4.6.6	Squeeze-Casting Method.....	157
4.6.7	Arc-Melting Method.....	158
4.6.8	Unidirectional Zone-Melting Method	158
4.6.9	Electromagnetic Vibration Process	160
4.7	Bulk Metallic Glass Composites	161
4.7.1	<i>In Situ</i> Composites	162
4.7.2	<i>Ex Situ</i> Composites	162
4.8	Mechanical Alloying	163
4.9	Bulk Metallic Glass Foams	166
4.10	Concluding Remarks	169
	References	170
5	Crystallization Behavior	175
5.1	Introduction	175
5.2	Methodology.....	176
5.2.1	Transformation Temperatures	177
5.2.2	Activation Energy for Crystallization.....	182
5.2.3	Structural Details.....	185
5.3	Crystallization Modes in Melt-Spun Ribbons	187
5.3.1	Polymorphous Crystallization.....	188
5.3.2	Eutectic Crystallization.....	189
5.3.3	Primary Crystallization	190
5.4	Differences in Crystallization Behavior between Melt-Spun Ribbons and Bulk Metallic Glasses	190

5.5	Thermal Stability of Metallic Glasses	193
5.6	Crystallization Temperatures and Their Compositional Dependence	196
5.7	Annealing of Bulk Metallic Glasses	198
5.7.1	Structural Relaxation.....	200
5.7.2	Glass Transition.....	206
5.7.3	Phase Separation.....	207
5.7.4	Crystallization.....	220
5.8	Effect of Environment	224
5.9	Effect of Pressure.....	227
5.10	Effect of Magnetic Field.....	231
5.11	Effect of Ion Irradiation.....	232
5.12	Miscellaneous.....	232
5.13	Concluding Remarks.....	233
	References	234
6	Physical Properties.....	243
6.1	Introduction.....	243
6.2	Density.....	243
6.3	Thermal Expansion.....	251
6.4	Diffusion.....	255
6.5	Electrical Resistivity	261
6.6	Specific Heat.....	266
6.7	Viscosity	269
	References	274
7	Corrosion Behavior	281
7.1	Introduction.....	281
7.2	Terminology and Methodology	283
7.3	Copper-Based Bulk Metallic Glasses	286
7.3.1	Influence of Composition.....	286
7.3.2	Influence of Test Environment.....	293
7.3.3	Nature of the Passive Film.....	293
7.3.4	Hierarchical Surface Structures.....	294
7.3.5	Nanophase Composites	296
7.4	Iron-Based Bulk Metallic Glasses	300
7.4.1	Influence of Composition.....	301
7.4.2	Influence of Test Environment.....	303
7.4.3	Influence of Structural Changes.....	303
7.4.4	Nature of the Passive Film.....	306
7.4.5	Bioactivity	308
7.5	Magnesium-Based Bulk Glassy Alloys.....	310
7.6	Nickel-Based Bulk Metallic Glasses	311
7.6.1	Influence of Composition.....	312
7.6.2	Influence of Test Environment.....	316
7.6.3	Nature of the Passive Film.....	316
7.6.4	Influence of Microstructure.....	319
7.7	Titanium-Based Bulk Metallic Glasses	320
7.8	Zirconium-Based Bulk Metallic Glasses.....	323
7.8.1	Influence of Composition, Test Environment, and Temperature.....	327
7.8.2	Influence of Microstructure.....	328

7.8.3	Polarization Studies.....	328
7.8.4	Pitting Corrosion.....	329
7.9	Other Bulk Metallic Glassy Alloys.....	331
7.10	Concluding Remarks.....	332
	References.....	332
8	Mechanical Behavior.....	339
8.1	Introduction.....	339
8.2	Deformation Behavior.....	340
8.2.1	Inhomogeneous Deformation.....	340
8.2.2	Homogeneous Deformation.....	343
8.3	Deformation Maps.....	346
8.4	Temperature Rise at Shear Bands.....	349
8.4.1	Nanocrystallization near Shear Bands.....	355
8.5	Strength.....	357
8.6	Ductility.....	361
8.6.1	Effect of Composition.....	368
8.6.2	Extrinsic Factors.....	369
8.6.3	Ductile Fe-Based Bulk Metallic Glasses.....	373
8.7	Fatigue.....	375
8.7.1	Methodology.....	376
8.7.2	High-Cycle Fatigue.....	377
8.7.2.1	Effect of Composition.....	381
8.7.2.2	Effect of Environment.....	383
8.7.2.3	Effect of Microstructure.....	384
8.7.2.4	Effect of Testing Method.....	386
8.7.2.5	Effect of Structural Relaxation.....	387
8.7.3	Fatigue Crack Growth Rate.....	388
8.7.3.1	Effect of Environment.....	391
8.7.3.2	Effect of Temperature.....	392
8.7.4	Fatigue Fracture Surface Characterization.....	393
8.7.5	Fatigue Fracture Mechanisms.....	395
8.7.5.1	Crack Initiation.....	395
8.7.5.2	Crack Propagation.....	396
8.7.6	Improvement of Fatigue Resistance.....	397
8.8	Yield Behavior.....	400
8.8.1	Yield Criterion.....	400
8.8.2	Fracture Angle.....	401
8.8.3	Effect of Strain Rate on Fracture Strength.....	401
8.8.4	Fracture Morphology.....	405
8.9	BMG Composites.....	408
8.9.1	Mechanical Properties.....	410
8.9.2	Effect of Particle Shape.....	413
8.9.3	Effect of Volume Fraction.....	414
8.9.4	Shear Band Initiation.....	415
8.9.5	Shear Band Propagation.....	416
8.9.6	Superelasticity.....	417
8.9.7	High Strength-High Ductility BMGs.....	418
8.9.8	Icosahedral Particle-Dispersion Effect.....	424

8.10	Concluding Remarks	427
	References	427
9	Magnetic Properties	441
9.1	Introduction	441
9.2	Soft Magnetic Materials	442
9.2.1	Effect of Alloying Elements.....	442
9.2.2	Effect of Annealing.....	445
9.3	Nanocrystalline Alloys	448
9.4	Hard Magnetic Materials.....	452
9.5	Magnetocaloric Properties.....	457
9.6	Concluding Remarks.....	457
	References	459
10	Applications	465
10.1	Introduction	465
10.2	Special Characteristics of Bulk Metallic Glasses	465
10.3	Structural Applications	468
10.3.1	Sporting Goods	468
10.3.2	Precision Gears.....	469
10.3.3	Motors.....	472
10.3.4	Automobile Valve Springs	474
10.3.5	Diaphragms for Pressure Sensors	476
10.3.6	Pipes for a Coriolis Mass Flowmeter	478
10.3.7	Optical Mirror Devices	479
10.3.8	Structural Parts for Aircraft	480
10.3.9	Shot Peening Balls	481
10.3.10	Metallic Glassy Screw Bolts.....	483
10.3.11	Applications to Surface Coatings	486
10.4	Chemical Applications	489
10.5	Magnetic Applications	492
10.5.1	Magnetic Actuators	493
10.5.2	Hyperthermia Glassy Alloys	493
10.6	Miscellaneous Applications	496
10.6.1	Jewelry	496
10.6.2	Biomedical Applications	498
10.6.3	Medical Devices	499
10.6.4	Others	501
10.7	Concluding Remarks.....	501
	References	503
11	Epilogue	507
11.1	Introduction	507
11.2	Size and Shape.....	508
11.3	Mechanical Properties.....	509
11.4	Magnetic Properties.....	510
11.5	Fundamental Properties	510
11.6	Concluding Remarks	511
	References	511
	Index	513
