

AN INTRODUCTORY COURSE ON  
**DIFFERENTIABLE  
MANIFOLDS**

SIAVASH SHAHSHAHANI

DOVER PUBLICATIONS, INC.  
Mineola, New York

# Contents

Preface	1
<b>Part I. Pointwise</b>	<b>5</b>
Chapter 1. Multilinear Algebra	7
A. Dual Space	7
B. Tensors	8
C. Anti-symmetric Tensors	13
D. Real Linear Spaces	17
E. Product Structure	19
EXERCISES	24
<b>Part II. Local</b>	<b>27</b>
Chapter 2. Vector Fields: Local Theory	29
A. Tangent Space	29
B. Vector Fields and Differential Equations	33
C. Vector Fields as Operators	44
D. Lie Bracket of Vector Fields	51
EXERCISES	60
Chapter 3. Tensor Fields: Local Theory	65
A. Basic Constructions	65
B. Pointwise Operations	68
C. Exterior Derivative	72
D. Lie Derivative	77
E. Riemannian Metrics	81
EXERCISES	86
<b>Part III. Global</b>	<b>91</b>
Chapter 4. Manifolds, Tangent Bundle	93
A. Topological Manifolds	93
B. Smooth Manifolds	102
C. Smooth Structures	104
D. The Tangent Bundle	109
Appendix	120
EXERCISES	122

Chapter 5. Mappings, Submanifolds and Quotients	125
A. Submanifolds	125
B. Immersions, Submersions and Embeddings	132
C. Quotient Manifolds	137
D. Covering Spaces	142
EXERCISES	150
Chapter 6. Vector Bundles and Fields	155
A. Basic Constructions	155
B. Vector Fields: Globalization	164
C. Differential Forms: Globalization	169
D. Riemannian Metrics	175
E. Plane Fields	181
EXERCISES	195
Chapter 7. Integration and Cohomology	203
A. Manifolds with Boundary	203
B. Integration on Manifolds with Boundary	209
C. Stokes Theorem	217
D. De Rham Cohomology	222
E. Top-dimensional Cohomology and Applications	232
EXERCISES	242
Chapter 8. Lie Groups and Homogeneous Spaces	251
A. Continuous Groups	251
B. The Lie Algebra of a Lie Group	261
C. Homogeneous Spaces	271
EXERCISES	279
<b>Part IV. Geometric Structures</b>	<b>285</b>
Chapter 9. An Introduction to Connections	287
A. The Geography of the Double Tangent Bundle	287
B. Descent of the Second Derivative	295
C. Covariant Derivative	303
D. Curvature and Torsion	310
E. Newtonian Mechanics	321
EXERCISES	330
Appendix I. The Exponential of a Matrix	337
Appendix II. Differential Calculus in Normed Space	341
Bibliography	349
List of symbols	351
Index	353
