

Plant Design and Operations

Second Edition

Ian Sutton

Author, Sutton Technical Books, Ashland, Virginia

Gulf Professional Publishing
An imprint of Elsevier

Contents

Preface	xxv
CHAPTER 1 Safety in Design	1
Introduction	1
Standard Examples	2
Terminology	2
Regulations, Standards, and Guidance	2
Regulatory Agencies (the United States)	3
Regulations (International)	3
Industry Standards	5
Health, Safety, and Environment	7
Process Safety Management	9
Risk Management	10
Units of Measurement	11
SI Units	12
Date Format	12
Engineering Drawings	13
Block Diagrams	13
Process Flow Diagrams	14
Piping and Instrument Diagrams	15
Spec Breaks	18
Isometric Drawings	18
Electrical Single-Line Diagrams	18
Materials of Construction	19
Flammable and Combustible Materials	19
Fire Triangle	20
Flammable Range	21
Flash Point	21
Flammable/Combustible Liquids	22
Ignition Sources	23
Lightning	25
Area Classification	25
IEC Code	27
Regulations and Standards	27
Temperature Code	29
Classification Plan	29

Fireproofing Insulation.....	30
Fireproofing Materials.....	33
Cryogenic Systems.....	34
Maintenance.....	34
CHAPTER 2 Siting and Layout.....	35
Introduction.....	35
Regulations and Standards.....	36
Siting.....	36
Layout.....	38
Layout Risk Analysis.....	40
Facility Orientation.....	41
Hazardous Areas.....	41
Blocks and Roads.....	42
Piping.....	42
Drainage Systems.....	43
Loading/Unloading Facilities.....	44
Routine Access and Egress.....	45
Explosion Protection.....	46
Safe Areas.....	46
Emergency Escape.....	47
Manual Alarm Call Points.....	47
Process Isolation Valves.....	48
Firefighting.....	49
Emergency Showers and Eyewashes.....	49
Equipment Spacing.....	51
Pressure Vessels.....	54
Hydrocarbon Storage Tanks.....	56
Pumps.....	57
Compressors/Compressor Drivers.....	58
Heat Exchangers.....	59
Boilers.....	59
Fired Equipment.....	59
Air Intakes.....	60
Equipment Stacking.....	61
Piping and Valves.....	61
Piping.....	61
Valves.....	62
Flares and Vents.....	62
Buildings.....	63
Utilities.....	64

Stairways and Ladders..... 64
 Stairways..... 65
 Ladders..... 67
 Platforms..... 71
 Guardrails, Handrails, and Toeboards..... 71
 Ramps 72

CHAPTER 3 Equipment and Buildings 73

Introduction..... 73
 Regulations and Standards 74
 Pressure Vessels/Columns 74
 Pressure Vessel Code 74
 Fire Hazard 79
 Maximum Allowable Working Pressure..... 79
 Vessels Under Vacuum 80
 Storage Vessels..... 81
 Reflux Vessels 82
 Manways..... 82
 Nameplate/Documentation 82
 Storage Tanks 82
 Functions of Storage Tanks..... 84
 Types of Storage Tank 85
 Fixed Roof Tanks 86
 Floating Roof Tanks..... 87
 Plastic Tanks..... 89
 Bund Walls/Berms..... 89
 Tank Farms 90
 Stairs and Platforms..... 90
 Tank Design..... 91
 Tank Fires 93
 Boilover/Foamover 95
 Rag Layers..... 95
 Bottoms Sediment and Water..... 96
 Pumps..... 97
 Types of Pump..... 98
 Shutdown and Alarm Systems 99
 Suction Piping..... 99
 Minimum Flow Protection 99
 Fire Protection 100
 Sealless Pumps..... 100
 Sparing 100

Pump Isolation	100
Vibration	101
Pump Casing	101
Seals and Packing	101
Compressors	102
API 618	102
Seals	102
Shutdown and Alarm Systems	102
Liquid Knockout	104
Relief Valves	104
Compressor Isolation	104
Surge Protection	105
Sparing Policy	105
Turbines	105
Gas Turbines	105
Steam Turbines	106
Heat Exchangers	106
Shell and Tube Exchangers	108
Tube/Shell Side	108
Tube Leakage	108
Air-Cooled Exchangers	110
Cooling Towers	111
Natural/Forced Draft	111
Safety	113
Fired Heaters	114
Heat Transfer Fluids	115
Air Preheaters	117
Safety	118
Flares/Blowdown	119
Emergency Depressurization	119
Flaring	120
Thermal Oxidizers	125
Boilers	125
Internal Combustion Engines	126
Starter Systems	127
Intake, Exhaust, and Fuel Systems	127
Electrical Equipment	127
Transformers	128
Equipment Grounding	128
Ground-Fault Circuit Interrupters	128

Buildings.....	129
Administrative Buildings.....	130
Control Buildings.....	130
Process Buildings.....	135
Warehouses and Workshops.....	136
Temporary Buildings.....	136
CHAPTER 4 Piping.....	139
Introduction.....	139
Regulations and Standards.....	140
Pipe Specifications.....	140
Pipe Sizing.....	143
Nominal Pipe Sizes.....	144
Pipe Schedule.....	144
Fluid Velocity.....	146
Materials.....	146
Steel.....	146
Other Metals.....	146
Polymers.....	147
Equipment.....	148
Underground Piping.....	148
Fittings.....	149
Welding.....	150
Threaded Piping.....	150
Expansion Loops/Compensators.....	150
Small Pipe Connections.....	152
Flanges.....	153
Gaskets.....	154
Blinds.....	154
Line Blinds.....	156
Spectacle Blinds.....	156
Insulation.....	156
Heat Tracing.....	157
Steam Tracing.....	158
Electrical Tracing.....	158
Flame Arrestors.....	159
Thermal Flame Arrestors.....	159
Water Seal Flame Arrestors.....	160
Velocity Flame Arrestors.....	161
Detonation Arrestors.....	161
Vortex Breakers.....	161
Hoses.....	162

CHAPTER 5	Valves	165
	Introduction.....	165
	Regulations and Standards	166
	Valve Symbols.....	166
	Block Valves.....	166
	Gate Valves.....	166
	Ball Valves	168
	Butterfly Valves.....	170
	Plug Valves.....	170
	Needle Valves.....	171
	Excess Flow Valves.....	171
	Self-Closing Valves.....	172
	Globe/Control Valves	173
	Check (Non-return) Valves	174
	Rotary Valves	175
	Flangeless Valves	176
	Emergency Isolation Valves.....	177
	Valve Seat Materials	177
	Valve Position.....	177
	Steam Traps	178
	Pressure Relief Devices.....	178
	Causes of Overpressure	179
	Pressure Safety Relief Valves	179
	Pilot-Operated Pressure Relief Valves.....	181
	Block Valves.....	182
	Thermal Relief Valves.....	183
	Rupture Disks	183
	Hatches/Doors.....	185
CHAPTER 6	Instrumentation and Control	187
	Introduction.....	187
	Regulations and Standards	188
	Operating/Safe Limits.....	188
	Process Control.....	193
	Distributed Control Systems	193
	Supervisory Control and Data Acquisition Systems.....	194
	Safety Instrumented Systems	195
	Safety Integrity Level.....	196
	Testing and Inspection.....	197
	High-Integrity Pressure Protection System.....	198

Fire and Gas Detection 199

 Fire Detection 200

 Toxic Gas Detection 203

 Layout of Detectors 204

 Portable Gas Detectors 206

Alarm Systems 206

 Alarm Signaling 208

 Response to Alarms 208

 Response Matrix 210

 Limitations 211

 Alarm Flooding 211

CHAPTER 7 Transportation 213

Introduction 213

Terminology 214

Regulations and Standards 214

 International Safety Guide 217

 CAP 437—Offshore Helicopter Landing Areas 218

Tank Trucks 219

 Loading/Unloading 220

 Loading Racks 220

 Static Electricity 222

 Bonding 225

 Switch Loading 225

 Additives 226

Vacuum Trucks 226

Tank (Rail) Cars 228

 Tank Car Markings 228

 Pressure Vessels 229

 Empty Cars 229

 Graffiti 230

Marine Operations 230

 Ships and Barges 231

 Small Boats 231

 Jetty Terminals 233

 Personnel Transfer 233

 Cargo Baskets 236

 Helicopters 236

Pipelines 239

 One Call 239

 Pigging 241

 Slug Catchers 247

CHAPTER 8	Operations	249
	Introduction.....	249
	Regulations and Standards	249
	Housekeeping.....	251
	Storage and Handling of Hazardous Materials.....	252
	Flammable Liquids.....	252
	Oxidizing Agents.....	253
	Catching Samples	253
	Gas Storage Cylinders	255
	Tank Operations	256
	Filling and Emptying.....	256
	Purging and Cleaning	257
	Rotating Equipment.....	257
	Emergency Response.....	258
	Manual Emergency Shutdown	258
	Evacuation, Escape, and Rescue	258
	Personnel Tracking.....	260
	Nonprocess Operations.....	260
	Outside Storage.....	260
	Coal and Coke Storage.....	261
	Drum Storage.....	261
	Cranes and Rigging	261
	Lifting Precautions	262
	Wire Ropes, Chains, and Slings.....	263
	Tag Lines	263
	Start-Up.....	263
	Commissioning	264
	Operational Readiness Review.....	264
	Start-Up.....	264
CHAPTER 9	Maintenance	265
	Introduction.....	265
	Regulations and Standards	266
	Maintenance Management System.....	266
	Types of Maintenance	267
	Repair Maintenance.....	267
	Condition-Based Maintenance	267
	Scheduled Maintenance.....	268
	Reliability-Centered Maintenance.....	268
	Procurement.....	269
	Spare Parts	269

Documentation.....	270
Factory Acceptance Tests.....	270
Maintenance Task Organization.....	271
Step 1—Plan the Work.....	271
Step 2—Conduct a JHA.....	273
Step 3—Prepare/Issue a Work Permit.....	273
Step 4—Shutdown and Isolate Equipment.....	273
Step 5—First Break.....	274
Step 6—Perform the Work.....	275
Step 7—Close Out the Work.....	275
Step 8—Handover to Operations.....	275
Pressure Tests.....	276
Testing Procedure.....	277
Installing Blinds.....	278
Test Medium.....	279
Tightness Test.....	281
Strength Test.....	281
Pressure Test Manual.....	282
Records.....	282
Online Cleaning and Repair.....	283
Corrosion.....	285
Cathodic Protection.....	285
Corrosion Under Insulation.....	286
CO ₂ Corrosion.....	288
Sulfide Stress Cracking.....	288
Controlling Corrosion.....	288
Simultaneous Operations.....	289
Managing SIMOPs.....	289
SIMOPs Matrix.....	290
Conducting SIMOPs.....	290
CHAPTER 10 Energy Control.....	293
Introduction.....	293
Regulations and Standards.....	294
29 CFR 1910.119.....	294
API 2015.....	296
API 2026.....	298
API 2217A.....	299
ANSI Z117.1.....	300
NFPA 69.....	301

Example	304
Risk Management	304
Energy Control Program	305
Step 1—Job Hazards Analysis	305
Step 2—Work Permit	305
General Work Permits	306
Hot Work Permits	306
Confined Space Permits	308
Issuing the Permit	308
Multiple Work Permits	308
Changes in Conditions	308
Barrier Tape	309
Step 3—Vent, Drain, and Purge	309
Inert Gas	309
Air-Blowing Hydrocarbon Lines	310
Step 4—Isolate the Equipment	311
Positive Isolation	311
Nonpositive Isolation	315
Step 5—Open the Equipment	316
Test for Oxygen	316
Heavy Sludge Deposits	317
Step 6—Complete Work/Return to Service	317
Lockout/Tagout	317
Car Seals	319
Group Lockout/Lockboxes	319
Padlocks	320
Tags	320
Removing Locks and Tags	320
Electrical Isolation	321
Confined Space Entry	321
Types of Space	323
The Entry Permit	324
Personnel	325
Test	326
Excavations	327
Tie-Ins	329
Hot Tapping	330
Plugged Lines	330
Prevention of Pluggage	330
Unplugging a Line	331
Mechanical	332
Differential Pressure	332

CHAPTER 11 Inspection	335
Introduction.....	335
Regulations and Standards	336
API RP 510.....	337
API 653.....	340
API RP 580.....	341
Organization.....	342
Inspection Programs	343
Initial Inspection.....	344
Routine External Inspection	344
Complete External Inspection	345
Internal Inspection	345
Inspection Frequency.....	346
Nondestructive Testing.....	347
Continuous Monitoring.....	347
Equipment and Piping	348
Pumps.....	348
Tanks.....	348
Relief Valves	349
Inspection Records and Report	350
Risk-Based Inspection	350
Analyze Risk.....	352
Determine Costs	352
Allocate Resources	352
CHAPTER 12 Firefighting	353
Introduction.....	353
Regulations and Standards	354
API 2021.....	356
NFPA 10.....	357
Fire Scenarios	358
Leak Sources.....	358
Types of Fire.....	359
Single Fire Concept.....	359
Radiant Heat	359
Fire Prevention	359
Release Prevention	359
Preventing Ignition	360
Fire Protection	361
Operating Response.....	361
Safety Instrumentation.....	361

Passive Fire Protection	361
Active Fire Protection	361
Firewater Systems.....	362
Firewater Supply.....	364
Firewater Pumps	365
Main Fire Pumps	365
Jockey Pumps	366
Firewater Distribution.....	366
Ring Main/Header	366
Capacity and Rates	367
Disposal of Firewater	367
Materials of Construction.....	368
Firewater Delivery	368
Hydrants.....	368
Fire Monitors	369
Sprays.....	370
Deluge Systems	373
Testing	373
Other Firefighting Media.....	373
Halons	373
Steam	373
Foam	374
Carbon Dioxide.....	375
Inergen	375
Earth-Moving Equipment.....	376
Portable Fire Extinguishers	376
Water Extinguishers	377
Carbon Dioxide Extinguishers	377
Dry Chemical Extinguishers	377
Organization and Training.....	378
First Response Team	378
Communications	378
Firefighting Vehicles	378
Fire Training Ground.....	379
CHAPTER 13 Occupational Safety.....	381
Introduction.....	381
Regulations, Standards, and Guidance.....	382
Measuring Performance.....	382
Safety Manual.....	384
Incident Reporting	388

Vehicle Incidents	389
Near Misses	389
Behavior-Based Safety	389
Management Commitment	390
Observed Hazard Card	391
Timeout Policies	391
Lone Worker Policy	393
Machinery Safety	393
Dropped Objects	393
Overhead Power Lines	394
Emergency Showers and Eyewashes	395
Design of Emergency Showers	395
Operating the Shower	399
Eyewash Units	399
Testing	399
CHAPTER 14 Personal Protective Equipment	401
Introduction	401
Types of PPE	402
Regulations and Standards	403
Guidance Documents	405
OSHA 3151	405
HSE Personal Protective Equipment	405
Clothing	406
Flame-Resistant Clothing	406
Impervious Clothing/Proximity Suits	407
Bunker Gear	407
Head Protection	408
Additional Equipment/Markers	408
Color Schemes	409
Maintenance and Storage	409
Hand Protection	409
Foot Protection	410
Eye/Face Protection	410
Respiratory Protection	410
Supplied Air Respirators	411
Air-Purifying Respirators	412
Self-Contained Breathing Apparatus	412
Chemical Canister Rebreathers	412
Disposable Respirators	412

Fall Protection..... 412
 Definitions 413
 Fall Protection System..... 414
 Fall Arrest System Equipment 415

CHAPTER 15 Health 417

Introduction..... 417
 Regulations and Standards 418
 Employee Access to Records 418
 Asbestos 418
 Radiant Heat 420
 Noise 421
 Definitions 422
 Noise Limits 423
 Noise Control..... 425
 Vibration Control..... 427
 Naturally Occurring Radioactive Material..... 427
 Regulations and Standards 427
 Technologically Enhanced NORM 428
 Exposure 428
 Treatment..... 428
 Water/Dry Blasting..... 428
 Safe Limits..... 428
 Protective Measures..... 428
 Lifting 429
 Heat Stress 429
 Heat Index..... 429
 Types of Heat Stress..... 430
 Heat Stress Factors 430
 Heat Stress Prevention..... 430
 Thermal Radiation 431
 Cold Stress 432
 Equivalent Chill Temperature 433
 Controlling Cold Stress 433
 Food and Galley Hygiene..... 433
 Methods of Preservation and Treatment 434
 Treating Contamination..... 434
 Storage and Cooking Temperatures 435
 Facilities and Equipment 435
 Alcohol and Drug Policy..... 435
 Coverage 435
 Affected Participants 436

Applicants for Employment	437
Testing	437
Legal Drugs	437
Contractors.....	437
CHAPTER 16 Human Factors and Ergonomics.....	439
Introduction.....	439
Regulations and Standards	440
Process Safety Management.....	441
Principles of Human Behavior	442
Improving Human Factors.....	444
Change the Work/Workplace	444
Change Work Performance	444
Change the Person	444
Human Error	445
Automation of Functions.....	445
Control Rooms.....	445
Work Stations	446
Operation of Valves.....	447
Critical Valves	447
Noncritical Valves	448
Nonoperational Valves	448
Valve Criticality Analysis	448
Signs.....	449
Prohibition	450
Mandatory Action.....	451
Warning	452
Safe Condition	453
The Safety Diamond.....	454
Labeling	456
Color Coding	457
General Application.....	458
American Public Works Association	458
Piping	458
Hoses.....	459
Refineries	460
Human Factors on Projects	462
Phase I—Concept Selection	462
Phase II—Preliminary Engineering.....	462
Phase III—Detailed Engineering.....	463

CHAPTER 17 Chemicals	465
Introduction.....	465
Regulations and Standards	466
Safety Data Sheets (SDS).....	466
Structure	466
OSHA Requirements	469
Global Harmonization System	470
Fluid Categories.....	471
Chemical Compatibility.....	471
Exposure Limits.....	472
Emergency Response Planning Guidelines (ERPG).....	472
Immediately Dangerous to Life and Health.....	474
Permissible Exposure Limits.....	474
Threshold Limit Values.....	474
Short-Term Exposure Limit	475
Benzene.....	475
Carbon Dioxide.....	475
Carbon Monoxide	476
Chlorine	476
Hydrogen Fluoride.....	476
Unloading.....	477
KOH Beds.....	477
Dedicated Flare.....	477
Hydrogen Sulfide.....	477
Regulations and Standards	478
Toxicity.....	479
Location of Fixed Monitors	480
Sensor Technology	480
Flaring of H ₂ S.....	480
Corrosion/Metallurgy.....	481
H ₂ S Safety Plan	481
Lead	485
Nitrogen	485
Sulfur Dioxide	486
Oxygen.....	487
Oxidizing Agents.....	488
CHAPTER 18 Industries	491
Introduction.....	491
Offshore Oil and Gas.....	494
Platform Layout.....	495

Rotating Equipment	496
Flares	497
Wellbay Area	497
Drilling Rigs	497
Noise	498
Emergency Evacuation and Rescue	499
Secondary Method of Escape	499
Tertiary Methods of Escape	502
Temporary Refuge	502
Oil Refineries	504
Distillation	506
Chemical Reactions	507
Chemical and Petrochemical Plants	507
CHAPTER 19 Common Hazards	509
Introduction	509
Process Hazards	510
High Flow	510
Low/No Flow	510
Reverse Flow	510
Misdirected Flow	512
High Pressure	512
Low Pressure	512
High Temperature	512
Low Temperature	514
High Level	515
Wrong Composition	515
Chemical Embrittlement	515
Strong Oxidizers	516
Static Electricity	516
Hazards of Utilities	516
Common Cause Failure	516
Process Contamination	516
Electrical Power Failure	516
Nitrogen	517
Reverse Flow to a Utility Header	517
Survivability of Utilities	518
Hazards of Water	518
Water in Very Hot Liquid	518
Water and Firefighting	519

Hazards of Steam.....	519
Steaming Vessels During Turnaround	520
Reboiler Leak	520
Wet Steam in Turbines.....	520
Hazards of Ice.....	520
Line Freezing.....	521
Hydrates	521
Hazards of Compressed Gas	522
Gas Cylinders.....	522
Pigging	522
Hazards of Air	522
Flammable Mixture	522
Blowing a Line Clear	523
Hazards of External Events.....	523
Flooding	523
Earthquakes.....	523
Hazards of Equipment and Instruments.....	524
Furnace Firing.....	524
Fired Heater Burnout.....	524
Multiple Uses of Equipment	525
Distributed Control Systems	525
Hazards of Piping, Valves, and Hoses.....	526
Piping.....	526
Hoses.....	529
Valves	530
Shared Relief Valve.....	532
SDV Bypass.....	533
CHAPTER 20 Security	535
Introduction.....	535
Regulations and Standards	536
Types of Attack	537
Members of the Public	537
Sabotage.....	539
Terrorism	539
Cybersecurity.....	540
Security Vulnerability Analyses.....	541
Managing Security.....	541
Culture	541
Inherent Safety.....	542
Hazards Analysis	542

Rings of Protection 542
 Transportation 544
 Countermeasures 544
 Access Security 545
 Personnel Screening 545
 Offshore 546
 Transportation Worker Identification Credential (the United States) 546
 Equipment Modifications 546
 Response to a Threatening Call 546

Acronyms 549
 Bibliography 553
 Index 559
