Introduction 1

PART ONE Global challenges and port governance 11

01 Value creation and value capture in the ports’ business system 13
Larissa van der Lught and Peter de Langen
Introduction 13
The business ecosystems approach 14
The port as a business network 16
Implications of the business ecosystems perspective for PDCs 19
Conclusion 25
References 27

02 The governance of ports under global challenges: What next? 29
Michael Roe
The attitude of the maritime sector 30
The problems of implementing governance and policy change 34
So what is to be done? 37
Some final thoughts 53
References 54
03 Effect of global supply chain developments on the governance of port regulation 62
Jason Angelopoulos, Constantinos Chlomoudis and Theodore Styliadis

Introduction 62
Recent developments in maritime transportation and ports 63
Concentration in container liner shipping and terminal operators 66
Contemporary governance of port regulation and economic regulatory tools: towards a holistic approach for the transport network 78
Conclusions 85
References 86

04 Port governance reform in Spain 94
Xavier Fageda and Marta Gonzalez-Aregall

Introduction 94
Port governance in Europe 96
Spanish port reform 98
The Spanish port system 101
Conclusion 109
References 110

PART TWO Port resilience, transport logistics and the environment 115

05 Port resilience: a perspective from UK ports 117
Andrew Grainger, Duncan Shaw and Kamal Achuthan

Introduction 117
How important are ports? 118
Who has an interest in ports? 122
How vulnerable are ports? 125
What does resilience mean? 125
How can ports prepare themselves? 128
Simulation as a tool for improving port resilience 129
Information sharing for port resilience planning 132
A call to action 135
References 136
06 Quantifying resilience in seaports: an application to ports in the Hamburg–Le Havre range 139

*Indra Vonck and Theo Notteboom*

Introduction 139
The resilience concept 141
Methodology for quantifying resilience 144
Port outputs 152
The 4R framework applied to the Hamburg–Le Havre range 157
Conclusions 171
References 173

07 Understanding Australian port resilience and the development of a port resilience framework 176

*Stephen Cahoon, Benjamin Brooks and Vic Justice*

Introduction 176
Why port resilience? 177
Understanding organizational resilience concepts 179
Deconstructing port organizational resilience 180
Resilience case study – Hurricane Sandy 182
Implications of Hurricane Sandy for Australian ports 184
Port management culture and leadership 185
Port resilience – resistance and enablement 187
Adaptation and transformation 188
Contingency management as a resilience foundation 191
Acquiring organizational resilience 193
Resilience learning opportunities 194
Developing a port resilience framework 195
Conclusions 197
Appendix 197
References 200

08 Green pricing decision-making: tackling uncertainty in the case of port infrastructure 207

*Magali Geerts, Michaël Dooms and Mychal Langenus*

Introduction 207
Green pricing decision-making 209
Development of a multi-criteria-based toolbox 210
Contents

Applications 219
Conclusion 236
Appendix 239
References 243

09 The implications of the SECA for ports and hinterland transport in Sweden 245
Rickard Bergqvist and Kevin Cullinane

Introduction 245
Sweden's economy and supporting port sector 246
Shipping emissions 249
Impacts of the Sulphur Directive 255
Conclusions 267
References 272

10 The role of ports in the offshore wind industry 275
Negar Akbari, Chandra Irawan, Dylan Jones and David Menachof

Introduction 275
Offshore wind port involvement in the North Sea region 276
Offshore wind industry and port selection 281
Conclusion 298
Appendix 298
References 299

PART THREE Port policies and competition strategies 303

11 Canadian ports policy: an evolutionary approach 305
Michael Ircha

Introduction 305
Waves of Canadian port evolution 306
Growing international trade 310
Port infrastructure 313
West coast ports 317
Transitioning to a fourth wave? 324
Conclusion 326
12 Port policies and private investments: insights from Latin America and Caribbean countries 332
Claudio Ferrari and Alessio Tei

Introduction 332
The involvement of the private sector in the port industry 333
The case study 336
The data 339
The PPPs in Latin America and the Caribbean 344
The role of PPPs 348
References 349

13 The operations management and governance of cruise terminals in Hong Kong 351
Yui-Yip Lau, Adolf Ng and Ka-Chai Tam

Introduction 351
Background 354
Data collection 357
A historical account of the site selection process 358
The recent development plans of the Kai Tak Cruise Terminal (KTCT) 366
Conclusion 371
Acknowledgements 372
References 373

14 Competition strategies in the Spanish port system and their relationship with port authority efficiency 376
Beatriz Tovar and Alan Wall

Introduction 376
Regulatory changes in the Spanish port system since the early 1990s 378
Data 382
Evolution of market concentration in the Spanish port system: 1993–2012 384
Output concentration and specialization within individual port authorities 389
Output specialization/concentration, port size, and their relationship with productive efficiency 395
Conclusions and discussion 396
Appendix 399
References 404

15 Assessing the national port system – the case of Vietnam 407
Vinh Thai
Introduction 407
General background to the Vietnamese port system 408
Anatomy of port development in Vietnam 410
Conclusion 439
References 439

PART FOUR Port choice and ports in shipping systems 443

16 Supply chain modelling for container-port choice: case study of a west Mediterranean trans-shipment port 445
Khalid Bichou
Background and introduction 446
Literature review 448
Methodology 451
Empirical results 458
Conclusions and recommendations 465
References 466

17 Port-centric logistics: the seaport versus inland location dilemma 470
Robert Mason, Stephen Pettit and Anthony Beresford
Introduction 470
What is port-centric logistics? 472
Port-centric logistics approaches 473
The concept of value 475
Where should port-centric logistics facilities be located? 477
Methodological approach 477
Case 1: Moving logistics functions from an inland location to a seaport 478
Case 2: Moving logistics functions from a seaport to an inland location 479
Conclusion 481
References 483

18 Port management implications from economies of scale in the liner container shipping industry 486
Ricardo Sanchez and Gordon Wilmsmeier

Introduction 486
Recent changes in the shipping industry 488
Main economic concepts related to economies of scale, industrial capacity and capacity adjustment 492
Common beliefs: a discussion 497
Port management implications in decoupled supply and demand market conditions 511
Conclusion 515

Appendix 1 517
Appendix 2 519
References 519
Index 525
