CONTENTS

List of Tables ix
Foreword to the 2017 Edition xi
Foreword to the 1972 Edition xxvii
Acknowledgments xxxi
Introduction and Summary xxxiii

1. A STOCK APPROACH TO THE DEMAND FOR HEALTH 1
1.a. The Model 1
1.b. Equilibrium Conditions 5
1.c. Glossary 11

2. THE SHADOW PRICE OF HEALTH 13
2.a. The Investment Demand Curve 13
2.b. Variations in Depreciation Rates 16
   Life Cycle Patterns 16
   Cross-Sectional Variations 22
   Uncertainty 23
2.c. Market and Nonmarket Efficiency 25
   Wage Effects 26
   The Role of Human Capital 29
   Joint Effects 33
2.d. Glossary 35
CONTENTS

3. THE PURE CONSUMPTION MODEL 37
   3.a. Life Cycle Patterns 37
   3.b. Market and Nonmarket Efficiency 41
       Wage Effects 42
       The Role of Human Capital 42
   3.c. Glossary 45

4. AN EMPIRICAL FORMULATION OF THE MODEL 47
   4.a. Structure and Reduced Form 48
   4.b. Measurement of Health and Variables Considered 54
   4.c. Glossary 66

5. EMPIRICAL RESULTS: THE NORC SAMPLE 69
   5.a. Whites with Positive Sick Time 69
       Demand Curves for Health and Medical Care 69
       The Gross Investment Production Function 81
       The Role of Disability Insurance 83
   5.b. Supplementary Results 88
       All Whites in the Labor Force 88
       Males 90

6. JOINT PRODUCTION AND THE MORTALITY DATA 93
   6.a. The Theory of Joint Production 94
   6.b. The Mortality Data 99
   6.c. Glossary 103

Appendix A. Utility Maximizations 105
Appendix B. Derivation of Investment Model Formulas 109
Appendix C. Derivation of Consumption Model Formulas 119
Appendix D. Statistical Properties of the Model 125
Appendix E. Additional Empirical Results 133
Appendix F. Sources and Methods: Mortality Analysis 143
