Part two – Designing and delivering services and products  

3 Designing Services and Products  

Introduction  

Designing and developing services and products  

The research and development process  

The design and development process  

Reviewing the service and product mix  

Developing a specification  

Techniques for improving design  

Standardization  

Modular design  

Mass customization  

Taguchi methods  

Quality function deployment and the house of quality  

Value analysis  

Simultaneous engineering  

Variety reduction  

Critical reflections  

Summary  

Study activities  

Exploring further  

Companion website  

Notes and references  

4 Delivering Services  

Introduction  

Factors affecting service delivery system design  

Characteristics of service operations  

Understanding how services differ  

Designing the service delivery system  

Overall design of service delivery systems  

Detailed design of service delivery systems  

Phase 1 – the point of customer interface: back office or front office?  

Phase 2 – the delivery system  

IT-based service delivery system designs  

Further aspects of service delivery  

Enhancing services  

Customer participation in service delivery  

Improving operations  

Lean service operations  

Tools and methods  

Critical reflections  

Summary  

Study activities  

Exploring further

# Essential Operations Management Contents

## 5 Making Products

### Introduction

### Factors affecting the design of the manufacturing process
- Categories of product
- Types of manufacturing process

### Designing the manufacturing process
- Implications of process design

### Hybrid processes
- Cells

### Improving operations
- Lean operations

### Critical reflections

### Summary

### Study activities

### Exploring further

### Companion website

### Notes and references

## 6 Location and Layout

### Introduction

### Choosing a location
- Levels of decision
- Background factors influencing location decisions
- Site location techniques

### Choosing a layout
- Factors influencing layout
- Basic types of layout
- Detailed layout design

### Critical reflections

### Summary

### Study activities

### Exploring further

### Companion website

### Notes and references

## Part three – Managing Operations

### 7 Managing Capacity

### Introduction

### An overview of managing capacity
- Defining and measuring capacity

### Factors affecting capacity management
- How do the service delivery system and manufacturing process design affect capacity?
- Determining the level of capacity

### Critical reflections

### Summary

### Study activities

### Exploring further

### Companion website

### Notes and references
Planning and managing capacity 189
   Resource planning 190
   Types of capacity plan 194
   Managing demand and capacity 195

Critical reflections 200

Summary 201

Study activities 202

Exploring further 203

Companion website 203

Notes and references 203

8 Scheduling and Executing Operations 207

Introduction 208

What is operations scheduling? 208
   The role of scheduling in managing operations 208

Operations scheduling systems 210
   Project management 210
   Informal scheduling systems 210
   Scheduling systems for complex services or products 212
   Scheduling systems for repeat services and products 216

Critical reflections 233

Summary 234

Study activities 235

Exploring further 240

Companion website 240

Notes and references 240

9 Managing Inventory 243

Introduction 244

What is inventory? 244
   The role of inventory 244
   Types of inventory 245
   Functions of inventory 247

Models and approaches for managing inventory 252
   Background issues and approaches 252
   Key inventory decisions – what to stock and when to order 256
   Deciding how much inventory to hold, how much material to order, and when 257

Inventory control systems and analysis 262
   Inventory control systems 263
   Inventory analysis 264

Critical reflections 266

Summary 267

Study activities 267

Exploring further 268
10 Managing Quality
Introduction
Defining quality and its role
Quality philosophies: the work of Deming, Juran and Crosby
W. Edwards Deming
Joseph M. Juran
Philip B. Crosby
The steps to effectively managing quality
Tools and techniques
Approaches to managing quality
Total quality management
Quality management frameworks: ISO 9000, Baldrige Award and EFQM Excellence Award
Critical reflections
Summary
Study activities
Exploring further
Companion website
Notes and references
11 Managing the Supply Chain
Introduction
What is a supply chain?
Designing the supply chain
Deciding whether to make or buy
Advantages and disadvantages of make or buy
Advantages of making in-house
Disadvantages of making in-house
Advantages of deciding to buy/outsource
Disadvantages of deciding to buy/outsource
Outsourcing – managing the risks
Insourcing or reshoring
Alternatives to outsourcing
Managing supply chains
Types of supplier relationship
Corporate social responsibility
Digital supply
Developing supply chains
Stages of development
Tools and techniques for developing supply chains
The benefits of improving supply chains
Reverse logistics – handling returns in an online world
Critical reflections
Summary
Study activities
Part four – Improving operations

12 Improving Operations

Introduction

Why improve operations?
- Releasing cash
- Improving market support
- Reducing costs

The process of improving operations
- Approaches to improving operations
- Improvement tools and techniques
- Making improvements

Critical reflections

Summary

Study activities

Exploring further
