

# Essays on Qualitative and Quantitative Risk Management

David Fritz

# Contents

List of Figures	VI
List of Tables	IX
1 Introduction	1
2 It's All About the Risk: Text Mining Reporting Quality	9
2.1 Introduction . . . . .	9
2.2 Literature review . . . . .	14
2.2.1 Pioneer work in financial textual analysis . . . . .	14
2.2.2 Risk studies connecting quantitative and qualitative data . . . . .	15
2.2.3 Risk reporting quality . . . . .	17
2.3 Regulatory framework . . . . .	21
2.4 Methods . . . . .	25
2.4.1 Pre-processing the corpus . . . . .	26
2.4.2 Quantification methods and basic assumptions . . . . .	27
2.5 Data set . . . . .	31
2.6 Results . . . . .	39
2.6.1 Regression and estimation of RIX . . . . .	41
2.6.2 Regression of RIX by type of bank . . . . .	44
2.6.3 Regression of RIX by distressed and non-distressed banks . . . . .	47
2.6.4 Performance measurements . . . . .	47
2.6.5 Regression and prediction of future RIX . . . . .	49
2.6.6 Decomposition of RIX . . . . .	52
2.7 Conclusion . . . . .	54

2.A	Data description . . . . .	57
2.B	An alternative measure for cooccurrences . . . . .	59
2.C	Sentiment detection . . . . .	61
2.D	Readability . . . . .	62
2.E	Additional text mining measures . . . . .	63
<b>3</b>	<b>A New Way of Sentiment Analysis of 10-K Filings</b>	<b>65</b>
3.1	Introduction . . . . .	65
3.2	Literature review . . . . .	68
3.3	Methods . . . . .	73
3.3.1	Pre-processing . . . . .	73
3.3.2	Ordinary sentiment scores . . . . .	74
3.3.3	The amplifier- and negator-adjusted score . . . . .	76
3.3.4	Required weights . . . . .	81
3.4	Data . . . . .	84
3.4.1	Firm fundamentals . . . . .	86
3.4.2	The sample . . . . .	87
3.5	Results . . . . .	90
3.5.1	Factors which affect the sentiment score . . . . .	93
3.5.2	Document tone and returns . . . . .	97
3.5.3	Role of each chapter of a 10-K filing . . . . .	102
3.6	Conclusion . . . . .	108
3.A	Score formulations . . . . .	110
3.B	Additional summary statistics . . . . .	110
3.C	Structure and content of 10-K filings . . . . .	113
3.D	Word lists . . . . .	116
<b>4</b>	<b>Hands on CreditRisk<sup>+</sup></b>	<b>121</b>
4.1	Introduction . . . . .	121
4.2	Literature review . . . . .	125
4.3	Basics of CreditRisk <sup>+</sup> and its assumptions . . . . .	127
4.3.1	The CreditRisk <sup>+</sup> : basic model and its assumptions . . . . .	128

4.4	Alternative approaches to measure credit risk . . . . .	135
4.4.1	The Vasicek model . . . . .	136
4.4.2	The SA and the IRBA . . . . .	138
4.5	Implementations of CreditRisk <sup>+</sup> and its validations . . . . .	141
4.5.1	Numerically stable version by Haaf . . . . .	141
4.5.2	Fast Fourier transformation . . . . .	143
4.5.3	Saddlepoint approximation . . . . .	145
4.5.4	The Bürgisser model . . . . .	146
4.5.5	The ABCR <sup>+</sup> model . . . . .	147
4.5.6	The common background vector model . . . . .	150
4.6	Results and Implications . . . . .	153
4.6.1	Data set . . . . .	153
4.6.2	The aliasing effect within a FFT-Implementation . . . . .	155
4.6.3	Comparison of different implementations for constant LGD . . . . .	156
4.6.4	The influence of LGD changes . . . . .	161
4.6.5	Correlations between PD and LGD . . . . .	169
4.6.6	Comparision analysis . . . . .	171
4.7	Conclusion . . . . .	173
4.A	Additional mathematical representations . . . . .	177
4.B	Additional figures . . . . .	183
4.C	Additional tables . . . . .	191
4.D	Robustness tests . . . . .	198
