MANAGING INNOVATION WITHIN NETWORKS

WIM G. BIEMANS

Routledge
Taylor & Francis Group
LONDON AND NEW YORK
## Contents

*List of tables and figures*  ix  
*Acknowledgements*  xii  
*Preface*  xv  

1 **Introduction**  1  
   *Why this book on developing innovations?*  2  
   *What is so special about our empirical investigation?*  3  
   *Contents of the book*  5  

2 **Innovation**  6  
   *Defining ‘innovation’*  6  
   *Classification of innovations*  9  
   *Innovation strategies*  12  
   *Innovativeness and firm size*  17  
   *Innovation: failure versus success*  19  

3 **Product development, adoption, and diffusion**  26  
   *The product development process*  27  
   *The adoption process*  41  
   *The diffusion process*  51  

4 **Interaction and networks**  64  
   *The studies of von Hippel: Manufacturer-Active Paradigm (MAP) versus Customer-Active Paradigm (CAP)*  66  
   *CAP: Criticism, refinements, and conceptual extensions*  72  
   *Supplier–customer interaction in industrial markets*  75  
   *Networks*  79
Contents

5 User involvement in product development 95
   Product development as a phased process 98
   Differences between having industrial and consumer products tested by potential users 99
   Derived demand 102
   Product champions 103
   Networks 109
   Marketing of knowledge 111
   Testing industrial innovations with potential users: a tentative framework 114

6 Development of innovations within networks 124
   Medical equipment 124
   The development, adoption, and diffusion of medical equipment innovations; some theoretical background 127
   Outline of the research 134
   Defining interaction in the context of developing innovations 140
   Involvement of manufacturers, users, and third parties in product development 151
   Product development within networks 168
   The adoption and diffusion of complex medical equipment 199

7 Managerial implications 204
   The concepts of interaction and networks 205
   The role of the manufacturer in product development 209
   Interaction between the manufacturer and potential users 211
   Interaction between the manufacturer and various third parties 214
   The functioning of organizations within networks 216
   The five Cs of innovation management 222

Appendix A Critical issues to be considered when involving potential users and various third parties in product development processes 228

Appendix B Some methodological considerations 236
