Artificial Intelligence for Fashion Industry in the Big Data Era
Contents

Introduction: Artificial Intelligence for Fashion Industry in the Big Data Era ........................................... 1
Sébastien Thomassey and Xianyi Zeng

Part I AI for Fashion Sales Forecasting

AI-Based Fashion Sales Forecasting Methods in Big Data Era .......... 9
Shuyun Ren, Chi-leung Patrick Hui and Tsun-ming Jason Choi

Enhanced Predictive Models for Purchasing in the Fashion Field by Applying Regression Trees Equipped with Ordinal Logistic Regression .................................................. 27
Ali Fallah Tehrani and Diane Ahrens

A Data Mining-Based Framework for Multi-item Markdown Optimization ................................................ 47
Ayhan Demiriz

Social Media Analytics for Decision Support in Fashion Buying Processes .................................................. 71
Samaneh Beheshti-Kashi, Michael Lütjen and Klaus-Dieter Thoben

Part II AI for Textile Apparel Manufacturing and Supply Chain

Review of Artificial Intelligence Applications in Garment Manufacturing .................................................. 97
Radhia Abd Jelil

AI for Apparel Manufacturing in Big Data Era: A Focus on Cutting and Sewing ........................................ 125
Yanni Xu, Sébastien Thomassey and Xianyi Zeng
A Discrete Event Simulation Model with Genetic Algorithm Optimisation for Customised Textile Production Scheduling 153
Brahmadeep and Sébastien Thomassey

An Intelligent Fashion Replenishment System Based on Data Analytics and Expert Judgment 173
Roberta Sirovich, Giuseppe Craparotta and Elena Marocco

Blockchain-Based Secured Traceability System for Textile and Clothing Supply Chain 197
Tarun Kumar Agrawal, Ajay Sharma and Vijay Kumar

Part III AI for Garment Design and Comfort

Artificial Intelligence Applied to Multisensory Studies of Textile Products 211
Zhebin Xue, Xianyi Zeng and Ludovic Koehl

Evaluation of Fashion Design Using Artificial Intelligence Tools 245
Yan Hong, Xianyi Zeng, Pascal Bruniaux and Yan Chen

Garment Wearing Comfort Analysis Using Data Mining Technology 257
Kaixuan Liu

Garment Fit Evaluation Using Machine Learning Technology 273
Kaixuan Liu, Xianyi Zeng, Pascal Bruniaux, Xuyuan Tao, Edwin Kamalha and Jianping Wang
