

## Outline

List of Figures.....	VII
List of Tables.....	XI
Preface.....	1
Part I: Sovereign defaults – A literature review.....	5
1. Introduction.....	5
2. Sovereign defaults in history.....	6
3. Theoretical thoughts on sovereign defaults.....	8
3.1. A theoretical overview on sovereign debt and default costs.....	8
3.2. The risk of contagion.....	10
4. Empirical findings.....	12
4.1. Government access to capital markets.....	13
4.2. Output growth.....	20
4.3. The domestic banking sector and private access to lending.....	26
4.4. Contagion.....	29
4.5. International trade.....	31
4.6. Foreign direct investment.....	33
4.7. Development aid.....	33
4.8. Political careers.....	34
4.9. Anecdotal evidence on other retaliation policies against defaulters.....	37
5. The benefits of sovereign defaults.....	38
6. Shortcomings of the empirical literature.....	39
7. Conclusion.....	41
Part II: Quantifying the costs of sovereign defaults using odious debt defaults as a quasi-natural experiment.....	43
Preface.....	43
1. Introduction.....	43

2.	Odious debt as a quasi-natural experiment to isolate the impact of a sovereign default on macroeconomic fundamentals .....	44
2.1.	The causality problem - Why and when do defaults occur? .....	45
2.2.	What is odious debt? - The ex-ante versus the ex-post approach .....	47
2.3.	The quasi-natural experiment.....	48
2.3.1.	Costa Rica 1923 .....	48
2.3.2.	South Africa 1993 .....	49
2.3.3.	Ecuador 2008 .....	51
2.3.4.	Other countries.....	52
2.3.5.	Is the treatment exogenous?.....	54
3.	Empirical investigation.....	55
3.1.	Methodology .....	55
3.2.	Testing for significance of the results .....	58
3.3.	Data .....	59
3.4.	Specification.....	60
4.	Results .....	60
4.1.	Odious debt defaults and GDP growth.....	61
4.1.1.	The GDP per capita in purchasing power parities of Costa Rica after the odious debt default in 1923 .....	62
4.1.2.	The GDP per capita South Africa after the odious debt default in 1993 ...	64
4.1.3.	The GDP per capita of Ecuador after the odious debt default in 2008 .....	70
4.1.4.	Interim conclusion on the GDP per capita evolution in the aftermath of odious debt defaults .....	76
4.2.	Odious debt defaults and exports .....	76
4.2.1.	Exports after the odious debt default of Costa Rica in 1923 .....	76
4.2.2.	Exports after the odious debt default of South Africa in 1993 .....	78
4.2.3.	Exports after the odious debt default of Ecuador in 2008 .....	80

4.2.4. Interim conclusion on the development of exports in the aftermath of odious debt defaults.....	84
4.3. Odious debt defaults and FDI inflows.....	84
4.4. Odious debt defaults and private lending.....	89
4.5. Odious debt defaults and development aid .....	93
4.6. Odious debt defaults and reelections.....	96
5. Conclusion.....	97
Part III: The impact of sovereign defaults on migration.....	99
1. Introduction .....	99
2. Theoretical perspective.....	101
2.1. Push factors .....	101
2.2. Pull factors.....	102
2.3. Braking factors .....	103
2.4. Migration decision.....	103
2.5. The costs and benefits of migration .....	104
2.5.1. In the home country .....	104
2.5.2. In the host country .....	105
2.6. Migration and economic shocks.....	109
2.6.1. Influence of economic shocks on migration decision.....	109
2.6.2. The special case of a sovereign default.....	110
2.7. Who tends to migrate?.....	117
3. Empirical investigation.....	120
3.1. Specification.....	120
3.2. Data .....	123
3.3. Results .....	126
3.3.1. Fixed-effects results .....	127
3.3.2. Fixed-effects IV results.....	134

3.3.3.	Dynamic panel regression.....	135
3.3.4.	FGLS regression results.....	138
3.3.5.	A comparison of the regression results.....	138
3.3.6.	Discussion of the results.....	139
4.	Case study evidence.....	140
4.1.	Methodology.....	140
4.2.	Testing for significance.....	144
4.3.	Specification.....	144
4.4.	Synthetic control method results.....	145
4.5.	A critical analysis on the methodology.....	159
4.6.	Default versus austerity.....	159
5.	Conclusion.....	160
Part IV:	Reducing the default costs – Austerity and consensus.....	163
1.	Introduction.....	163
2.	A literature review on austerity and its costs and benefits.....	164
3.	The avoidance of default and currency crisis in the Baltic States: a success?.....	169
3.1.	Before the crisis.....	169
3.2.	The Great Recession in the Baltic States.....	171
3.3.	How did the Baltic States react to the crisis?.....	175
3.4.	The recovery.....	179
3.5.	Was the Baltic austerity a success story?.....	185
3.6.	The Difference in Differences analysis.....	189
3.6.1.	OLS results.....	190
3.6.2.	Country fixed-effects results.....	192
3.6.3.	Country and time fixed-effects results.....	192
3.6.4.	Time fixed-effects.....	193
3.6.5.	Changing the intervention period in the Baltic States to $t_0=2010$ .....	193

3.6.6.	Placebo studies.....	194
3.6.7.	Changing the Greek default year .....	194
3.6.8.	A discussion of the results and the contribution to the literature.....	195
3.6.9.	Is the treatment exogenous?.....	196
3.7.	An alternative interpretation of the econometric results .....	197
3.8.	Summarizing the results obtained from the Baltic States .....	197
4.	Policy recommendations derived from the Baltic States – possible lessons for Greece and the Argentine default in a retrospective .....	198
4.1.	Is Argentina a deterrent? .....	198
4.2.	Why are the Baltic States different from Argentina – and other defaulters? ..	207
4.3.	On external devaluation .....	209
4.4.	Lessons for Greece .....	211
4.4.1.	Assessing the Greek Economic Crisis .....	212
4.4.2.	External devaluation .....	215
4.4.3.	Internal devaluation: structural reforms and austerity .....	219
5.	Further policies to reduce default costs .....	222
6.	Conclusion.....	224
Part V:	Policy Recommendations.....	227
Literature	.....	230
Appendix	.....	263
