# Multi-tier sustainable supply chain management - learning from the minerals case

## II. Table of contents

Acknowledgements .....	v
I. List of contributions from the dissertation .....	vi
II. Table of contents .....	viii
III. List of figures .....	xii
IV. List of tables .....	xiii
V. List of abbreviations .....	xiv
1 Introduction to the thesis .....	1
1.1 Motivation, theoretical background, and research questions .....	1
1.1.1 The current state of multi-tier sustainable supply chain management .....	1
1.1.2 Selecting an empirical field .....	3
1.1.3 Selecting a theoretical foundation .....	4
1.1.4 Research questions investigated by the thesis .....	6
1.2 Research strategy .....	7
1.3 Cumulative structure and research design of the thesis .....	10
2 Sustainable supply chain management for minerals .....	16
2.1 Abstract .....	16
2.2 Introduction .....	17
2.3 The sustainability discussion in mineral supply chains .....	18
2.4 Methodology .....	23
2.4.1 Literature review .....	23
2.4.2 Contingency analysis .....	26
2.5 Findings .....	26
2.5.1 Descriptive analysis .....	26
2.5.2 Material evaluation .....	29
2.5.3 Results of the contingency analysis .....	37
2.6 Discussion and research directions .....	42
2.6.1 The practices in SSCM for minerals .....	42
2.6.2 The benefits of SSCM for minerals .....	44
2.6.3 Limitations, research directions, and research quality .....	46
2.7 Conclusion .....	47
3 Extending the reach of multi-tier sustainable supply chain management – insights from mineral supply chains .....	48
3.1 Abstract .....	48

4.5.2	Material evaluation: SSCM for minerals practices prescribed by the standards.....	96
4.6	Discussion.....	101
4.6.1	Theoretical contributions to SSCM.....	101
4.6.2	Implications for managing the extended supply chain.....	103
4.6.3	Implications for research and practice on sustainability standards.....	104
4.6.4	Limitations and research directions.....	105
4.7	Conclusion.....	106
5	A three-dimensional framework for multi-tier sustainable supply chain management.....	107
5.1	Abstract.....	107
5.2	Introduction.....	108
5.3	Literature review.....	110
5.3.1	Multi-tier sustainable supply chain management and supply chain uncertainty.....	110
5.3.2	Institutional theory.....	114
5.4	Development of the three-dimensional framework.....	117
5.4.1	The central theme: Reducing uncertainty by applying MT-SSCM practices 117	
5.4.2	Dimension 1: The interplay of pressures on the supplier by its direct environment and the supply chain.....	119
5.4.3	Dimension 2: The role of supply uncertainty as a driver of sub-supplier management.....	120
5.4.4	Dimension 3: The role of demand uncertainty as an enabler of sub-supplier management.....	122
5.4.5	Integrating the three dimensions.....	123
5.4.6	Adaptation scenarios: Changing the focal firm's position in the framework 126	
5.5	Discussion.....	127
5.5.1	Managerial implications.....	128
5.5.2	Limitations and future research.....	129
5.6	Conclusions.....	132
6	General discussion and conclusion.....	133
6.1	Contributions to the discourse on multi-tier sustainable supply chain management.....	133
6.2	Contributions to the discourse on sustainability in the minerals sector.....	138

3.2	Introduction .....	49
3.3	Literature review and conceptualization of key terms .....	51
3.3.1	Characterization of the mineral supply chain .....	51
3.3.2	Current status on multi-tier sustainable supply chain management.....	52
3.3.3	Integrating multi-tier sustainable supply chain management and the upstream-downstream division in mineral supply chains.....	54
3.4	Methodology .....	55
3.4.1	Delphi technique .....	55
3.4.2	Content analysis.....	61
3.4.3	Cluster analysis.....	61
3.5	Findings.....	62
3.5.1	Structuring the mineral supply chain .....	62
3.5.2	Identifying the major sustainability issues in the mineral supply chain ...	63
3.5.3	Where have the issues to be addressed in the mineral SC?.....	67
3.5.4	Conceptual synthesis.....	69
3.6	Discussion .....	74
3.6.1	Contributions to the field of sustainability in minerals and mining supply chains	74
3.6.2	Contributions to multi-tier sustainable supply chain management.....	75
3.6.3	Research directions .....	76
3.6.4	Limitations .....	77
3.7	Conclusion.....	78
4	The complementing role of sustainability standards in managing the extended supply chain .....	79
4.1	Abstract .....	79
4.2	Introduction .....	79
4.3	Literature review and conceptualization .....	82
4.3.1	Multi-tier sustainable supply chain management (MT-SSCM).....	82
4.3.2	Institutional theory in MT-SSCM .....	84
4.3.3	Using standards to complement MT-SSCM from an institutional theory perspective .....	86
4.4	Methodology .....	91
4.5	Findings: The potential of using sustainability standards in MT-SSCM .....	94
4.5.1	Descriptive analysis: SC coverage and standard ownership .....	94

---

6.3	Limitations of the thesis .....	140
6.4	Research directions .....	142
6.5	Concluding remarks and reflections.....	144
7	References .....	146
8	Appendices .....	163
8.1	Appendices of Chapter 2.....	163
8.2	Appendices of Chapter 3.....	168
8.3	Appendices of Chapter 5.....	170
