About the Author	xxi
Chapter 1 Introduction	1
1.1 What Are Sustainability and Sustainability Science?	2
1.2 Philosophy	3
1.3 Outline	4
1.4 An Optimistic Approach	5
Chapter 2 Sustainability and Human Well-Being	7
2.1 Sustainability Components	7
2.2 Capital Supply and Demand	10
2.3 The Value of Ecosystem Services and Costs of Environmental Degradation	13
2.3.1 Forest Ecosystems and Deforestation	14
2.3.2 Measures of Environmental Degradation	16
Web Resources	16
Chapter 3 The Environmental ImPACT	17
3.1 Introduction	17
3.2 The ImPACT Identity	17
3.3 Biocapacity and the Ecological Footprint	21
3.4 Population	26
3.4.1 Problem: Exponential Growth of Population	26
3.4.2 Trends in Human Population	27
3.4.3 Solution: Stabilize Population	28
3.5 Consumption	31
3.5.1 Problem: Excessive Consumption and Materialism	32
3.5.2 Solution: Reduce Consumption and Waste	33
3.6 Technology	34
3.6.1 Problems	35
3.6.2 Solutions	36
3.7 Conclusions	38
Web Resources	39
Chapter 4 Risk, Resilience, and System Dynamics	41
4.1 Introduction	41
4.2 Security and Risk	41
4.3 Environmental Risks	44
4.4 Resilience and Socio-Ecological Systems	47

4.5	Systems Theory	53
4.6	Ecological Overshoot and Collapse.....	57
4.7	Examples of Collapse: Unsustainable Societies Past and Present.....	61
4.8	Case Study: Haiti.....	62
	4.8.1 Local Problems.....	62
	4.8.2 Local Solutions.....	64
4.9	A Preliminary Look at Global Solutions.....	65
Chapter 5	Sustainable Development: How to Avoid Collapse and Build a Better Society.....	67
5.1	Growth versus Development	67
5.2	Properties of Sustainable Societies	68
5.3	Factors That Influence the Sustainability of Developing Countries.....	69
	5.3.1 Poverty.....	69
	5.3.2 Globalization	72
	5.3.2.1 Effects on the Economy.....	73
	5.3.2.2 Effects on Society.....	74
	5.3.2.3 Effects on the Environment.....	75
	5.3.2.4 Problems and Solutions	76
5.4	Sustainable Development	77
	5.4.1 Case Study: Uganda	78
	5.4.2 Urbanization.....	79
	5.4.3 The Commons Approach to Managing Shared Resources.....	81
	5.4.4 Comparison of the Current Sustainability Status of Countries.....	86
	Web Resources	88
Chapter 6	Nonrenewable Resources: Oil and Minerals.....	91
6.1	Oil.....	91
	6.1.1 Oil Supply and Resource Depletion Estimates	92
	6.1.2 Consequences of Peak Oil.....	97
	6.1.2.1 Environmental and Social Costs of Oil Use.....	97
	6.1.2.2 Effects on Transportation and the Economy	98
	6.1.3 Case Study: Cuba	100
	6.1.4 U.S. Solutions to Oil Scarcity.....	102
6.2	National and Global Resource Production Peaks.....	104
6.3	Mineral Resources.....	105
	6.3.1 Phosphorus	106
	6.3.2 Uranium.....	107
	6.3.3 Metals.....	107
	6.3.4 Environmental Impacts of Mining.....	108
6.4	Conclusions.....	109
	Web Resources	110
Chapter 7	Global Climate Change.....	111
7.1	Climate Change in the Anthropocene.....	113
7.2	Greenhouse Gases	114
7.3	The Carbon Cycle and Feedback Loops.....	115
7.4	Changes in Global Temperature Over Time.....	117

7.5	Projections of Future Atmospheric Carbon Dioxide Concentrations and Temperatures	119
7.6	Problems (Potential Consequences)	120
7.6.1	Sea Level Rise	120
7.6.2	Extreme Weather Events	121
7.6.3	Reduced Water and Food Security and Loss of Ecosystem Services	121
7.6.4	Environmental Migration	122
7.6.5	Conclusions	123
	Web Resources	123
Chapter 8	Responses to Global Climate Change	125
8.1	Why Are We Not Addressing the Climate Crisis?	125
8.2	The Social Psychology of GCC	130
8.3	Solutions	132
8.3.1	Mitigation	134
8.3.1.1	Reducing Carbon Sources	135
8.3.2	Regulation	137
8.3.2.1	Domestic Regulation	137
8.3.2.2	International Regulation	140
8.3.3	Adaptation	141
8.3.3.1	Migration as a Climate Adaptation	142
8.3.3.2	Increasing Carbon Sinks and Reducing Solar Radiation: Climate Engineering	143
8.3.4	Parallels between the Greenhouse Gas—Climate Change and CFC—Ozone Hole Problems	144
8.4	Conclusions	146
Chapter 9	Nonrenewable Energy Sources	147
9.1	Introduction	147
9.2	Life Cycle Assessment of Energy Costs	149
9.3	Coal	150
9.3.1	Coal Mining: Mountaintop Removal	151
9.3.2	Coal Burning: Toxic Heavy Metals, Acid Rain, and Ash Waste	152
9.3.3	Carbon Capture and Storage	153
9.3.4	The True Cost of Coal Use	154
9.4	Natural Gas	155
9.4.1	Hydraulic Fracturing	156
9.5	Nuclear Power	158
9.5.1	Nuclear Fission	159
9.5.2	Nuclear Reactors	159
9.5.3	Obstacles to the Expansion of Nuclear Power	160
9.5.4	Summary	162
9.6	Conclusions	163
Chapter 10	Renewable Energy Sources	165
10.1	Wind	167
10.2	Solar	169

10.3	Biofuels.....	171
10.4	Water.....	173
10.4.1	Hydroelectric Power from Dams.....	173
10.4.1.1	Case Study: The Three Gorges Dam.....	176
10.4.2	Ocean Power.....	176
10.5	Geothermal.....	177
10.6	Secondary Energy: Electricity and Hydrogen.....	178
10.7	Summary: Are Renewables Enough, and Can We Afford Them?.....	178
Chapter 11	Sustainable Energy Plans	181
11.1	Introduction	181
11.2	Solutions	182
11.2.1	Objective 1: Reduce Greenhouse Gas Emissions.....	182
11.2.1.1	Sustainable Transportation	184
11.2.2	Objective 2: Reduce Per Capita Energy Demand.....	186
11.2.2.1	Increasing Energy Efficiency.....	186
11.2.2.2	Energy Conservation	189
11.2.2.3	A Personal Plan to Reduce Home Energy Use.....	191
11.2.3	Objective 3: Increase Renewable Energy Supply	194
11.2.4	The Need for a Smart Electric Grid	196
11.3	Government Policies.....	197
11.4	Problems and Solutions	198
11.5	Conclusions and the Future	199
	Web Resources	200
Chapter 12	Water	203
12.1	Life Cycle Analysis, Virtual Water, Water Intensity, and Water Footprints	203
12.2	The Water Cycle and Water Systems.....	205
12.3	Problems.....	209
12.3.1	Problems of Water Quantity: Water Scarcity	209
12.3.2	Problems of Water Quality: Pollution	211
12.3.3	Use of Bottled Water	212
12.4	Solutions	213
12.4.1	Increase Water Supply.....	214
12.4.2	Reduce Water Demand.....	215
12.4.3	The Economics of Water: Public versus Private	216
12.4.3.1	Developing Countries	217
12.4.3.2	The United States.....	217
12.4.4	Sustainable Water Use.....	218
12.5	Case Study: Bangladesh	220
12.6	Conclusions.....	221
	Web Resources	222
Chapter 13	Food.....	223
13.1	Introduction	223
13.2	Problems.....	225
13.2.1	Environmental Impacts of Industrial Food Production	225

13.2.2	Threats to Food Security	227
13.2.3	The Collapse of Marine Fisheries	228
13.2.4	The Food–Energy–Water Nexus	230
13.3	Solutions	231
13.3.1	Life Cycle Assessment of Food Products.....	232
13.3.2	Decrease Food Demand and the Environmental Impact	233
13.3.2.1	Conserve Food	233
13.3.2.2	Buy Locally Produced Organic Food.....	234
13.3.2.3	Eat Healthy	235
13.3.2.4	Become a Vegetarian	235
13.3.3	Increase Food Supply: Sustainable Food Production.....	237
13.3.3.1	Genetic Engineering	237
13.3.3.2	Sustainable Farming Methods	239
13.3.3.3	Aquaculture	241
13.3.3.4	Grow Your Own Food	243
13.3.4	Conserve and Create Soil	245
13.4	Conclusions.....	245
	Web Resources	246
Chapter 14	Waste and Pollution.....	249
14.1	Background.....	249
14.2	Problems.....	250
14.2.1	Health Impacts of Pollution.....	250
14.2.2	Hazardous Chemicals.....	251
14.2.2.1	Toxicity	252
14.2.2.2	Trace Elements and Heavy Metals	254
14.2.3	Air Pollution.....	256
14.2.3.1	Acid Rain	257
14.2.3.2	Case Study: Ducktown, Tennessee	257
14.2.3.3	Particulate Matter	258
14.2.4	Water Pollution	258
14.2.5	Case Study: Deep Well Injection of Chemical Wastes	261
14.3	Solutions	262
14.3.1	Waste Management	262
14.3.2	Safe Hazardous Waste Disposal.....	265
14.3.3	Policies to Reduce Waste and Pollution	266
14.4	Conclusions.....	267
	Resources.....	267
Chapter 15	The Biosphere.....	269
15.1	Introduction	269
15.2	Problems	272
15.2.1	Global Biodiversity Loss and Species Extinction	272
15.2.2	Global Climate Change: A New Threat to Ecosystems	275
15.2.3	Threats to Marine Ecosystems	276
15.2.4	Effects of Ecosystem Degradation on Human Health	277
15.3	Solutions	279
15.3.1	Wildlife Conservation	279
15.3.2	Policies That Promote Sustainability	281

15.4	Putting It All Together.....	282
	Web Resources	283
Chapter 16	The Future.....	285
16.1	Future Scenarios.....	285
16.2	Case Study: China	289
16.3	Ethical Issues.....	292
16.4	Improving Human Well-Being.....	294
16.5	The Importance of Science.....	295
16.6	How to Prepare for the Future.....	296
16.7	Take-Home Messages.....	298
	Resources.....	298
