Preface xvi
About the Author xxiii

Introduction 1
Performance Improvement and Evaluation 1
What Is Evaluation? 2
What Is Not Evaluation? 3
How Does Evaluation Compare With Research? 4
Program Evaluation in the HPI Context 5
Evaluation Is Often Neglected 6
Different Evaluation Designs Used in Program Evaluation 7
Descriptive Case Study Type Evaluation Design 8
Frameworks for Conducting Evaluations in the HPI Context 9
The 10-Step Evaluation Procedure 10
Chapter Summary 16
Chapter Discussion 16

Chapter 1 • Identify an Evaluand (Step 1) and Its Stakeholders (Step 2) 20
Identify a Performance Improvement Intervention as an Evaluand 21
Use the 5W1H Method to Understand the Intervention Program 22
Ask Why the Intervention Program Was Implemented 23
Check If Program Goals Are Based on Needs 25
Sell Evaluation to the Client 26
Identify Three Groups of Stakeholders 27
Chapter Summary 29
Chapter Discussion 30
Now, Your Turn—Identify an Evaluand and Its Stakeholders 31
Chapter 6 • Determine Dimensions and Importance Weighting (Step 5)

Think About Dimensions of the Evaluand to Investigate
Start With the Stakeholders’ Needs
Relate the Purpose of Evaluation to the Program Logic Model Elements
Incorporate Relevant Theoretical Frameworks and Professional Standards
Write Dimensional Evaluation Questions
Determine Importance Weighting Based on Usage of Dimensional Findings
Recognize a Black Box, Gray Box, or Clear Box Evaluation
Finalize the Number of Dimensions
Chapter Summary
Chapter Discussion
Now, Your Turn—Determine Dimensions and Importance Weighting

Chapter 7 • Determine Data Collection Methods (Step 6)

Determine Evaluation Designs for Dimensional Evaluations
Select Data Collection Methods That Allow Direct Measures of Dimensions
Apply Critical Multiplism
Triangulate Multiple Sets of Data
Select Appropriate Methods When Using the Four-Level Training Evaluation Model
Select Appropriate Methods When Using Brinkerhoff’s Success Case Method
Review an Example of Data Collection Methods
Use an Iterative Design Approach
Assess Feasibility and Risk Factors Again
Conduct Formative Meta-Evaluations
Chapter Summary
Chapter Discussion
Now, Your Turn—Determine Data Collection Methods

Chapter 8 • Write an Evaluation Proposal and Get Approval

Determine Sections to Be Included in an Evaluation Proposal
Review a Sample Evaluation Proposal
Now, Your Turn—Write an Evaluation Proposal
Chapter 9 • Develop Data Collection Instruments

I—Self-Administered Surveys (Step 7) 148

Comply With IRB Requirements 149

Use Informed Consent Forms 150

Determine Materials to Be Developed for Different Data Collection Methods 152

Distinguish Anonymity from Confidentiality 152

Develop Materials for Conducting Self-Administered Surveys 156

Determine Whether to Use Closed-Ended Questions, Open-Ended Questions, or Both 162

Ask Specific Questions That Measure the Quality of a Dimension 163

Design Survey Items Using a Question or Statement Format 164

Recognize Nominal, Ordinal, Interval, and Ratio Scales 166

Decide Whether to Include or Omit a Midpoint in the Likert Scale 167

Decide Whether to Use Ascending or Descending Order of the Likert Scale Options 170

Follow Other Guidelines for Developing Survey Items 171

Develop Survey Items That Measure a Construct 174

Test Validity and Reliability of a Survey Instrument 175

Conduct Formative Meta-Evaluations 176

Chapter Summary 177

Chapter Discussion 178

Now, Your Turn—Develop Survey Instruments 180

Chapter 10 • Develop Data Collection Instruments

II—Interviews, Focus Groups, Observations, Extant Data Reviews, and Tests (Step 7) 181

Determine Whether to Use a Structured, Unstructured, or Semi-Structured Interview 182

Develop Materials for Conducting Interviews or Focus Groups 184

Solicit Interview Volunteers at the End of a Self-Administered Web-Based Survey 190

Develop Materials for Conducting Observations 193

Develop Materials for Conducting Extant Data Reviews 197

Develop Materials for Administering Tests 198

Conduct Formative Meta-Evaluations 199

Chapter Summary 200

Chapter Discussion 200

Now, Your Turn—Develop Instruments for Conducting Interviews, Focus Groups, Observations, Extant Data Reviews, and Tests 201
Chapter 11 • Collect Data (Step 8) 202
- Follow Professional and Ethical Guidelines 202
- What Would You Do? 205
- Use Strategies to Collect Data Successfully and Ethically 208
- Use Strategies When Collecting Data From Self-Administered Surveys 209
- Use Strategies When Collecting Data From Interviews and Focus Groups 210
- Use Strategies When Collecting Data From Observations and Tests 212
- Use Strategies to Ensure Anonymity or Confidentiality of Data 213
- Conduct Formative Meta-Evaluations 213
- Chapter Summary 214
- Chapter Discussion 214
- Now, Your Turn—Collect Data 215

Chapter 12 • Analyze Data With Rubrics (Step 9) 216
- Use Evidence-Based Practice 217
- Keep in Mind: Evaluation = Measurement + Valuation With Rubrics 218
- Apply the Same or Different Weighting to the Multiple Sets of Data 220
- Analyze Structured Survey Data With Rubrics 222
- Analyze Unstructured Survey or Interview Data With Rubrics 226
- Analyze Semi-Structured Survey or Interview Data With Rubrics 227
- Analyze Data Obtained From Observations, Extant Data Reviews, and Tests With Rubrics 228
- Determine the Number of Levels and Labels for Rubrics 230
- Triangulate Results Obtained From Multiple Sources for Each Dimension 231
- Conduct Formative Meta-Evaluations 235
- Chapter Summary 237
- Chapter Discussion 238
- Now, Your Turn—Analyze Data With Rubrics 239

Chapter 13 • Draw Conclusions (Step 10) 240
- Revisit Formative or Summative Use of Evaluation Findings 240
- Develop a Synthesis Rubric 243
- Draw Evidence-Based Conclusions and Recommendations 247
- Conduct Formative Meta-Evaluations 249
- Chapter Summary 250
- Chapter Discussion 251
- Now, Your Turn—Draw Conclusions and Make Recommendations 251
Chapter 14 • Write a Final Report and Conduct a Summative Meta-Evaluation

Extend the Evaluation Proposal to a Final Report
Present Dimensional Results in the Evaluation Results Section
Present Supporting Information in Appendices
Present Conclusions
Report the Findings Ethically
Conduct a Summative Meta-Evaluation
Report Limitations
Write an Executive Summary
Present the Final Report to Stakeholders
Follow Up With Stakeholders
Present Complete Sections in a Final Report
Now, Your Turn—Write a Final Report

Appendix A • A Summary of the Frameworks Used
Appendix B • Evaluation Development Worksheets
Appendix C • Survey Questionnaire Makeover
Appendix D • A Sample Survey Questionnaire Measuring Multiple Dimensions, Sample Rubrics, and Reliability Testing With IBM® SPSS® Statistics
Appendix E • Experimental Studies and Data Analysis With t-Tests Using Excel
