Research on Efficiency and Fairness of Resources Allocation by China's Governmental Administration

SHENG Hong
QIAN Pu
The Unirule Institute of Economics, China
Contents

Synopsis v
About the Authors xv
Acknowledgments xvii

Chapter 1 The Administrative Department as a Mechanism of Resource Allocation 1

I. The Basic Resource Allocation Mechanisms 1

II. The Economical and Technical Characteristics of the Three Sectors and Their Proper Resource Allocation Mechanisms 3

1. Economic and technical characteristics of education 4
2. Economic and technical characteristics of medical care 8
3. Economic and technical characteristics of land allocation 9

III. Characteristics of Market System and Administrative Departments in Resource Allocation 10

1. Market system 10
2. Administrative departments 11

IV. The Scope and Modes of Resource Allocation by the Administrative Departments 15

1. Appropriate scope of resource allocation by the administrative departments 15
2. Current study of allocation of resources led by the administrative departments in China: overstepping and non-presence 16
Chapter 2 The Evaluation Criteria for Efficiency and Fairness on Resource Allocation Led by the Administrative Departments

I. The Efficiency Evaluation Criteria for Resource Allocation Led by the Administrative Departments
   1. The efficiency loss due to overstepping of the administrative departments
   2. Efficiency loss due to overstepping of the administrative departments
   3. The efficiency evaluation criteria of allocating resources among individuals by the administrative departments
   4. The efficiency evaluation on the regulating behavior by the administrative departments

II. The Fairness Evaluation Criteria of Resource Allocation by the Administrative Departments
   1. Rawls’s principles of justice
   2. The fairness evaluation of directly allocating public financial resources by the administrative departments
   3. The fairness evaluation criteria of entry regulation
   4. The fairness evaluation criteria of price regulation
   5. The fairness evaluation criteria of product regulation
   6. The fairness index of public financial resource allocation

Chapter 3 Applying Rent-Seeking Theory to Analyze Resource Allocation by the Administrative Departments

I. Concept of Rent and Its Extension
II. The Theory of Rent Dissipation and Its Generalization
III. Rent Retention
IV. Rent Seeking
V. The Fairness Evaluation Criteria of Rent Setting, Rent Retention, and Rent Seeking
VI. Applying the Rent-Seeking Theory to Analyze Allocation of Resources by the Administrative Departments
Chapter 4 Efficiency and Fairness of Educational Resource Allocation by the Administrative Departments

I. The Specific Mechanism and Content of Educational Resource Allocation by the Administrative Departments

1. The basic resource allocation mechanism of the education system
2. Educational resource allocation and deployment mechanism of public and private education
3. Allocation and deployment of basic educational resources
4. Allocation and deployment mechanism of higher-education resources
5. Summary

II. Strategic Countermeasures and Corresponding Games Against Resource Misallocation in the Field of Education

1. Strategic countermeasures against resource misallocation in the field of basic education — fight for quality services in basic education
2. Countermeasures of resource misallocation in the field of higher education — NCEE (National College Entrance Examination) migration
3. Foot voting — studying abroad

III. The Administrative Departments’ Countermeasure Against the Strategic Behavior in the Field of Education

1. Cracking down on NCEE (National College Entrance Examination) movers
2. Restraining the “school selection fever”

IV. The Consequences of Education Resource Allocation by Administration Departments

1. Total inflow of investment and structural distribution
2. Spatial allocation of educational resources
3. Allocation of state financial funds in the field of education
4. Resource allocation among different groups
5. Prevalent phenomenon of rent seeking
Contents

6. Rent seeking in education leads to social opposition and political tension 157
7. Summary 159

Chapter 5 Efficiency and Fairness Allocation of Medical Resources by Administrative Departments 163

I. The Mechanism of Medical Resource Deployment by Administrative Departments and Its Content 163
1. The allocation of social resources in medical field 163
2. The mechanism of resource allocation and deployment in medical industry 184
3. The mechanism of medical resource allocation and deployment among different social groups 188
4. Summary 193

II. Strategic Response to the Misallocation of Resources and the Corresponding Game Process in the Field of Medical Care 194
1. Seeking medical treatment in large cities/advanced hospitals 194
2. Hospital ticket scalpers 196
3. Red envelopes, kickbacks, and moonlighting 197

III. Countermeasures of Administrative Departments Against the Strategic Behaviors in the Field of Healthcare 201
1. Investigation and treatment on receiving red envelopes 201
2. Investigation and treatment on “moonlighting” 203
3. Cracking down on unlicensed medical practice 204

IV. Results of resource allocation by administrative departments in the field of healthcare 205
1. The quantity allocation 205
2. The spatial allocation of healthcare resources 208
3. The justice of financial fund allocation in the field of healthcare 212

Chapter 6 Efficiency and Justice of Land Resource Allocation by the Administrative Departments 235

I. The Specific Mechanisms of Land Resource Allocation by the Administrative Departments and Its Contents 235
1. Direct allocation of land resources by the administrative departments — planning 235
2. Direct allocation of land resources by the administrative departments — examination and approval on projects 237
3. Regulations on usage and transaction: the conversion of collective land into construction land must go through governmental expropriation 238
4. Cultivated land protection: examination and approval on the conversion of agricultural land and quota restraints 240
5. Supply system of construction land 243
6. Price regulation 247
7. Regulation on plot ratio 252
8. Affordable housing: quantity regulation, price regulation, and buyer regulation 253
9. Summary 254

II. Strategic Behaviors in the Field of Land and the Cost of Resources 255
1. Rent dissipation coming from direct allocation and regulation of administrative departments 255
2. Strategic behaviors of local governments against the central government 257
3. Strategic behaviors of farmers against administrative departments 266
4. Strategic behaviors of real estate developers against administrative departments 280

III. The Administrative Departments’ Countermeasures to Combat Various Strategic Behaviors in the Land Sector 281
1. The central government’s countermeasures to suppress illegal activities of the local governments 281
2. The administrative departments suppressing the strategic behaviors by the private individuals 282
3. Measures of central government: strengthening the construction of affordable housing 295
4. Regulations leading to more regulations 296

IV. Results of Land Resource Allocation by the Administrative Departments 297
1. Impact on total quantity of land allocation 297
2. Impact on the structure of land allocation 301
3. Land allocation among people 321
4. Severe corruption in the land rent seeking 329
5. “Small property right housing” and “urban village” property 342
6. Summary 343

Chapter 7 Basic Conclusions and Reform Suggestions 351

I. The Evaluation of Overall Efficiency 351
   1. The institutional evaluation: regulation on market
      for private goods is inefficient 351
   2. The evaluation of results: total quantity imbalance
      and structural distortion 352

II. Evaluation of Fairness: Unfairness of Motivation
    and Unfairness of Results 355
   1. Unfairness of resource allocation among different areas 355
   2. The unfairness of resource allocation among
      different groups 358

III. Analysis of Specific Phenomena 361
   1. Price regulation due to entry regulation 361
   2. Fairness inspection of admission quota of the National
      College Entrance Examination 362
   3. Legal analysis on the self-benefiting behavior on resource
      allocation of the administrative departments 363
   4. Summary 378

IV. Basic Conclusions 378

V. Reform Suggestions 380
   1. Basic principles of reform 380
   2. Reform suggestions in the educational field 381
   3. Reform suggestions in the medical care field 384
   4. Reform suggestions in the land field 385
