Kazuhisa Takemura

Foundations of Economic Psychology
A Behavioral and Mathematical Approach

Springer
Contents

  1.1 Economic Behavior as a Subject of Economic Psychology and Related Academic Societies ....................... 2
      1.1.1 Economic Behavior ........................................ 2
      1.1.2 Academic Societies Related to Economic Psychology .................................................... 3
  1.2 The Perspective of Economic Psychology .......................... 4
      1.2.1 Micro and Macro in Economic Psychology .......................... 4
      1.2.2 Process and Consequences .................................. 5
      1.2.3 Explanation by Natural Language and Mathematical Explanation ....................................... 6
      1.2.4 Qualitative Analysis and Quantitative Analysis .................................................... 6
      1.2.5 Abstraction and Materialization of Economic Behavior ................................................ 7
  1.3 The Goal of Economic Psychology and Its Approach .................. 8
      1.3.1 Elucidation of Economic Phenomena and Relationship with Behavioral Economics ..................... 8
      1.3.2 Marketing .................................................. 10
      1.3.3 Public Policy for Consumers .................................. 13
      1.3.4 Elucidation of Decision Making in Economic Behavior ................................................ 15
  1.4 Theoretical Framework of Economic Behavior Research ............... 16
      1.4.1 Hermeneutic Paradigm ........................................ 17
      1.4.2 Utility Theory Paradigm ...................................... 18
      1.4.3 Psychoanalytic Paradigm ...................................... 19
      1.4.4 Macroeconomic Psychology Paradigm .................................. 21
      1.4.5 Sociopsychological Paradigm .................................. 23
2 Rational Choice and Revealed Preference: Theoretical Representation of Preference Relations Leading to the Best Choice

2.1 Framework to Describe Decision Making
2.1.1 Relationship Recognition and Set Theory
2.1.2 Ordering and Comparative Judgment
2.1.3 Various Forms of Comparative Judgments

2.2 Best Option and Selection Function
2.2.1 Best Option
2.2.2 Conditions for Guaranteeing Preference Relations and the Best Option

2.3 Criteria of Rationality and Weak Order
2.3.1 Two Criteria of Rationality
2.3.2 Rational Choice and Weak Order

2.4 Criteria of Rationality and Utility Maximization
2.4.1 Expression Theorem of Weak Order
2.4.2 Uniqueness Theorem on Weak Order
2.4.3 Utility Maximization

2.5 Utility Function and Indifference Curve
2.5.1 Indifference Curve
2.5.2 Perfect Substitutes
2.5.3 Perfect Completeness
2.5.4 Indifference Curves of Noneconomic Goods
2.5.5 Indifference Curves of Neutral Goods

2.6 Revealed Preference
2.6.1 What is Revealed Preference?
2.6.2 Principle of Revealed Preference
2.6.3 Weak Axiom of Revealed Preference
2.6.4 Strong Axiom of Revealed Preference

2.7 Empirical Testing of Rational Preference Relations
2.7.1 Empirical Examination of Weak Order
2.7.2 Nontransitivity and Thresholds
2.7.3 Decision Making Model to Explain Nontransitivity

6 Multi-attribute Decision Making Process in Economic
Behavior: Process Tracking of Decision Making
and Computer Simulation ........................................ 157

6.1 Expression of Multi-attribute Decision Making by Consumers
and Measurement Theory ........................................ 157
  6.1.1 Definition of Multi-attribute Decision Making ......... 157
  6.1.2 Weak Order Property of Multi-attribute
       Decision Making and Conjoint Measurement ............. 158
  6.1.3 Additive Conjoint Structure and Measurement ......... 160

6.2 Multi-attribute Decision Making Not Satisfying Weak Order .......... 163
  6.2.1 Preference According to the Superiority Principle .... 164
  6.2.2 Theorem of Decision Making by Highest Superior
       Attribute Number ........................................... 165
  6.2.3 General Possibility Theorem on Multi-attribute
       Decision Making ............................................ 165

6.3 Process Analysis of Multi-attribute Decision Making ............... 167
  6.3.1 Process-Tracing Technique ................................ 167
  6.3.2 Types of Consumers’ Information Search ............... 168
  6.3.3 Situation of Consumers’ Information Search .......... 169

6.4 Consumers’ Various Decision Strategies ........................ 170
  6.4.1 Information Search and Option Evaluation .............. 170
  6.4.2 What is a Decision Strategy? ............................. 171
  6.4.3 Types of Consumers’ Decision Strategies ............... 172
  6.4.4 Classification of Consumers’ Decision Strategies .... 174
  6.4.5 How to Identify Consumers’ Decision Strategies ...... 175

6.5 Situation Dependence of Consumers’ Decision Strategies .......... 177
  6.5.1 Decision Strategies and Situational Factors ............. 177
  6.5.2 Theory Explaining Situation Dependence of Multi-
       attribute Decision Making Process by Consumers .......... 178

6.6 Consumers’ Multistage Decision Making and Computer
Simulation of Decision Strategies ................................ 181

6.7 Purchase Environment and Consumers’ Decision Making
Process .......................................................... 185
  6.7.1 Information Overload and Consumers’ Decision
       Strategies ................................................... 185
  6.7.2 Consumers’ Decision Strategies, Involvement,
       and Emotion ............................................... 185
  6.7.3 Consumers’ Decision Making in Stores .................. 186
  6.7.4 Factors Influencing In-store Consumer Behavior ...... 188
  6.7.5 Consumers’ Unplanned Purchase ......................... 189

6.8 Context Factors of Consumer Behavior .................................. 190
  6.8.1 Priming Effect ........................................... 190
  6.8.2 Context-Dependent Effect ............................... 191
6.9 Process After Consumers' Decision Making
6.9.1 Cognitive Dissonance Theory
6.9.2 Cognitive Dissonance and Consumer Behavior
6.10 Multi-attribute Decision Making Process and "Good Decision"
