China's Development Under a Differential Urbanization Model
### Contents

1 Urbanization Since 1949: History, Current State and Problems
   1.1 Introduction: Urbanization with Chinese Characteristics 1
   1.2 History of Urbanization in China
      1.2.1 From 1900 to 1949 3
      1.2.2 From 1949 to 1978 4
      1.2.3 From 1979 to the Present 8
      1.2.4 Steady Development: 1985–1991 9
   1.3 Current Conditions 12
   1.4 Basic Problems 14
   References 18

2 Theoretical Explorations of a Differential Urbanization Model
   2.1 The Particularities of the Foundations and Conditions of Urbanization in China 21
   2.2 One Size Fits All or Differentiated? A Question About Basic Approach 23
   2.3 A Differential Urbanization Model 24
      2.3.1 A Differential Urbanization Model that Factors in City Size 25
      2.3.2 A Diversified Urbanization Process Based on Driving Force 26
      2.3.3 The Basic Principles for Pushing Ahead with the Diversified Process of Urbanization 28
   2.4 Three Plan in One: Making Overall Plans Based on the Strategy of Urbanization with a Diversified Process 29
      2.4.1 The Integration of the National Development Plan for Priority Zones, Land and Resources Plan and Urban Planning 29
      2.4.2 Establishing an Overall Strategic Planning System for Land and Space Use 30
2.5 Formation of a Diverse Urban Society ........................................... 32
  2.5.1 Social Structure Transition: A Differential
         Urbanization Model and the Formation of Urban
         China .............................................................. 32
  2.5.2 Disputing Over Urban Society: Diversified Urban
         Society and its Influence ......................................... 34
References ...................................................................................... 37

3 The Lessons and Experiences of Urbanization and Urban
   Development at Home and Abroad .................................................. 39
  3.1 The Experiences and Lessons in Urbanization to Be Learned
       from Developed Countries .................................................. 40
     3.1.1 United Kingdom: Endogenous Urbanization ...................... 40
     3.1.2 United States: Market-Based Urbanization ....................... 48
     3.1.3 The Soviet Union: Urbanization Through Central
            Planning ............................................................... 61
     3.1.4 Japan: Urbanization Promoted by the Government .......... 68
  3.2 Experiences and Lessons from the Urbanization Process
       in Developing Countries .................................................. 75
     3.2.1 South Korea: Centralized and Decentralized Patterns
            of Urbanization .................................................. 75
     3.2.2 China Taiwan: Urbanization Driven by Industry ............. 81
     3.2.3 Brazil: Urbanization Driven by External Factors .......... 88
     3.2.4 Urbanization in India: A Slow Process ....................... 92
References ...................................................................................... 101

4 Seven Approaches to Urbanization in China ................................. 103
  4.1 The Particularized Process of Pushing Ahead with
       Urbanization in China .................................................. 104
  4.2 Review: Research into the Pushing Model of Urbanization
       in China ................................................................. 110
  4.3 Multi-models of Pushing Ahead with China's Urbanization ....... 112
     4.3.1 The Establishment of Development Zones ....................... 114
     4.3.2 The Establishment of New Districts and Towns ............. 117
     4.3.3 Urban Expansion ................................................ 118
     4.3.4 Urban Renewal .................................................. 119
     4.3.5 The Establishment of CBDs ...................................... 120
     4.3.6 Industrialization in Towns ...................................... 122
     4.3.7 Industrialization in Villages .................................... 123
  4.4 An Analysis on the Advantages and Disadvantages of China's
       Models of Pushing Ahead with Urbanization ..................... 125
References ...................................................................................... 128
5 The Establishment of Development Zones

5.1 The Origin and History of Development Zones
5.1.1 Background for Establishing Development Zones
5.1.2 History

5.2 The Types and Spatial Layout of Development Zones
5.2.1 National Economic and Technological Development Zones
5.2.2 National Level High-Tech Industrial Development Zones
5.2.3 National Bonded Areas
5.2.4 National Level Border Economic Cooperation Zones
5.2.5 National Level Export Processing Zones
5.2.6 Other State-Level Development Zones
5.2.7 Provincial Development Zones

5.3 The Model of Governance in Development Zones
5.3.1 The Basic Concept and Characteristics of the Model of Governance in Development Zones
5.3.2 Classification of Zone Governance Models

5.4 The Strategic Functions of the Development Zones
5.4.1 The Economic Functions of Development Zones
5.4.2 Social Functions
5.4.3 Political Functions

5.5 The Logic in Pushing Ahead with Urbanization by Development Zones
5.5.1 The Start-up Phase
5.5.2 The Organization of Resource
5.5.3 Resources Mobilization and Deployment
5.5.4 Returns

5.6 The Economic Limitations and Social Constraints of the Development Zone Model
5.6.1 Economic Limitations
5.6.2 Social Constraints

7 The Urban Expansion Model ........................................... 219
7.1 The Government-Led Urban Expansion Model ................. 220
7.1.1 Large-Scale, High Speed and Significant Regional Differences .................................................. 221
7.1.2 Rapid Increase and Large Proportions of Residential and Industrial Land ........................................... 222
7.1.3 Larger Proportion of Infrastructure and Low-Income Housing Construction in Local Government Debt ........ 223
7.1.4 Capability and Differentiation in Urban Renewal and Development ........................................... 225
7.2 Understanding Urban Expansion: Growth, Differentiation and Sprawl .................................................. 227
7.2.1 Urban Growth ...................................................... 227
7.2.2 The Differentiation of Social Space ........................................... 231
7.2.3 The Sprawl of Cities ................................................... 233
7.3 The Political and Economic Mechanisms of Urban Expansion ........................................... 236
7.4 Conclusions ................................................................. 240
References ................................................................. 240

8 The Old Town Renewal Model in China ................................... 243
8.1 Concept and the Current Condition of the Development ........ 244
8.1.1 Concepts ................................................................. 244
8.2 The Current Condition of the “Old Town” Area .................. 245
8.2.1 The Aging of Buildings in the Old Town Area .................. 245
8.2.2 High Population Density and Poor Living Conditions .................................................. 245
8.2.3 Serious Problems with Infrastructure ...................................... 246
8.2.4 Empty Nesters and Population Aging ...................................... 246
8.2.5 Housing Property Rights ................................................... 247
8.3 The Previous Approaches to Old Town Renewal .................. 247
8.3.1 The Renovation of Dilapidated Houses ...................................... 247
8.3.2 The Impetus of Real Estate ................................................... 247
# Contents

8.3.3 Old Town Renewal Promoted by Important Social Events ................................................. 248

8.4 Problems with the Process of Old Town Renewal ................................................................. 249
  8.4.1 The Loss of Unique Features and Distinctive Cultures of Cities .................................. 249
  8.4.2 Building Brands Through Imitation Classics and Fake Antiques ................................. 250
  8.4.3 The Social Problems Caused by Old Town Renewal ......................................................... 251

8.5 Countermeasures and Suggestions for Improvements to the Old Town Renewal Model ............... 253
  8.5.1 A Focus on People's Livelihoods and the Adoption of Multifaceted Programs .................. 253
  8.5.2 The Protection of Historic Buildings in Old Town Areas .............................................. 255
  8.5.3 The Modifications Carried Out to Buildings Without Heritage Values in Old Town Areas . . 256

8.6 Other Aspects ......................................................................................................................... 257

References ................................................................................................................................. 257

9 CBDs Development Model ......................................................................................................... 259

9.1 An Introduction to the CBD Model: General Rules and International Comparison ...................... 260
  9.1.1 The Definition, Characteristics and Evolutionary Laws of CBDs ........................................ 261
  9.1.2 The Development Model of CBDs in China: An International Comparison ....................... 262

9.2 The Current Condition and Characteristics of CBD Development in China ............................... 264
  9.2.1 A Brief Introduction to CBD Development in China ......................................................... 264
  9.2.2 The Characteristics of CBD Development in China ............................................................ 265

9.3 The Feasibility of CBDs in China and a Case Study: From the Perspective of Governmental Administration .......................................................... 269
  9.3.1 An Analysis on the Feasibility of CBD Development in Large and Medium-Sized Cities in China .......................................................... 270
  9.3.2 Mature CBDs: A Case of Lujiazui Financial and Trade Zone in Shanghai ......................... 272

9.4 Lessons to Be Learned About CBD Development in China: The Case of Zhujiang New Town in Guangzhou .......................................................... 278
  9.4.1 Background .......................................................................................................................... 278
  9.4.2 The Location of Zhujiang New Town .................................................................................. 279
  9.4.3 Challenges and Responses .................................................................................................. 279
  9.4.4 An Evaluation of the New Plan ............................................................................................ 281
9.5 The Problems in and Solutions to CBD Development in China

9.5.1 An Analysis of Problems in CBD Development in China

9.5.2 Suggestions for CBD Planning in China
