1 Operations and strategy 1

Perspective: Airlines – need to stay competitive 1
Introduction 4

History of operations management 4
   Industrial Revolution 4
   Scientific management 5
   Human relations movement 5
   Operations research 5
   Just-in-time and lean production systems 5
   Recent developments 5

Operations management 6
   The customer 8
   Transformation process 10
   Products and services 13
   Service package 15
   Servitisation 16
   Customer experience paradigm in operations 17

Strategy 18
   Strategy defined 18
   What is strategy? 19
   Strategic capability 22
   Core competence 23
   Corporate strategy 24

</table>
Strategic capacity planning process 84
Strategies for balancing supply with demand 87
Production planning approaches 89
Production planning model 92
Facilities and capacity 100
Capacity flexibility 101
Revenue management – also known as yield management 103
Revenue management overview 103
Revenue management process 106
Complications and extensions of revenue management 111
Service capacity 113
Queues and waiting lines 113
Chapter summary 114
Discussion questions 114
Key terms 114
Notes 115
Additional reading on capacity and revenue management 115

4 Process design and strategy 116
Perspective: Digital ubiquity – embracing digital technology 116
Introduction 118
Customers and relationships 118
Customer-centricity 118
Classifying customers by type or attitude 119
Strategic importance of process 122
Process thinking 122
Value adding and cost adding 124
Strategic decisions for process 128
Process flow structures 131
Process variability 134
Perfect process 136
Strategic service vision 136
Characteristics of service operations 137
Service encounter 138
Service-profit chain 139
Linkages in the service-profit chain 139
Service-profit chain in perspective 144
Chapter summary 145
Discussion questions 146
Key terms 146
Notes 146
Additional reading on process design and strategy 147
5 Applying lean thinking to operations 148

Perspective: Chelsea Sugar – lean thinking 148
Introduction 150

Lean thinking 150
  Introduction to lean 150  
  History of lean 151  
  Understanding and implementing lean thinking 153  
  Five principles of lean 154  
  The Toyota Way 155  
  14 Principles of the Toyota Way 156  
  Value and waste 157  
  Value stream mapping 162  
  Continuous improvement 163  
  Plan-do-check-adjust cycle (PDCA cycle) 164  
  Lean production and scheduling 165  
  Lean enterprise 167  
  Basic seven tools of quality 168  
  Lean leadership 175  
  Lean services 176  

Statistical process control 177

Chapter summary 185
  Discussion questions 186  
  Key terms 186  
  Notes 187  
  Additional reading on applying lean thinking to operations 187

6 Achieving balanced results and measuring performance 189

Perspective: Nokia – how do we measure performance? 189
Introduction 190

Developing balanced results 191
  Business performance scope 191  
Hoshin kanri process 197
  Without a hoshin-style process 197  
  With a hoshin-style process 197  
  Regular hoshin reviews 198  
Balanced scorecard 199
  Performance measures from four perspectives 199  
  Linking strategy with operations 203  
  Closed-loop management system 204  
Driving performance metrics 205
  Performance metrics are changing 205  
  Benchmarking 207  
  Measurement determines behaviour 208
Chapter summary 210
Discussion questions 211
Key terms 211
Notes 211
Additional reading on achieving balanced results and measuring performance 212

7 Quality management and product design 213

Perspective – customer requirements in product design 213
Introduction 216
Design for the customer 216
Voice of the customer 216
Customer requirements 217
Kano model 217
Quality function deployment 220
House of quality 221
Total quality management 223
What is quality? 223
Service definition of quality 225
Traditional costs of quality 228
Quality management frameworks 230
Process capability and six sigma quality 232
Process cause and variation 232
Process capability measurements 235
Six sigma quality 244
Define-measure-analyse-improve-control 245
Lean six sigma 246
Strategic product design 246
Structured product development 247
Product development portfolios 248
Robust design 249
Design for operations 250

Chapter summary 251
Discussion questions 251
Key terms 251
Notes 252
Additional reading on quality management and product design 253

8 Inventory and resource planning 254

Perspective: Fonterra – too much milk then and not enough milk now 254
Introduction 257
Inventory and inventory management 258
Inventory purpose 259
Why hold inventory? 260
New approaches and considerations 262
Generic inventory management model 264
Inventory management systems 266
Fixed reorder quantity model 267
Economic order quantity model 267
Fixed reorder cycle model 270
Newsvendor problem 271
Material requirements planning (MRP) 276
Demand driven material requirements planning (DDMRP) 279
Other planning and scheduling systems 282
Resource planning 284
Sales and operations planning 284
Scheduling 288
Process industries 288
Theory of constraints 290
Performance measurement 291
Logical thinking process 292
Logistics including drum-buffer-rope scheduling 294
Scheduling using theory of constraints 296
Operating guidelines 297
Chapter summary 298
Discussion questions 298
Key terms 299
Notes 300
Additional reading on inventory and resource planning 301

9 Collaborative supply chains

Perspective: Weta Group – the creative art of motion pictures 302
Introduction 304
Supply chain management 305
Supply chain overview 305
Supply chain management from a strategic view 308
Bullwhip effect – demand amplification 309
Collaborative supply chains 313
Characteristics of a collaborative supply chain 314
Advantages of collaboration 315
Competitive advantage 318
Service chain management 319
Primary value components of service chain management 320
Strategic view of supply chains 321
Strategic role of inventory in supply chains 325
Demand chain management 326
  Effective and responsive data exchange 327
  Exchange of process and design information 327
  Pull-based supply methodology 327
  Rhythmic planning cycles 328
  Efficient consumer response 328

Purchasing 330
  Supplier selection 331
  Multiple suppliers 331
  Replenishment 333
  Supply chain system metrics 335

Chapter summary 336
  Discussion questions 336
  Key terms 337
  Notes 337
  Additional reading on collaborative supply chains 338

10 Advanced supply chain concepts: Technology and sustainability 339

  Perspective: Warehouse of the future 339
  Introduction 342
  Autonomous vehicles 342
    Categories and benefits of autonomous vehicles 343
    Autonomous vehicles in logistics 344
  Robotics and automation 348
    Technical basics of robotic systems 349
    Stakeholders and risks of robotics and automation 349
  Omnichannel logistics 354
    Reverse logistics and returns management 355
    Retail returns network design 358
  Sustainable supply chain management 361
    Sustainability stakeholders 362
    Sustainable supply chain operations 363

Chapter summary 365
  Discussion questions 366
  Key terms 367
  Notes 367
  Additional reading on advanced supply chain concepts 368

Case study summaries 369
  Case 1: Three crises for Toyota 369
  Case 2: Tube Forgings of America, Inc. 369
  Case 3: Jarden Fresh Preserving 369
  Case 4: Airbus and the A380 369
  Case 5: PUMA Sportlifestyle 369
Case 6: Ottoman Co. 369
Case 7: SteelCom 370
Case 8: Tait Communications 370
Case 9: Nat-pak and Tastie-food 370
Case 10: Waikato District Health Board 370
Case 11: Implementing circular economy at HP 370
Case 12: Fischer fixing systems 370
Case 13: Bridging design prototypes 370

Case 1 Three crises for Toyota 371
JEFFREY K. LIKER

The Great Recession 371
The recall crisis 372
The great East Japan earthquake and tsunami 374
Discussion questions 375
Notes 376

Case 2 Tube Forgings of America, Inc.: Surviving and thriving during the downturn 377
CAROL A. PTAK AND CHAD SMITH

Company overview 377
Early days 377
The task ahead 378
Challenges to the system 378
Solution 378
Dynamic buffer calculations 380
Commentary 380
Summary 381
Discussion questions 381
Notes 381

Case 3 Jarden Fresh Preserving 382
THOMAS F. WALLACE

Author's comments 382
Management of market risk 382
Why sales and operations planning (S&OP) became a priority 383
Fresh Preserving S&OP design 383
Modelling supply flexibility 384
Bridging demand to supply 384
Scenario planning and mitigation 385
Results 386
The moral of the story 386
Discussion questions 386
Notes 387

Case 4 Airbus and the A380
LINCOLN C. WOOD AND LINH N. K. DUONG

Discussion questions 392
Notes 392

Case 5 PUMA Sportlifestyle: Journey towards sustainable supply chain management
HENDRIK REEKE

Company overview 393
Criticism and controversies 393
Sustainable supply chain management 394
PUMA’s sustainable supply chain 395
Discussion questions 396
Notes 397

Case 6 Ottoman Co.
LALEH HAERIAN ARDEKANI

Business model 398
Process design 398
Challenges and current problems 399
Solutions for facing challenges ahead 399
Discussion questions 400

Case 7 SteelCom
LINCOLN C. WOOD

Company and products 402
Inventory management 403
Discussion questions 404

Case 8 Tait Communications
DAVID GARDINER

Discussion questions 407
Notes 408

Case 9 Nat-pak and Tastie-food
ANSON K. T. LI

Introduction 409
Nat-pak 409
Tastie-food 411
Discussion questions 412

Case 10 Waikato District Health Board: Consumables supply for elective surgery
CRYSTAL BEAVIS

Introduction 413
The rebuilding programme 414
The need to gain control of the consumables inventory system 414
Map of the original process 415
Process improvements 416
Map of the new 'BOM' process for supplying consumables for elective surgery 418
Evaluation 418
Process weaknesses 418
Process strengths 419
How the new process helped enhance and strengthen the value chain in other ways 420
Discussion questions 421
Note 421
References 421

Case 11 Implementing circular economy at HP
CARL KÜHL AND HENDRIK REEFKE

Company overview 422
HP and circular economy 422
Implementing CE at HP 423
Discussion questions 424
Notes 425

Case 12 Fischer fixing systems: Moving forward with the workforce – change communication at the Global Distribution Centre
KLAUS MÖLLER, JULIAN GABEL, AND FRANK BERTAGNOLLI

Introduction 426
The fischer group of companies 427
Logistics processing via the Global Distribution Centre 427
Further investment in automation for productivity growth 428
Employee communication 429
Challenges in the change management 430
Decision making 431
Note 431
Additional readings 432
Case 13 Bridging design prototypes 433

GLORIA GOMEZ, MAIGEN WILKI THYGESEN, ANDREAS MELSON, MATHIAS HALKJÆR PETERSEN, CASPER HARLEV, ENIKÖ ROZSNYÓI, AND THOMAS A. RUBAEK

Understanding user needs for feature design 433
Case A: Evaluating digital games for dementia with the bridging design prototype principles 434
MAIGEN WILKI THYGESEN AND ANDREAS MELSON

Case B: Bridging design prototype of a plant sensor 436
MATHIAS HALKJÆR PETERSEN AND CASPER HARLEV

Case C: Bridging design prototype of a user research framework for a robotics start-up 438
ENIKÖ ROZSNYÓI AND THOMAS A. RUBAEK

Discussion questions 440
Notes 440
References of student cases 440

Index 441
