Early Learning and Child Well-being in Estonia
# Table of contents

**EXECUTIVE SUMMARY** ........................................................................................................ 11

**READER’S GUIDE** ............................................................................................................... 13

**ABBREVIATIONS AND ACRONYMS** .................................................................................... 15

**CHAPTER 1** EARLY LEARNING MATTERS: THE INTERNATIONAL EARLY LEARNING AND CHILD WELL-BEING STUDY ........................................................................................................ 17

The early years: A window of opportunity ... and risk ................................................................ 18
Countries can learn from each other to improve children’s early learning outcomes .................. 19

**CHAPTER 2** THE CONTEXT OF EARLY LEARNING IN ESTONIA ........................................... 21

Profile of children and families .................................................................................................. 22
Strategies to strengthen early learning ....................................................................................... 25
Early childhood education and care provision ........................................................................... 28
Participation in preschool institutions ....................................................................................... 30
Quality and impact of preschool institutions ........................................................................... 31
Policy issues and debates around early learning ....................................................................... 33

**CHAPTER 3** CHILDREN’S EMERGENT LITERACY AND EMERGENT NUMERACY SKILLS IN ESTONIA ................................................................. 39

The importance of early literacy and numeracy development ..................................................... 40
Emergent literacy and emergent numeracy skills of five-year-olds in Estonia ......................... 41
Individual characteristics and emergent literacy and emergent numeracy skills ...................... 45
Home and family characteristics and emergent literacy and emergent numeracy skills .......... 49
Home learning environment and emergent literacy and emergent numeracy skills ................ 51
Assessing the combined effects of child and family characteristics on emergent literacy and emergent numeracy scores ........................................................... 55
Relationship between early literacy and numeracy scores and outcomes in other learning domains .................................................. 57
Summary and conclusions ........................................................................................................ 58

**CHAPTER 4** CHILDREN’S SELF-REGULATION SKILLS IN ESTONIA ................................... 61

The importance of self-regulation development ....................................................................... 62
Self-regulation skills of five-year-olds in Estonia ..................................................................... 64
Individual characteristics and self-regulation skills ................................................................ 66
Home and family characteristics and self-regulation skills ...................................................... 68
Home learning environment and self-regulation skills ............................................................. 73
Assessing the combined effects of child and family characteristics on self-regulation scores .................................................. 77
Summary and conclusions ........................................................................................................ 79

**CHAPTER 5** CHILDREN’S SOCIAL-EMOTIONAL SKILLS IN ESTONIA .................................. 83

The importance of social-emotional development .................................................................... 84
Social-emotional skills of five-year-olds in Estonia .................................................................. 86
Individual characteristics and social-emotional skills ............................................................. 88
Home and family characteristics and early social-emotional skills ......................................... 91
Home learning environment and early social-emotional skills ................................................................. 94
Relationship between social-emotional scores and outcomes in other learning domains .......................... 100
Summary and conclusions .......................................................................................................................... 101

CHAPTER 6 SUMMARY AND CONCLUSIONS ................................................................................................. 105

ANNEX A TECHNICAL NOTE ........................................................................................................................ 109

BOXES
Box 2.1 Estonian Lifelong Learning Strategy 2020 ......................................................................................... 26
Box 2.2 Quality of ECEC provision in Estonia against EU structural indicators ........................................... 32
Box 5.1 Defining social-emotional learning .................................................................................................... 85

FIGURES
Figure 1.1 Children’s early learning and later life outcomes ............................................................................ 18
Figure 1.2 Risk and protective factors affect development trajectories ............................................................ 18
Figure 1.3 Change in enrolment rates of children aged 3 to 5 years (2005, 2010 and 2017) ......................... 19
Figure 1.4 IELS approach to gathering direct and indirect information .......................................................... 20
Figure 2.1 Population share by primary language, Estonia ............................................................................ 22
Figure 2.2 Education level of women giving birth, percentage by year, 2000 to 2017, Estonia ..................... 23
Figure 2.3 Percentage of parents taking parental leave, by duration, Estonia .................................................. 24
Figure 2.4 Comparison between the number of children aged 0-14 and the number of adults aged 65–79 in Estonia, 2000 to 2018 ....................................................................................................................... 24
Figure 2.5 Comparison between number of immigrants and number of emigrants in Estonia, 2005-2017 ................................................................................................................................................. 25
Figure 2.6 Overview of ECEC provision in Estonia ........................................................................................ 28
Figure 2.7 Enrolment in preschool institutions by age, 2014 to 2016, Estonia ................................................ 30
Figure 2.8 Average performance of Estonia in PISA, 2006 to 2018 ............................................................... 32
Figure 2.9 Comparison of childcare costs across OECD countries ................................................................. 34
Figure 2.10 Percentage of children aged between three and the minimum compulsory school age in formal ECEC, by hours per week, 2008 to 2017 ............................................................................................................... 35
Figure 2.11 Percentage of children under three in formal ECEC, by hours per week, 2008 to 2017 ................ 35
Figure 3.1 Distribution of emergent literacy and emergent numeracy scores, Estonia .................................... 42
Figure 3.2 Mastery of key language and literacy-related skills as reported by parents and educators, Estonia .................................................................................................................................................. 43
Figure 3.3 Emergent literacy scores by reported mastery of key language and literacy-related skills, Estonia .................................................................................................................................................. 43
Figure 3.4 Mastery of key early mathematics skills as reported by parents and educators, Estonia ............... 44
Figure 3.5 Emergent numeracy scores by reported mastery of key early mathematics skills, Estonia ........... 45
Figure 3.6 Emergent literacy and emergent numeracy scores by children’s language, Estonia ...................... 45
Figure 3.7 Mean emergent literacy and emergent numeracy scores of Estonian-speaking and Russian-speaking children by gender, Estonia ...................................................................................... 46
Figure 3.8 Receptive language development as reported by parents and educators by gender, Estonia ......... 46
Figure 3.9 Expressive language development as reported by parents and educators by gender, Estonia .......... 47
Figure 3.10 Numeracy development as reported by parents and educators by gender, Estonia ..................... 47
Figure 3.11 Emergent literacy and emergent numeracy scores by age of child in months, Estonia .................. 48
Figure 3.12 Relative associations between early difficulties and emergent literacy and emergent numeracy scores, Estonia ........................................................................................................................................... 48
Figure 3.13 Emergent literacy and emergent numeracy scores by socio-economic quartile, Estonia ............ 49
Figure 3.14 Emergent literacy and emergent numeracy scores by home language, Estonia ........................... 50
Figure 3.15 Emergent literacy and emergent numeracy by mother’s educational attainment, Estonia .......... 51
Figure 3.16 Emergent literacy and emergent numeracy scores by number of children’s books in the home, Estonia ........................................................................................................................................... 52
Figure 3.17 Frequency of engagement in literacy-related activities at home, Estonia ....................................... 52
Figure 3.18 Emergent literacy scores by how often a child is read to from a book at home, Estonia ............... 53
Figure 3.19 Frequency of engagement in numeracy-related activities at home, Estonia ................................. 53
Figure 3.20 Emergent numeracy scores by frequency of numeracy-related activities at home, Estonia ................................................. 54
Figure 3.21 Emergent literacy and emergent numeracy by frequency of participation in special or paid activities outside the home, Estonia ................................................................. 54
Figure 3.22 Emergent literacy and emergent numeracy scores by parental involvement in preschool activities, Estonia ........................................... 55
Figure 3.23 Correlations between emergent literacy scores and other learning domains, Estonia .................................................. 58
Figure 3.24 Correlations between emergent numeracy scores and other learning domains, Estonia ........................................ 58

Figure 4.1 The three key components of self-regulation .............................................................................................................. 63
Figure 4.2 Distribution of self-regulation scores, Estonia ........................................................................................................ 65
Figure 4.3 Self-regulation development as reported by parents and educators, Estonia ............................................................... 66
