Early Learning and Child Well-being

A STUDY OF FIVE-YEAR-OLDS IN ENGLAND, ESTONIA, AND THE UNITED STATES

OECD
BETTER POLICIES FOR BETTER LIVES
# Table of contents

**EXECUTIVE SUMMARY** .................................................................................................................. 11

**READER’S GUIDE** .......................................................................................................................... 13

**ABBREVIATIONS AND ACRONYMS** ............................................................................................ 15

**CHAPTER 1 WHY EARLY LEARNING AND CHILD WELL-BEING MATTER** ...................................... 17
The early years: a window of opportunity ... and risk ........................................................................... 18
A strong predictor of later outcomes ..................................................................................................... 19
The areas of early learning that matter most for children ...................................................................... 22
The drivers of positive early development .............................................................................................. 23
Catching-up during early schooling is possible but is challenging ......................................................... 25
Conclusions ........................................................................................................................................... 26

**CHAPTER 2 THE DESIGN AND IMPLEMENTATION OF THE STUDY** .............................................. 29
Objectives and guiding principles .......................................................................................................... 30
The conceptual design of the study ........................................................................................................ 31
The target group of children sampled in the study ................................................................................. 32
The aspects of children’s early learning that were assessed .................................................................. 32
How children were assessed .................................................................................................................. 33
Contextual information on each child ..................................................................................................... 34
How the study was implemented ........................................................................................................... 35
Participation rates ................................................................................................................................... 35

**CHAPTER 3 A SNAPSHOT OF PARTICIPATING COUNTRIES** ......................................................... 37
Introduction ........................................................................................................................................... 38
Demographics ....................................................................................................................................... 38
Income .................................................................................................................................................... 40
Early years systems ................................................................................................................................. 42
Education system performance ............................................................................................................... 43
Conclusions ............................................................................................................................................ 44

**CHAPTER 4 SOCIAL-EMOTIONAL SKILLS** .................................................................................... 47
Social-emotional skills are critical for children’s development and well-being .................................... 48
Early social-emotional skills are predictive of a range of later outcomes ............................................ 48
Overall findings ..................................................................................................................................... 50
Conclusions ........................................................................................................................................... 62

**CHAPTER 5 CHILDREN’S SKILLS IN SELF-REGULATION** ............................................................ 65
Introduction ........................................................................................................................................... 66
Self-regulation skills are critical for well-being and educational success ............................................. 66
Overall findings ..................................................................................................................................... 68
Conclusions ........................................................................................................................................... 75
Table of contents

CHAPTER 6 EMERGENT LITERACY AND EMERGENT NUMERACY ................................................. 79
Early cognitive skills matter ........................................................................................................ 80
Overall findings .......................................................................................................................... 82
Conclusions ................................................................................................................................. 93

ANNEX A TECHNICAL NOTE .................................................................................................... 95

BOXES
Box 1.1 Children's rights to early learning and well-being .......................................................... 26
Box 2.1 Policy and research questions addressed by the study ..................................................... 30

FIGURES
Figure 1.1 Risk and protective factors affect development trajectories ........................................ 18
Figure 1.2 Change in enrolment rates of children aged 3 to 5 years (2005, 2010 and 2017) ............. 19
Figure 1.3 Predicted percentage effects on adult earnings of early childhood programmes, based on test scores versus adult outcomes .................................................. 20
Figure 1.4 Key areas of early learning and child well-being ......................................................... 22
Figure 1.5 Drivers of children's early learning ............................................................................. 23
Figure 1.6 Relationship between age of participation in early childhood education programmes and students' reading scores at age 15 across countries, controlling for socio-economic status, 2018 .................................................. 25
Figure 2.1 Conceptual framework for the study ........................................................................... 31
Figure 2.2 Children's early learning included in IELS .................................................................. 33
Figure 2.3 Tom and Mia, the lead characters from the children's stories in IELS ............................ 34
