

MOST® Work Measurement Systems

Fourth Edition

Kjell B. Zandin

Edited by
Therese M. Schmidt

Contents

Foreword	xv
In Memory of Kjell B. Zandin	xvii
Acknowledgments.....	xix
Author	xxi
Editor	xxiii
Chapter 1 The Concept of MOST—An Introduction	1
Work Measurement	1
Definition of Terms—MOST Analysis	4
Definition of Terms—Standard Time	6
The Concept of the MOST Work Measurement Technique	7
The BasicMOST Sequence Models.....	9
Time Units	12
Parameter Indexing	13
Application Speed	14
Accuracy.....	15
Method Sensitivity	15
Structured Method Descriptions	16
Analyzing Technology with MOST	17
Integration of MOST Standards.....	17
Chapter 2 The MOST Systems Family	19
Levels of Work Measurement.....	19
Compatibility of MOST Systems	20
Application of MOST to Develop Engineered Standards	20
MOST System Selection.....	21
BasicMOST	21
MiniMOST	21
MaxiMOST	22
Decision Diagram.....	22
System Selection Charts.....	22
Application of a MOST Work Measurement System	25
Identifying the Best Method.....	25
Practical Analysis Procedures.....	26
Analyst Consistency	26
General Application Rules for All MOST Systems	27
Chapter 3 The BasicMOST System	29
The General Move Sequence Model	30
The Sequence Model	31

Phases of the General Move Sequence Model	31
Parameter Definitions.....	32
Parameter Indexing	32
Action Distance (A)	34
Body Motion (B).....	37
Gain Control (G).....	40
Placement (P).....	43
Parameter Frequencies	47
Writing Method Descriptions.....	49
General Move Examples	50
The Controlled Move Sequence Model.....	51
The Sequence Model	52
Phases of the Controlled Move Sequence Model.....	52
Parameter Definitions.....	52
Parameter Indexing	53
Move Controlled (M).....	53
Summary of Foot Motions	56
Process Time (X).....	58
Alignment (I).....	59
Writing Method Descriptions.....	63
Controlled Move Examples	64
The Tool Use Sequence Model.....	65
The Sequence Model	66
Phases of the Tool Use Sequence Model.....	67
Parameter Definitions.....	67
Parameter Indexing	68
Fasten or Loosen (F or L)	71
Tool Placement	80
Writing Method Descriptions	81
Tool Use Examples for Fasten or Loosen	82
Tool Use Frequencies.....	82
Tool Use Frequency Examples	84
Multiple Tool Actions	85
Cut, Surface Treat, Measure, Record and Think.....	86
Cut (C).....	86
Tool Use Examples for Cut	89
Surface Treat (S).....	90
Tool Use Examples for Surface Treat.....	91
Measure (M).....	91
Tool Use Examples for Measure	96
Special Measuring Tools	97
Record (R)	98
Tool Use Examples for Record	99
Think (T).....	100
Tool Use Examples for Think	103

The Equipment Use Sequence Model	104
The Sequence Model	104
Phases of the Equipment Use Sequence Model.....	104
Parameter Definitions.....	105
Parameter Indexing	105
Keyboard (W).....	107
Keypad (K)	108
Writing Method Descriptions.....	109
Equipment Use Examples for Keyboard and Keypad	110
Letter/Paper Handling (H)	110
Letter/Paper Handling Examples	116
The Manual Crane Sequence Model.....	117
The Sequence Model	118
Parameter Definitions.....	118
Parameter Indexing	119
Manual Crane Data Card Backup Information	122
Writing Method Descriptions.....	122
Manual Crane Examples	122
Development of Elements for Special Tools or Situations	123
Application of the BasicMOST Work Measurement System.....	127
The BasicMOST Analysis	127
Method Levels and Simultaneous Motions	127
Method Level and Simultaneous Motion Examples.....	128
BasicMOST Analysis Documentation.....	129
Summary of the BasicMOST Analysis	134
Validation of Process Times.....	134
BasicMOST Summary	135
Chapter 4 The MiniMOST System.....	137
The General Move Sequence Model	138
The Sequence Model	138
Phases of the General Move Sequence Model	139
Parameter Definitions.....	139
Parameter Indexing	140
Limiting or Limited	142
Action Distance (A).....	142
Body Motion (B).....	147
Gain Control (G).....	149
Consideration of Effective Net Weight.....	153
Placement (P).....	154
Precise Placement.....	155
Adjustments to the Values for Precise Placement	157
Is a Precise Placement Value Required?	159
Parameter Frequencies	159

Writing Method Descriptions	161
General Move Examples	162
The Controlled Move Sequence Model.....	163
The Sequence Model	163
Phases of the Sequence Model	164
Parameter Definitions	165
Parameter Indexing	165
Move Controlled (M).....	165
Effective Net Weight in the Controlled Move Sequence Model.....	169
Process Time (X).....	170
Alignment (I).....	170
Writing Method Descriptions	173
Controlled Move Examples	174
Application of the MiniMOST Work Measurement System.....	174
The MiniMOST Analysis.....	174
MiniMOST Analysis Documentation	176
Motion Combinations	180
Simultaneous Motion Guide.....	182
Control Level and Method Level.....	184
Summary of the MiniMOST Analysis.....	185
Analysis of Activities Involving Tools	186
Development of Special Tool Elements.....	187
MiniMOST Summary	187
Chapter 5 The MaxiMOST System	191
The Sequence Models	191
Parameter Indexing	193
Parameter Definitions	194
Action Distance (A).....	195
Body Motion (B).....	196
The Part Handling Sequence Model	200
The Sequence Model	201
Parameter Definitions.....	201
Parameter Indexing	202
Part Handling—General Move (P).....	203
Part Handling—Controlled Move (P)	206
Parameter Frequencies	211
Writing Method Descriptions	213
Part Handling Examples.....	213
The Tool Use Sequence Model.....	215
The Sequence Model	216
Parameter Definitions.....	216
Parameter Indexing	216

Assemble or Disassemble Standard Fasteners (T)	216
Tighten or Loosen Standard Fasteners (T).....	221
Assemble or Disassemble Long Fasteners (T)	222
Tighten or Loosen Long Fasteners (T).....	224
Writing Method Descriptions	225
Tool Use Examples—Fasteners	226
General Tools I (T)	227
Tool Use—General Tools I Examples.....	232
General Tools II (T).....	234
Tool Use—General Tools II Examples	241
Measuring Tools (T).....	243
Tool Use—Measuring Tools Examples	254
The Machine Handling Sequence Model.....	256
The Sequence Model	256
Parameter Definitions	256
Parameter Indexing	256
Operate Machine Controls (M)	257
Secure or Release Parts (M).....	259
Writing Method Descriptions	263
Machine Handling Examples	263
The Powered Crane Sequence Model	264
The Sequence Model	265
Parameter Definitions.....	266
Powered Crane Data Card Backup Information.....	266
Parameter Indexing	267
Writing Method Descriptions	268
Powered Crane Example	268
The Powered Truck Sequence Model.....	269
The Sequence Model	269
Powered Truck Data Card Backup Information	272
Parameter Definitions.....	273
Parameter Indexing	273
Writing Method Descriptions	274
Powered Truck Examples	275
Developing New Elements	275
Application of the MaxiMOST Work Measurement System.....	278
The MaxiMOST Analysis	278
MaxiMOST Analysis Documentation.....	278
Workplace Layout.....	282
Multiple Operator Activities.....	283
Summary of the MaxiMOST Analysis	283
Validation of Process Times.....	284
MaxiMOST Summary.....	284

Chapter 6	Using MOST Standards to Manage Performance.....	287
Accenture Workforce Performance Model	287	
Accenture Managing Performance Cycle	288	
Use Standards to Establish and Communicate Expectations.....	288	
Build in the Conditions for Success	290	
Use Feedback to Make Reality Visible	291	
Respond to Challenges and Opportunities.....	293	
Using MOST-Developed Standards to Improve Productivity	293	
Appendix A: Theory	297	
Index.....	319	
Subject Categories.....	321	
Subject Index	323
