macmillan

Contents

1	Introduction	1
1.1	Background	1
1.2	Organization of Chapters	2
	References	4
2	Consumer Demand—Theory	5
2.1	Introduction	5
2.2	Consumer's Choice Problem	5
2.2.1	First-Order Conditions: Application of the Kuhn-Tucker Theorem	6
2.2.2	Demand Functions	7
2.3	Comparative Statics of Income and Price Changes	7
2.3.1	Fundamental Matrix Equation of Consumer Demand	8
2.3.2	Slutsky Substitution Matrix	9
2.3.3	General Restrictions of Consumer Behavior	10
2.4	Comparative Statics of Exogenous Preference Shift Variables	11
2.5	Comparative Statics with Strictly Concave Utility Function	12
2.6	Duality Theory: Relationships Between Marshallian, Hicksian, and Frischian Demands	14
2.7	Inverse Demand Functions	15
2.7.1	Wold-Hotelling Identity	16
2.7.2	Comparative Statics	16
	Problems	18
	References	19
3	Consumer Demand—Separability and Commodity Aggregation	21
3.1	Introduction	21
3.2	Restrictions on Price Movements	21
3.3	Separability Concepts	22
3.4	Implications of Weak Separability	23

3.4.1	Theorem 1: Conditional Demand Functions	23
3.4.2	Total Differential of First-Stage Allocation Equations	24
3.5	Two-Stage Budgeting	26
3.5.1	Theorem 2 and Consistency Requirement	26
3.5.2	Form of Price Indices	28
3.6	Implications of Strong Separability	29
3.6.1	General Form of Composite Demand Function	29
3.6.2	Unconditional Demand Elasticities	30
3.7	Weak Separability Alone Insufficient to Estimate Unconditional Demand Elasticities	31
3.8	Empirical Implications	32
	Problems	34
	References	35
4	Consumer Demand—Empirical Analysis I	37
4.1	Introduction	37
4.2	Brief History of Empirical Consumer Demand Models	37
4.2.1	Single-Equation Approach	37
4.2.2	Systems of Demand Functions Derived from Directly Specified Utility Function	38
4.2.3	Formulation of Directly Specified Demand Functions	39
4.2.4	Derivation of Demand Functions Using Locally Flexible Functional Forms	39
4.2.5	Demand Functions Derived from Globally Flexible Functional Forms	40
4.3	System of Demand Equations Estimation	40
4.4	The Rotterdam Model	42
4.5	The Almost Ideal Demand System	44
4.6	The Linear Approximate AIDS	47
4.7	Comparison of RM with AIDS	47
4.8	Alternative Differential Demand Systems	49
4.9	Generalization of AIDS Demand Systems	49
	Problems	51
	References	52
5	Consumer Demand—Empirical Analysis II	55
5.1	Introduction	55
5.2	Application to U.S. Meat Demand	55
5.2.1	Development of Data Set Based on USDA Disappearance Data	56
5.2.2	Application to Absolute Price Version of Rotterdam Model	56
5.2.3	Application to LA/AIDS and AIDS Models	60

5.2.4	Unconditional Demand Elasticities from Rotterdam Model	63
5.3	Imposing Negative Semi-Definiteness	72
5.4	Other Data Sets	74
	Problems	76
	References	76
6	Quality, Heterogeneous Goods, and Cross-Section Demand	79
6.1	Introduction	79
6.2	Unit Values, Prices, and Quality	79
6.2.1	Problem of Average Prices Varying Across Households	79
6.2.2	Income and Price Elasticities of Quality	80
6.3	Cox and Wohlgenant Approach to Modeling Unit Values	81
6.4	Deaton Approach to Unit Values in Estimating Demand Functions	84
6.5	Theil-Clement Approach to Quality Measurement	86
6.6	Modeling Systems of Demand Functions for Heterogeneous Goods	87
6.6.1	Multi-Stage Budgeting Approaches to Quality	87
6.6.2	Nested Logit Framework Approach to Modeling Heterogeneous Goods	89
6.6.3	Hedonic Metric Approach to Estimating Differentiated Demand Functions	90
6.7	Specifying and Estimating Systems of Demand Functions with Panel Data	91
6.7.1	Structure of Panel Data Models	91
6.7.2	Demographic Variables	92
6.7.3	Modeling Higher Order Engel Curves	93
6.8	Systems of Demand Functions with Missing Observations	93
6.8.1	Missing Values on Exogenous Variables	93
6.8.2	Missing Values on Dependent Variable	93
6.8.3	Tobit Model	94
6.8.4	An Alternative Two-Stage Approach	95
6.8.5	Problem of Missing Prices and Amemyia Principle	95
6.8.6	Stone–Lewbel Prices	97
6.9	An Alternative Approach Based on Pseudo-Panel Data	97
	Problems	98
	References	98
7	Derived Demand, Marketing Margins, and Relationship Between Output and Raw Material Prices	101
7.1	Introduction	101
7.2	Historical Approaches to Modeling Derived Demand for Raw Materials	103

7.2.1	Price Spread Relationships with Quantity/Price	103
7.2.2	Derived Demand Elasticities as Products Between Elasticities of Price Transmission and Retail Demand Elasticities	104
7.2.3	Derived Demand Elasticities Constrained to Be Less Than Retail Demand Elasticities	105
7.3	Gardner Model of Retail and Farm Price Relationships	105
7.3.1	Long-Run Competitive Model with Variable Proportions Production Function	105
7.3.2	Comparative Statics of Retail-to-Farm Price Ratio	106
7.3.3	Comparative Statics of Farm Value Share	108
7.3.4	Biased Estimates of Markup Price Equation	109
7.3.5	Derived Demand Elasticities not Proportional to Retail Demand Elasticities	110
7.4	Empirical Analysis: The Wohlgenant Model of Retail-to-Farm Price Linkages	111
7.4.1	Importance of Input Substitutability in Food Industry	111
7.4.2	No Direct Estimates of Food Consumption by Commodity	111
7.4.3	Reduced-Form Model of Retail and Farm Prices	112
7.4.4	Comparative Statics of Reduced Form	113
7.4.5	Relationship of Reduced Form to Structure	115
7.4.6	Empirical Specification	116
7.5	Empirical Application to US Retail-to-Farm Price Linkages of Meats	118
7.5.1	Data Set Consistent with Data Set for Consumer Demand for Meats	118
7.5.2	Weights in Retail Demand Index	120
7.5.3	Testing Zero Homogeneity Condition	121
7.5.4	Model Estimation with Symmetry Restriction	121
7.5.5	Model Estimation with CRTS Restriction	124
7.5.6	Sensitivity of Results to Specification of Retail Demand Index	128
7.5.7	Results for Retail-to-Farm Price Linkage Equations	130
	Appendix: Input Substitution and Output Demand Uncertainty	131
	References	134
8	Retail-to-Farm Demand Linkages, Imperfect Competition, and Short-Run Price Determination	137
8.1	Introduction	137
8.2	Generalized Derived Demand Relationships	137
8.2.1	Properties of System of Derived Demand Functions	139

8.2.2	Total Demand Elasticities for Retail-to-Farm Demand Linkages for Meats	141
8.3	Imperfect Competition and Market Intermediaries	143
8.3.1	Review of Different Models	143
8.3.2	Implications for Reduced-Form Retail and Farm Price Models	146
8.4	Short-Run Lags in Price Determination	148
8.4.1	Causes of Lags Between Retail and Farm Prices	148
8.4.2	Model of Short-Run Price Determination with Inventory Behavior	149
8.4.3	Empirical Application to the US Beef Short-Run Farm-to-Retail Price Spreads	152
8.4.4	Asymmetry in Price Changes	159
	Appendix: Derivation of Inventory Cost Function	160
	References	163
9	Dynamic Consumer Demand	165
9.1	Introduction	165
9.2	History of Empirical Models of Dynamic Consumer Demand	166
9.2.1	Geometric Distribution	166
9.2.2	Partial Adjustment Model	167
9.2.3	State Adjustment Model	167
9.3	Dynamic Models with Theoretical Foundations: Myopic Behavior	169
9.3.1	Dynamic Additive Quadratic Demand Model and Dynamic Linear Expenditure System	170
9.3.2	Dynamic Models for Estimating Disaggregated Commodities	171
9.4	Dynamic Models with Theoretical Foundations: Intertemporal Behavior	171
9.4.1	Rational Addiction Model	172
9.4.2	Multivariate Rational Addiction (MRA) Model	173
	9.4.2.1 First-Order Conditions	174
	9.4.2.2 Euler Equations	174
	9.4.2.3 Theorem: Closed-Form Solution to Matrix Difference Equation	175
	9.4.2.4 Formulas for Elasticities	175
9.5	Simple Non-Additive Preferences and Other Modeling Approaches	176
9.5.1	SNAP Model	176
9.5.2	Spinnewyn Model	178
9.5.3	Meghir and Weber Short Memory Model	179
9.6	Empirical Application to Dynamic Demand for US Alcohol	180
9.6.1	Application of MRA Model to Alcohol Demand	180

9.6.1.1	GMM Results	183
Appendix:	Proof of Theorem 4	186
