# Contents

<i>Preface</i>	v
<i>About the Authors</i>	vii
<b>Chapter 1. What is Economics?</b>	<b>1</b>
General Overview . . . . .	1
Major Areas of Economics . . . . .	2
Economic Research in Agricultural and Natural Resources . .	4
Biology and Economics . . . . .	5
Economics in the Policy Process . . . . .	7
The Economics Profession . . . . .	9
Subdisciplines of Environmental and Resource Economics . .	9
<b>Chapter 2. Markets and Welfare</b>	<b>13</b>
Part 1: When is a Market Socially Optimal? . . . . .	13
Potential Reasons for Government Intervention in the Market . . . . .	14
Government Policies to Disseminate Information . . . . .	15
Externalities . . . . .	16
Public Goods . . . . .	16
Transfer Policies . . . . .	17

Part 2: Welfare . . . . .	18
Welfare under Monopoly . . . . .	19
Welfare under Monopsony . . . . .	23
Welfare under Middlemen . . . . .	25
<b>Chapter 3. Externalities and Policy</b>	<b>27</b>
Overview of Externalities . . . . .	27
Production Externalities . . . . .	28
Policy 1: Externality Tax (Pollution Tax) or Output Tax . . . . .	33
Policy 2: Output-Reduction Subsidy . . . . .	35
Policy 3: Standards on Pollution or Output . . . . .	36
Elasticity Effects on the Magnitude of Externalities . . . . .	37
Imperfect Competition and Externality Policy . . . . .	38
Production externalities: An example . . . . .	40
Consumption Externalities . . . . .	42
Example: Externalities from Cigarette Smoking . . . . .	44
Health costs associated with smoking . . . . .	44
Example: The Economics of Illicit Drugs . . . . .	45
Positive Externalities . . . . .	47
<b>Chapter 4. Pollution Control under Heterogeneity</b>	<b>51</b>
Polluter Heterogeneity and Markets for Pollution . . . . .	51
The Benefits of Pollution Trading . . . . .	55
Problems Associated with Pollution Permit Markets . . . . .	55
Choice of Pollution Taxes or Standards . . . . .	56
Uncertainty and Policy Choices . . . . .	60
Components of Externality Policy . . . . .	65
Technology Diffusion . . . . .	67
<b>Chapter 5. Property Rights and Political Economy</b>	<b>69</b>
General Overview . . . . .	69
Legal Aspects of Environmental Policy and Coase Theorem . . . . .	70
The Coase Theorem Depends on Bribery . . . . .	70
Uncertainty Regarding Environmental Benefits and Costs . . . . .	73

Determination of Property Rights Allocation . . . . .	74
A Comparison of Alternate Legal Arrangements . . . . .	75
Economics of Environmental Restoration . . . . .	78
Limited Information and Second-Best Policy . . . . .	79
Political Economy and Externality Policy . . . . .	82
<b>Chapter 6. Introduction to Public Goods</b>	<b>87</b>
General Overview . . . . .	87
Heterogeneity, Non-Rivalry and Market Failure . . . . .	90
Non-Excludability and Market Failure . . . . .	91
Optimal Provision with Homogenous Individuals . . . . .	93
Private Market Outcome for a Non-Excludable Public Good	94
Other Mechanisms for Providing the Socially Optimal Level	
of Public Goods . . . . .	95
The Specification of Congestion Costs in Public	
Goods Models . . . . .	96
<b>Chapter 7. Advanced Applications of</b>	
<b>Public Goods</b>	<b>99</b>
Excludable Public Goods . . . . .	99
Heterogeneous Demand for a Public Good . . . . .	103
The Case of Increasing Marginal Costs . . . . .	106
Public Goods, Environmental Amenities and Non-Use	
Benefits . . . . .	110
Heterogeneous Demand for a Public Good: An Example . . .	111
Example: Lower Marginal Cost of Provision . . . . .	114
<b>Chapter 8. Technological Change and Pollution</b>	
<b>Control</b>	<b>119</b>
Production Function and Technology . . . . .	119
Research . . . . .	121
Adoption of Innovations . . . . .	122
Adoption Choices of Conservation Technology . . . . .	123
Costs to Adoption . . . . .	125
Pollution Tax Considerations . . . . .	130
Second Best Policies . . . . .	133

<b>Chapter 9. Valuation of Environmental Benefits</b>	<b>135</b>
General Overview . . . . .	135
Types of Benefits . . . . .	137
Concepts in Benefits Measurement . . . . .	139
Uncertainty, Expected Benefits and Risk Aversion . . . . .	139
Methodologies for Benefits Valuation . . . . .	141
<b>Chapter 10. Natural Resource Economics</b>	<b>147</b>
General Overview . . . . .	147
Key Element of Dynamics: Interest Rate . . . . .	147
The Components of Interest Rates . . . . .	151
Discounting . . . . .	152
Uncertainty and Interest Rates . . . . .	155
Benefit–Cost Analysis . . . . .	158
<b>Chapter 11. Non-Renewable Resources</b>	<b>161</b>
Background . . . . .	161
Constrained Optimization . . . . .	161
Intertemporal Resource Extraction: Two-Period Model . . . . .	164
Decision-Making in Continuous Time . . . . .	165
Non-Renewable and Renewable Perspectives on Energy Resources . . . . .	168
<b>Chapter 12. Renewable Resources and Fisheries</b>	<b>173</b>
Background . . . . .	173
Renewable Stock and Flow Dynamics . . . . .	173
Population Interaction and Dynamics . . . . .	182
Notes on the Future of Fisheries . . . . .	186
<b>Chapter 13. Forests</b>	<b>195</b>
State of the World's Forests . . . . .	195
Economics of Forest Resource Management . . . . .	198
Discrete vs. Continuous Discounting . . . . .	199
Single-Harvest Rotation . . . . .	199
The Faustmann Model: An Infinite-Planning Horizon . . . . .	203
Other Perspectives on Forest Resources . . . . .	205

<b>Chapter 14. Economics of Water</b>	<b>209</b>
General Overview . . . . .	209
Introduction to Groundwater Management . . . . .	211
Water Institutions . . . . .	213
Water Projects and Benefit–Cost Analysis . . . . .	214
Water Pricing . . . . .	215
Allocation, Water Rights and Trading . . . . .	219
Conclusion . . . . .	221
<b>Chapter 15. Introduction to Issues in           Environmental Economics</b>	<b>223</b>
Environmental Economics as an International Issue . . . . .	223
The Environment and Human Well-Being . . . . .	230
Sustainability . . . . .	231
A Modern Approach to Environmental Projects . . . . .	231
<b>Chapter 16. The Economics of Pest Control</b>	<b>233</b>
General Overview . . . . .	233
A Brief History of Pesticide Use . . . . .	234
Pesticides in a Damage Control Framework . . . . .	235
Pesticide Resistance . . . . .	238
Unknown Pest Populations and Pest Population Monitoring . . . . .	238
Regional Cooperation in Pest Control Activities . . . . .	240
Health-Risk and Environmental Effects of Pesticide Use . . . . .	241
Pesticide Policy . . . . .	244
Pesticide-Use Strategies . . . . .	246
Pesticides in Developing Countries . . . . .	247
Pesticides Regulations and Policies . . . . .	248
Major Issues of Debate . . . . .	249
<b>Chapter 17. Economic Development and           Climate Change</b>	<b>253</b>
How Much Trouble Are We In? . . . . .	253
How Did We Get Here? . . . . .	264
The Challenge of Climate-Equity . . . . .	266
Mitigation — How Can We Limit Climate Change? . . . . .	267

Adaptation — How Can We Live with Climate Change? . . . . .	273
Climate Change and Disaster Risk Management (DRM) . . . . .	281
Migration: For Better or Worse . . . . .	283
Notes on Climate Change and Agriculture . . . . .	287
Conclusion . . . . .	290
<b>Chapter 18. Biodiversity, Biotechnology, and Intellectual Property Rights</b>	<b>291</b>
Public Goods . . . . .	291
Global Public Goods . . . . .	293
Knowledge as a Public Good . . . . .	294
The Innovation Process . . . . .	295
Alternative Forms of Intellectual Property Rights . . . . .	295
Technology Transfer from the Public to the Private Sector . . . . .	296
Neglected Crops and Orphan Drugs . . . . .	297
Strategies to Provide Orphan Drugs and Address Neglected Diseases . . . . .	299
Public Institutions of Intellectual Property Rights in the Developing World . . . . .	300
<b>Chapter 19. Environmental Services</b>	<b>303</b>
Categories of Environmental Services . . . . .	303
Targeting and Policy Design . . . . .	304
Organizational Structure and Environmental Services . . . . .	305
Environmental Services can be Multi-Objective . . . . .	306
Political Economic Considerations . . . . .	308
Information Considerations . . . . .	309
Inhabitants' Rights . . . . .	310
<b>Chapter 20. Introduction to Supply Chains</b>	<b>313</b>
Two-Stage Supply Chain: Examining an Agricultural Product . . . . .	314
The Optimization Problem . . . . .	315
<b>Chapter 21. Sustainable Development and the Bioeconomy</b>	<b>319</b>
General Overview . . . . .	319
Introduction to Sustainable Development . . . . .	319

Economic Growth and Sustainable Development . . . . .	321
The Main Strategies to Attain Sustainable Development . . .	325
The Bioeconomy . . . . .	327
<b>Chapter 22. Political Economy and Behavioral Considerations</b>	<b>331</b>
General Overview . . . . .	331
Political Economy . . . . .	332
Behavioral Considerations . . . . .	335
<i>Appendix: Additional Practice Exercises</i>	341
<i>Index</i>	369
