STATISTICS;  
An Introductory  
Analysis \_\_\_\_\_

**A HARPER INTERNATIONAL EDITION**

*jointly published by*

HARPER & ROW, NEW YORK, EVANSTON & LONDON  
AND JOHN WEATHERHILL, INC., TOKYO

# CONTENTS

<b>Preface: Note on Uses and Organization</b>	<b>xv</b>
<b>Preface to the Second Edition</b>	<b>xvii</b>
<b>Acknowledgments</b>	<b>xix</b>
<b>1. Introduction</b>	<b>1</b>
1.1. Statistical Techniques	2
1.2. Statistical Tables	3
1.3. Graphic Presentation	5
<b>2. Frequency Distribution</b>	<b>6</b>
2.1. The Concept of a Variable	6
2.2. Frequency Distribution	10
2.3. Graphic Presentation	14
2.4. Cumulative Frequency Distribution	20
2.5. Relative Frequencies	29
<b>3. Measures of Location</b>	<b>35</b>
3.1. The Arithmetic Mean	37
3.2. The Median	47
3.3. The Mode	51
3.4. Comparison of the Mean, Median, and Mode	53
3.5. The Geometric Mean	54

<b>4. Measures of Dispersion</b>	<b>59</b>
4.1. The Range	59
4.2. Mean Deviations	60
4.3. The Standard Deviation	61
4.4. Relative Dispersion (Coefficient of Variation)	75
<b>5. Probability Theory</b>	<b>78</b>
5.1. Preliminary Ideas	79
5.2. The Objective Approach to Probability	86
5.3. The Subjective Approach	94
5.4. Postulates of Probability Theory	96
5.5. Conditional Probabilities	99
5.6. A Rule for Multiplication of Probabilities	105
5.7. Statistical Independence	107
5.8. Mathematical Expectation and Random Variable	110
5.9. Summary	112
<b>6. The Normal Curve and Normal Area Table</b>	<b>113</b>
6.1. Introduction	113
6.2. Heuristic Explanation of the Normal Curve and Normal Area Table	115
6.3. Discussion of the Normal Distribution	122
6.4. Continuity Correction	124
6.5. Ordinate of the Normal Distribution	126
<b>7. Sampling Distribution</b>	<b>129</b>
7.1. All Possible Samples	129
7.2. Simple Random Sampling	133
7.3. Some Practical Problems	138
7.4. Sampling Distribution	139
7.5. Comments on the Standard Error Formula	161
7.6. The Sampling Distribution of the Sample Proportion	162
<b>8. Testing Hypotheses</b>	<b>168</b>
8.1. Introduction of New Terminology	168
8.2. Type I and Type II Errors	172
8.3. Testing Hypotheses	174
8.4. Simple Decision Problems	188

8.5. Examples Using the Sample Mean	204
8.6. Decision Rules Concerning Proportions	215
8.7. Changing the Sample Size	222
8.8. Calculations of the Decision Rule when $\beta$ is Given	224
<b>9. Decision Theory</b>	<b>227</b>
9.1. Introduction—Payoff Table	228
9.2. Expected Values of an Act	232
<b>10. Estimation</b>	<b>237</b>
10.1. Introduction—Estimation and Estimators	237
10.2. Unbiasedness	240
10.3. Consistent Estimator	241
10.4. Efficiency	242
10.5. Sufficiency	244
10.6. Method of Maximum Likelihood (ML)	245
10.7. The Relationship among the Error, Risk, and Sample Size	251
10.8. Interval Estimation	259
<b>11. Index Numbers</b>	<b>265</b>
11.1. Weighted Relative Price Index	265
11.2. Weighted Aggregative Price Index	273
11.3. Variations of the Weighted Price Indices	275
11.4. Chain Index Numbers	281
11.5. Splicing and Shifting the Base of Index Numbers	286
11.6. Deflating Prices and Income	294
11.7. Comments on Price Indices	297
11.8. Quantity Index Numbers	304
<b>12. Time Series—Trend Line</b>	<b>330</b>
12.1. Review	330
12.2. Introduction	332
12.3. The Freehand Method	334
12.4. Method of Semiaverages	336
12.5. The Method of Moving Averages	337
12.6. The Method of Least Squares	339
12.7. Changing the Unit Value and Shifting the Origin	345

<b>13. Seasonal and Cyclical Movement</b>	<b>350</b>
13.1. Definitions of Terms	350
13.2. Seasonal Variation	353
13.3. The Method of Simple Averages	354
13.4. Ratio-to-Moving Average Method	357
13.5. Seasonally Adjusted Data	360
13.6. Cyclical Fluctuations	362
13.7. Comments on Time Series	363
<b>14. Linear Regression Analysis</b>	<b>368</b>
14.1. Introduction	368
14.2. The Regression Problem	369
14.3. Estimation of $A$ and $B$ —Type I Population Case	379
14.4. Finding a Regression Function	384
14.5. Sample Standard Deviation (Standard Error of Estimate)	389
14.6. Interpretation of $\sigma_{YX}^2$ and the Coefficient of Determination $r^2$	391
14.7. Estimating $\sigma_a^2$ and $\sigma_b^2$	405
14.8. Summary	411
14.9. Estimating $A$ and $B$ —Type II Population	412
14.10. Tests Concerning $a$ and $b$	415
14.11. Confidence Interval for $\sigma_{YX}$	419
14.12. Confidence Interval for $Y$	425
14.13. Comments on Regression Analysis	428
<b>15. Correlation Analysis</b>	<b>431</b>
15.1. The Bivariate Distribution	432
15.2. Correlation Coefficient: Case I	435
15.3. The Bivariate Distribution and Regression Analysis	445
15.4. The Correlation Coefficient: Case II	447
15.5. Comments and Summary	457
15.6. Tests of Hypothesis Concerning Correlation Coefficients	462
15.7. Rank Correlation	467
<b>16. Random Variables and Probability Distributions</b>	<b>473</b>
16.1. Sets	473
16.2. Sample Space	476
16.3. Axioms	478

16.4. Random Variable	479
16.5. Conditional Probability	488
<b>17. The <math>t</math> Distribution</b>	<b>502</b>
17.1. Expected Value of Sample Variance	503
17.2. Pooled Variance	504
17.3. Degrees of Freedom	505
17.4. The $t$ Distribution	507
17.5. Examples	511
17.6. Tests Concerning the Difference of Two Means	514
17.7. Confidence Intervals for a Mean	524
17.8. Confidence Interval for the Difference Between Means from Two Populations when the Standard Deviations Are Known	527
17.9. Confidence Interval for the Difference Between Means from Two Normal Populations when the Standard Deviations Are Unknown	528
<b>18. The Binomial Distribution</b>	<b>531</b>
18.1. Bernoulli Trials	531
18.2. A Geometrical Interpretation	533
18.3. Finding the Binomial Distribution	535
18.4. Tables of the Binomial Probability Distribution	537
18.5. The Sampling Distribution of the Sample Proportion $p$	541
18.6. Tests of Hypotheses, Using the Binomial Distribution	550
18.7. Calculation of the $OC$ Curve	557
18.8. Estimators of $\pi$ and $\sigma_p$	562
18.9. The Normal Distribution as an Approximation of the Binomial Distribution	567
18.10. Confidence Interval	572
18.11. Determining the Sample Size $n$ by Use of a Confidence Interval	579
18.12. Comparison of Two Percentages	584
<b>19. The Poisson Distribution</b>	<b>588</b>
19.1. The Poisson Distribution as the Limit of the Binomial Distribution	589
19.2. The Poisson Process	594

19.3. Finding the Poisson Distribution	595
19.4. Estimation of $\lambda$ and Applications	599
19.5. The Multinomial Distribution	606
19.6. The Hypergeometric Distribution	611
<b>20. The Chi-Square Distribution</b>	<b>613</b>
20.1. $\chi^2$ Distribution and Its Properties	614
20.2. K. Pearson's Approximation	616
20.3. The Goodness-of-Fit Test	617
20.4. Tests of Independence: Contingency Tables	625
20.5. Test of Homogeneity	636
20.6. Confidence Interval for $\sigma^2$	640
<b>21. The <math>F</math> Distribution</b>	<b>642</b>
21.1. The $F$ Distribution	642
21.2. The $F$ Table	645
21.3. Testing the Equality of Variances	651
21.4. Other Tests Using the $F$ Distribution	655
21.5. Analysis of Variance	664
21.6. Fixed Effects, Completely Randomized, 1-Way Classification Model	677
21.7. Fixed Effects, Randomized Block, 1-Way Classification Model	695
21.8. Fixed Effects, Completely Randomized, 2-Way Classification, 1 Observation Per Cell Model	711
21.9. Fixed Effects, Completely Randomized, 2-Way Classification, $n$ Observations Per Cell Model	716
21.10. Fixed Effects, Randomized Blocks, 2-Way Classification, $n$ Observations Per Cell	725
21.11. Random Effects, Completely Randomized, 1-Way Classification Model	732
21.12. Random Effects, Randomized Blocks, 1-Way Classification Model	737
21.13. Random Effects, Completely Randomized, 2-Way Classification, 1 Observation Per Cell Model	741
21.14. Random Effects, Completely Randomized, 2-Way Classification, $n$ Observations Model	743
21.15. Random Effects, Randomized Blocks, 2-Way Classification, $n$ Observations Model	746

<b>22. Multiple Linear Regression</b>	<b>752</b>
22.1. Introduction	753
22.2. Estimation of Parameters	754
22.3. Estimating $\sigma^2$	757
22.4. Interpretation of the Regression Equation	760
22.5. The Coefficient of Multiple Determination	763
22.6. Partial Correlation	766
22.7. Gauss Multipliers	774
22.8. Example	781
22.9. Tests of Hypotheses of the Regression Coefficients	788
22.10. Summary	793
22.11. Regression Analysis and Analysis of Variance	796
22.12. Addition of Variables	806
22.13. The Durbin-Watson Test	809
22.14. Generalization of the Partial Correlation Coefficient	813
22.15. Graphic Correlation	823
22.16. Multiplicative Forms of Regression Functions	828
22.17. Appendix: Matrix Algebra	835
<b>23. Time Series (II)</b>	<b>845</b>
23.1. The Trend Line	845
23.2. The Moving Average	860
23.3. Tests of Independence	865
23.4. Stationary Time Series	869
<b>Tables</b>	<b>876</b>
<b>Index</b>	<b>915</b>
