# ESSAYS IN FINANCIAL ECONOMICS

by

YINQIU LU

A dissertation submitted to the Graduate Faculty in Economics  
in partial fulfillment of the requirements for the degree of  
Doctor of Philosophy, The City University of New York

2005

## TABLE OF CONTENTS

Acknowledgements . . . . .	vi
Table of Contents . . . . .	viii
List of Tables . . . . .	xi
List of Figures . . . . .	xii
<b>I Essay 1: Convexity Adjustment and LIBOR Market Model, Case of Constant Maturity Swap</b>	<b>1</b>
1.1 Introduction . . . . .	2
1.2 Framework . . . . .	3
1.3 Pricing Convex Interest Rate Instruments . . . . .	6
1.3.1 Market convention: the convexity adjustment . . . . .	7
1.3.2 Market procedure: the LIBOR market model . . . . .	11
1.4 Results . . . . .	16
1.4.1 Convexity adjustment and yield curve slope . . . . .	16
1.4.2 Other results . . . . .	17
1.5 Conclusion . . . . .	18
<b>Appendix</b>	<b>25</b>
<b>II Essay 2: Pricing Contingent Credit Lines with Application to Argentina, Brazil and Mexico</b>	<b>27</b>
2.1 Introduction . . . . .	28
2.2 CCL Structure . . . . .	30
2.2.1 Fee structure . . . . .	30

2.2.2	A simplified CCL contract . . . . .	30
2.2.3	Payment in a CCL contract . . . . .	32
2.3	Modelling CCL as a Credit Derivative with Reverse Knock-out Characteristic . . . . .	33
2.3.1	The model . . . . .	35
2.3.2	Application to CCL contract . . . . .	38
2.4	Data . . . . .	39
2.5	Parameter Calculation and Simulation Results . . . . .	39
2.5.1	Parameter calculation . . . . .	39
2.5.2	Simulation results . . . . .	40
2.6	Conclusion . . . . .	42

### **III Essay 3: Forecasting Stock Market Volatility: The Empirical Performance of the SGED-GARCH, Implied, and Realized Volatility Models** **49**

3.1	Introduction . . . . .	50
3.2	Alternative Volatility Models . . . . .	55
3.2.1	Realized volatility . . . . .	55
3.2.2	Implied volatility . . . . .	56
3.2.3	SGED-GARCH models . . . . .	57
3.2.4	Fitted volatility . . . . .	61
3.3	Data . . . . .	62
3.4	Empirical Results . . . . .	65
3.4.1	Estimation results and model comparisons . . . . .	65
3.4.2	Comparing in-sample forecasting performance . . . . .	68

3.4.3	Out-of-sample performance of alternative volatility models . . . . .	73
3.5	Conclusion . . . . .	75
	<b>Bibliography</b>	<b>84</b>
