1 Introduction 1
Pauline Barrieu and Luca Albertini

PART I NON-LIFE SECURITISATION 7

2 Non-life Insurance Securitisation: Market Overview, Background and Evolution 9
Jonathan Spry
2.1 Market overview 9
2.2 Market dynamics 14
2.3 The question of basis risk remains 16
2.4 ILS and the credit crunch 18

3 Cedants’ Perspectives on Non-life Securitization 19
3A Insurance-linked securities as part of advanced risk intermediation 21
Insa Adena, Katharina Hartwig and Georg Rindermann
3A.1 Motivation for Allianz to take part in ILS activities 21
3A.2 Objectives of insurance companies 23
3A.3 Case study: Blue Fin Ltd 24
References 28
3B Reinsurance vs Securitisation 29
Guillaume Gorge
3B.1 Keeping risk vs transferring it 29
3B.2 Reinsurance vs securitisation 30
3B.3 Application to main P&C risks 31
3B.4 Case studies: AURA RE and SPARC 32
3B.5 Limits and success factors to securitisation 33
References 34
3C Securitisation as a diversification from traditional retrocession 35
Jean-Luc Besson
# 4 Choice of Triggers

*Dominik Hagedorn, Christian Heigl, Andreas Müller and Gerold Seidler*

- 4.1 General aspects
- 4.2 Indemnity triggers
  - 4.2.1 Scope of coverage
  - 4.2.2 Payout timing
  - 4.2.3 Loss verification
  - 4.2.4 Transparency
- 4.3 Non-indemnity triggers
  - 4.3.1 Parametric triggers (pure and index)
  - 4.3.2 Industry loss triggers
  - 4.3.3 Modelled loss triggers
- 4.4 Choosing the optimal trigger
  - 4.4.1 Comparison of trigger types
  - 4.4.2 Choice of trigger and alternative solutions

# 5 Basis Risk from the Cedant’s Perspective

*David Ross and Jillian Williams*

- 5.1 Introduction
- 5.2 Investor vs sponsor risk
- 5.3 Trigger types
- 5.4 Catastrophe models
  - 5.4.1 Key components of catastrophe models
  - 5.4.2 Uncertainty
- 5.5 Sources of basis risk
  - 5.5.1 Source 1: Catastrophe model error/shortcomings
  - 5.5.2 Source 2: Discrepancy between the modelled index loss and the modelled company loss
  - 5.5.3 Source 3: Dynamic basis risk
- 5.6 Defining basis risk
- 5.7 Quantifying basis risk
  - 5.7.1 Measures for pro rata hedges
  - 5.7.2 Measures for digital hedges
  - 5.7.3 Measuring positive basis risk
- 5.8 Minimising basis risk
  - 5.8.1 Over-hedging
  - 5.8.2 Choice of index
  - 5.8.3 Reset clauses
  - 5.8.4 Cat model input
- 5.9 Conclusion

# 6 Rating Methodology

*Cameron Heath*

- 6.1 Standard & Poor’s ratings services’ rating process
  - 6.1.1 Initial interaction
  - 6.1.2 Risk analysis
## Contents

6.1.3 Documentation review 67  
6.1.4 Transaction closing 67  
6.1.5 Surveillance 67  

6.2 Risk analysis 68  
6.2.1 Trigger options 68  
6.2.2 Indemnity vs non-indemnity triggers 68  
6.2.3 Risk factors 70  
6.2.4 Adjusted probability of default 72  
6.2.5 Application of methodology 73  
6.2.6 Default table 74  
6.2.7 Multi-event criteria 74  

6.3 Legal and swap documentation review process 75  
6.3.1 Insurance focus points 75  
6.3.2 Legal and structural focus points 75  

6.4 Impact on sponsor 75  
6.4.1 Capital model treatment of ILS 75  
6.4.2 Summary of basis risk analysis 76  
6.4.3 Sources of basis risk 77  
6.4.4 Link to ILS revised probability of attachment 82  

References 82  

7 Risk Modelling and the Role and Benefits of Cat Indices 83  
*Ben Brookes*  

7.1 Components of a cat model 84  
7.2 Insurance-linked securities 84  
7.2.1 General overview 84  
7.2.2 Insurance-linked security triggers 85  
7.2.3 Basis risk 90  

7.3 Cat indices 93  
7.3.1 Property Claims Service (PCS) 93  
7.3.2 Re-Ex – NYMEX 93  
7.3.3 Insurance Futures Exchange Service (IFEX) 94  
7.3.4 Carvill Hurricane Index (CHI) – Chicago Mercantile Exchange (CME) 94  
7.3.5 Paradex 95  

7.4 Summary 99  

8 Legal Issues 101  
*Malcolm Wattman, Matthew Feig, James Langston, and James Frazier*  

8.1 The note offering – federal securities law implications 101  
8.1.1 The distribution of the notes 101  
8.1.2 Application of the anti-fraud provisions of the federal securities laws 102  
8.1.3 Securities offering reform 103  
8.1.4 Provision of information 103  
8.1.5 The Investment Company Act of 1940 104  

8.2 The note offering – the offering circular 104  
8.2.1 Important terms 104  
8.2.2 ERISA considerations 106
8.2.3 Other considerations regarding the proceeds and payment of interest
8.2.4 The risk analysis
8.2.5 Opinions
8.3 Types of transactions
8.3.1 Parametric, index and modeled loss transactions
8.3.2 Indemnity transactions
8.4 Conclusion

9 The Investor Perspective (Non-Life)
Luca Albertini
9.1 The creation of a sustainable and liquid market
9.1.1 Creation of common terminology
9.1.2 Risk analysis
9.1.3 Correlation with other investments in the portfolio
9.1.4 Relative value
9.1.5 Valuation and liquidity
9.2 Key transaction features from the investor perspective
9.2.1 Assessment of the underlying risks being securitised
9.2.2 Risk assessment of the instrument
9.2.3 Pricing and risk-return profile
9.3 Market evolution: the investor perspective
9.3.1 Collateral arrangements
9.3.2 Data transparency
9.3.3 Exposure monitoring
9.3.4 Modelling rigour

10 ILS Portfolio Monitoring Systems
Tibor Winkler and John Stroughair
10.1 Introduction
10.1.1 Completing the circle
10.1.2 ‘Square peg in a round hole?’
10.2 Miu – An ILS platform in a convergent space
10.2.1 Overview
10.2.2 Nuts and bolts – how the platform works
10.2.3 Step by step – entering a contract
10.2.4 Portfolio analysis
10.3 RMS library of cat bond characterisations
10.3.1 Motivation and objectives
10.3.2 How is it done? A bird’s eye view
10.3.3 Apples to apples – a leap for the market
10.4 Conclusion

11 The Evolution and Future of Reinsurance Sidecars
Douglas J. Lambert and Kenneth R. Pierce
11.1 A brief history of the brief history of sidecars
11.2 Sidecar structures
11.2.1 Basic structure
11.2.2 Market-facing sidecar

15 Cedants’ Perspectives on Life Securitisation 189
15A A cedant’s perspective on life securitisation 191
   Alison McKie
   15A.1 Why securitise? 191
   15A.2 Life ILS can be complex 194
   15A.3 Outlook for life ILS 198
15B A cedant’s perspective on life securitisation 199
   Chris Madsen
   15B.1 Key considerations 199
   15B.2 Examples of securitisation opportunities 202
   15B.3 Differences between securitisation and reinsurance 205

16 Rating Methodology 207
   Harish Gohil
   16.1 Fitch’s approach to the rating process 207
   16.2 Insurance risk analysis 208
      16.2.1 Risk modelling 208
      16.2.2 Ratings benchmarks 209
      16.2.3 Analysis of sponsor and other counterparties 210
      16.2.4 Surveillance 210
   16.3 Zest: a VIF case study 211
   References 212

17 Life Securitisation: Risk Modelling 213
   Steven Schreiber
   17.1 Modelling of a catastrophic mortality transaction 213
   17.2 Modelling of a VIF transaction 216

18 Life Insurance Securitisation: Legal Issues 219
   Jennifer Donohue
   18.1 Monetisation of future cash flows 219
      18.1.1 Some background on monetisation 219
      18.1.2 The market drivers of monetisation 220
      18.1.3 Monetisation in the current climate 221
      18.1.4 Some transaction structures 221
   18.2 Legal aspects of life insurance securitisation – some key features 222
      18.2.1 Closed book/open book 222
      18.2.2 Unit-linked policies – not ‘with profits’ policies 222
18.2.3 Risk transfer versus no transfer 222
18.2.4 Warranties 222
18.2.5 Monoline wrap (payment obligation) 223
18.2.6 Recharacterisation risk 223
18.3 Some examples of value-in-force securitisation/monetisation 225
18.3.1 A classical VIF structure: Gracechurch 225
18.3.2 A private but reported transaction: Zest 226
18.4 Outlook 227

19 The Investor Perspective (Life) 229
Luca Alberini
19.1 Life insurance-linked risks and investor appetite 229
19.1.1 The role of the monolines 229
19.1.2 Understanding the risk 230
19.1.3 Correlation with other investments 234
19.1.4 Relative value 236
19.1.5 Valuation and liquidity 237
19.2 Key transaction features from the investor perspective 237
19.2.1 Risk assessment of the instrument 237
19.2.2 Pricing and risk-return profile 240
19.3 Market evolution: the investor perspective 242

20 Longevity Securitisation: Specific Challenges and Transactions 245
Jennifer Donohue, Kirsty Maclean and Norman Peard
20.1 Mortality and longevity risk 245
20.2 A market for longevity risk 246
20.2.1 Potential sources of longevity risk for securitisation 246
20.2.2 Demand for longevity risk 247
20.3 Key structural aspects of longevity risk securitisation 248
20.3.1 Isolating longevity risk 248
20.3.2 Analysis of longevity risks 249
20.3.3 Longevity risk – legal explanation 250
20.3.4 Examples and legal aspects of transaction structures 252
20.4 Some features of longevity risk 255
20.4.1 Model risk 255
20.4.2 Ratings 258
20.4.3 Pricing 258

21 Longevity Risk Transfer: Indices and Capital Market Solutions 261
Guy Coughlan
21.1 The nature of longevity risk 262
21.2 The market for longevity risk transfer 263
21.2.1 Hedgers 263
21.2.2 Investors 265
21.2.3 Intermediaries 265
21.3 Importance of indices, tools and standards 266
21.3.1 Longevity indices 266
21.3.2 Trading and liquidity 268
21.4 Capital market instruments for longevity risk transfer 268
   21.4.1 Longevity bond 268
   21.4.2 Survivor swap 269
   21.4.3 q-forward 269
   21.4.4 Survivor forward 271
   21.4.5 Instruments and liquidity 272
21.5 Customised vs standardised longevity hedges 273
   21.5.1 Customised longevity hedge 273
   21.5.2 Standardised index-based longevity hedge 273
   21.5.3 Advantages and disadvantages 274
21.6 Case study: customised longevity hedge 274
21.7 Implementing a standardised index-based longevity hedge 275
   21.7.1 Liability sensitivity and hedge calibration 276
   21.7.2 Hedge effectiveness analysis 278
21.8 Conclusions 280

23 Case Study: Some Embedded Value and XXX Securitisations 293
Michael Eakins and Nicola Dondi
23.1 Embedded value securitisation – Avondale S.A. 295
23.2 XXX securitisation 299

PART III TAX AND REGULATORY CONSIDERATIONS 305

24 The UK Taxation Treatment of Insurance-Linked Securities 307
Adam Blakemore and Oliver Iliffe
24.1 The Directive and the taxation of UK ISPVs 308
   24.1.1 The implementation of the Directive in the UK 308
   24.1.2 Implementation of the ISPV framework in the UK 308
   24.1.3 UK tax treatment of ISPVs 310
24.2 Non-UK insurance special purpose vehicles 315
   24.2.1 Tax residence status of the issuer 316
   24.2.2 Tax residence status of the issuer’s agents 317
   24.2.3 Location and management of the issuer’s assets 318

David S. Miller and Shlomo Boehm

25.1 Avoiding US corporate income tax for the issuer
   25.1.1 Overview
   25.1.2 Trade or business in the United States
   25.1.3 Procedures followed by catastrophe bond issuers to avoid substantive business activities in the United States
   25.1.4 Section 864(b)(2) safe harbor

25.2 Withholding tax and excise tax
   25.2.1 Overview
   25.2.2 Descriptions of insurance-linked instruments written on standard ISDA forms
   25.2.3 Federal income tax definition of notional principal contracts
   25.2.4 Put options
   25.2.5 The Bank of America case (income not clearly described within any other generally recognised category)

25.3 US federal income tax treatment of an investor in a catastrophe bond issuer: overview
   25.3.1 US investors
   25.3.2 Timing and character of income and gain of the issuer with respect to the permitted investments, the total return swap and the insurance-linked instrument
   25.3.3 Foreign investors
   25.3.4 Notes that are treated as indebtedness for federal income tax purposes
