Johann Heinrich von Thünen's Contribution to Forestry Economics: A Brief Introduction to Part III of the Isolated State, by Ulrich van Suntum xvi

Section One 1

§ 1. Timber yield 1
§ 2. Timber value 2
§ 3. The determination of the value of pinewood stock of a given age 5
§ 4. The determination of the value of timber stocks of differing rotation periods 7
§ 5. The rent of the woodland soil 9
§ 6. Calculations related to the rotation period 12
§ 7. Thinning out 18
§ 8. The rent of woodland in comparison with ground rent 26
§ 9. Underwood or brushwood 29
§ 10. The influence of the yield in value of thinnings on the most advantageous rotation period and on ground rent 32
§ 11. The thinning methods employed by Chief Forester Nagel 34
§ 12. Ground rent and rotation period from pollination, if thinning removes half the wooded growth 39

§ 13. Comparison of the two methods, in which thinning removes 41
A. One-third of annual timber growth
B. Half of this growth
Concerning the part of the volume, which is captured by thinning 41
Concerning the rent of woodland 42
Concerning the ground rent 44
Concerning the rotation period 46

Section Two 48

§ 14. How great does the space around each tree need to be in relation to its diameter if the annual growth in value of the entire woodland is to achieve a maximum? 48
§ 15. The growth of individual trees in diameter and in physical volume 51
§ 16. Calculation of the portion of the growth to be removed in thinning 53
§ 17. Criticism 64
§ 18. Ground rent and the most advantageous rotation period, if only ⅓ of the growth is left in the remaining stock 74

Section Three 78

§ 19. What is the relationship between the growth of the tree and the space which each tree is given? 78
§ 20. Calculation of total growth 90
§ 21. Ground rent and most advantageous rotation period for different degrees of interval between trees 95
§ 22. What part of the timber reserve is at different ages removed in decennial thinnings? 100
§ 23. Deviation of the results of our calculation from reality 102

§ 24. Comparison of the ground rent of woodland with that of arable land 105
§ 25. Applications 110

Continuation 114

Epilogue: A Chronicle of Editing the *Isolated State* 134
