4. Kansei Engineering Procedures: Kansei Engineering Type II

4.1 Selecting Survey Target
4.2 Extracting Low-Level Kansei Words
4.3 Construction of Semantic Differential Scale (Part 1)
4.4 Primary Evaluation Experiment
4.5 Factor Analysis of Kansei Words
4.6 Extracting High-Level Kansei Words
4.7 Configuration of SD Scale (Part 2)
4.8 Secondary Evaluation Experiment
4.9 Preparation of Evaluation Samples
4.10 Extracting Item/Category
4.11 Statistical Analysis
  4.11.1 Factor Analysis of Kansei Words
  4.11.2 Analysis of SD Evaluation
  4.11.3 Multivariate Analysis
  4.11.4 How to Utilize Quantification Theory Type I
4.12 Creation of Databases
  4.12.1 Kansei Words Database
  4.12.2 Design Elements Database
  4.12.3 Rule Base
4.13 Artificial Intelligence (AI) Prototyping
4.14 Establishing an AI System

5. Kansei Engineering Type II Application Cases

5.1 HULIS
5.2 FAIMS
5.3 Entrance Door Kansei Engineering System
5.4 Kansei Engineering System for Car Interior

6. Hybrid Kansei Engineering

6.1 Forward Kansei Engineering and Backward Kansei Engineering
  6.1.1 Forward Kansei Engineering
    6.1.1.1 Consumer Product Selection
    6.1.1.2 Designer Product Development
  6.1.2 Backward Kansei Engineering
6.2 Hybrid Kansei Engineering
6.3 Backward Kansei Engineering with Template
  6.3.1 Image Recognition Procedure
  6.3.2 Backward Kansei Engineering System
  6.3.3 Actual Example of the Recognition Result
  6.3.4 The Future of Hybrid Kansei Engineering
Contents

7. Virtual Kansei Engineering: Kansei Engineering Type IV .............. 107
  7.1 What Is Virtual Reality? ........................................... 107
  7.2 Virtual Kansei Engineering ......................................... 108
  7.3 Custom Kitchen Kansei Engineering ............................... 109
     7.3.1 Computer Memory Content .................................... 109
     7.3.2 Selecting Kitchen Style ....................................... 109
     7.3.3 Virtual Reality .................................................. 110
  7.4 The Evolution of Virtual Kansei Engineering ....................... 110
     7.4.1 Fields Where Trial Products Are Either Expensive or Require a Long Design Time ......................... 111
     7.4.2 Customer Decision-Making ..................................... 111
     7.4.3 Education and Training ....................................... 112

8. Kansei Quality Management ............................................. 115
  8.1 What Is Kansei Quality Management? ............................... 115
  8.2 What Are the Aims of QC and TQC? ................................ 116
  8.3 Kansei Quality Management Thinking .............................. 118
  8.4 Kansei Quality Management Case Studies ......................... 119
     8.4.1 Kansei Quality Management for Restaurants ............... 119
     8.4.2 Quality Table for Hotels ..................................... 121
     8.4.3 Kansei at Ladies’ Wear Department ......................... 123
     8.4.4 Cash Register Work at Supermarket ......................... 125

Index .................................................................................. 135
