Editor

Stakeholders and Scientists

Achieving Implementable Solutions to Energy and Environmental Issues

Springer
Contents

1 Introduction: Stakeholders and Science ............................................. 1
   Joanna Burger

2 Minority Participation in Environmental and Energy Decision Making ............................................. 27
   James H. Johnson Jr.

3 Energy Diversity: Options and Stakeholders ............................................. 39
   Michael Gochfeld

4 How Clean Is Clean? Stakeholders and Consensus-Building at the Fernald Uranium Plant ............................................. 63
   Kenneth Morgan and Gary Stegner

5 Stakeholders, Risk from Mercury, and the Savannah River Site: Iterative and Inclusive Solutions to Deal with Risk from Fish Consumption ............................................. 89
   Joanna Burger

6 Helping Mother Earth Heal: Dine College and Enhanced Natural Attenuation Research at U. S. Department of Energy Uranium Processing Sites on Navajo Land ............................................. 119

7 Nez Perce Involvement with Solving Environmental Problems: History, Perspectives, Treaty Rights, and Obligations ............................................. 149
   Gabriel Bohnee, Jonathan Paul Matthews, Josiah Pinkham, Anthony Smith, and John Stanfill
8 Amchitka Island: Melding Science and Stakeholders to Achieve Solutions for a Former Department of Energy Site .......................... 185
Joanna Burger, Michael Gochfeld, Charles W. Powers, and David S. Kosson

9 Decommissioning of Nuclear Facilities and Stakeholder Concerns ........................................... 211
James H. Clarke, Joanna Burger, Charles W. Powers, and David S. Kosson

10 PSEG's Estuary Enhancement Program: An Innovative Solution to an Industry Problem .......................... 229
John H. Balletto and John M. Teal

11 Joint Fact Finding and Stakeholder Consensus Building at the Altamont Wind Resource Area in California ........................................ 255
Gina Bartlett

12 Wind Energy in Vermont: The Benefits and Limitations of Stakeholder Involvement ........................................... 283
Mary R. English

13 Hydropower, Salmon and the Penobscot River (Maine, USA): Pursuing Improved Environmental and Energy Outcomes Through Participatory Decision-Making and Basin-Scale Decision Context ........................................... 311
Jeffrey J. Opperman, Colin Apse, Fred Ayer, John Banks, Laura Rose Day, Joshua Royte, and John Seebach

14 Using Stakeholder Input to Develop a Comparative Risk Assessment for Wildlife from the Life Cycles of Six Electrical Generation Fuels ........................................... 337

15 Institutional Void and Stakeholder Leadership: Implementing Renewable Energy Standards in Minnesota .............. 367
Adam R. Fremeth and Alfred A. Marcus

16 Communicating Between the Public and Experts: Predictable Differences and Opportunities to Narrow Them .......... 393
Michael R. Greenberg and Lauren C. Babcock-Dunning
17 Media, Local Stakeholders, and Alternatives for Nuclear Waste and Energy Facilities ................................................. 409
Karen W. Lowrie, Amanda Kennedy, Jonathan Hubert, and Michael R. Greenberg

18 Science and Stakeholders: A Synthesis .................................................. 427
Joanna Burger

Index ................................................................................................................. 443
