Contents

<i>Preface</i>	vii
Chapter 1. The World of Energy 1: An Elementary Survey	1
1. Another Energy Message for the 21st Century	6
2. Some Aspects of the Future Supply of Oil	15
3. Deeper Thoughts than Usual about Nuclear Energy	29
4. Two (Nuclear) Hearts in Three-Quarter Time: Sweden and Italy	43
5. Natural Gas: In the Mood for Misunderstandings	53
6. Conclusions and Further Observations	73
7. Mathematical Appendix: Easy Topics Made Difficult	77
Key Concepts and Issues	80
Questions for Discussion	80
Bibliography	81
Chapter 2. The World of Energy 2: An Applied Survey	87
1. Three (Natural Gas) Kings: Russia, Iran and Qatar	89
2. Coming to Terms with Coal	98
3. An Invaluable Lesson on Electric Deregulation	111
4. Emissions Trading	124
5. Energy and Some Macroeconomics	130
6. A Conclusion	133
Key Concepts and Issues	136
Questions for Discussion	136
Bibliography	137

Chapter 3. The World of Energy 3: A Modern Survey	141
1. Oil Futures; and Speculation versus Fundamentals . . .	142
2. The Controversy about Global Warming	159
3. Energy Units, Terminology, and Some Mathematics	169
4. Loose Ends: Mr. Malthus, Options, and Refining and ‘Crack Spreads’	180
5. Final Statements	188
6. Appendix: An Easy Derivation of the Annuity Formula	205
Key Concepts and Issues	207
Questions for Discussion	207
Bibliography	208
Chapter 4. An Introduction to Oil Economics	213
1. 1931–1974: Examining a Fundamental Relationship for the Pricing of an Exhaustible Natural Resource (i.e., Oil)	215
2. 1960–1973: From OPEC’s Formation to the First Oil Price Shock	222
3. 1974–1999: Relatively Quiet Days on the World Oil Markets	226
4. Natural Decline	233
5. 2000–2020: Then, Now and Later	239
6. A Summary	241
7. Final Statements and Conclusions	243
Appendix 1. More Comments about Oil Futures Markets	247
Appendix 2. Deriving a Logistic Curve for an Exhaustible Resource	255
Key Concepts and Issues	258
Questions for Discussion	258
Bibliography	259

Chapter 5. An Introduction to Natural Gas Economics	261
1. Introduction	263
2. Energy Units and Heat Equivalents	265
3. Some General Remarks about Natural Gas	269
4. Natural Gas Reserves and Locations	276
5. Some Aspects of Natural Gas Production Economics	283
6. An Introduction to Natural Gas Pipelines	287
7. Some Contemporary Price Issues	294
8. Storage, Hubs and Market Centers	297
9. Prelude to a Blunder	302
10. Some Aspects of Merit Order	309
11. Russian Gas, and Comments on LNG and Shale Gas	312
12. Conclusions: The Golden Age of Natural Gas	322
Key Concepts and Issues	330
Questions for Discussion	330
Bibliography	331
Chapter 6. Economic Theory and Nuclear Energy	335
1. Introduction	335
2. Introducing Capacity Factors and Base Loads	340
3. Deeper Meanings	346
4. A Minimal Outline of the Nuclear Fuel Cycle	355
5. Some Basic Analytics	361
6. More Economics of Load Division	369
7. More Background for Curious Readers	373
8. Further Aspects of Nuclear Costs	378
9. Nuclear Energy and the Kyoto Hobby-Horse	382
10. Concluding Remarks	383
A Short Glossary	386
Bibliography	387

Chapter 7. Economic Theory and the Great Coal Game	391
1. A Mandatory Background	392
2. A Coal Primer	395
3. Further Comments on the World Coal Scene	409
4. Concluding Remarks: “Welcome to the Land of Coal”	416
Bibliography	418
 Chapter 8. The Final Countdown	 421
A Short Introduction	421
12. In the Head of U.S. Energy Secretary Chu	427
11. On Libya and Oil	430
10. Emissions Trading and Climate Change: A Brief Negative Résumé	433
9. OPEC’s Strategy: An Update	436
8. Energy, Macroeconomics, and Economic Growth	441
7. On the Sunny Side of the Nuclear Street	447
6. Possible Shale Fallacies	451
5. Energy and the Best Brain of the 20th Century	464
4. Some Unfriendly Economic Comments on Another Green Fantasy: Roadmap 2050	469
3. Not So Nice about Oil	472
2. Remembering the Stern Review of Climate Change: An Unfriendly Note	475
1. A Disobliging Comment on Electric Deregulation	480
Finishing Touches	483
Bibliography	493
 <i>Index</i>	 497
